A COMMITMENT TO EXCELLENCE

MISSION
To optimize the quality of people’s lives by advancing family medicine principles through:

• Service
• Education
• Research and scholarship
• Personalized health care
• Community engagement

VISION
The Ohio State University Department of Family Medicine will be a recognized leader in shaping the future of family medicine.

VALUES
The Ohio State University Department of Family Medicine is committed to:

• Excellence
• Compassion
• Integrity
• Collaboration
• Innovation

“As Chief Resident, I feel we have a diverse group of residents who work well together. This combination has helped to create a rich teaching environment for faculty, as well as learning environment for residents and students. Our residents have represented The Ohio State University Wexner Medical Center and our Department of Family Medicine well, both in our locations of practice and in our community.”

-Mark Kahle, MD

“The Ohio State University Family Medicine Program has offered me more than I could ask for. I have had the opportunity to train in a community hospital inpatient setting with the support and resources of a large academic medical center. The curriculum is strong and has the flexibility to allow me to tailor my education to meet future goals while opening the doors to amazing opportunities in my training. My time in the residency has been a great experience. If asked to make the decision again, I would definitely choose Ohio State.”

-Michael Donaworth, MD
LETTER FROM THE CHAIR

The 2011-2012 academic year was another success for the Department of Family Medicine. I have listed a few selected highlights of the past year:

- We recruited Dr. Ann McAlearney, who joined our Department on July 1st as Professor and Vice Chair of Research. As Vice Chair of Research she will lead and grow our investigator-initiated research program, which will be focused on federally-funded outcomes-based research.

- The Department of Family Medicine and the Division of General Internal Medicine were awarded $788,612 from the U.S. Department of Health and Human Services Health Resources and Services Administration for a five-year grant project. Entitled, "Ohio State Primary Care: Foundation for a Central Ohio Accountable Care Organization," the two Medical Center units are partnering with Columbus Neighborhood Health Center, Inc. (CNHC) to conduct this project.

- Dr. Milisa Rizer, Associate Professor of Clinical Family Medicine, was appointed to the position of Chief Medical Information Officer for Ohio State's Wexner Medical Center.

- Dr. Doug Post, Professor of Family Medicine, was appointed as Assistant Dean of Practice-Based Learning as a part of the College of Medicine's new administrative structure. Dr. Post is responsible for overseeing the longitudinal small-group and longitudinal-practice components of the new Lead-ServeInspire Curriculum.

- Dr. Leon McDougle, Associate Professor of Family Medicine and Associate Dean for Diversity and Inclusion in the College of Medicine, was one of four recipients of the University-wide 2012 Distinguished Diversity Enhancement Awards.

- Dr. Cari Brackett, Associate Professor of Clinical Pharmacy and Family Medicine, was presented the College of Pharmacy’s Miriam R. Balshone Memorial Award for Distinguished Teaching at the 2012 College of Pharmacy’s Graduation Convocation.

- Dr. Riza Conroy, Assistant Professor of Clinical Family Medicine, was presented with the 2012 Department of Family Medicine and College of Medicine Excellence in Teaching Award.

- Notification was received in March 2012 that all seven of our Department of Family Medicine practice sites were each recognized as a Level 3 Patient-Centered Medical Home (PCMH) by the National Committee for Quality Assurance (NCQA).

- Dr. Mary Jo Welker, Professor of Clinical Family Medicine and Chair of the Department, was elected President of the American Academy of Family Physicians Foundation in January 2012.

- Also in January, Dr. Milisa Rizer, Associate Professor of Clinical Family Medicine, was presented the College’s Excellence in Clinical Care Award. Dr. Rizer was the charter recipient! In presenting the award to Dr. Rizer, Dr. Steven Gabbe, Senior Vice President for Health Sciences, and Dr. Charles Lockwood, Dean of the College of Medicine, cited Dr. Rizer's outstanding leadership role regarding designing, developing, and implementing the electronic medical record across the entire spectrum of outpatient and inpatient settings of the Ohio State University Wexner Medical Center.
• Dr. Randy Wexler, Associate Professor of Family Medicine, was funded as Principal Investigator for a one-year research project beginning January 1, 2012. It is entitled, "Development and Validation of a Measure to Assess Satisfaction with the Patient Centered Medical Home."

• Dr. Maryanna Klatt, Associate Professor of Clinical Family Medicine, presented three, peer-reviewed professional papers at the 2012 International Research Congress on Integrative Medicine held in Portland, OR from May 15 – 18.

• Dr. Larry Gabel was awarded the title of Professor Emeritus in the Department of Family Medicine. While Larry has officially retired, he remains part time in the Department helping with academic responsibilities.

• At the annual meeting of the Ohio Academy of Family Physicians (OAFP), Dr. Linda Stone, Associate Professor Emeritus of Clinical Family Medicine, was honored with the 2011 Distinguished Service Award.

• Dr. Edward Bope, Clinical Professor of Family Medicine and Chief of Primary Care at the Columbus VA Ambulatory Care Center, was appointed as Assistant Dean of VA Medical Student Education.

• Dr. Riza Maria Conroy was honored as one of 12 outstanding foreign-born physician faculty at the Ohio State Wexner Medical Center at a reception that included the world premier showing of Journey to Innovation. The 12 were selected by the Medical Center’s Diversity Council based on their inspiring stories and contributions to medicine.

• Dr. Riza Conroy, Clinical Assistant Professor of Family Medicine, was honored as a Columbus Health Care Hero regarding Underserved Care. Dr. Conroy was honored for her work with the Health and Wellness Helping Hands Free Clinic on the northeast side of Columbus, a clinic that she helped found in 2007.

In addition, as you read through our annual report you will see the wonderful things that our faculty, our residents, and our students are doing on a regular basis to make the Department of Family Medicine a solid part of the institution and a success at The Ohio State University.

Thanks to all,

Mary Jo Welker
Professor– Clinical and Chair
Over the last few years many individuals associated with the Medical Center have worked to establish meaningful statements of mission, vision, values, and goals. Six Key result Areas (KRAs) have been established as a means of assessing related performance of individuals, divisions, departments, and the medical center as a whole. Additionally, faculty and staff members of the Department of Family Medicine have worked to establish performance metrics regarding reach of the six KRAs. These metrics serve as a means to determine our status within the College in comparison to other clinical departments as well as nationally in comparison to other departments of family medicine.

- **USN&WR COM Primary Care Ranking** (Lower Ranking is Better)
The Department of Family Medicine presently operates on an annual budget in the order of $12 million. From a KRA perspective, it is observed that Dr. Welker’s financial leadership has been remarkable over the last decade with Reserves increasing dramatically. In January 2011, the Department began hiring new physician faculty in the Faculty Group Practice (FGP) within OSU instead of through Family Medicine Foundation, LLC (FMF). In July 2011, most of the physician faculty who had been dual employed by OSU and FMF also moved into the FGP to be fully employed by OSU. Due to the change in employment, most of the revenues and expenses moved into the FGP from FMF in July 2011. The large gain during the 2011-12 year in the FGP is due to now being on a cash-based accounting system, which does not allow for accrued salaries, benefits, or other commitments which would be paid in the future.

Endowment income and development funds are important to financing various activities of the Department each year. In addition to development funds, we also have numerous endowment funds that provide annual income based on income earned from university investments. For the most part between 2002-03 and 2004-05, endowment principal increased yearly but did so dramatically in 2005-06 when the Department created several new endowment funds. These new funds were initially set up using donations from our practice plan, however that initial investment has allowed for additional funds for donors to support. Over the past five years our endowment income has been variable based on external forces.

Development efforts have been ongoing in the Department of Family Medicine since it was founded. The 2011-12 academic year continued this history.

While the Family Medicine Development Fund provides support for the Department’s general needs, the rest of our development funds provide support to specific programs including sports medicine, medical student and resident education, research, occupational medicine, and integrative health. Donations to development funds allow immediate use of the gift to support current needs. Our development funds include:

- Family Medicine Development: 303130 $22,909
- Center of Integrative Medicine: 311967 47,721
- Family Medicine Predoctoral Education Development Fund: 312107 2,711
- Family Medicine Sports Medicine Development Fund: 312110 -17,648
- Family Medicine Residency Development Fund: 312152 15,748
- Occupational Medicine in Family Medicine: 312206 6,569
- Family Medicine Research Development Fund: 312228 3,082
- Family Medicine Scholarship Fund: 312482 840
- Midmark Support Fund: 312498 0
- CMAF Urban Diabetes FITNESS Program: 312559 36,096
- Family/Sports Medicine Initiative: 312611 16,560
- Columbus Free Clinic Support: 312781 4,755
- Family Medicine Chairman Fund: 312836 9,696
- Clinical Faculty Grant Family Medicine Fund: 312857 86,378
- Sports Med Clinical Faculty Fund: 312952 13,939
In addition to development funds, we also have numerous endowment funds that provide annual income based on income earned. As seen in the related KRA graph, for the most part endowment principal has increased yearly but dramatically has done so since 2005-06.

Our endowment funds and present cash value include:

- Crisafi-Monte Endowment Fund 601491 $1,001,664
- Dr. Peter and Alice Lancione Endowment Fund in Family Medicine 603922 75,570
- Thomas E. Rardin Family Practice Center Fund 605968 164,837
- Rural Family Medicine Endowment Fund 606222 125,474
- Urban Family Medicine Endowment Fund 607439 28,850
- Marie J. and Robert S. Young Fund in Family Medicine 607735 23,936
- Dr. J. Martin Byers, Jr. Memorial Fund in Family Medicine 641015 173,699
- Lloyd L. and Ilma Dowell Family Medicine Fund 641818 39,396
- Family Medicine Medical Student Education and Support Fund 642017 60,804
- Excellence in Family Medicine Fund 642075 51,541
- Family Medicine Residency Support Fund 642115 68,085
- Mary Jo Welker, MD and Lloyd M Welker Endowment Fund 647660 90,060
- Marianna H. and P. Tennyson Williams, MD. Endowment Fund 647715 147,226
- Glen F. Aukerman, MD Endowed Fund for Integrative Medicine 660100 158,660

We accomplished a great deal during the 2011-12 academic year in the clinical arena. Four of our sites were recognized as Patient-Centered Medical Homes (PCMH) including Bethel, Worthington, Upper Arlington, and Lewis Center. They joined our other sites that were recognized previously as PCMHs: CarePoint Gahanna, CarePoint East, and Rardin. This made all of our traditional family medicine sites NCQA level 3 recognized.

On July 1, 2011, we integrated all but a few faculty into the Faculty Group Practice (FGP) from Family Medicine Foundation, LLC. This was a tremendous undertaking and resulted in almost all of our faculty being fully employed by OSU, joining with all other clinical departments in this new medical center model.

We welcomed new physicians to our practice sites:
Dr. Veronique Bartman joined our Worthington site.
Dr. Anoosheh Behrooz joined our Bethel Road and Upper Arlington sites.
Dr. Laurie Belknap joined our CarePoint Lewis Center site.
Dr. Rebecca Grant joined our CarePoint East site.
Dr. Orin Hall joined our Occupational Medicine sites.
Dr. Shalina Nair joined our CarePoint Gahanna site.
Dr. Luis Salazar joined our Rardin and Sports Medicine at CarePoint East sites.
Dr. Kirti Shanker joined our Bethel Road site.

Some physicians moved between sites:
Dr. Rupal Oza moved from Rardin Family Medicine to CarePoint East.

Unfortunately, we said goodbye to some very special people:
Dr. Tony Casey left our Rardin practice.
Dr. Liliana Gomez Medley left our CarePoint East.
Dr. Alice Frazier retired from our Worthington site.
Dr. John Jonesco left our Worthington site.
Dr. Donald LeMay left our Sports Medicine at Morehouse site.
Dr. Scott Merryman left our Lipids clinics and family medicine site.

In-Patient Services
The in-patient service at OSU East continued to be active this year accounting for 2,677 patient days. The attending physicians on the inpatient service were: Drs. Veronique Bartman, Anthony Casey, Liliana Gomez-Medley, Allison Macerollo, John McConaghy, Fred Miser and Rupal Oza. This included 657 admissions with an average length of stay of 4.07 days. Additionally, 75 observation patients had their care managed by this inpatient service.
KRA-related data on the previous page, regarding in-patient admissions, demonstrate a declining pattern across recent years. This trend is not surprising in that it reflects changing practices in all of health care delivery with greater emphasis on out-patient care. As well, our Length-of-Stay data reflect national trends regarding in-patient care being more intensive with concomitant increases in out-patient care.

**Obstetrical Care**
Our deliveries this year were performed under the supervision of Obstetric Faculty at The Ohio State University Wexner Medical Center. Drs. Bill Buoni, Allison Macerollo, Fred Miser, Rupal Oza, and Milisa Rizer provided prenatal supervision.

**Occupational Medicine**
Occupational Medicine maintained high patient volumes with 17,988 visits at the Occupational Medicine at CarePoint East and West offices. Occupational Medicine West continues to provide initial health assessments and introduction to the U.S. health system to refugees from across the world including refugees from Somalia, Iraq, Bhutan, and Myanmar (Burma).

**Retail Clinics**
The partnership with the Giant Eagle grocery store chain continues to be a good experience. Our nurse practitioners in those sites are doing well, their patient satisfaction is high, and their convenience for patients is exceptional. In addition, we have become the collaborating physicians for the Kroger Little Clinic which is located in the same strip mall as our OSU Primary Care at Lewis Center.
Community Partnerships

Asian Health Initiative - The Asian Health Initiative is a jointly sponsored program between The Ohio State University Medical Center, the James Cancer Hospital and Solove Research Institute, the Department of Family Medicine, the Coalition for Asian American Health, the Asian American Community Services, the Asian American Community Service Council, and the Southeast Asian United Methodist Ministries of Central Ohio. The Rardin Family Practice Center houses this initiative, providing care one half-day per week for non-English speaking patients, primarily an indigent population. This functions as a free clinic and medical students are invited to participate in this project.

Amethyst House - Dr. Edna Marie Jones provides services two half-days per week at Amethyst House, which is a drug and alcohol rehabilitation center for women and children. It is located on South High Street.

Latino Free Clinic - This clinic was started in December 2000 and is a jointly sponsored program among the following entities: the Ohio State University Wexner Medical Center, the Latino Health Alliance, and Saint Vincent’s Family Services. The Rardin Family Practice Center houses this initiative, which provides care two half-days per month for Spanish-speaking patients, primarily an indigent population. It functions as a free clinic with Dr. Cregg Ashcraft serving as the medical director.

Columbus Free Clinic - The Columbus Free Clinic continues in the Rardin Family Practice Center on Thursday evenings. This is a free clinic run by medical students of The Ohio State University and supervised by volunteer physicians from the community. Our faculty and residents provide supervision along with other physicians from The Ohio State University and the community.

Noor Free Clinic - We continue to partner with the Noor Free Clinic which is staffed by the Muslim physicians and nurses from the central Ohio community. This free clinic is held at the Rardin Family Practice Center on Wednesday evenings. Medical students are encouraged to participate.

Plans for the Future
- Expand our relationship with the Kroger Little Clinics. Ultimately, we would like to be the collaborating physicians for all of their sites.
- Open an OSU Primary Care office in New Albany, Ohio
- Work on our PCMH sites to advance care and meet NCQA level 3 recognition under the 2011 guidelines.

Predoctoral Education continues to lead a variety of curricular and extracurricular programming to enhance the learning of all medical students and encourage those students interested in family medicine to follow their heart. A team of committed teachers, facilitators, preceptors, and mentors works with premedical to graduating medical students. Committed students add leadership to our programs to improve outcomes.

In the Match, 5% of the class (12 students) chose careers in family medicine, with many matching into top programs around the country.

Clinical Assessment and Problem Solving (CAPS)
CAPS is a longitudinal course that spans all four years of medical school. It is focused on student performance of clinical competencies and is designed to reinforce learning of the basic sciences. It encompasses patient-centered history taking, physical examination skills, behavioral/social sciences, clinical reasoning, professionalism, and ethics. Dr. Doug Post is the program director and Dr. Allison Macerollo is one of three associate program directors. This course is both challenging and exciting as it evolves to accommodate a new class each year. Many of our faculty have been instrumental in the delivery of this course via weekly facilitation of small groups. Participating faculty include Drs. Mike Alexander, Laurie Belknap, Maria Riza Conroy, Rob Crane, Liliana Medley-Gomez, Anup Kanodia, Nanette Lacuesta, Don Mack, Sherri Martinez, Janet Mason, John McConaghy, Shalina Nair, Eunice Oppenheim-Knudsen, Luis Salazar, Bushra Sidiqui, and Angela Tucker.

Med 1
Sixty-one members of our faculty hosted Med 1 students for their preceptorships. The preceptorship was longitudinal as students met with their preceptors on a monthly basis. The students worked on various clinical skills, including patient interviewing, physical examination, and team-based care.

Med 2
Our Summer Externship experience for students entering their Med 2 year included 12 inner-city and rural settings. The preceptors hosting students were: Drs. Randall Longenecker, Bellefontaine; Kelly Flemming, Columbus Neighborhood Health Centers, Columbus; Delia Herzog, Damascus Family Medicine, Marysville; David Scoggins, Arbor View Family Medicine, Lancaster; Michael Johnson, Bucyrus Family Practice, Bucyrus; John O’Handley, Mount Carmel Outreach Van, Columbus; and Coshocton County Memorial Hospital Family Practice, Coshocton. Drs. Welker, Cronau, Oza, and Miser hosted students at the Rardin Family Practice Center. Dr. Allison Macerollo coordinated student experiences at OSU Carepoint East Family Medicine. Dr. Randall Wexler coordinated research experiences. The students presented at the Capstone Conference on their experiences and research findings. Student evaluations of the program remain very strong. Many thanks to the OAFP Foundation, the Byers Endowment Fund, and the Lancione Endowment Fund for funding our students.
Two hundred thirteen third-year medical students completed the required four-week family medicine rotation portion of the Ambulatory Care Curriculum. Didactics were held on Monday mornings with four additional workshops and a formative Observed Standardized Clinical Encounter (OSCE) also being offered. Regular and auxiliary faculty presented lectures and workshops including: Drs. Ann Aring, James Cassady, Holly Cronau, Patrick Fahey, Richard Gordon, Laurie Hommema, Melissa Jefferis, Maryanna Klatt, Nanette Lacuesta, Jeffrey Milks, Dan Polonia, Kristen Rundell, Robert Skully, and Jason Weihl. This rotation is highlighted by its clinical component, which uses preceptors representing a wide diversity of practices including: residency practices, along with rural, urban, suburban, and inner city sites involving approximately 61 volunteer preceptors. Fourteen students from the Med 3 class chose to take a second month in family medicine during their selective month. The selective month continues as a separate month of the third year. Dr. Cronau continues to serve as clerkship Director for both the third and fourth-year required courses and continues to work with several departments to coordinate didactics and clinical experiences for both courses.

Seventy-four students took advantage of our fourth-year family medicine offerings. A wealth of diversity is available in our subinternships, electives, and selectives with sites in rural, urban, and suburban locations. Students also pursued electives in sports medicine, research, and integrative medicine. The Department continued to offer Healthcare for the Underserved as part of the DOC 3 Chronic Care Curriculum. This popular rotation is led by Drs. Jack O’Handley and Dana Vallangeon.

**The Family Medicine Interest Group**

The Family Medicine Interest Group (FMIG) has maintained its excellent tradition with a high number of student involvement and excitement.

The FMIG Leadership provided yet another outstanding year of meetings and workshops. The year started with a panel event with family medicine physicians in all different areas: a private practice physician, a practitioner working in concierge medicine, a geriatrician faculty member and last, but not least, a fellow family physician who works at a federally qualified health center in town. Primary care week included a panel of primary care physicians in family medicine, internal medicine, pediatrics, and med/peds and focused on the patient-centered medical home. A new event was held during primary care week called “a walk over lunch” to raise awareness of exercise for our students and the patients they will see. A popular event is the role of the national health services with two current family medicine residents in the program. Other meetings included a talk on alternative medicine and featured two physicians from The Ohio State University Wexner Medical Center Integrative Medicine site. Our last meeting had fourth-year students who matched in family medicine speak about getting ready for rotations and preparing for interviewing.

FMIG workshops are designed to give first and second-year students the opportunity to begin developing clinical skills early in their training. They are organized in conjunction with the residency programs in the Columbus area. This year we held four workshops covering the topics of phlebotomy, intubation, basic suturing, and cardiac murmurs. Dr. Allison Macerollo continues as advisor and has maintained many traditions and started some new programs as well.

**Medical Student Interest Programs**

FMIG Community Service was active this year as well. Many students volunteered with the Mount Carmel Van to provide medical care to the indigent in Columbus. The Tar Wars program to encourage school-age children not to smoke was also a success, as medical students visited multiple schools on several dates reaching hundreds of elementary school students. This was the third year of the students undertaking diabetic screenings in the waiting room of the Columbus Free Clinic. This program was a great success and served many patients and families.
In terms of financial support, FMIG obtained operating and programming funds from the Ohio Union, as well as grants from both the AAFP and OAFP to support our programs. Finally, FMIG receives support from sponsorship of the local residency programs, sponsorship of the Central Ohio Academy of Family Physicians, and the commitment of the Department of Family Medicine leadership and faculty.

**Communications**
The communications part of our programming continues to be strong. Dr. Macerollo oversees the production of the quarterly newsletter with the assistance of Program Coordinator, Amy Peters. It is distributed electronically, with print copies made available to College of Medicine programming and leaders. The newsletter featured updates for both local and national meetings, advice columns for the many aspects of medical student life, and thoughtful articles on doctor-patient relationships written by faculty, residents, and students. The updated website at [http://virtualfp.com](http://virtualfp.com) and the OSU FMIG Facebook site promote the upcoming meetings and activities for our students. The Central Ohio Academy of Family Physicians continues its support of the newsletter in its ongoing partnership with the OSU FMIG.

**Premedical Initiative**
The Premedical Initiative Group (PMI) had a successful 2011-12 year. Headed by Wendy Wang, Sally Ogle, Whitney Christian, and Carrie Mohn, the group conducted several educational meetings for undergraduate students covering such topics as choosing a school to apply to, medical school interviewing techniques, preparing to take the MCAT, and other topics. The group met at University Hall which, by its location, is more in central campus and facilitates better attendance by the undergraduate students. The PMI group made presentations to the Alpha Epsilon Delta group (AED) which is OSU’s premed club. The group also paired undergraduate students with medical students who served as mentors to the undergraduates.

**Family Medicine Leadership Development Program (FMLDP)**
The Family Medicine Leadership Development Program continues to serve as the central portal for engagement of students in the third and fourth year of medical school. The student-designed curriculum for 2011-12 centered on the theme “Individual Excellence can Change the World – a Curriculum from Self to Community to World.” Monthly dinner meetings included time for discussion on various topics related to the theme along with social support. Topics included “Work Life Balance: Finding the Right Career in Family Medicine”; “Professionalism for Physician Leaders”; “Helping the Underserved (the Family Physician in the Community)”; and “Promoting Change in the Community (the Family Physician: Changing the Community and State Activism).” The students very much appreciated the support of the family medicine faculty and staff in their efforts to continue the tradition of the FMLDP.

The FMLDP/FMIG sent six students to the AAFP National Conference in July 2011. The students appreciated the financial support of the Department of Family Medicine for this conference.

**Family Medicine Honors Program**
The Honors Program had an exceptional year with seven students participating in the program with their innovative and creative projects. This program focuses on personal and professional growth. Each project is student designed and the student works with a faculty advisor. Projects span the world of family medicine from integrative medicine to patient education, patient health and wellness, clinical research, and community outreach. Student evaluations of this experience continue to be excellent and the presentation of the projects at the annual Honors Reception is testimony to the wonderful work of our students.

The annual Honors Reception is always a special evening. This year was no exception. The audience had a chance to hear about each of the Honors Program projects and celebrate each student’s success. This special night honored fourth-year students with departmental awards including:

- The Tennyson Williams, MD Award in Humanism
- The Pat Fahey, MD and Larry Gabel, PhD Award in Academic Excellence
- The John Lombardo, MD Award in Community Service
- The Glen Aukenman, MD Award in Leadership
- The Mary Jo Welker, MD Award in Professionalism

Margaret Lee, Brock Trejo, Benjamin Christensen, Jonathan Bonnet, and Vaughn Harris.
Now in its seventh year, the Champion of Family Medicine Award was again given to a physician in another specialty who supports our students in their pursuit of a career in family medicine. This year’s award was presented to Dr. Michael Para from the Department of Internal Medicine Division of Infectious Diseases.

Champion of Family Medicine
Michael Para, MD

Family Medicine Leadership Development Program Officers
Co-Chairs: Matthew Gibson, Margaret Lee, and Jonathan Bonnet
Faculty Advisor: Holly Cronau, MD and Allison Macerollo, MD

Family Medicine Interest Group Officers
President: Sally Ogle
Vice President: Alexander Hooper
Treasurer: Carrie Mohn
Meeting Coordinator: Stephanie Christopher
Workshop Coordinator: Lauren Phillips and Nicole Verdecchia
Desktop Publishing and Advising: Amy Peters, MPH
Advisor: Allison Macerollo, MD

Community Service Officers
Tar Wars: Steven Shin, James Vargo, Vincent Gonzalez, and Alexander Hooper
Mount Carmel Outreach Van: Whitney Christian
CFC Diabetes Screening: Nicholas Ladwig, Ryan Story, Megan Jones, and Thomas Feehan
FMLDP Community Service: All FMLDP Officers
Advisor: Allison Macerollo, MD

Sports Medicine Interest Group Officers
Coordinator: Stephanie Christopher
Advisor: Allison Macerollo, MD

Premedical Initiative Officers
Med 2: Lauren Endersen, Bethany Elliott, Heather Muston, and Kevin Martinez
Advisor: Allison Macerollo, MD

Predoctoral Education Committee
Members: Valerie Niedermier and Malorie Sprunger Schoof

Faculty Advisors: Holly Cronau, MD, Allison Macerollo, MD, and Randy Wexler, MD

We continue to be inspired by our students’ enthusiasm for family medicine, their dedication to their patients, and their leadership abilities that continue to place us in the local, state, and national spotlight.
University and Urban Residency Program
The 2011-12 academic year proved to be another successful year as the University and Urban Programs continued to strive for excellence in educating family medicine residents. For the fourth year in a row both Programs filled within the Match. Much of the Programs’ continued success belongs to the wonderful support of the Department and the outstanding efforts of the residency faculty, staff, and residents who strive toward perfecting the culture and learning environment of the program.

Residency Administration
Dr. Fred Miser continued as Director of the Residency Program, assisted by Dr. Scott Merryman, Associate Residency Director. Dr. Rupal Oza, formerly Assistant Program Director in the University Program, accepted the position of Urban Program Director, filling the vacancy after Dr. Parita Patel left. Sarah Germak continued in her role as Residency Program Coordinator. In March, Meghan Parsley accepted a new departmental position as Faculty Affairs Coordinator. Brittany Campbell joined residency staff in May 2012 as an Office Associate. Ms. Campbell is also responsible for Communications and Marketing for the Department. The Residency Committee continued to oversee residency activities, provide strategic direction, and ensure the program met its goals. “Working Groups” for the Urban Track, curriculum review, and recruitment/retention met to ensure forward momentum continued as the Program worked to implement programmatic changes. Task forces were created to enhance procedural training, didactic sessions, and teaching on the inpatient service for the residents.

Residents
First-year residents for the 2011-2012 academic year were:

Jason Foster, MD
Rajeshwari Nagaraja, MD
Tahir Maya, MD
Magdalena Teodorescu, MD, PhD
Michael Salama, MD

*Joined with advanced credit from Pathology Residency

Second-year residents for the 2011-2012 academic year were:

Margaret Apostol, MD
Anette Bodoky, MD**
Michael Donaworth, MD
Meana Gerges, MD
Stacey Guan, MD, MPH
Mark Kahle, DO

*Transferred into program at PGY-2 Level
**Joined with advanced credit from OB Internship

Resident Satisfaction

% of Ohio State Family Medicine Residency
Positions Filled in Match
Third-year residents who graduated from the Program in the 2011-2012 academic year:

**Graduating Resident**
- Maysa El Sayyid, MD
- Katrina Gordon, MD
- Lindsey Konor, MD
- Simarpreet Vidwan, MD
- Lena Winkler, MD
- Ryan-Niko Hickman, MD
- Shivonne Suttles, MD

**Employment after Graduation**
- Hospitalist Fellowship, Grant Medical Center, Ohio
- Faculty Development Fellowship, Chicago, Illinois
- Residency Faculty, Savannah, Georgia
- Pending – taking time off to be with her young son
- Palliative Medicine/Hospice, Columbus, Ohio
- Sports Medicine Fellowship, North Carolina
- National Health Services Corps Physician, Indiana

**Graduation Dinner**
The Residency Graduation Dinner was held on June 9, 2012 at COSI. Guests included graduating residents, their families and significant others, residents, faculty, and staff. The residents were honored for their accomplishments and contributions to the Program, and faculty members were given awards from the residents as thanks for their involvement with residency education. Drs. Lindsey Konor, Michael Donaworth, and Ryan-Niko Hickman were commended for their contributions as Chief and Co-chief Residents, respectively. Dr. Michael Donaworth provided a very entertaining “roast” for the graduating residents. Dr. Miser provided the keynote address to the graduates, noting how far they had come. He challenged the graduates to make their practice of medicine worthwhile by making the quality of others’ lives better through service.

**At the Residency Graduation Dinner a number of special awards were given to various residents and faculty:**

- **Outstanding Intern of the Year**
  - Michael Salama, MD

- **Tennyson Williams Family Medicine Resident of the Year**
  - Lindsey Konor, MD

- **The Society of Teachers of Family Medicine Resident Teacher of the Year**
  - Maysa El-Sayyid, MD

- **Resident Ambassador Award**
  - Michael Donaworth, MD

- **Dr. Bryan Beggin Community Service Award**
  - Shivonne Suttles, MD

- **Research and Scholarship Award**
  - Lena Winkler, MD

- **Director’s Award for Excellence in Academics**
  - Mark Kahle, DO

- **Family Physician of the Year**
  - John McConaghy, MD

- **Family Physician Teacher of the Year**
  - John McConaghy, MD

- **Urban Program Family Physician of the Year**
  - Rebecca Grant, MD

- **Mikhail Novikov OSU Faculty Member of the Year**
  - Evan Dixon, MD (Cardiology)

**Faculty**
This year, we were sad to see a few great faculty members leave our Program. Drs. Tony Casey, Don LeMay, Scott Merryman, and Liliana Gomez-Medley all left the Program during or at the end of the academic year. The Program spent a good portion of the year recruiting faculty and succeeding in hiring replacements to start during the 2012-13 year.

**Preceptors in the Family Practice Centers included:**

- **Bill Buoni, MD**
- **Don LeMay, DO**
- **Fred Miser, MD**
- **Tony Casey, MD**
- **Allison Macerollo, MD**
- **Rupal Oza, MD**
- **Rob Crane, MD**
- **Don Mack, MD**
- **Angela Tucker, MD**
- **Pat Fahey, MD**
- **John McConaghy, MD**
- **Liliana Gomez-Medley, MD**
- **Scott Merryman, MD**
Attendings on the Family Medicine In-Patient Teams included:

Veronique Bartman, MD  Allison Macerollo, MD  Liliana Gomez-Medley, MD  Rupal Oza, MD
Tony Casey, MD  John McConaghy, MD  Fred Miser, MD

The Maternity Care Group consisted of Drs. Bill Buoni, Tony Casey, Leon McDougle, Fred Miser, and Rupal Oza. The Newborn Nursery Group consisted of Drs. Tony Casey, John McConaghy, Fred Miser, and Rupal Oza.

Faculty Development Series

Dr. Miser led a quarterly faculty development series for the faculty. Issues discussed included characteristics of the outstanding teacher, standards, evaluation and feedback, video precepting, and competency-based curriculum. During this time the faculty examined the Program’s evaluation system to ensure all evaluations were current and appropriate and that both evaluations and curriculum emphasized the ACGME six Core Competencies.

Residency Awards

2011 AAFP Foundation Pfizer Immunization Awards Program – Under the direction of Drs. Bill Buoni and Fred Miser, with the assistance of Ms. Jennifer Lehman and the residents, the Program was recognized as one of 16 programs nationwide to receive this prestigious award. Winners were chosen for their ability to find creative, team-based solutions that increase immunization rates. The Residency Program was chosen based on its plan, which involves all of the residents, to implement a system to increase immunization rates in medically underserved children. Along with a cash award, the Residency Program was recognized at the June 2011 American Family Medicine Residency Director’s Workshop in Kansas City and again at the July 2011 National Conference of Family Medicine Residents and Medical Students.

OSU College of Medicine Diversity Enhancement Award – The OSU College of Medicine Office of Diversity & Inclusion recognized the Residency Program this year as a recipient of the first ever Diversity Enhancement Award. Acknowledging the Program’s efforts toward promoting diversity, not only among its residents and faculty, but also because of its outreach through global medicine.

Scholarly Activity

Scholarship is vital for the academic environment of the Program. Residents are required to complete a scholarly project defined as a data driven research project, a case report, or a critical literature review. Regardless of the type of project, the outcomes expected are a presentation and a manuscript suitable for publication. Our 13th annual Resident Scholarly Activity Symposium was conducted on May 16, 2012. The presentations were diverse and included:

<table>

</tbody>
</table>
Global Health
Three residents completed international rotations this year. In October 2011, Dr. Anette Bodoky traveled to Budapest, Hungary and Drs. Ryan-Niko Hickman and Gregory Ladele travelled to Zimbabwe. They came back with outstanding experiences that they subsequently shared with the faculty and residents in the Program. Needless to say, their view of medicine, and health in general, changed dramatically through their experiences.

Recruitment
Resident recruitment remained a high priority for the Program. Sarah Germak and Drs. Fred Miser, Scott Merryman, and Rupal Oza coordinated the recruitment experience for applicants, providing a personalized approach. Dr. Michael Donaworth was the resident in charge of recruitment for the main and urban programs. Despite the trend of decreased interest in Family Medicine among medical students, interest in OSU was higher than ever before. Quality of applicants accepted for interviews was extremely high, and both programs filled in the match with a group of talented, motivated future Family Physicians.

The following will be first-year residents selected for the 2012-2013 academic year:

Recurr
Steven Albrechta, MD
Lisa Johns, MD
Kerry Kuffenkam, MD
Tri Le, MD
Saida Omarova, MD
Marie Schaefer, MD
Melissa Davis, MD
Charlene Lohner, MD

Medical School
Florida State University
Medical College of Georgia
University of Minnesota
Baylor University
American University of the Caribbean
Yale University
Escuela Latinoamericana de Medicina (Cuba)
Wright State University

Academic Residency Track
Dr. Michael Salama, second-year resident, is enrolled in the Academic Track as he is working toward achieving his MBA degree through the Fisher College of Business.

OAFP/F Resident Delegate
The Ohio Academy of Family Physicians/Foundation once again selected Dr. Meana Gerges, second-year resident, to be the resident delegate to the 2012 AAFP National Congress of Family Medicine Residents. Congratulations to Dr. Gerges for this prestigious honor.
SPORTS MEDICINE

Under the leadership of Tom Best, MD, PhD the Division of Sports Medicine is an active element of the Department of Family Medicine regarding its three-part mission of clinical practice, research, and education. All faculty members contribute to all parts of the mission and are engaged in both clinical care and scholarly activity.

National Recognition
Dr. Best is a Past President of the American College of Sports Medicine (ACSM). Dr. Best serves on the President’s Council for Physical Activity and the External Advisory Board for the U.S. Bone and Joint Initiative

Research
Research is an important part of the mission of both the Division of Sports Medicine and the Department of Family Medicine. Faculty members participate as PIs, Co-PIs, and investigators on studies within the Division as well as collaborating with Orthopedics, other departments within the College of Medicine, and other colleges across the campus. Faculty regularly travel to regional, national, and international meetings to present their research as well as participate on discussant panels on a wide variety of Sports Medicine topics. As a group, the Division authored over 27 peer-reviewed papers. The faculty also delivered 44 presentations at local, national, and international conferences.

In addition to his work on his NIH funded research project on eccentric muscle mass, Dr. Best participated in two other nationally funded studies. Dr. James Borchers continues his work investigating the role of topical vs. oral non-steroidal anti-inflammatories following ankle sprains. This is a prospective study to determine if there is a difference in recovery between topical and oral agents in Division-1 athletes.

In addition to his two NIH funded projects, Dr. Timothy Hewett received two industry funded grants in the past year. These studies will examine the effects of a prophylactic knee brace and neuromuscular training on knee joint loading and the development of a sensor brace to measure knee kinematics.

Fourth-Year Medical Students Sports Medicine Rotation
The Division of Sports Medicine is committed to medical student education and offers a four-week elective to fourth-year medical students in Sports Medicine. The rotation is offered for six four-week blocks during the academic year. A total of 16 students completed the rotation during the 2011-12 academic year. Evaluations for the elective were high; the elective is one of the college’s most popular and highly rated among fourth-year electives. Seventeen students are currently enrolled in the elective for the 2012-13 academic year.

The primary goals of the rotation are:
• Exposure to a multidisciplinary approach for the practice of Sports Medicine
• Become familiar with common problems encountered in Sports Medicine, their presentation, diagnosis, and management
• Learn and refine musculoskeletal physical examination skills
• Become familiar with common procedures used in Sports Medicine (i.e., injection techniques, fracture care, splinting/casting)
• Office hours with assigned physician(s)
• Attendance at weekly Sports Medicine conferences
• Attendance for training room coverage with their assigned physician
• Attendance at three athletic events over the four-week rotation with their assigned physician
• Complete required readings
• Presentation with a written paper on topic of choice at the end of the four-week rotation

Resident Education
The Division of Sports Medicine supports the mission of resident education within the Department of Family Medicine. An elective is available for second-year residents with an interest in Sports Medicine. Sports Medicine is required of all third-year residents in the Department and is completed at the OSU Sports Medicine Center. Regardless of whether the rotation is elective or required, the residents are actively involved with conferences and Grand Rounds. Faculty members of the Division also provide resident education via workshops and lectures through the Ohio State Family Medicine Residency Program. This also includes a longitudinal rotation, involving second and third year residents. This rotation provides a more in-depth sports medicine learning experience and is available to qualified applicants. A total of eight residents completed rotations in Sports Medicine during the recent year.
Fellowship
The Division of Sports Medicine is dedicated to advanced education in Sports Medicine by offering a one-year Fellowship in Primary Care Sports Medicine leading to eligibility to complete the Certificate of Added Qualifications (CAQ) in Sports Medicine. The program currently accepts two fellows per year. The fellowship is accredited by the ACGME; fellows are expected to pass the CAQ exam once their fellowship is completed. In addition, fellows are expected to present at a national meeting of their choice during their year at OSU. Scholarly writing in the form of a systematic review with faculty involvement is also expected. Mehran Mostafavifar, MD and Jessica Wertz, DO both presented abstracts at national meetings: AMSSM, and ACSM.

Fellows 2011-2012
• Jessica Wertz, DO
• Mehran Mostafavifar, MD

Clinical Programs
The OSU Sports Medicine Center, a multidisciplinary treatment center, offers family medicine, orthopedics, physical therapy, and psychological and nutritional counseling services by individuals who understand and are experienced in dealing with competitive and recreational athletes. This expertise is applied to patients who are physically active or wish to embark on a healthier lifestyle. The Department of Family Medicine is a partner with the Department of Orthopedic Surgery and OSU Wexner Medical Center in the OSU Sports Medicine Center.

Athletic Team Coverage
The Division of Sports Medicine provides care for all 36 varsity sports at Ohio State. Faculty members of the Division provide comprehensive care for all athletes at Ohio State along with event coverage for the entire Athletic Department. During the past year Sports Medicine became the team physician for Capital University, covering its athletic programs and student health. High school coverage continues to be a priority of the Division of Sports Medicine. Faculty and fellows of the Division provide care for many local high schools and for state tournaments for the Ohio High School Athletic Association. A significant amount of time is dedicated to the care of student athletes from the Columbus Public Schools. A free walk-in clinic at East on Saturday mornings continues to draw injured athletes for assessment.

Multiple community events such as Pelotonia are also covered by the faculty and fellows of the Division. Resident and student involvement is encouraged.
Outreach

The Division of Sports Medicine recognizes the importance of community outreach efforts. The following events reflect the dedication to the community by the Sports Medicine faculty:

- Best TM, Team Physician for Columbus Crusaders and Worthington Christian
- Best TM, Team Physician for Columbus Ballet Met, 2011, 2012
- Borchers JR, Mostafavifar MA, Wertz J, Saturday morning injury clinic (free service to Columbus Public Schools), August - November 2010, 2011, 2012
- McCamey K, Pelotonia Bike with Brutus event, August 2011, 2012
- Salazar L, Team Physician, Columbus State University, 2011, 2012
- Salazar L, Team Physician for Eastmoor and Walnut Ridge High Schools, Columbus 2011
- Salazar L, Team Physician men’s and women’s OSU Rugby teams, 2011, 2012
- Salazar L, Physician coverage for Pelotonia 2011

Faculty

- Thomas Best, MD, PhD, FACSM, Professor of Family Medicine and Pomerene Chair and Team Physician
- James Borchers, MD, MPH, Associate Professor of Clinical Family Medicine and Team Physician
- Kendra McCamey, MD, Clinical Assistant Professor of Family Medicine and Team Physician
- Ray Pongonis, DO, Clinical Assistant Professor of Family Medicine and Team Physician
- Luis Salazar, MD, Clinical Assistant Professor of Family Medicine and Team Physician
The Ohio State University Center for Integrative Medicine (OSU/CIM) is a unique medical practice center that combines the best of integrative family and internal medicine with evidence-based complementary/alternative medical modalities. The Center is located at 2000 Kenny Road in a 9,460 square foot facility. The Center, in its seventh year of clinical growth, is part of OSU Medical Center’s Primary Care Network.

Dr. Glen Aukerman is the Medical Director. He also is the Director of Integrative Medicine in the Department of Family Medicine. The Center for Integrative Medicine has been a member of The Consortium of Academic Health Centers for Integrative Medicine since 2008. In May 2010, The Ohio State University hosted this national organization’s steering committee Steering Committee meeting and dinner.

The OSU/CIM has gained community support, receiving donations in excess of $15,000. The Center for Integrative Medicine is actively engaged in strategic planning and development funding, with two current funds: The Medicine Program Fund and The Glen Aukerman Endowment Fund for Integrative Medicine.

The OSU/CIM allows students pursuing degrees in medicine and other healthcare professions opportunities to study integrative medicine’s role in their career of choice. OSU/CIM provides educational sessions for medical students, nurse practitioners, dietetics students, departmental grand rounds presentations, and rotation and shadowing opportunities for Med 1 through Med 4 students, as well as residents from departments such as Family Medicine, Internal Medicine, Psychiatry, and Dermatology in and outside of Ohio State University. The OSU/CIM also provides unique informational and shadowing opportunities to physicians (to date, has included physicians from the following specialty areas: Dermatology, Emergency Medicine, Endocrinology, Neurology, and Psychiatry) and nurse practitioners from the community.

The OSU/CIM offers a one-year Integrative Medicine Fellowship open to any specialty. The Fellowship offers a unique opportunity for physicians to study with experts in all five domains of complementary medicine as well as integrative family and internal medicine to develop clinical, research, and academic capabilities in the field of Integrative Medicine.

The OSU/CIM has presented on Integrative Medicine through didactics: Grand Rounds and special meetings for Family Medicine Residency, Internal Medicine, University Hospital East, and the James, as well as courses for medical, nursing, and allied health students. From July 2011 thru June 2012, over 200 presentations were conducted by OSU/CIM providers at regional and national conferences, for community groups and local and network hospitals, and through the OSU/CIM Community Series. The OSU/CIM Community Series includes regular community education workshops on a variety of topics including yoga, meditation, integrative medicine, acupuncture, chiropractic, nutrition, massage, and Ayurveda. Attendance has increased to as many as 200 participants for some sessions held in the Martha Moorehouse Auditorium.

Practitioners July 2011 thru June 2012 at the Ohio State Center for Integrative Medicine Include:

Integrative Family Medicine .................................................................Glen Aukerman, MD, DABFP, DABHM
.................................................................................................Ruslana Kurpita, MD, DABFP, DABHM
............................................................................................Anup Kanodia, MD, MPH
.................................................................................................Kathryn Scholl, MSN,CNP

Integrative Internal Medicine/Pediatrics ............................................Linda Chun, MD, DABIM, DABP

Ayurveda ................................................................................................Hari Sharma, MD, FRCPC, DABHM

TCM/Acupuncture ......................................................................................David Wang, LAC
.................................................................................................Hailing Zhang, LAC

Chiropractic Rehabilitation .................................................................John Grandominico, DC

Massage Therapy ......................................................................................Cheryl Boschert, LMT
.................................................................................................Rhonda Crockett, LMT
.................................................................................................Jean LaPolla, LMT
.................................................................................................Amanda Sonk, LMT
The continuing medical education program in the Department, held in conjunction with monthly faculty meetings, offered many outstanding presentations in all areas of family medicine. The evaluations of the presentations were all excellent; many of the speakers have been requested to return in the future to share other timely topics.

Each participant is awarded 1-hour of category 1 AAFP prescribed credit. All family physicians, residents, and nurse practicioners are invited to join us at 7:00 am the first Thursday of every month in Room 233, Northwood and High Building (Rardin Family Practice Center). http://ccme.osu.edu/.
The Ohio State University Department of Family Medicine continues to move toward becoming one of the top research departments in the nation. The Research Committee meets on a quarterly basis to guide the Department’s research agenda and priorities. Members of the Research Committee include Drs. Lorraine Wallace (Chair), Tom Best, Pat Fahey, Anup Kanodia, Leon McDougle, Fred Miser, Doug Post, Mary Jo Welker, Randy Wexler, plus Jennifer Lehman, Paula Smailes, and Tonya Van Fossen.

The Department has a strong infrastructure support to accomplish its research mission. Joan Allen, RN, MBA Clinical Research Specialist, oversees the regulatory and financial aspects of the Department’s industry-sponsored clinical trials. Paula Smailes, RN, MSN, CCRC, CCRP is a full-time Clinical Research Specialist and coordinates all departmental trials. Jennifer Lehman, CRA, CCRC, CCRP continues her outstanding work as Clinical Research Manager for the Department.

Scholarship Working Group
Under the direction of Dr. Lorraine Wallace, the Scholarship Working Group (SWG) was launched in January 2012. The purpose of the SWG is to equip junior faculty members with the necessary scholarship-related skills (e.g., formulating research questions, developing a research proposal, writing for peer-reviewed publications) needed to advance their academic careers. The SWG meets on a monthly basis to discuss timely research-related topics and plan collaborative projects.

In May 2012, as part of the SWG, Drs. Macerollo, Mack, Oza, and Wallace wrote and submitted questions for inclusion in the Council of Academic Family Medicine’s Educational Research Alliance (CERA) survey. Their questions, related to chronic pain management, were selected for inclusion in the next CERA survey round to be distributed to family medicine physician members of the Society of Teachers of Family Medicine, North American Primary Care Research Group, Association of Family Medicine Residency Directors, and Association of Family Medicine Department Chairs. Drs. Macerollo, Mack, Oza, and Wallace will submit at least two manuscripts based on the data generated from this project. Additionally, the team will submit abstracts for presentations at national meetings once data analyses from this project are complete.

Industry-Sponsored Clinical Trials
The departmental clinical trials enterprise has been busy over the past year. Dr. Scott Merryman completed his first clinical trial as Principal Investigator (PI) and did a fantastic job! His study not only exceeded the contracted enrollment number, but also underwent a sponsor audit by Merck and passed with flying colors. Dr. Merryman and his team received many accolades from the audit, which was great for them and the Department. With Dr. Fred Miser serving as PI, we also completed the second year of the flu vaccine study. We were able to enroll 49 patients in the flu vaccine study in just two weeks. We continued to establish our relationship with Merck with a sitagliptin study on which Dr. Miser served as PI. The Medical Director for clinical trials, Dr. Pat Fahey, led a hypertension study sponsored by Novartis.
Merck: A phase III, multicenter, randomized, double-blind, placebo-controlled clinical trial to study the safety and insulin-sparing efficacy of the addition of sitagliptin in patients with Type 2 diabetes mellitus who have inadequate glycemic control on Insulin Alone or in Combination with Metformin (3/12-present) PI: Fred Miser, MD, Sub-I’s: Patrick Fahey, MD, Fred Miser, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

Merck: A clinical trial comparing the efficacy and safety of a sitagliptin-based treatment paradigm to a liraglutide-based treatment paradigm in patients with type-2 diabetes mellitus that have inadequate glycemic control (4/11-12/11). PI: Scott Merryman, MD; Sub-I’s: Patrick Fahey, MD, Fred Miser, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

Sanofi Pasteur: Efficacy study of Fluzone high dose Trivalent vaccine compared with Fluzone vaccine in elderly adults (9/11-5/12). PI: Fred Miser, MD Sub-I’s: Patrick Fahey, MD, Randy Wexler, MD, Paula Smailes RN, MSN, Jeanette Davis, RN, Joan Allen, RN, MBA , and Angela King.

Novartis: A 12-week, multi-center, randomized, double blind, active control parallel group study to evaluate efficacy and safety of the combination of Valturna and Amlodipine or Valturna and Chlorthalidone versus Valturna alone in patients with stage 2 hypertension (5/11-1/12). PI: Patrick Fahey, MD Sub-I’s: Fred Miser, MD, Paula Smailes RN, MSN, and Joan Allen, RN, MBA

Investigator-Initiated Research

Dr. Maryanna Klatt continued her research utilizing her protocol Mindfulness in Motion to assess reductions in stress in working adults. Developing this unique intervention has led to Dr Klatt being sought out both nationally and internationally to test this protocol for various populations that might benefit from this stress reduction strategy. Mindfulness in Motion can be adapted for age, gender, etc, thus it has wide applicability. Expressed interest from researchers in Canada, Denmark, Sweden, Germany, and in the U.S. speaks to the high level of interest in effective stress reduction protocols that can be implemented at the work/school site. Stress hormones in saliva were found to be reduced by 40% in a randomized trial of nurses working in a surgical intensive care unit. In another RCT conducted with a group of Neonatal Intensive Care Nurses their resiliency skills were significantly increased. Both manuscripts are in process. In a randomized trial of older adults, Mindfulness in Motion was shown to impact cognitive functioning as verified by fMRI. Two manuscripts are in review and this data served as pilot data for a R01 submitted June 2012 .The Mindfulness in Motion CD’s and DVD’s that were generated for participants to practice the stress reduction strategy daily have been Service Marked by the Ohio Secretary of State with licensing and commercialization of the program in 2011. The practice CD/DVD is now available on Amazon.com. http://www.amazon.com/Mindfulness-Motion-Daily-Dose-Practice/dp/1934849855.

Adapting this adult worksite program to be appropriate for children in the classroom, Dr Klatt designed a DVD program that classroom teachers could implement. Adding a nutrition component, Dr Klatt worked with Dr. Gail Kaye (College of Public Health) to develop the program: Fuel for Learning. The focus is on stress reduction and healthy behaviors, with the overall goal of reducing childhood obesity. Teachers conducted the DVD-based eight-week nutrition and stress reduction program in their classrooms. With a grant from OSU Outreach and Engagement, Drs. Klatt and Kaye were able to study this with 167 3rd graders in 6 different classrooms. Statistically significant changes were found in classroom hyperactivity behavior (p=.045). Manuscript is in progress. Dr. Klatt believes that there is an unexplored mine of low-cost, high-yield movement and meditation practices that have broad pragmatic value for both adults and children. Her goal is to expose people to yoga, meditative, and breathing techniques that can be done during the day, helping them achieve the life and balance that they desire.
As part of the OSU Faculty Teaching Scholars Project, Dr. Don Mack conducted a study entitled, “A Comparison of Three Models to Teach Geriatric Cognitive Vitality.” The objective of this study was to compare three different curricular models used in teaching geriatric content to first year medical students.

Drs. Don Mack and Doug Post conducted a research project on “health coaching” with funding from the Crisafi-Monte fund. Initial results from the study were positive which led to the development of a health coaching project for all medical students. The Health Coaching Project strives to instill in the student the skills and practical experience to become proficient in health coaching. During their first year, students receive training in health coaching via eLearning modules and practice sessions with a peer, and then are evaluated on their health coaching skills in a summative OSCE. These training activities are designed to prepare students for their health coaching role with patients. Students work with their longitudinal practice preceptor to identify a patient with chronic disease who is well-suited to the longitudinal health coaching program. They meet one-on-one with this patient and conduct a needs assessment. Later, students collaborate with their patient to develop a personal action plan, based on the results of the needs assessment. The student reconvenes with the patient for three additional visits during the second year of the project. Patient progress is assessed, and behavioral change counseling and support is provided as needed. Students also experience a longitudinal group session facilitated by a professional health coach to address challenges they may be experiencing with their patients and to strategize solutions. Towards the end of their second year in the project, students present the results of their health coaching project to peers in a longitudinal group session.

Dr. Leon McDougle’s collaborative research currently involves serving as Co-PI for the study entitled, Closing the Health Disparity Gap: Impact of Health Empowerment Technologies on Elderly African American’s Health Provider Relationships. NIH RFA-MD-07-002 Research Infrastructure In Minority Institutions (RIMI)[P20] 5-year Ohio State University subcontract in partnership with Greta Winbush, Ph.D., Associate Professor of Psychology and Gerontology at Central State University, funded October 2008. In addition, in collaboration with 11 medical schools, Dr. McDougle serves as the PI for a study entitled, A National Evaluation of Long-term Outcomes for Premedical Postbaccalaureate Programs Designed to Advance Workforce Diversity and Health Equity, which builds upon his initial work published in the article entitled, Survey of Care for the Underserved: A Control Group Study of Practicing Physicians Who Were Graduates of The Ohio State University College of Medicine Premedical Postbaccalaureate Training Program (Academic Medicine 2010;85:36-40). Furthermore, Dr. McDougle serves as a co-investigator for the studies entitled, The Ohio State University Internal Medicine Residency Primary Care Track: A new medically underserved, community-based program from an established Educational Innovations Project. DHHS Health Resources & Services Administration, 09/30/2010 – 09/29/2015; and DISCOVERY PREP (Diversity & Innovation in Science Created by Opportunities Valuing Engagement of and Research by Young Biomedical and Behavioral Scientist in a Postbaccalaureate Research Education Program), this four-year NIGMS award was funded January 2010. Lastly, Dr. McDougle was invited to serve on the Editorial Board for Spectrum: A Journal on Black Men - October 1, 2011 to September 30, 2014.
Dr. Fred Miser worked on several NIH funded investigations. He collaborated with Dr. Carla Miller from Human Nutrition regarding mind-based approaches to the management and treatment of diabetes and obesity. Dr. Miser served as a co-investigator, with Dr. Celia Wilson, to test the feasibility of a decision support intervention for making choices about managing mild-to-moderate depressive symptoms among type II diabetics. He served as a co-investigator, with faculty members from Case Western Reserve University, on the NIH funded “Systolic Blood Pressure Intervention Trial (SPRINT)” to examine the effectiveness of tight blood pressure control in hypertensive adults aged ≥55 years of age.

Dr. Doug Post is PI of a three-year study funded by the Lance Armstrong Foundation entitled, “Developing a Communication Tool for Appalachian Breast Cancer Survivors.” Additionally, Dr. Post is Co-PI on a 5-year project funded by the American Cancer Society National Division, the Ohio Patient Navigator Research Program. Dr. Post presented the results of two of his research projects at the International Conference on Communication in Healthcare in Chicago, IL in October 2011.

Dr. Lorraine Wallace was PI on two investigator-initiated studies, funded by Purdue Pharma, to explore patient understanding of opioid educational materials. Specifically, she and Drs. Miser, McDougle, and Wexler designed and validated a survey to evaluate patient understanding of opioid medications, developed patient-centered educational materials to promote safe and effective opioid use, and conducted a community-based project to explore the daily experiences of patients living with chronic pain. Dr. Wallace continues to serve as Deputy Section Editor of BMC Family Practice and on the Board of Directors for the North American Primary Care Research Group.

Dr. Randy Wexler continues his work as PI on a two-year study funded by the Agency for Healthcare Research and Quality entitled, “Use of Health Information Technology to Increase Primary Care Access in Medicaid Patients.” He is also the PI on a grant funded by the American Academy of Family Physicians Foundation, with Dr. Michael Edwards and Ms. Jennifer Lehman, to develop and validate a Patient-Centered Medical Home (PCMH) survey instrument to capture patients’ perceptions related to receiving care in practices which have been transformed through implementation of the PCMH model. Dr. Wexler also served as PI on an unrestricted grant from the American Academy of Family Physicians Foundation for the study of PCMH implementation. Specifically, related to this project he is examining lessons learned from PCMH implementation and how a PCMH-based network informs development of an Accountable Care Organization.

Dr. Tom Best’s research continues to focus on the pathophysiology of muscle-tendon injuries. While treating muscle weakness and pain with pharmaceutical drugs and traditional exercise regimens has met with some success, large numbers of people have turned to alternative approaches including myofacial release, massage, acupuncture, and yoga. According to the American Massage Therapy Association (AMTA, http://www.amtamassage.org) the benefits of massage on muscle include: relief of muscle tension, STET stiffness, faster healing of strained muscles and sprained ligaments, reduced muscle pain, swelling, and spasm, greater range of motion, and even enhanced athletic performance. Although at this time many claims are made about massage, there are only a few studies to support its use. Moreover, the biological mechanism(s) by which massage works are largely unknown. To this end, the research team is utilizing its well-established in vivo rabbit model of eccentric exercise-induced muscle inflammation and weakness that closely mimics muscle injuries in athletes to examine the efficacy of massage therapies.
The overall hypothesis is that biomechanical signals generated during massage therapies at the correct magnitude, duration, and frequency are: (i) potent anti-inflammatory signals that inhibit muscle inflammation by suppressing expression of proinflammatory mediators and (ii) effective signals that augment muscle regeneration and repair by upregulating expression of genes essential for muscle cell proliferation and differentiation. This multidisciplinary effort, supported by the NIH, will hopefully provide a strong rationale for future mechanistic studies and eventually clinical trials investigating the optimal indications and strategies for massage therapies to restore skeletal muscle dysfunction and improve overall human health. A second area of focus is the role of the quadriceps in articular cartilage deterioration and osteoarthritis. A team consisting of Orthopedic Surgeons, Mechanical Engineers, Physical Therapists, and Biostatisticians has come together here at OSU to understand more about this common problem in order to target new therapies and preventive measures. A final area of research involved the pathophysiology and treatment of chronic low back pain (LBP). This project involves a collaboration between colleagues in Engineering and Biostatistics that is attempting to extend our current thinking about LBP – its etiology and its treatment.

**Drs. Tom Best and James Borchers** are co-investigators on a recently funded NIH grant entitled, “Functional Evaluation to Predict Lower Extremity Musculoskeletal Injury.”

**Dr. Timothy Hewett**, Director of Research for the Sports Health & Performance Institute, is currently working on various studies examining ACL injuries.

**Dr. Luis Salazar** is currently working with **Dr. Mike Donaworth** (Co-Chief resident) on a project to assess patients’ awareness and understanding of the risks associated with concussion.

**Education-Related Research and Scholarship**

Department of Family Medicine faculty continue to work on three U.S. DHHS Health Resources and Service Administration (HRSA) funded educational grants.

**Dr. Holly Cronau** is the PI on the medical student education grant project entitled, “Virtual Reality: A Unique Means to Teach the Reality of the Patient-Centered Medical Home.” The major objectives of this project are to: (1) create virtual “realities” to enhance Ohio State College of Medicine students’ learning regarding patient-centered medical home (PCMH) principles, that can be adopted or adapted by other educational programs; (2) assure that Med 1 and Med 2 Ohio State medical students, through the present CAPS I and CAPS II pre-clinical curriculum, are well grounded in Quality Measures and Health Information Technology elements of the PCMH model; and (3) assure that Med 3 and Med 4 Ohio State medical students, through the present year-three 8-week Ambulatory Clerkship and year-four 4-week DOC 2 Chronic Care Preceptorship, are well grounded in Patient Experiences and Practice Organization elements of the PCMH model.

At the residency program level, **Dr. Fred Miser** is the PI on: “The Patient-Centered Medical Home: Adaptable Curriculum Models, Instructional Modules, and Implementation Plans.” The main purpose of this project is to plan, develop, and implement educational and training modalities relative to the Ohio State University Family Medicine Residency Program that promote family medicine residents’ knowledge and abilities regarding the PCMH.

**Dr. Mary Jo Welker** is serving as PI on the following departmental project, “Ohio State Primary Care: Foundation for a Central Ohio Accountable Care Organization.” This 5-year project began in October 2011. The purpose of this project is to empower the Department of Family Medicine and the Division of General Internal Medicine to be transformational change agents within the Ohio State University Health System toward establishing and expanding an Accountable Care Organization in Central Ohio.
Investigator-Initiated Research

**Not Funded:**

**Best TM.** Influence of Trunk Neuromuscular Control on Knee Biomechanics. National Institutes of Health, one-year grant, January 2013, $419,375, Co-Investigator (Not Funded).

**Best TM.** WE CARE: Wellness Education for Children at Risk, National Institute of Food & Agriculture, four-year grant, January 2012, $2,499,869, Co-Investigator (Not Funded).

**Hewett TE.** Development of Clinical Prediction Tools for Secondary ACL Injury Risk, National Institutes of Health / National Research Service Awards, three-year grant, September 2012, $146,070, Principal Investigator (Not Funded).

**Hewett TE.** Playing Surface Moisture and Injury Risk: Development and Validation of Assessment Methods Used to Determine Hardness and Traction Values of Natural Grass and Synthetic Turf Athletic Fields. NFL Charities, one-year grant, July 2012, $96,268, Co-Principal Investigator (Not Funded).

**Klatt M.** Mindfulness Based-Stress Reduction Intervention for the Neonatal Intensive Care Unit (NICU) Personnel. The Center for Clinical and Translational Science (CCTS), one-year grant, January 2013, $25,000 (Not Funded).

**Prakash R, Klatt M.** Mindfulness Training and Functional Connectivity of the Aging Brain. one-year grant, December 2011, $100,000, Co-Investigator (Not Funded).

**In-review:**

**Hewett TE.** Can Physical Examination Predict Patient-reported Outcomes of ACL Reconstruction? National Institutes of Health, five-year grant, September 2012, $480,600, Co-Investigator (Status Pending).

**McDougle L, et al.** Renewing the Covenant: Diversity Objectives and Strategies for HEALTH. Urban Universities for Health – A Learning Collaborative, four-year grant, September 2012, $84,850 (Status Pending).

**Miller C, Willis CE, Miser WF.** Decision Support and Type 2 Diabetes. National Institutes of Health - National Institute of Diabetes and Digestive and Kidney Diseases, two-year R21 grant, September 2011, $418,961, Co-Investigator (Status Pending).

**Post DM, Shapiro C, Wood M, Naughton M, Atkins J.** Increasing Adherence to Adjuvant Hormonal Therapy among Breast Cancer Patients: A Pilot Study to Develop and Refine a Novel Intervention. Alliance for Clinical Trials in Oncology Foundation, one-year grant, September 2012, $147,000 (Status Pending).
