VALUES
The Ohio State University Department of Family Medicine is committed to:
• Excellence
• Compassion
• Integrity
• Collaboration
• Innovation

Quotes from our residents:

The Ohio State University Family Medicine Residency Program offers the best of both worlds. As a resident, you have access to everything that a major academic medical center has to offer, but you are given the opportunity to practice in a non-competitive community hospital. This combination provides a unique learning environment that allows for residents to get the most out of both settings.
-Michael Donaworth, MD

“Ohio State is the epicenter of both teaching and learning. It allows all specialties to come together for the care of our patients. I can’t imagine a better place to be able to take care of patients with all fields available right at our fingertips. I am proud to be a buckeye and a Family Medicine doctor at OSU.”
-Lindsay Konor, MD
LETTER FROM THE CHAIR

It is hard to believe that I have served as Chair of the Department of Family Medicine at The Ohio State University for 12 years. And, I have just been reappointed for another four-year term. I am sure that is mostly due to the hard work and commitment of my faculty and staff. We have many activities, presentations, and publications for you to read about in the report for the academic year 2010-11. I would like to highlight just a few:

• The Ohio State Family Medicine Interest Group (FMIG) received one of the American Academy of Family Physicians (AAFP) Annual Program of Excellence (PoE) Awards for 2011. This is the eleventh consecutive year for Ohio State to have received one of these awards! A number of persons deserve credit for this award and the long record of accomplishment: Dr. Allison Macerollo, Dr. Holly Cronau, and, especially, the students.
• At the 2011 Office of Diversity & Inclusion Celebration, the Ohio State Family Medicine Residency Program was the singular recipient of the Diversity Enhancement Award in recognition of the Program’s dedication to enhancing diversity in medicine.
• The Ohio State Family Medicine Residency Program was the recipient of a 2011 American Academy of Family Physicians (AAFP) Foundation Pfizer Immunization Award based on an application developed and submitted by the residents under Dr. Bill Buoni’s guidance and leadership.
• Four of our faculty have been approved for promotion and/or tenure, effective October 1, 2011:
  W. Fred Miser, MD, MA - Professor of Family Medicine
  Leon McDougle, MD, MPH - Associate Professor of Family Medicine with Tenure
  Randy Wexler, MD, MPH - Associate Professor of Family Medicine with Tenure
  James Borchers, MD, MPH - Associate Professor of Clinical Family Medicine
• The Ohio State Medical Association (OSMA) initiated a new award in 2011, the Physician Advocate Award, and Dr. Randy Wexler was honored as the recipient of the inaugural award.
• Ms. Jennifer Lehman sat for and passed three certification exams: one offered by the Association of Clinical Research Professionals, a second by the Society of Clinical Research Associates, and a third by the Research Administrators Certification Council. She was successful on all of the exams. Now she has the right to indicate that she is a Certified Clinical Research Professional (CCRP), a Certified Clinical Research Coordinator (CCRC), and a Certified Research Administrator (CRA).
• The Medical Center recently announced its highest-performing health care providers, faculty members who achieved patient experience results at the 90th percentile during all of calendar year 2010. Of the 150 individuals, 10 faculty members in the Department of Family Medicine were recognized: Drs. Holly Cronau, Janet Mason, Fred Miser, Perry Mostov, Eunice Oppenheim-Knudsen, Benita Petri, Milisa Rizer, Joan Simon, Mary Jo Welker, and Robert Whitehead.
• Dr. Glen Aukerman and Ms. Laura Kunze were recognized with an Excellence in Patient/Health Education Award for their work at the Center for Integrative Medicine.
• Dr. Leon McDougle, Assistant Professor of Family Medicine and Assistant Dean for Diversity and Cultural Affairs, was selected to receive an award for outstanding leadership and service provided for African American males at The Ohio State University.
• The Department was ranked #19 in 2012 U.S. World & News Report rankings of all departments of family medicine in the United States. That places us in the top 12.5% of all departments of family medicine in the nation! In addition, the College of Medicine moved from #39 to #33 regarding being ranked for Primary Care.
• The National Committee for Quality Assurance (NCQA) recognized OSU Family Medicine at Thomas Rardin, OSU Family Medicine at University Hospital East, and OSU Family Medicine at CarePoint Gahanna each as LEVEL 3 Patient-Centered Medical Homes, the highest rating that can be achieved.
• Dr. John McConaghy was recognized as a Certified Physician Executive by the Credentials Committee of the Certifying Commission in Medical Management.
• Dr. Don LeMay was awarded the Excellence in Teaching Award for the Department of Family Medicine.
• Dr. Don Mack was selected for the Charter Class of the Society of Teachers of Family Medicine (STFM) Program, Emerging Leaders, a program designed to teach the complexities of successfully leading a team toward completion of a project. 
• Dr. Allison Macerollo was presented with a 2011 University Alumni Award for Distinguished Teaching, the University’s highest honor for teaching excellence.
• Dr. Randy Longenecker, Clinical Professor of Family Medicine and Assistant Dean for Rural Medical Education, was selected by the Board of Directors of the Society of Teachers of Family Medicine (STFM) to receive the 2011 STFM Excellence in Education Award.
• Tony Casey, MD was selected by the Society of Teachers of Family Medicine (STFM) as one of seven recipients of the 2011 New Faculty Scholars Award.
LETTER FROM THE CHAIR

• Dr. Linda Stone was selected as the new President of the Ohio State College of Medicine Alumni Association.
• Dr. Michael Alexander, Family Practice at Gahanna CarePoint, was voted by Med 1 students as the most effective Clinical Assessment and Problem Solving (CAPS) course facilitator for 2010-11!
• Columbus Monthly listed excerpts from the Best Doctors in America 2010-2011 database including family physicians in central Ohio. Of the 28 Best Doctor family physicians listed, 22 are faculty members in the Ohio State Department of Family Medicine. Of our Regular Track faculty, Drs. Glen Aukerman, Tom Best, William Buoni, Patrick Fahey, Ruslana Kurpita, Don Mack, Scott Merryman, Fred Miser, Perry Mostov, Milisa Rizer, and Mary Jo Welker were identified as Best Doctors. Of our Auxiliary Track faculty, Drs. David Applegate, Ed Bope, Alysea Herzog, Doug Knutson, John Lombardo, Thomas Pommering, David Rudy, Robert Skully, James Soldano, Shifra Tyberg, and John Weigand were identified as Best Doctors.
• Dr. Linda Stone, Associate Professor Emeritus in the Department of Family Medicine, was one of four persons honored with the Distinguished Alumni Award by Michigan State University.
• The grant application, “Virtual Reality: A Unique Means to Teach the Reality of the Patient-Centered Medical Home ,” was funded as a five-year project for $1,319,089. Dr. Holly Cronau will serve as Principal Investigator with most all medical student education faculty having significant project roles. The purpose of the project is to further enhance the Department of Family Medicine’s leadership role within the Ohio State University College of Medicine in the development and implementation of innovative, technology-driven, case-based, primary care educational initiatives toward learning patient-centered medical home (PCMH) principles.
• The grant application, “The Patient-Centered Medical Home: Adaptable Curriculum Models, Instructional Modules, and Implementation Plans,” was funded as a five-year project for $1,004,187. Dr. Fred Miser will serve as Principal Investigator with most all residency faculty having significant project roles. The purpose of the project is to plan, develop, and implement educational and training modalities relative to the Ohio State University Family Medicine Residency Program that promote family medicine residents’ knowledge and abilities regarding the Patient-Centered Medical Home (PCMH).
• Dr. Randy Wexler was published in JAMA with a Letter to the Editor.
• Dr. Maryanna Klatt, Assistant Professor of Clinical Family Medicine with primary responsibilities to the Division of Integrative Medicine, recently had two of her manuscripts published! One article, “Integrative Healthcare Education: Alive, Well, and Diligently Preparing Students for 21st Century Medicine,” was published in the September/October 2010 edition of Explore. It describes the evolution of Integrative Medicine at Ohio State with particular emphasis on the Integrative Approaches to Health and Wellness Minor offered through the School of Allied Health Professions. The other article, “Complementary and Alternative Medicine Use Among Asian Indians in the United States: A National Study,” was published in the Journal of Alternative and Complementary Medicine. It is the first such national-level study of its kind and provides important information regarding health behaviors, beliefs, and patterns of complementary and alternative medicine use in this ethnic subgroup that comprises 5% of the U.S. population.
• Dr. Rob Crane, Clinical Associate Professor of Family Medicine, received the 2010 Ohio Academy of Family Physicians/Foundation Family Medicine Mentorship Award.
• Dr. Tom Best, Professor and Pomerene Chair in the Department of Family Medicine, has been elected to a three-year term on the Board of Directors for the United States Bone and Joint Initiative organization.
• In November 2010, we opened our first two Fast Care Clinics in cooperation with Giant Eagle, a local grocery store chain. These are operated by The Ohio State University with our employees and our EMR.
• In November 2010, we opened a new site at Lewis Center in southern Delaware County. This is a primary care site which includes family medicine along with general internal medicine and internal medicine/pediatrics. This collaboration is a first for Ohio State.
• In June 2011, our Urban Program moved into a new site a Care Point East. This new office will give the residency a more modern look and hopefully will help with recruitment.
• Dr. Lorraine Wallace was recruited as our Director of Research and will bring new initiatives and energy to our research endeavors.
• Finally, effective July 1, 2011 almost all of our faculty were integrated into the Faculty Group Practice of the university. This will eventually bring all of the departments in alignment as we become a truly integrated delivery system.

I am looking forward to what the new academic year will bring and excited about what we still have to look forward to. I want to thank all my faculty and staff for their hard work during this past year to make it a true success.

Thanks to all,

Mary Jo Welker, M.D.
Professor-Clinical and Chair

**USN&WR Family Medicine Ranking**

*Note: (Lower Ranking is Better)*

**USN&WR COM Primary Care Ranking**

*Note: (Lower Ranking is Better)*
The Department of Family Medicine presently operates on an annual budget in the order of $12 million. From a KRA perspective, it is observed that Dr. Welker inherited a negative situation when she was appointed Chair in 1999-00. Her financial leadership has been remarkable over the past decade with Reserves increasing dramatically until the recent downturn in the economy.

FINANCIAL RESOURCES

Development efforts have been ongoing in the Department of Family Medicine since it was founded. The 2010-11 academic year continued this history.

While the Family Medicine Development Fund provides support for the Department’s general needs, the rest of our development funds provides support to specific programs including sports medicine, medical student and resident education, research, occupational medicine, and integrative health. Donations to development funds allow immediate use of the gift to support current needs. Our development funds include:

In addition to development funds, we also have numerous endowment funds that provide annual income based on income earned. As seen in the related KRA graph, for the most part endowment principal has increased yearly but dramatically has done so since 2005-06. (KRA Endowment Principal Graph). Our endowment funds and present market value include:

<table>

Endowment income and development funds are important to financing various activities of the Department each year. In addition to development funds, we also have numerous endowment funds that provide annual income based on income earned from university investments. For the most part between 2001-02 and 2004-05, endowment principal increased yearly but did so dramatically in 2005-06 when the department created several new endowment funds. These new funds were initially set up using donations from our practice plan, however that initial investment has allowed for additional funds for donors to support. Over the past five years our endowment income has been variable based on external forces. Our endowment funds and present market value include:

We accomplished a great deal during the 2010-11 academic year in the clinical arena. In November, we opened our new Primary Care at CarePoint Lewis Center site. This site has family medicine, general internal medicine, and IM/Peds physicians practicing together in the same location and sharing staff. This is a first for The Ohio State University.

In June, our OSU East Family Medicine practice moved to the new CarePoint East site. This gives them more space in a newly refurbished environment. Occupational Medicine East also moved into CarePoint East and is sharing the reception area with family medicine. Soon we will have Sports Medicine joining that location as well.

We had three of our sites recognized as Patient-Centered Medical Homes, including CarePoint Gahanna, OSU Family Medicine at Rardin, and OSU Family Medicine at Care Point East. Our Bethel and Lewis Center sites will apply in the fall of 2011 for NCQA Patient-Centered Medical Home status. Our Worthington and Upper Arlington sites will be applying by December 2011.

We integrated all but a few faculty into OSU from the departmental practice plan. All new hires after January 1, 2011 were integrated employees, and a majority of our current faculty integrated beginning July 1, 2011.
The in-patient service at OSU East continued to be active this year accounting for 3293 patient days. The attending physicians on the in-patient service were: Drs. Shalva Kakabadze, Liliana Gomez-Medley Allison Macerollo, John McConaghy, Rupal Oza, Paul Nanda, and Parita Patel. This included 885 admissions with an average length of stay of 3.72 days.

KRA-related data regarding in-patient admissions demonstrate a declining pattern across recent years. This trend is not surprising in that it reflects changing practices in all of health care delivery with greater emphasis on out-patient care. As well, our Length-of-Stay data reflect national trends regarding in-patient care tending toward shorter stays in the hospital with concomitant increases in out-patient care.

Obstetrical Care

Our deliveries this year were preformed under the supervision of Obstetric Faculty at The Ohio State University Medical Center. Drs. Leon McDougle, Fred Miser, Rupal Oza, Parita Patel, and Milisa Rizer provided the prenatal supervision.
Ohio Department of Rehabilitation and Corrections

We started a pilot project in Marion, and hired two physician – one for the Marion Correctional Institute and one for North Central Correctional Institute. These facilities are adjacent to each other in Marion. We hired three mid-level providers to work with the physicians in the care of these individuals. We also hired a part-time physician to cover vacation and sick time. In addition, we piloted the EPIC system in those sites with the physicians and staff.

Giant Eagle – Fast Care

We worked with one of our local grocery chains to open retail clinic at two sites as part of a pilot program. We hired five nurse practitioners to work in these sites and cover the hours. They are OSU employees. The clinics are on our EPIC system. This is a good partnership with the Giant Eagle stores which helps our patients with education about medication, about how to read labels, and how to purchase and cook foods that are healthy for their personal needs.

Community Partnerships

Asian Health Initiative

The Asian Health Initiative is a jointly sponsored program between The Ohio State University Medical Center, The James Cancer Hospital and Solove Research Institute, Department of Family Medicine, the Coalition for Asian American Health, the Asian American Community Services, the Asian American Community Service Council, and the Southeast Asian United Methodist Ministries of Central Ohio. The Rardin Family Practice Center houses this initiative, providing care one half-day per week for non-English speaking patients, primarily an indigent population. This functions as a free clinic and medical students are invited to participate in this project.
Amethyst House

Dr. Edna Marie Jones provides services two half-days per week at Amethyst House, which is a drug and alcohol rehabilitation center for women and children. It is located on South High Street.

Latino Free Clinic

This clinic was started in December 2000 and is a jointly sponsored program among the following entities: The Ohio State University Medical Center, the Latino Health Alliance, and Saint Vincent’s Family Services. The Rardin Family Practice Center houses this initiative, which provides care two half-days per month for Spanish-speaking patients, primarily an indigent population. It functions as a free clinic with Dr. Cregg Ashcraft serving as the medical director.

Columbus Free Clinic

The Columbus Free Clinic continues in the Rardin Family Practice Center on Thursday evenings. This is a free clinic run by medical students of The Ohio State University and supervised by volunteer physicians from the community. Our faculty and residents provide supervision along with other physicians from The Ohio State University and the community.

Noor Free Clinic

We continue to partner with the Noor Free Clinic which is staffed by the Muslim physicians and nurses from the central Ohio community. This free clinic is now held at the Rardin Family Practice Center on Wednesday evenings. Medical students are encouraged to participate.

Overall Patient Satisfaction: Primary Care Network

Note: Vendor change in 2008-09; cannot compare to previous years because of different scoring mechanism.)

Predoctoral Education continues to lead a variety of curricular and extracurricular programming to enhance the learning of all medical students and encourage those students interested in family medicine to follow their heart. A team of committed teachers, facilitators, preceptors, and mentors works with premedical to graduating medical students. Committed students add leadership to our programs to improve outcomes.

In the Match, 8% of the class (18 students) chose careers in family medicine, with many matching into top programs around the country. Family Medicine continues to be one of the top career choices for Ohio State medical students.
**Pредоформальное образование**

**Клиническая оценка и проблемное решение (CAPS)**

Четырехгодичный курс CAPS фокусируется на всех вопросах, которые выходят за рамки основных наук. Он включает в себя Patient-Centered History Taking, physical examination skills, behavioral/social sciences, clinical reasoning, professionalism, and ethics. Курс фокусируется на мастерстве навыков и использует клинические навыки тестирования, чтобы обеспечить, что это мастерство достигается всем студентами. Доктор Дуг Пост является директором программы, а Доктор Алисон Макеролло — одним из трех вспомогательных директоров. Эта программа является вызывающей и захватывающей, так как она развивается, чтобы удовлетворить запросы нового класса каждый год. Многие из наших преподавателей были важными в предоставлении этой программы с недельной активностью в малых группах. Участвующие в преподавании включают Доктора Майка Александра, Тони Кейси, Марию Ризу Конроу, Роба Крэйна, Лилы Медлей-Гомез, Мелиссу Джифферис, Анупа Кандио, Доктора Алисона Макеролло, Дона Мака, Шери Мартинеса, Янет Масона, Джона Макконагхи, Скотт Мерримана, Нуичи Оппенгайма-Кнудсена, Бениты Петр-Пикстона, Кейт Тиу, и Ангелины Теку.

**Медицина 1**

Сорок пять членов нашего штата участвовали в качестве предоформителей для студентов из Мед 1, которые поддерживали их практику. Практика предоформителя была долговременной, так как студенты встречались с их предоформителями по мере необходимости. Студенты работали над различными клиническими навыками, включая интервью пациента, физическое исследование, и командную работу.

**Медицина 2**

Наша практика «Сезонная практика» для студентов, которые переключаются на Мед 2, включала 12 городских и сельских мест. Предоформители, которые принимали студентов, включали Доктора Рэндалло Лонгенекера, Беллфонтайна; Келли Фламминг Колумбус Neighborhood Health Centers, Колумбус; Делейн Герцог, Damascus Family Medicine, Marysville; Дэвид Скоггин, Arbor View Family Medicine, Ланкастер; Майкл Джонсон, Bucyrus Family Practice, Bucyrus; О’Хенли, Mount Carmel Outreach Van, and Coshocton County Memorial Hospital Family Practice. Доктора Велкер, Кронов, Оза и Майер организовали студентов в Rardin Family Practice Center. Доктор Алисон Макеролло координировала опыт студентов в OSU East. Доктора Рэндалло Векслер организовали исследовательские опыты. Студенты представили свои результаты на конференции Capstone на их опыте и научных достижениях. Оценки студентов о программе очень хорошая. Спасибо ОАФП Фонд, Пайерс, и Ланчионе Фонд за финансы наших студентов.
The Family Medicine Interest Group (FMIG) has maintained its excellent tradition and was awarded the American Academy of Family Physicians (AAFP) Program of Excellence. This is the 11th year OSU FMIG has received this PoE recognition.

The FMIG leadership provided yet another outstanding year of meetings and workshops. The topics for our meetings included Dr. Luis Salazar, a sports medicine fellow, speaking about the day in the life of a sports medicine doctor, introduction to family medicine and the patient-centered medical home, Integrative medicine, loan repayment opportunities in primary care through our SEARCH representatives of Ohio and an advisor for Health Policy & Director, External Relations & Advocacy for OSU who spoke about health care reform and primary care in the future. The workshops, sponsored by some of the local residency programs, were very successful and introduced the procedural scope of practice available through family medicine. The FMIG Orientation pizza lunch always starts the year. The attendance this year was excellent. Many of these students signed up for membership in the AAFP and OAFP at this meeting and at the College of Medicine’s Activities Fair. Dr. Allison Macerollo continues as advisor and has maintained many traditions and started some new programs as well.

FMIG Community Service was active this year as well. Many students volunteered with the Mount Carmel Van to provide medical care to the indigent in Columbus. The Tar Wars program to encourage school-aged children not to smoke was also a success, as medical students visited multiple schools on several dates reaching hundreds of elementary school students. This was the second year of the students undertaking diabetic screenings in the waiting room of the Columbus Free Clinic. This program was a great success and served many patients and families. Finally, FMIG recently adopted On-Call Creations, a student-run group whose purpose is to knit or crochet hats and baby booties to donate to OSU hospitals for needy infants.

In terms of financial support, FMIG obtained operating and programming funds from the Ohio Union, as well as grants from both the AAFP and OAFP to support our programs. FMIG also utilizes book sales for a small additional fundraiser. Finally, FMIG receives support from sponsorship of the local residency programs, sponsorship of the Central Ohio Academy of Family Physicians, and the commitment of the Department of Family Medicine leadership and faculty.

**Medical Student Interest Programs**

Two hundred ten third-year medical students completed the required four-week family medicine rotation portion of the Ambulatory Care Curriculum. Didactics were held on Monday mornings with four additional workshops and a formative observed standardized Clinical Encounter also being offered. Regular and auxiliary faculty presented lectures and workshops including: Drs. Ann Aring, Ed Bope, Carl Brackett, Holly Cronau, Pat Fahey, Curt Gingrich, Alicia Herzog, Theresa Holt, Maryanna Klatt, Sherri Morgan, Dan Polonia, Richard Rodenberg, and Robert Skully. This rotation is highlighted by its clinical component, which uses preceptors representing a wide diversity of practices including: residency practices, along with rural, urban, suburban, and inner city sites involving approximately 80 volunteer preceptors. Nine students from the Med 3 class chose to take a second month in family medicine during their selective month. The selective month continues as a separate month of the third year. Dr. Cronau continues to serve as clerkship director for both the third and fourth-year required courses and continues to work with several departments to coordinate didactics and clinical experiences for both courses.

Eighty-three students took advantage of our fourth-year family medicine offerings. A wealth of diversity is available in our subinternships, electives, and selectives. Students in other electives had the opportunity to experience practices in rural, urban, suburban, and military sites in Columbus and across the country. Students also pursued electives in sports medicine, research, and integrative medicine. The Department continued to offer Healthcare for the Underserved as part of the DOC -3 Chronic Care curriculum. This popular rotation is led by Drs. Jack O’Handley and Dana Vallangeon.
**Communications**

The communications part of our programming continues to be strong. Dr. Macerollo oversees the production of the quarterly newsletter with the assistance of Program Coordinator, Amy Peters. It is distributed electronically, with print copies made available to College of Medicine programming and leaders. The newsletter featured updates for both local and national meetings, advice columns for the many aspects of medical student life, and thoughtful articles on doctor-patient relationships written by faculty, residents, and students. The updated website at http://virtualfp.com and the OSU FMIG Facebook site promote the upcoming meetings and activities for our students. The Central Ohio Academy of Family Physicians continues its support of the newsletter in its ongoing partnership with the OSU FMIG.

**Championship of Family Medicine**

Sheryl Pfeil, MD

Now in its sixth year, the Champion of Family Medicine Award was again given to a physician in another specialty who supports our students in their pursuit of a career in family medicine. This year’s award was presented to Dr. Sheryl Pfeil, from the Department of Gastroenterology, Hepatology, and Nutrition.

The FMLDP/FMIG sent seven students to the AAFP National Conference in July 2010. The students appreciated the financial support of the Department of Family Medicine for this conference.

We continue to be inspired by our students’ enthusiasm for family medicine, their dedication to their patients, and their leadership abilities that continue to place us in the local, state, and national spotlight.

**Family Medicine Leadership Development Program (FMLDP)**

The Family Medicine Leadership Development Program continues to serve as the central portal for engagement of students in the third and fourth year of medical school. The student-designed curriculum for 2010-2011 centered on the theme “The Many Facets of Family Medicine.” Monthly dinner meetings included time for discussion on various topics related to the theme along with social support. Topics included “Procedures in Family Medicine/Credentialing,” “Health Care Reform,” “Connecting with Patients,” “Community Resources,” “Getting Ready for Residency,” and “Patient-Centered Medical Home.” The students very much appreciated the support of the family medicine faculty and staff in their efforts to continue the tradition of the FMLDP.

**Family Medicine Honors Program**

The Honors Program had an exceptional year with 10 students participating in the program with their innovative and creative projects. This program focuses on personal and professional growth. Each project is student designed and the student works with a faculty advisor. Projects span the world of family medicine from international experiences, patient education, patient health and wellness, and community outreach. Student evaluations of this experience continue to be excellent and the presentation of the projects at the annual Honors Reception is testimony to the wonderful work of our students.

**Premedical Initiative Group**

The Premedical Initiative Group (PMI) had a successful 2010-11 year. Headed by Lauren Enderson, Bethany Elliott, Heather Muston, and Kevin Martinez, the group conducted several educational meetings for undergraduate students covering such topics as choosing a school to apply to, medical school interviewing techniques, preparing to take the MCAT, and other topics. The group met at University Hall which, by its location, is more in central campus and facilitates better attendance by the undergraduate students. The PMI group made presentations to the Alpha Epsilon Delta group (AED) which is basically OSU’s premed club. The group also paired undergraduate students with medical students who served as mentors to the undergraduates.
**Family Medicine Special Events**
The annual Honors Reception is always a special evening. This year was no exception. The audience had a chance to hear about each of the Honors Program projects and celebrate each student’s success. This special night honored fourth-year students with departmental awards including:

The Tennyson Williams, MD Award in Humanism ............................................................... Janice Esker
The Pat Fahey, MD and Larry Gabel, PhD Award in Academic Excellence .......................... Wendy Palastro
The John Lombardo, MD Award in Community Service ...................................................... Wes Halderman
The Glen Aukerman, MD Award in Leadership .................................................................. Rein Lambrecht
The Mary Jo Welker, MD Award in Professionalism ............................................................ Abby Davids

**Family Medicine Leadership Development Program**
Co-Chairs: Med 3 ................................................. Max Carraro, Rein Lambrecht, and Wendy Palastro
Faculty Advisor ................................................. Holly Cronau, MD; Allison Macerollo, MD, and Benita Petri, MD

**FMIG Officers**
President .............................................................. Sally Ogle
Vice President ...................................................... Alexander Hooper
Treasurer .............................................................. Carrie Mohn
Meeting Coordinator .................................................. Stephanie Christopher
Workshop Coordinator ........................................ Lauren Phillips and Nicole Verdecchia
Desktop Publishing and Advising .................................... Amy Roese, MPH
Advisor ................................................................. Allison Macerollo, MD

**Community Service**
On Call Creations ........................................ Kate Cieply and Valerie Niedermier
Tar Wars ......................................................... Steven Shin, James Vargo, Vincent Gonzalez, and Alexander Hooper
Mount Carmel Outreach Van ......................................................... Whitney Christian
CFC Diabetes Screening ...................................... Nicholas Ladwig, Ryan Story, Megan Jones, and Thomas Feehan
FMLDP Community Service .................................... All FMLDP officers
Advisor ................................................................. Allison Macerollo, MD

**Sports Medicine Interest Group**
Coordinators .................................................. Darin Bradshaw, Ashley Davidson, Ryan Donald, and John Reid
Advisor ................................................................. Allison Macerollo, MD

**Premedical Initiative**
Med 2 Officers ................................................ Lauren Endersen, Bethany Elliott, Heather Muston, and Kevin Martinez
Advisor ................................................................. Allison Macerollo, MD

**Predoctoral Education Committee**
................................................................. Abby Davids and Lynda Labranche

**Faculty Advisors**
................................................................. Holly Cronau, MD, Allison Macerollo, MD, Benita Petri, MD, and Randy Wexler, MD
The 2010-11 academic year proved to be another successful year as the University and Urban Programs continued to strive for excellence in educating family medicine residents. For the fourth year in a row, the programs filled within the match. Much of the credit for the programs’ continued success belongs to the wonderful support of the Department and the outstanding efforts of the residency faculty, staff, and residents who strive toward perfecting the culture and learning environment.

Dr. Fred Miser continued as Director of the Residency Program, assisted by Dr. Scott Merryman, Associate Residency Director, and Dr. Parita Patel, Urban Program Director. Sarah Germak, Program Coordinator, and Meghan Parsley, Residency Assistant, enjoyed their first full year with the residency program. Their assistance to Dr. Miser, the faculty, and the residents was invaluable. The Residency Committee continued to oversee residency activities, provide strategic direction, and ensure the program met its goals. “Working Groups” for the Urban Program, curriculum review, and recruitment/retention met monthly to ensure forward momentum continued as the program worked to implement programmatic changes. Task forces were created to enhance procedural training, didactic sessions, and teaching on the inpatient service for the residents.
Residents

First-year residents for the 2010-11 academic year:
- Anette Bodoky, MD *
- Zackery Boyd, MD (Rural Program)
- Belmund Catague, MD (Urban Program)
- Michael Donaworth, MD
- Margaret Elkheir, MD
- Meana Gerges, MD
- Stacey Guan, MD
- Mark Kahle, DO
- Gregory Ladele, DO (Urban Program)
- Tina Lee, MD
- Daniel Vigil, MD (Rural Program)
* joined with advance credit from a first-year OB/GYN residency

Second-year residents for the 2010-11 academic year:
- Maysa El-Sayyid, MD
- Katrina Gordon, MD
- Ryan-Niko Hickman, MD (Urban Program)
- Lindsey Konor, MD
- Shivonne Suttles, MD (Urban Program)
- Simarpreet Vidwan, MD
- Lena Winkler, MD

Third-year residents graduated from the Program in the 2010-11 academic year:
- Roy Chan, MD Private Practice, CA
- Tate de Leon, MD Primary Care/Concierge Medicine, Eisenhower Medical Center, CA
- Rebecca Grant, MD Residency Faculty, Ohio State Family Medicine
- Amina Joyner, DO Taking time off
- Laura Kiloflishi, MD Graduating in December
- Inah Kim, MD Taking time off
- Nanette Lacuesta, MD Residency Faculty, Riverside Methodist Hospital, OH
- Sirisha Talari, MD Hospitalist Medicine, University of Kentucky
- Jess Wertz, DO Sports Medicine Fellowship, The Ohio State University
- Jasmine Usher, MD Graduating in December
- Randy Villarreal Urgent Care/Primary Care, First Care, VA

The Residency Graduation Dinner

The Residency Graduation Dinner was held on June 18, 2011 at the Longaberger Alumni House at The Ohio State University. Guests included graduating residents, their families and significant others, residents, faculty, and staff. The residents were honored for their accomplishments and contributions to the program, and faculty members were given awards from the residents as thanks for their involvement with residency education. Drs. Nanette Lacuesta, Tate de Leon, and Lindsey Konor were commended for their contributions as Chief and Co-chief Residents, respectively. Drs. Lindsey Konor and Michael Donaworth provided a very entertaining “roast” for the graduating residents. The team approach to the roast was a humorous success! Dr. Miser provided the key note address to the graduates, noting how far they had come, and encouraging them to make life worthwhile by making the quality of others’ lives better through service.
Special Awards

At the Residency Graduation dinner a number of special awards were given to various residents and faculty:

- Outstanding Intern of the Year: Mark Kahale, DO
- Tennyson Williams Family Medicine Resident of the Year: Nanette Lacuesta-Kimmel, MD
- The Society of Teachers of Family Medicine Resident Teacher of the Year: Jess Wertz, DO
- Resident Ambassador Award: Michael Donaworth, MD
- Dr. Bryan Beggin Community Service Award: Rebecca Grant, MD and Randy Villarreal, MD
- Research and Scholarship Award: Inah Kim, MD
- Workhorse of the Year Award: Tate de Leon, MD and Roy Chan, MD
- Director’s Award for Excellence in Academics: Rebecca Grant, MD and Nanette Lacuesta-Kimmel, MD
- Family Physician of the Year: Don Mack, MD and Shalva Kakabadze, MD
- Family Physician Teacher of the Year: Rupal Oza, MD and Parita Patel, MD
- Urban Track Family Physician of the Year: Shalva Kakabadze, MD
- MikhailNovikov OSU Faculty Member of the Year: John Larry, MD
- Outstanding Intern of the Year: Mark Kahale, DO
- Tennyson Williams Family Medicine Resident of the Year: Nanette Lacuesta-Kimmel, MD
- The Society of Teachers of Family Medicine Resident Teacher of the Year: Jess Wertz, DO
- Resident Ambassador Award: Michael Donaworth, MD
- Dr. Bryan Beggin Community Service Award: Rebecca Grant, MD and Randy Villarreal, MD
- Research and Scholarship Award: Inah Kim, MD
- Workhorse of the Year Award: Tate de Leon, MD and Roy Chan, MD
- Director’s Award for Excellence in Academics: Rebecca Grant, MD and Nanette Lacuesta-Kimmel, MD
- Family Physician of the Year: Don Mack, MD and Shalva Kakabadze, MD
- Family Physician Teacher of the Year: Rupal Oza, MD and Parita Patel, MD
- Urban Track Family Physician of the Year: Shalva Kakabadze, MD
- Mikhail Novikov OSU Faculty Member of the Year: John Larry, MD

Faculty

Toward the end of the academic year the residents and faculty were sad to say goodbye to Dr. Parita Patel, as she joined her husband in Florida. Dr. Patel had a huge positive impact on the Urban Program through her work with evidence-based medicine, journal club, and Objective Structured Clinical Examinations (OSCEs). We wish her the best success. A search is ongoing for her replacement as Dr. Miser assumes the Interim Director position.

Preceptors in Family Practice Centers included:

- Bill Buoni, MD
- Tony Casey, MD
- Rob Crane, MD
- Pat Fahey, MD
- Shalva Kakabadze, MD
- Don LeMay, DO
- Allison Macerollo, MD
- John McConaghy, MD
- Leon McDougle, MD
- Scott Merryman, MD
- Fred Miser, MD
- Paul Nanda, MD
- Rupal Oza, MD
- Parita Patel, MD
- Liliana Gomez-Medley, MD

Attendings on the Family Medicine In-Patient Teams included:

- Tony Casey, MD
- Shalva Kakabadze, MD
- Allison Macerollo, MD
- John McConaghy, MD
- Liliana Gomez-Medley, MD
- Parita Patel, MD
- Paul Nanda, MD
- Rupal Oza, MD

Maternity Care Group

The Maternity Care Group consisted of Drs. Bill Buoni, Tony Casey, Leon McDougle, Fred Miser, Rupal Oza, and Parita Patel.

The Newborn Nursery Group consisted of Drs. Tony Casey, John McConaghy, Fred Miser, Paula Nanda, Rupal Oza, Parita Patel, and Rupal Oza.

Faculty Development Series

Dr. Miser led a quarterly faculty development series for the faculty. Issues discussed included characteristics of the outstanding teacher, standards, evaluation, and feedback, video precepting, and competency-based curriculum. During this time the faculty examined the program’s evaluation system to ensure all evaluations were current and appropriate and that both evaluations and curriculum emphasized the ACGME six Core Competencies.
Scholarly Activity

Scholarship is vital for the academic environment of the Program. Residents are required to do a data-based research project, a case report, or a critical review. Regardless of the type of project, the outcomes expected are a formal presentation and a manuscript suitable for publication. Our 11th annual Resident Scholarly Activity Symposium was conducted on April 15, 2011.

The presentations were diverse and included:

- Roy Chan, MD
- Tate de Leon, MD
- Rebecca Grant, MD
- Amina Joyner, DO
- Laura Kilofliski, MD
- In-Ah Kim, MD
- Nanette Lacuesta-Kimmel, MD
- Sirisha Talari, MD
- Jasmine Usher, MD
- Randy Villarreal, MD
- Jessica Wertz, DO

A Review of Pandemic H1N1 and Its Impact on the Health Behaviors of the US Public
Warfarin Induced Skin Necrosis
Recurrent Abdominal Pain and Hyponatremia: Acute Intermittent Porphyria Associated with SIAD
The Case of A.W.: Finding a Link Between Congenital Cataracts and Congenital Hearing Loss: Infection vs. Genetics?
Evidence-Based Protocol for Management of Nausea and Vomiting in Pregnancy
A Systems Medicine Approach to Refractory Rumination
Non-pharmacologic Options for Treatment of Nausea and Vomiting in Pregnancy
Prevention of Venous Thromboembolism in Hospitalized Medicine: An Evidence-Based Review
It’s Not How He Came In: A Discussion of Cognitive Errors
Human Papillomavirus: Considerations in Males
Achilles Tendon Rupture: Risk Assessment of Aerial and Ground Athletes

Two of our graduating residents were successful in publishing their works prior to graduation:

Global Health

Dr. Paul Nanda continued to direct the global health activities of the Residency Program. With his expertise and guidance, four residents completed international rotations. In February 2011, Dr. Rebecca Grant traveled to Lesoto, Africa, and Drs. Lindsey Konor, Shivonne Suttles, and Simarpreet Vidwan travelled to Zimbabwe. They came back with outstanding experiences that they subsequently shared with the faculty and residents in the program. Needless to say, their view of medicine, and health in general, changed dramatically through their experiences.
Residency

Recruitment

Resident recruitment remained a high priority for the program. Sarah Germak and Drs. Tony Casey, Scott Merryman, Fred Miser, and Rupal Oza coordinated the recruitment experience for applicants, providing a personalized approach. Dr. Lindsey Konor was the resident in charge of recruitment for the Main and Urban programs. Despite the trend of decreased interest in Family Medicine among medical students, interest in OSU was higher than ever before, and the program scheduled interviews for a record number of applicants. Quality of applicants accepted for interviews was extremely high, and both programs filled in the match with a group of talented, motivated future Family Physicians.

New Residents for 2011-12

Resident and Faculty Strategic Goal-Setting for 2010-11

Dr. Miser led both residents and faculty in setting strategic goals for the 2010-11 year. One main focus of strategic planning was preparing for upcoming changes in the ACGME rules governing residency. Particular areas of planning were changes in resident duty hours and supervision. Residents and faculty presented and evaluated various proposed changes regarding the Family Medicine Inpatient Service. The final plan was implemented in June 2011, one month before the new ACGME policy went into effect, to ensure everything would run smoothly for the new academic year.

Five areas of focus from the strategic planning included: 1) improving the family medicine inpatient service, 2) enhancing the teaching curriculum, 3) increasing student exposure to our program, 4) improving procedural training, and 5) improving relationships. Great progress was made as resident committees worked on each of these areas.

For the 2011-12 upcoming academic year, the program will move from 12 one-month block rotations to 13 4-week block rotations, annually. This allows for three more rotations. One month of family medicine inpatient service will be replaced each in the 2nd- and 3rd-years with family medicine adult selectives. The Wednesday afternoon didactics were restructured to allow both consistency and variety in educational opportunities. Residents received FP Essentials, the number one AAFP-sponsored CME activity, to read as part of their monthly learning activities.

To ensure the quality of our curriculum and evaluations, faculty focused on reviewing evaluations and curriculum for all rotations, with an emphasis on the family medicine office and inpatient service evaluations. The curriculum committee met on a monthly basis to work on various curricula. Various faculty worked on competency-based evaluations. A select number of faculty created three new rotations in preparation for the 2011-12 year. Dr. Miser and Sarah Germak worked to coordinate a 1st-year “Potpourri” rotation in which residents will gain a variety of experiences in imaging and diagnostic imaging, global health, oral health, home health care, ECG reading, phlebotomy, and the meaning of family medicine. Drs. Tony Casey, Scott Merryman, and Joan Simon coordinated a behavioral health rotation for 2nd years in which residents gain experience in child, adult, and geriatric psychiatry and alcohol and drug rehabilitation. Drs. Buoni, Mack, and Miser developed a Patient-Centered Medical Home rotation that combines experiences in practice and medical home management.

To enhance relationships within the residency, Dr. Nanette Lacuesta, Chief Resident, planned the first overnight retreat in program history. Residents spent a night and the following day at a cabin in Hocking Hills. It was an enjoyable experience where residents were able to relax while also work on team building, problem solving, strategic planning, and election of leadership for the upcoming year.

Academic Residency Track

Dr. Katrina Gordon, second-year resident, is enrolled in the Academic Track as she is working toward achieving her MPH degree through the School of Public Health. She was the recipient of a competitive travel award given by the National Institutes of Health and National Medical Association to attend the July 2011 NIH Workshop on Career Development in Academic Medicine at the 109th NMA Annual Convention in Washington D.C.
The Ohio Academy of Family Physicians/Foundation selected Dr. Meana Gerges, first-year resident, to be the resident delegate to the 2011 AAFP National Congress of Family Medicine Residents, to be held in July 2011. Congratulations to Dr. Gerges for this prestigious honor.

Rural Residency Track

The Ohio State University Rural Program, an integrated “2-2-2” rural training track primarily based in a rural community an hour northwest of Columbus, continued to experience success as defined by graduation of excellent resident physicians to rural practice, excellent evaluations of rural faculty and program by residents, and state and national recognition of faculty and program. This past year another of our graduates, Dr. Laura Sorg, chose to stay on as a physician at Mad River Family Practice bringing to four the number of physician faculty.

Unfortunately, after more than a decade and more than $2 million in support, the Board of Mary Rutan Hospital made the difficult decision to suspend the residency as of December 2011. Faced with increasingly difficult financial times, changing Medicare reimbursement as a sole provider hospital, and a lack of external support, the Board members felt they could no longer justify what up until now had been viewed as a sound investment and a community benefit. Our two PGY1 residents transferred to other programs after June 30, one to the OSU main program and the other to Fort Collins, Colorado. Our last two PGY3 residents will graduate off-cycle this fall.

Ironically, Dr. Longenecker, as project director of a consortium of individuals and organizations committed to sustaining RTTs as a strategy in rural medical education, was awarded a $one million grant from the Office of Rural Health Policy last Fall. Shortly after the Hospital Board’s decision in January and as part of this grant, RTT Program Directors from all around the nation and representatives from their respective State Offices of Rural Health convened in Columbus for the nation’s first ever meeting of this group. Following a visit to Logan County and the Rural Program they set about strategizing for the future. Since the RTT Conclave, Dr. Longenecker has initiated conversations with the ACGME and RRC for Family Medicine, and the current RRC Chair Dr. James Martin. In a presentation to the nation’s family medicine program directors, sustaining RTTs as one of 3 priorities listed for the RRC in Family Medicine this coming year. The efforts of the Technical Assistance Program are described on the RTT Technical Assistance Program website www.raconline.org/rtt/.

Teaching and Curriculum Development

The Rural Program will now transition to a clinical practice with continued teaching of medical, pharmacy, and nurse practitioner students. Through the efforts of Ms. Tara Wagner, Residency Program Manager, and others, Governor Kasich has recommended Logan County for a governor’s exception as a medically underserved population and Mad River Family Practice is exploring opportunities afforded by the recent Patient Protection and Affordable Care Act, including the possibility of becoming a Rural Health Clinic or Community Health Center, and eventually a Teaching Health Center, potentially resurrecting the residency program in coming years.

Predoctoral Education

The Rural Health Scholars program entered its ninth year. The theme for the annual retreat was “Creating Your Own Path to Rural Practice” Two prior Rural Health Scholars, Dr. Terri Mucha of McCall, Idaho (OSU Med 2004) and Dr. Eric Prenger from Sidney, Ohio (also OSU Med 2004) were invited guests. With the assistance of the State Office of Rural Health and the National Rural Health Association, two students received scholarships to attend the National Rural Health Association’s Rural Health Policy Institute in Washington, DC, and three rural health scholars attended the NRHA Annual Meeting and Rural Medical Educators’ pre-conference in Austin, Texas. Dr. Longenecker and the two students attending the Rural Health Policy Institute had the distinct privilege of meeting with Congressman Boehner’s Deputy Chief of Staff the afternoon of President Obama’s State of the Union address, in the Speaker’s quarters in the Capitol building itself!
Residency Physicians
Residency Physicians for 2010-2011:
PGY1 – Zachary Boyd, MD and Daniel Vigil, MD
PGY 2/3 – Jasmine Usher, MD and Laura Kilofliski, MD

Inter-professional Education
• Dr. Longenecker and Ms. Oralea Pittman DNP both teach in the Ohio State University College of Nursing Family Nurse Practitioner program, including the precepting of nurse practitioner students at Mad River Family Practice, and an annual joint presentation around collaborative practice both in the Rural Program and at the Ohio State College of Nursing.
• Rural Program faculty also teach pharmacy students from the Ohio Northern University College of Pharmacy who regularly participate in Morning Report.

Faculty Development
Longenecker, RL
• National Rural Health Association Rural Health Policy Institute, Washington, DC, January 2010
• RTT-SORH Conclave 2011, Columbus, Ohio, February 2011
• Society of Teachers of Family Medicine Annual Conference, New Orleans, LA, April 2011
• Rural Medical Educators pre-conference and National Rural Health Association Annual Meeting, Austin, Tx, May 2011
• Program Directors Workshop, Kansas City, Missouri, June 2011

McCauley, L
• Family Centered Maternity Care and ALSO Instructor Course, San Diego, CA, July 2010

Pittman, O
• National Organization for Nurse Practitioner Faculty, Albuquerque, NM, April 2011
• American Academy of Nurse Practitioners, Las Vegas, NV, June 2011

Sorg, L
• ASCCP Comprehensive Colposcopy, Philadelphia, PA, October 2010

Wagner, T
• Rural Health Policy Institute, Washington DC, January 2011
• RTT-SORH Conclave 2011, Columbus, OH, February 2011

Recruitment
Blessed with one of the best classes of student candidates ever, the Rural Program upon the announcement of the hospital Board had to withdraw from the NRMP match.

Future Directions and Challenges
Efforts continue to recruit another family physician to assist with obstetrics. As Mad River Family Practice transitions to a clinical practice, possibly an RHC or CHC, and Dr. Longenecker pursues the formation of a sustaining national network of RTT programs, the future of rural family medicine education at Ohio State University College of Medicine is yet to be determined. The successful Rural Health Scholars, supported by endowment funding from Dr. J. Martin Byers Jr. Memorial Fund in Family Medicine, will continue and this coming year a small reading study group of medical students led by Dr. Longenecker will be discussing the book, Country Doctor Revisited.
Under the leadership of Tom Best, MD, PhD the Division of Sports Medicine is an active element of the Department of Family Medicine regarding its three-part mission of clinical practice, research, and education. All faculty members contribute to all parts of the mission and are engaged in both clinical care and scholarly activity.

National Recognition
During 2010-11, Dr. Best served as President of the American College of Sports Medicine (ACSM). Dr. Best also served on the President’s Council for Physical Activity.

Research
Research is an important part of the mission of both the Division of Sports Medicine and the Department of Family Medicine. Faculty members participate as PIs, Co-PIs, and investigators on studies within the Division as well as collaborating with Orthopedics, and other departments within the College of Medicine, and other colleges across the campus as appropriate. Faculty regularly travel to regional, national, and international meetings to present their research as well as participate on discussant panels on a wide variety of Sports Medicine topics. As a group, the Division authored over 30 peer-reviewed papers. The faculty also delivered 38 presentations at national and international conferences.

In addition to his work on his NIH funded research project on eccentric muscle masse, Dr. Best participated in two other nationally funded studies. Dr. James Borchers continues his work investigating the role of topical vs. oral non-steroidal anti-inflammatories following ankle sprains. This is a prospective study to determine if there is a difference in recovery between topical and oral agents in Division-1 athletes.

Timothy Hewett, PhD became Director of Research for the Sports Health & Performance Institute earlier in the 2010-11 academic year. He is an international expert in the field of injury prevention, especially prevention of ACL injuries and the long term effects of these knee injuries. His research interests range from the molecular alteration of muscle contraction to the development of new methods for injury prevention and athletic development.

Fourth-Year Medical Student Sports Medicine Rotation
The Division of Sports Medicine is committed to medical student education and offers a four-week elective to fourth-year medical students in Sports Medicine. The rotation is offered for six four-week blocks during the academic year. A total of 17 students completed the rotation during the 2010-11 academic year. Evaluations for the elective were high; the elective is one of the OSUCOM’s most popular and highly rated among fourth-year electives. Seventeen students are currently enrolled in the elective for the 2011-12 academic year.

The primary goals of the rotation are:
• Exposure to a multidisciplinary approach for the practice of Sports Medicine
• Become familiar with common problems encountered in Sports Medicine, their presentation, diagnosis, and management
• Learn and refine musculoskeletal physical examination skills
• Become familiar with common procedures used in Sports Medicine (i.e., injection techniques, fracture care, splinting/casting)
• Office hours with assigned physician(s)
• Attendance at weekly Sports Medicine conferences
• Attendance for training room coverage with their assigned physician
• Attendance at three athletic events over the four-week rotation with their assigned physician
• Complete required readings
• Presentation with a written paper on topic of choice at the end of the four-week rotation
The Division of Sports Medicine supports the mission of resident education within the Department of Family Medicine. An elective is available for R2 residents with an interest in Sports Medicine. A three-year rotation in Sports Medicine is required of all R3 residents in the Department and is completed at the OSU Sports Medicine Center. Regardless of whether the rotation is elective or required, the residents are actively involved with conferences and Grand Rounds during the rotation. Faculty members of the Division also provide resident education via workshops and lectures through the Ohio State Family Medicine Residency Program. This also includes a longitudinal rotation, involving R2 and R3 year residents. This rotation provides a more in-depth sports medicine learning experience and is available to qualified applicants.

The Division of Sports Medicine is dedicated to advanced education in Sports Medicine by offering a one-year Fellowship in Primary Care Sports Medicine leading to eligibility to complete the Certificate of Added Qualifications (CAQ) in Sports Medicine. The program currently accepts two fellows per year. The fellowship is accredited by the ACGME; fellows are expected to pass the CAQ exam once their fellowship is completed. In addition, fellows are expected to present at a national meeting of their choice during their year at OSU. Scholarly writing in the form of a systematic review with faculty involvement is also expected. Andy Gilliland, MD and Luis Salazar, MD both presented abstracts at the Annual ACSM Meeting in Denver, CO in June 2011. Along with James Borchers, MD, MPH, they had a systematic review accepted for publication in the *Physician and Sports Medicine* in July 2011.

Fellows 2010-11
- Andy Gilliland, MD
- Luis Salazar, MD

Clinical Programs
The OSU Sports Medicine Center, a multidisciplinary treatment center, offers family medicine, orthopedics, physical therapy, and psychological and nutritional counseling services by individuals who understand and are experienced in dealing with competitive and recreational athletes. This expertise is applied to patients who are physically active or wish to embark on a healthier lifestyle. The Department of Family Medicine is a partner with the Department of Orthopedic Surgery and OSU Medical Center in the OSU Sports Medicine Center.
The Division of Sports Medicine provides care for all 36 varsity sports at Ohio State. Faculty members of the Division provide comprehensive care for all athletes at Ohio State along with event coverage for the entire Athletic Department.

During the past year Sports Medicine became the team physician for Capital University, covering its athletic programs and student health. High school coverage continues to be a priority of the Division of Sports Medicine. Faculty and fellows of the Division provide care for many local high schools and for state tournaments for the Ohio High School Athletic Association. A significant amount of time is dedicated to the care of student athletes from the Columbus Public Schools. A free walk-in clinic at East on Saturday mornings continues to draw injured athletes for assessment.

Multiple community events are also covered by the faculty and fellows of the Division. Resident and student involvement is encouraged.

Outreach

The Division of Sports Medicine recognizes the importance of community outreach efforts. The following events reflect the dedication to the community by the Sports Medicine faculty.
• Best TM, Team Physician for Columbus Crusaders and Worthington Christian Academy, 2010.
• Borchers JR, LeMay D, Gilliland A, Salazar L. Saturday morning injury clinic (free service to Columbus Public Schools) August 2010 – November 2010.
• Borchers JR, Gilliland A, Salazar L. Columbus City Wrestling Championships, February 2010.
• Borchers JR. OHSSA Wrestling Championships, March 2010.
• Borchers JR, McCamey K. OHSSA Track and Field Championships Coverage, June 2010.
• LeMay D. Lead Physician for the National Collegiate Rugby 7's Invitational, June 2010, 2011.
• McCamey K. AMSSM Education Committee, April 2009-April 2012.
• McCamey K. Pelotonia Bike with Brutus event August 2011.

Faculty
• Thomas Best, MD, PhD, FACSM, Professor of Family Medicine and Pomerene Chair and Team Physician
• James Borchers, MD, MPH, Assistant Professor of Clinical Family Medicine and Team Physician
• Donald LeMay, DO, Assistant Professor of Clinical Family Medicine and Team Physician
• Kendra McCamey, MD, Clinical Assistant Professor of Family Medicine and Team Physician
• Ray Pongonis, DO, Clinical Assistant Professor of Family Medicine and Team Physician
The Ohio State University Center for Integrative Medicine (OSU/CIM) is a unique medical practice center that combines the best of integrative family and internal medicine with evidence-based complementary/alternative medical modalities. The Center is located at 2000 Kenny Road in a 9,460 square foot facility. The Center, in its sixth year of clinical growth, is part of OSU Medical Center’s Primary Care Network.

Dr. Glen Aukerman is the Medical Director. He also is the Director of Integrative Medicine in the Department of Family Medicine. The Center for Integrative Medicine has been a member of the Consortium of Academic Health Centers for Integrative Medicine since 2008. In May 2010 The Ohio State University hosted this national organization’s steering committee Steering Committee meeting and dinner.

The OSU/CIM has gained tremendous community support, receiving donations in excess of $15,000. The Center for Integrative Medicine is actively engaged in strategic planning and development funding, with two current funds: The Medicine Program Fund and The Dr. Glen Aukerman Endowment Fund for Integrative Medicine.

The OSU/CIM allows students pursuing degrees in medicine and related healthcare professions opportunities to study integrative medicine’s role in their anticipated specialty of choice. OSU/CIM provides educational sessions for medical students, nurse practitioners, dietetics students, departmental grand rounds presentations, and rotation and shadowing opportunities for Med 1 through Med 4 students, as well as residents from departments such as Family Medicine, Internal Medicine, Psychiatry, and Dermatology in and outside of Ohio State University. The OSU/CIM also provides unique informational and shadowing opportunities to physicians (to date, has included physicians from the following specialty areas: Dermatology, Emergency Medicine, Endocrinology, Neurology, and Psychiatry) and nurse practitioners from the community.

The OSU/CIM has presented on Integrative Medicine through didactics: Grand Rounds and special meetings for Family Medicine Residency, Internal Medicine, University Hospital East, and the James, as well as courses for medical, nursing, and allied health students. From July 2010 thru June 2011, over 200 presentations were conducted by OSU/CIM providers at regional and national conferences, for community groups and local and network hospitals, and through the OSU/CIM Community Series. The OSU/CIM Community Series includes regular community education workshops on a variety of topics including yoga, meditation, integrative medicine, acupuncture, chiropractic, nutrition, massage, and Ayurveda. Attendance has increased to as many as 90 participants for some sessions.

Anup Kanodia, MD, MPH, a CIM physician, is being funded 30% academic time by OSU Center for Personalized Healthcare to help develop the Personalized Health Assessment tool.

Practitioners at the Ohio State Center for Integrative Medicine Include:

- Integrative Family Medicine
  - Glen Aukerman, MD, DABFP, DABHM
  - Ruslana Kurpita, MD, DABFP, DABHM
  - Anup Kanodia, MD, MPH
  - Kathryn Scholl, MSN,CNP
- Integrative Internal Medicine/Pediatrics
  - Linda Chun, MD, DABIM, DABP
- Ayurveda
  - Hari Sharma, MD, FRCP, DABHM
- TCM/Acupuncture
  - David Wang, Lac
- Chiropractic Rehabilitation
  - John Grandominico, DC
- Massage Therapy
  - Cheryl Boschert, LMT
  - Rhonda Crockett, LMT
  - Jean LaPolla, LMT
The continuing medical education program in the Department, held in conjunction with monthly faculty meetings, offered many outstanding presentations in all areas of family medicine. The evaluations of the presentations were all excellent; many of the speakers have been requested to return in the future to share other timely topics.

Each participant is awarded 1 hour of category 1 AAFP prescribed credit. All family physicians, residents, and nurse practitioners are invited to join us at 7:00 am the first Thursday of every month in Room 233, Northwood and High Building (Rardin Family Practice Center). http://ccme.osu.edu/.

The Ohio State University Department of Family Medicine continues to strive to achieve its goal of being a nationally recognized leader in the area of research and scholarship. The Research Committee, which meets quarterly, continues to oversee and guide the Department’s research agenda, to ensure the Research Strategic Plan is fully implemented, to develop a mechanism by which the Research Scorecards can be maintained on an ongoing basis, and to facilitate the monthly Research Forums. Members of the Committee include Drs. Doug Post (Chair), Tom Best, Pat Fahey, Larry Gabel, Anup Kanodia, Leon McDougle, Fred Miser, Mary Jo Welker, , Randy Wexler, plus Joan Allen, Jennifer Lehman, Paula Smailes, and Tonya Van Fossen.

The Department continues to experience strong infrastructure support for its research mission. Joan Allen, RN, MBA Clinical Research Specialist, oversees the regulatory and financial aspects of the Department’s industry-sponsored clinical trials. Paula Smailes, RN, MSN, CCRC, CCRP is a full-time Clinical Research Specialist and coordinates these trials. Jennifer Lehman, CRA, CCRC, CCRP continues her excellent work as Clinical Research Manager.

**Research Forum**

The Research Forum meets on a monthly basis to encourage and nurture increased and enhanced scholarship on the part of the faculty. Recognizing that many barriers exist to scholarship, even though it is expected and required for the purpose of promotion, we follow a process whereby faculty members volunteer to prepare either a manuscript or a grant application by a certain monthly deadline in order to have the entire group review it and provide constructive criticism. Typically, two documents are reviewed at each monthly Research Forum. The members of the Research Forum remain very positive in their reaction to this process. Since initiating the process, all faculty members have met their commitments.

**OSURF Applications Submitted**

**High-Impact Journal Publications**
The CCTS is meant to improve the quality of patient care through research and educational enterprises that encompasses basic, clinical, and community translational research that is bidirectional, interdisciplinary, and at the core of the Ohio State academic culture. The Center is designed to focus on integrating traditional biomedical research processes with a public health model. By focusing, integrating, and enhancing current resources plus developing new resources to address specific programmatic needs, the CCTS is envisioned to meet new challenges in clinical and translational research including:

- Emerging diseases
- A change in focus from acute to chronic health issues
- Health disparities
- Effects of pediatric and aging populations on public health

By continuing to transform the clinical and translational research efforts while still incorporating valuable advances through traditional discovery and translation, it is expected that new paradigms would be developed for translational of research and resources at the community level that would:

- Detect populations at risk
- Focus a greater proportion of resources to those at the most need
- Intervene before symptoms develop to enhance or preserve function
- Accelerate discovery to tangible medical and health benefits

Department researchers are well positioned to meet these high-level expectations. Past successes with community-engaged research have demonstrated a readiness for such challenges and an ability to be central to CCTS needs in community-based research.

**OSURF Applications – Funded/Non-Funded**

(Note: Data always one year in arrears)

**Research Award $ per Regular Faculty**

Member (OSURF Grants)
During the past year, our clinical trials program expanded its pool of principal investigators. Scott Merryman, MD agreed to be a principal investigator in his first clinical trial. We were able to exceed our contracted goal for his study and Dr. Merryman has proven to be an excellent PI. Dr. Patrick Fahey is serving as PI on a Novartis protocol that we acquired in 2010-11. In addition, Dr. Miser was selected to conduct another year of the flu vaccine study, similar to the 2009-10 project. Joan Allen, RN, MBA continues to work part-time and assist our clinical trials efforts.

Forest: A phase III, randomized, double-blind, placebo-controlled, multicenter study to evaluate the safety and efficacy of Dutogliptin in patients with type 2 diabetes mellitus on background treatment with Gilmepride with or without Metformin PI: Fred Miser, MD; Sub-I’s: Patrick Fahey, MD, Scott Merryman, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

Forest: DUT-MD-304: A phase III, randomized, double-blind, placebo-controlled, multicenter study to evaluate the safety and efficacy of Dutogliptin in patients with type 2 diabetes mellitus on background treatment with Dut-MD-304: A phase III, randomized, double-blind, placebo-controlled, multicenter study to evaluate the safety and efficacy of Dutogliptin in patients with type 2 diabetes mellitus on background treatment with Pioglitazone PI: Fred Miser, MD; Sub-I’s: Patrick Fahey, MD, Scott Merryman, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

Johnson & Johnson: A randomized, double-blind, placebo-controlled, 3-arm, parallel-group, 26-week, multicenter study with a 26-week extension, to evaluate the efficacy, safety and tolerability of Canagliflozin in the treatment of T2DM Subjects with moderate renal impairment PI: Scott Merryman, MD; Sub-I’s: Patrick Fahey, MD, Fred Miser, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

Merck: A clinical trial comparing the efficacy and safety of a sitagliptin-based treatment paradigm to a liraglutide-based treatment paradigm in patients with type-2 diabetes mellitus who have inadequate glycemic control PI: Fred Miser, MD; Sub-I’s: Patrick Fahey, MD, Scott Merryman, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

Merck: MK0431-102-01: A multicenter, randomized, double-blind study of the co-administration of Sitagliptin and Pioglitazone in patients with type 2 diabetes mellitus who have inadequate glycemic control PI: Fred Miser, MD; Sub-I’s: Patrick Fahey, MD, Scott Merryman, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

Novartis: A 12 week, multi-center, randomized double blind, active control parallel group study to evaluate efficacy and safety of the combination of Valturina and Amlodipine or Valturina and Chlorthalidone versus Valturina alone in patients with stage 2 hypertension PI: Pat Fahey, MD; Sub-I’s: Fred Miser, MD, Scott Merryman, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

While researchers in the Department of Family Medicine have not achieved full funding of that FTE portion dedicated to research still numbers of funded projects with FTE support are increasing dramatically.
Dr. Fred Miser is Co-PI on two NIH-funded studies. He is collaborating with Dr. Carla Miller of Human Nutrition in the study, Mindfulness-Based Approach to the Treatment of Obesity and Diabetes. Funded by the NIDDK, this two-year randomized, controlled trial evaluates the effectiveness of mindfulness training added to routine nutritional counseling in weight loss and glycemic control in adults with type 2 diabetes. Data from this trial will be used for support for an additional NIH application. Dr. Miser is also collaborating with Dr. Kwame Osei of Endocrinology and Dr. Lee Hebert of Nephrology in a seven-year multicenter, randomized, controlled trial funded by the National Heart, Lung, and Blood Institute titled, Systolic Blood Pressure Intervention Trial (SPRINT). This study evaluates the effectiveness of tight blood pressure control in adults age 55 years and older who have hypertension. Dr. Miser continues his work investigating cardiovascular risk factors and aspirin use as cardioprevention, funded by Partnership for Prevention. Assisted by Jennifer Lehman and a multitude of medical and pre-medical students, he collected over 1,600 “healthy heart surveys” from adults receiving care in the OSU Primary Care Practice-Based Research Network. Data analysis is currently underway. He also continues his work on health literacy and its impact on those with diabetes. Finally, he remains busy with the many clinical trials conducted by the Department.

The research of Dr. Leon McDougle has focused on workforce development and community-based behavioral modification projects aimed at decreasing health care disparities. Dr. McDougle’s leadership and input has been instrumental in acquiring several federally funded grants including The Ohio State University Internal Medicine Residency Primary Care Track: A New Medically Underserved, Community-Based Program from an established Educational Innovations Project. Dr. McDougle serves as a Co-Investigator for this $3.8 million DHHS Health Resources & Services Administration award, 09/30/2010 – 09/29/2015. Dr. McDougle continues his partnership with Greta Winbush, PhD, Associate Professor of Psychology and Gerontology at Central State University, a Historically Black University located in Wilberforce, Ohio; and OSU Department of Family Medicine research faculty, with work on the NIH 5 year project entitled “Closing the Health Disparity Gap: Impact of Health Empowerment Technologies on Elderly African American’s Health Provider Relationships.” In addition, partnership with Virginia Sanders, PhD, Director of the OSU Integrated Biomedical Science Graduate Program, 15 OSU biomedical scientists, Columbus State Community College, universities in central Ohio, and three Historically Black Colleges and Universities (HBCUs) resulted in a proposal to the National Institute for General Medical Sciences (NIGMS) entitled DISCOVERY PREP, funded in January 2010. The goal of “DISCOVERY PREP” is to increase the number of PhD graduates who are underrepresented in the biomedical sciences. Overall, this application was rated as excellent with high impact. Recently, Dr. McDougle’s essay entitled Answering the Question of the Year with Faculty Diversity was accepted for publication by Academic Medicine. Dr. McDougle and six other panelists were honored by invitations to present their essays at the November 4-7, 2011 Association of American Medical Colleges National Conference in Denver, Colorado. Over 120 authors submitted essays in response to the call by Academic Medicine.

Dr. Randy Wexler continues his work on improving patient-physician communication as a Board Member of the Time To Talk CARDIO program. On December 8, 2010, Hora de Hablar CARDIO was launched. In 2011, TTTC received four Bulldog Awards (which recognize outstanding media campaigns) in the following categories; Best Education/Public Service Campaign; Best Health, Medicine, and Fitness Campaign; best use of internet, and best website. The program also received a Silver SABRE award in consumer health. Also completed was an unfunded survey study of ED use which served as the basis for an AHRQ R21 award to begin in 2012.

Drs. Pat Fahey and Mary Jo Welker, working with medical center fiscal staff and joined by Dr. Randy Wexler this year, continue their evaluation of downstream revenue to the OSU Medical Center from the Primary Care Network. There is an increasing revenue stream to the Medical Center, in spite of the closure of five offices five years ago. Their efforts, including discussion of these findings, have been submitted for publication.
Dr. Doug Post is Principal Investigator of a three-year study funded by the Lance Armstrong Foundation entitled, Developing a Communication Tool for Appalachian Breast Cancer Survivors. Studies have indicated that communication problems between patients and clinicians are a major barrier to the effective management of pain, depression, and fatigue symptoms. This project is designed to address this important problem through the development and evaluation of a culturally-relevant cell phone-based patient communication tool for breast cancer patients undergoing chemotherapy treatment in Appalachia, Ohio. Dr. Post is Co-Principal Investigator on a project funded by the American Cancer Society National Division, Ohio Patient Navigator Research Program. This five-year project is part of an NIH-funded consortium of nine sites across the U.S. investigating the effects of patient navigator programs on patient and health care delivery outcomes for cancer. Dr. Post and Dr. Mary Jo Welker are Co-Investigators on an NIH-funded R01 study, Improving Colorectal Cancer Screening in Primary Care. The goal is to test a program to improve colorectal cancer screening among male and female patients over the age of 50 in 10 OSU primary care clinics. Dr. Post and Dr. Pat Fahey are Co-Investigators on the renewal of an NIH-funded Center for Population Health and Health Disparities titled Reducing Cervical Cancer In Appalachia. The major goal of the Center is to continue the investigation of why high rates of cervical cancer incidence and mortality are observed in Appalachia, Ohio. The Principal Investigator of the three NIH-funded studies above is Dr. Electra Paskett from the Department of Internal Medicine and the OSU Comprehensive Cancer Center. Dr. Post is also a consultant for Dr. Alvin Wee’s five-year K23 award funded by the NIH, Intervention to Prevent Delayed Diagnosis of Oral Cancer. The project is focused on understanding oral cancer screening and detection practices of primary care physicians, and to develop and test a web-based educational intervention. In the area of educational research, Dr. Post is Principal Investigator of a study funded by the Monte-Crisafi endowment fund entitled, Medical Student Partners in Health. This study is investigating the effects of a health coach intervention delivered by medical students to senior patients diagnosed with Type-2 diabetes and essential hypertension.

Sports Medicine Research

The research of Dr. Tom Best and colleagues from Biomedical Engineering, Dentistry, and Molecular Genetics focuses on the pathophysiology of muscle-tendon injuries. A team of post-docs, graduate students, and medical students is NIH-supported. A two-pronged approach is taken with both basic science and clinical studies. The basic science studies utilize an animal model to study the biomechanics and pathophysiology of injury and repair following eccentric exercise. They are specifically interested in the role of leukocytes in inflammation and repair. A variety of immunological and molecular techniques are used in an effort to dissect the role if NF-KB and other transcription factors in the repair of stretch-injured skeletal muscle. Recently, Dr. Best has collaborated with other scientists on the OSU campus to understand more about the role of exercise in cancer-induced cachexia. An animal model is being used to explore optimal methods of attenuating muscle wasting and inflammation through modalities such as massage therapy. The role of skeletal muscle as it relates to osteoarthritis is in the early stages of experimental design for Dr. Best and colleagues such as Drs. Rebecca Jackson from Endocrinology and Metin Gurcan from Bioinformatics. This work was recently awarded NIH funding and seeks to understand if rehabilitation strategies aimed at optimizing quadriceps function can mitigate the progression of osteoarthritis of the knee.

Dr. James Borchers continues his work investigating the role of topical vs. oral non-steroidal anti-inflammatories following ankle sprains. This is a prospective study to determine if there is a difference in recovery between topical and oral agents in Division-1 athletes.

Dr. Timothy Hewett became Director of Research for the Sports Health & Performance Institute earlier this year. He is an international expert in the field of injury prevention, especially prevention of ACL injuries and the long-term effects of these knee injuries. His research interests range from the molecular alteration of muscle contraction to the development of new methods for injury prevention and athletic development.
RESEARCH AND SCHOLARSHIP

Education-Related Research and Scholarship

The present strategic plan of the Department of Family Medicine has 11 strategic objectives, four of which relate to the patient-centered medical home model. These four are:

- Ensure the principles of family medicine and the patient-centered medical home are taught to 100% of the medical students.
- Get the EPIC medical record system to do what we want it to do to support the patient-centered medical home model.
- By 2012, 100% of graduating residents will have practiced in a patient-centered medical home model.
- By 2012, all family medicine sites will operate as a patient-centered medical home.

Work prior to the 2010-11 academic year, but especially during it, allowed faculty and staff in the Department of Family Medicine to use education-related research efforts to advance these four strategic objectives. Much of our efforts were associated with funding requests from the U.S. DHHS Health Resources and Service Administration (HRSA).

At the medical student education program level, we sought funding for a project entitled, “Virtual Reality: A Unique Means to Teach the Reality of the Patient-Centered Medical Home.” It was received in the form of a five-year grant project ($1,319,089) that began September 2010 and extends through June 2015. Dr. Holly Cronau is the Principal Investigator. The project’s purpose is to further enhance the Department of Family Medicine’s leadership role within the College of Medicine in the development and implementation of innovative, technology-driven, case-based primary care educational initiatives toward learning patient-centered medical home (PCMH) principles. There are three major key objectives: 1) to create two virtual “realities” to enhance Ohio State College of Medicine students’ learning regarding patient-centered medical home (PCMH) principles, that can be adopted or adapted by other educational programs: 1) a virtual EMR within the EPIC Careâ Electronic Medical Record (EMR) System and 2) virtual patients within Second Lifeâ; 2) to assure that Med 1 and Med 2 Ohio State medical students, through the present CAPS I and CAPS II pre-clinical curriculum, are well grounded in Quality Measures and Health Information Technology elements of the PCMH model; and 3) TO assure that Med 3 and Med 4 Ohio State medical students, through the present year-three 8-week Ambulatory Clerkship and year-four 4-week DOC 2 Chronic Care Preceptorship, are well grounded in Patient Experiences and Practice Organization elements of the PCMH model.

At the residency program level, we sought funding for a project entitled, “The Patient-Centered Medical Home: Adaptable Curriculum Models, Instructional Modules, and Implementation Plans.” It was received in the form of a five-year grant project ($1,004,187) that began September 2010 and extends through June 2015. Dr. Fred Miser is the Principal Investigator. Its purpose is to plan, develop, and implement educational and training modalities relative to the Ohio State University Family Medicine Residency Program that promote family medicine residents’ knowledge and abilities regarding the Patient-Centered Medical Home (PCMH). There were three major key objectives: 1) to design and configure a model three-year Patient-Centered Medical Home (PCMH) curriculum that melds core primary care principles, relationship-centered care, new information technology, and chronic care management; 2) to develop, pilot, and refine 16 instructional modules that, singularly or in combination, emphasize topics germane to the Patient-Centered Medical Home including family medicine core values, patient experiences, quality measures, health information technology, and practice organization; and 3) to transform the traditional provider-oriented, model ambulatory care training sites of the Ohio State Family Medicine Residency Program, including all three training tracks – Core-University, Urban, and Rural – into respective model Patient-Centered Medical Homes.

At the departmental level, we proposed a third project entitled, “Ohio State Primary Care: Foundation for a Central Ohio Accountable Care Organization.” It was proposed as a five-year grant project ($799,631) to begin October 2011. If funded Dr. Mary Jo Welker will serve as Principal Investigator. The purpose of this project is to empower the Department of Family Medicine and the Division of General Internal Medicine to be transformational change agents within the Ohio State University Health System toward establishing and expanding an Accountable Care Organization in Central Ohio. There were three major key objectives: 1) Given that primary care is essential to an Accountable Care Organization, establish a Primary Care Signature Program as an equitable partner to Ohio State’s six other Signature Programs and as a foundation for evolving the Ohio State Accountable Care Organization. 2) Use health information technology and data resources to facilitate data analysis and evidence-based decision support toward managing performance risk, that is, successfully preventing and/or treating illness in a cost-effective way. 3) Nurture informed champions, educate the broader physician community, and use innovative methods for training future health care professionals regarding Accountable Care Organizations.
Integrative Medicine Research
The Center for Integrative Medicine’s research focuses on scientific disciplines not often studied in conventional medical centers. We have a multidisciplinary team of researchers spanning the fields of family medicine, acupuncture, chiropractic, and ayurvedic. Our basic research includes two NIH-funded studies. The first is by Dr. Glen Aukerman who is researching aging by novel platforms for analysis of stem/progenitor cells. The second is Dr. David Wang, an acupuncturist, who is collaborating with the departments of Sports Medicine, Biomedical Engineering, Dentistry, and Molecular Genetics on the pathophysiology of muscle-tendon injuries.

Our clinical research is also very robust including one NIH-funded researcher Dr. Maryanna Klatt. Dr. Klatt has received multiple NIH grants for her work with mindfulness-based stress reduction. Dr. Aukerman is working with the Ohio State University Comprehensive Cancer Center to better understand outcomes and application of nutrition in cancer care. Dr. Hari Sharma continually publishes in peer-reviewed journals on the merits of ayurveda. Dr. Anup Kanodia is studying the clinical application of systems biology and complexity science, which enables the reintegration of genes, organelles, cells, tissues, organs, and organ systems as one organism. Also Dr. Kanodia is working with the Center for Personalized Health Care utilizing gene-based information to understand each person’s individual requirements for maintaining health, preventing disease and tailoring therapy.

Research Projects: Student Involvement
Both medical and undergraduate students continue to be heavily involved in faculty research. Through their work on research projects, students receive valuable mentorship in research design, methods, and analysis. A listing of projects, including faculty PIs and student collaborators who supported the research during the 2010-11 academic year is listed below.

• Acceptance of the outpatient electronic medical record by physicians and patients at The Ohio State University Medical Center during an institution wide implementation (PI: Rizer MK)

• Closing the health disparity gap: Impact of health empowerment technologies on elderly African American’s health provider relationships (PI: McDougle L)
  Lynda Labranche assisted with this study.

• Medical student partners in health (PI: Post DM)
  Wendy Pallastro assisted with this study.

• Systolic blood pressure intervention trial (Co-Investigator: Miser WF)
  Andy Cheng assisted with this study.
