LETTER FROM THE CHAIR

It has been another great year for the Department of Family Medicine at The Ohio State University College of Medicine. I will remind us all of just a few of our accomplishments:

- Dr. Fred Miser, Professor and Residency Director, was the recipient of the 2013 American Academy of Family Physicians’ (AAFP) Exemplary Teaching Award.
- Dr. Leon McDougle, Associate Professor, was appointed as The OSU Wexner Medical Center’s first Chief Diversity Officer (CDO). This appointment is in addition to Dr. McDougle’s current role as Associate Dean for Diversity and Inclusion.
- Dr. Lorraine Wallace, Associate Professor, was appointed as an Assistant Editor of *Family Medicine*. *Family Medicine* is the official journal of the Society of Teachers of Family Medicine.
- Drs. Donald Mack and Fred Miser were elected to the Board of Directors of the Ohio Academy of Family Physicians (OAFP). Dr. Mack was elected Treasurer to the Board of Directors of the OAFP and now serves on their Executive Committee. Dr. Miser was elected as Delegate-At-Large to the Board of Directors to the OAFP.

- Dr. Lorraine Wallace, Associate Professor, was appointed Director of the Area Health Education Center’s Clear Health Communication Program.
- Dr. James Borchers, Associate Clinical Professor and Primary Care Sports Medicine Fellowship Director, was recently named Physician Lead for Clinical Operations for OSU Sports Medicine.
- Dr. Randy Wexler, Associate Professor and Vice Chair of Clinical Affairs, is serving as a Co-Investigator on a Small Business Innovation Research (SBIR) program grant funded by the National Institutes of Health (NIH). Dr. Chris Taylor, Associate Professor of Medical Dietetics at The Ohio State University, is site Principal Investigator of the project.
- Dr. Ann McAlearney, Professor of Family Medicine and Vice Chair for Research, had an article nominated for the “Article of the Year Award” by the American College of Healthcare Executives. The article, “Organizational Coherence in Health Care Organizations: Conceptual Guidance to Facilitate Quality Improvement and Organizational Change,” was published this spring in *Quality Management in Healthcare*.

- Dr. Mary Jo Welker, other OSUMC leaders, Nationwide Children’s Hospital, and Healthy New Albany helped the city of New Albany break ground for the Center for Healthy Living.
- Dr. Robin Hunter, Clinical Assistant Professor and Chiropractor with OSU Sports Medicine and Rehabilitation, was inducted into the American Chiropractic Association (ACA) Sports Chiropractic Hall of Fame at the Meadowlands, New Jersey. She is only the 10th inductee into the Hall of Fame and is the first woman to be bestowed this honor.
- Dr. Ann McAlearney, Professor of Family Medicine and Vice Chair for Research, served as peer-reviewer for a manuscript submitted to the *New England Journal of Medicine*.
- Dr. Thomas Best, FACSM, Professor, Pomerene Chair and Director of the Division of Sports Medicine, received the 2014 Citation Award from the American College of Sports Medicine (ACSM). The ACSM Citation Award represents a lifetime of work and is one of the highest awards given by ACSM.
- Dr. Mary Jo Welker, Professor and Family Medicine Department Chair, Associate Dean for Primary Care, and Executive Director of OSU’s Primary Care Network, was chosen to serve as the AAFP Foundation’s representative on the *Family Medicine for America’s Health: Future of Family Medicine (FFM) 2.0 Project*.
- Dr. Wilburn Weddington, an emeritus faculty, published his book “Salt of the Earth Georgia Boy,” which is the story of a young black sharecropper and his journey to be a Professor of Family Medicine at The Ohio State University.
- Dr. Milisa Rizer, Associate Professor of Clinical Family Medicine and Chief Medical Information Officer, successfully completed the American Board of Preventive Medicine’s certification examination in Clinical Informatics.
The Mindfulness Program developed by Dr. Maryanna Klatt, Clinical Associate Professor of Family Medicine, has been recently adopted by the University of Minnesota-Duluth and other organizations throughout the local and national communities. We are excited for Dr. Klatt not only developing this innovative program, but for her success in disseminating it throughout the United States.

Drs. Holly Cronau and Donald Mack were inducted into Courage to Teach (CTT). Faculty from OSU, OhioHealth, Mount Carmel, and Nationwide Children’s Hospital are selected for CTT based on teaching excellence and a humanistic approach to medical education.

Dr. Maryanna Klatt, Clinical Associate Professor of Family Medicine, received a grant from the Women’s Place at Ohio State University. The grant provides Dr. Klatt the opportunity to be a Faculty Associate in the President and Provost’s Leadership Institute (PPLI).

The work of Ann S. McAlearney, ScD, Professor of Family Medicine and Vice Chair for Research, was recently highlighted in Becker’s Hospital Review. The article, “Six Questions to Evaluate Population Health Initiatives,” was based upon a presentation given by Dr. McAlearney at the American College of Healthcare Executives’ 57th Congress on Healthcare Leadership meeting in Chicago.

Dr. Fred Miser, Professor and Residency Director, received the Gold Level Association of Family Medicine Residency Directors (AFMRD) 2014 Program Director Recognition Award. This award is bestowed upon residency directors who have demonstrated accomplishments in tenure, training, performance, and advocacy.

Dr. Marie Schaefer, Chief Resident, was selected to receive a resident scholarship award to attend the Family Medicine Congressional Conference (FMCC) in Washington, DC. The purpose of the FMCC is to educate participants on family medicine’s legislative priorities and how to advocate for those issues.

Dr. Michael Alexander, Clinical Assistant Professor, was named an Expert Educator for Part 1 of the Lead.Serve.Inspire curriculum.

Dr. Laurie Belknap, Assistant Professor, was appointed as the Unit Director for Family Medicine for the Lead.Serve.Inspire curriculum.

Dr. Holly Cronau, Associate Professor, was selected to serve as Integration Director for the Patients Within Population Ring of the Lead.Serve.Inspire Curriculum—Part 2.

Dr. Allison Macerollo, Assistant Professor, was selected to be an Expert Educator for Part 2 of the Lead.Serve.Inspire curriculum. Additionally, Dr. Macerollo will serve as a Portfolio Coach of a small group of medical students over the course of their four years of study.

Dr. John McConaghy accepted the new role of Vice Chair for Quality Affairs effective July 1, 2014. In this role, Dr. McConaghy will lead efforts that improve the quality of care across all three missions with a focus on both the inpatient and outpatient settings.

The Family Medicine Interest Group (FMIG), led by Drs. Allison Macerollo and Cronau, was selected as a 2014 Program of Excellence Award winner by the American Academy of Family Physicians (AAFP).

Dr. Maryanna Klatt, Clinical Associate Professor of Family Medicine, received a grant from the OSU Grants for Research and Creative Activity in the Arts & Humanities Program. Dr. Klatt is serving as Co-Principal Investigator of the project entitled, “Recuperating the Social Brain: An Interdisciplinary Investigation into Harm and Healing,” for persons who have experienced a brain injury.

The AAFP Foundation selected our program to receive the 2014-15 Senior Immunization Grant Award. I would particularly like to thank Drs. Buoni, Davis and Tessier for their excellent work.

Dr. P. Tennyson Williams, founding Chair of the Ohio State Department of Family Medicine, upon his retirement pursued a long-time interest in photography. As you can see from the short YouTube video, he has developed quite a unique approach. Please enjoy: http://youtu.be/E7pyQ8wldrc

- Mary Jo Welker, MD
COMMITMENT TO EXCELLENCE

Mission
To optimize the quality of people’s lives by advancing family medicine principles through:
- Service
- Education
- Research and scholarship
- Personalized health care
- Community engagement

Vision
The Ohio State University Department of Family Medicine will be a recognized leader in shaping the future of family medicine.

Values
The Ohio State University Department of Family Medicine is committed to:
- Excellence
- Compassion
- Integrity
- Collaboration
- Innovation

“Our offices continue to be leaders in moving family medicine forward by being innovators in patient care, education, research, and scholarship while evolving a patient-centered, team-based model of care. All our offices were re-recognized by the National Committee on Quality Assurance as Level 3 Patient-Centered Medical Homes. Our quality metrics on blood pressure control and A1C control exceed national standards, and our 30 day readmission rates are 6% below the national average. We have implemented a compensation model that we believe is a model for the future, in which the totality of work done in the office, including teaching, and paperwork, is built into the model, while at the same time establishing a bonus structure based on the previously mentioned quality outcome metrics as well as others. As such, we believe we are ready to lead the way in population health and value-based care.”

“Our primary care research team is committed to advancing excellence in family medicine through collaborative projects designed to address issues of both local and national importance. Investigators, including researchers and collaborating clinicians, are receiving national and international attention through publication and presentation of research findings to both academic and professional audiences. We are especially eager to achieve local impact by helping to promote quality improvement efforts with the primary care offices, consistent with the goals of our Primary Care Strategic Plan.”

“Our Department is leading the way in patient-centered care and in improving the quality and safety of care through team based care, collaboration and coordination, and through leveraging IHIS to make care more consistent. These are exciting times as we launch into population health and management and as we educate our residents and students in patient-centered, quality and cost-effective care.”

Randy Wexler, MD, MPH, AAFP
Associate Professor of Family Medicine
Vice Chair of Clinical Affairs

Ann McAlearney, ScD, MS
Professor of Family Medicine
Vice Chair for Research

John McConaghy, MD, FAAFP
Professor of Clinical Family Medicine
Vice Chair for Quality Affairs
Associate Program Director
In February, 2014, the Department completed the Patient Centered Medical Home (PCMH) recertification process and received National Committee for Quality Assurance (NCQA) Level 3 recognition for all offices through February, 2017. Unlike our initial 2010 PCMH application process, we convened a Steering Committee comprised of lead physicians, office managers, care coordinators, information technologists, and the PCMH consultant who had guided us through the initial certification process.

The major difference between the 2008 and 2011 PCMH guidelines included the requirement to closely monitor and demonstrate improvement in various quality metrics. Selected quality metrics were based, in part, upon the Center for Medicare and Medicaid Services (CMS) STARS rankings, which form the basis of how CMS reimburses insurers. Additionally, we opted to focus on metrics that were included in meaningful use and disease frequency in our patient populations. As part of this comprehensive process, we continue to monitor: (1) glycosylated hemoglobin A1c levels (<8 and <9), (2) blood pressure control (<140mmHg/90mmHg), (3) smoking cessation counseling, (4) mammography screening, (5) pneumovax rates, and (6) Tdap rates. Overall, the Department has met and/or exceeded various quality metrics. For example, collectively, A1c levels currently exceed STARS requirements for patients with a baseline A1c <9, blood pressure control exceeds the national average by 20%, and rates of overdue pneumovax have dropped to less than 20%.

In 2013, we initiated the process of transitioning physician compensation from a volume-to-value based model. A Departmental Clinical Compensation Committee worked together to develop a new Family Medicine clinical compensation model. This new model was successfully launched on July 1, 2014. In addition to focusing on quality of care, the Committee recognized the need to acknowledge student teaching and aid in promoting a healthy work-life balance. As such, providers were eligible to have two 15-minute patient appointment slots blocked for each half day they were actively involved in teaching. Additionally, all providers, spending at least 60% in direct clinical care, were provided protective administrative time. Finally, a bonus structure was established, where during the 2014-2015 year, faculty can earn 10% of their clinical base salary for achieving specific quality metrics around patient satisfaction, A1c control, and pneumovax rates. We recently reconvened the Compensation Committee to begin the process of modifying quality and educational metrics for the upcoming academic year as well.

As you will see, we have greatly expanded our collaborations and partnerships over the past year. The Department continues to include dieticians, nurse practitioners, pharmacists, care coordinators, and social workers in even greater numbers than previous years. Over the course of the 2013-2014 academic year, we also expanded our collaborations with the College of Nursing and Kroger Little Clinics. Dr. Mary Jo Welker serves as the collaborating physician for the Total Health and Wellness site that is run by the College of Nursing. Working with them, they have also received NCQA designation as a Patient Centered Medical Home under the 2011 guidelines. We welcomed the addition of Matthew Stone, CNP and Candy Rinehart, CNP, DNP to the site which provides interdisciplinary education for students. In addition, we have expanded our relationship with the Kroger Little Clinics and our faculty serve as collaborating physicians for the 14 sites in the Central Ohio area. We also embarked on a protocol to help the nurse practitioners at these sites care for mild hypertensive patients in the retail clinic environment.

The novel Philip Heit Center for Healthy New Albany is set to open on February 1, 2015. The Philip Heit Center will include a combination of medical, fitness, social, and educational services and is a collaborative effort between The OSU Wexner Medical Center, Nationwide Children's Hospital, and the city of New Albany. The site will include family medicine, sports medicine, rehabilitation, and community programs centered on wellness.

Dr. Ernesto Ortiz-Cruzado joined our clinical practices with a joint appointment in the Department of Psychiatry. He completed a residency in Psychiatry and Family Medicine at the University of Cincinnati and is board certified in both specialties. Dr. Ortiz-Cruzado sees patients at both Care Point East Family Medicine and the Rardin Family Practice Center. He also interacts with family medicine residents at both locations. Dr. Ortiz Cruzado is helping us set the foundation for integrating behavioral care at all of our offices, in addition to fostering a significant collaboration with the Department of Psychiatry.
We are also collaborating with the Department of Psychology at The Ohio State University. As part of this effort, Dr. James Shaw, a residency faculty member, is training clinical psychology students at our clinical sites. During the 2013-2014 academic year, he invited three students to work with him and see patients at our Rardin Family Practice Center. After working through the initial challenges, this coming year we will have 6 psychology students. Five of them will be with Dr. Shaw at the Rardin Center and one of them will be with Dr. Joan Simon at our CarePoint East office. This is really a great innovation for us and allows us to significantly improve our integration of behavioral health into our PCMH model.

The Department was actively involved in developing partnerships between OSU Physicians, Mount Carmel Medical Center, and Madison County Hospital to expand primary care. Through these partnerships, the Department will hire 3 family physician faculty members who will practice exclusively at the Madison County Hospital along with a pediatrician and nurse practitioner.

To accomplish our ongoing efforts to continue to expand the Ohio State Primary Care Network and Sports Medicine, the Department welcomed the following faculty members during the 2013-14 academic year:

- Jennifer Carter, PhD—Sports Psychology
- Stephen Graef, PhD—Sports Psychology
- Jeffrey Hageman, DO—Outpatient and Inpatient Family Medicine
- Clinton Hartz, MD—Outpatient Family Medicine and Sports Medicine
- Michael Johansen, MD—Outpatient and Inpatient Family Medicine
- Ernesto Ortiz-Cruzado, MD—Outpatient Family Medicine and Psychiatry
- Arthur Palmer, MD—Outpatient and Inpatient Family Medicine
- Bethany Panchal, MD—Outpatient and Inpatient Family Medicine and Obstetrics
- Kristen Rundell, MD—Outpatient and Inpatient Family Medicine and Obstetrics
- Bryant Walrod, MD—Sports Medicine

Community Partnerships

Asian Health Initiative: The Asian Health Initiative is a jointly sponsored program between The Ohio State University Medical Center, The James Cancer Hospital and Solove Research Institute, Department of Family Medicine, the Coalition for Asian American Health, the Asian American Community Services, the Asian American Community Service Council, and the Southeast Asian United Methodist Ministries of Central Ohio. The Rardin Family Practice Center houses this initiative, providing care one half-day per week for non-English speaking patients, primarily an indigent population. The Asian Health Initiative functions as a free clinic with medical students welcome to participate in care delivery.

Latino Free Clinic: This clinic was started in December 2000 and is a jointly sponsored program among the following entities: The Ohio State University Medical Center, the Latino Health Alliance, and Saint Vincent’s Family Services. The Rardin Family Practice Center houses this initiative, which provides care two half-days per month for Spanish-speaking patients, primarily an indigent population. Dr. Cregg Ashcraft serves as the medical director of the Latino Free Clinic.

Columbus Free Clinic: The Rardin Family Practice Center is home to the Columbus Free Clinic on Thursday evenings. The Columbus Free Clinic is run by The Ohio State University medical students under the guidance and supervision of volunteer community physicians and residents.

Noor Free Clinic: The Rardin Family Practice Center is home to the Noor Free Clinic on Wednesday evenings. The Noor Free Clinic is staffed by Muslim physicians and nurses from the central Ohio community. Medical students are encouraged to participate in the delivery of care at the Noor Free Clinic.

The goal of the Primary Care Core Interdisciplinary Research Team is to advance the stature and visibility of primary care research at OSU. We have had a very busy year, including submitting 6 new grant/contract applications representing requests for over $20 million. We have also received funding across 8 external and internal grants. Collectively we have 35 peer-reviewed articles either published or in press, and another 14 articles currently under review. We have published 2 books and have one in press, as well as 12 published book chapters. Members of our research team have also been extremely successful disseminating the results of our research, reflected through our 27 peer-reviewed podium presentations, 17 peer-reviewed posters, and 12 additional keynote, invited, and teaching presentations made. Further, our faculty have been serving in critical roles within OSU, nationally, and internationally. Their collective service on dissertation committees, mentoring undergraduate and graduate students, serving as part of grant review panels for the Agency for Healthcare Research and Quality (AHRQ), the National Science Foundation (NSF), the Patient Centered Outcomes Research Institute (PCORI), and BC Cancer, and providing peer reviews for numerous high-impact journals including *New England Journal of Medicine, Health Affairs, Journal of General Internal Medicine, Health Services Research, Medical Care, Journal of American Board of Family Medicine*, and *Journal of Family Practice*.

**Primary Care Research Team Members**

- **Dr. Ann Scheck McAlearney** is Professor and Vice Chair for Research in the Department of Family Medicine and has extensive health services research expertise, including substantial work in the areas of health information technology adoption and implementation, primary care innovation, population health management, leadership development and organizational change.

- **Dr. Timothy Huerta** is an Associate Professor in both Family Medicine and Biomedical Informatics in the College of Medicine at OSU and brings both breadth and depth of experience in quantitative methods, health services research, and multi-disciplinary collaboration.

- **Dr. Cynthia J. Sieck** is an Assistant Professor in the Department of Family Medicine, having received her doctorate in Health Behavior and Health Education. Her research interests include patient engagement in health care and research activities and health behavior change.

- **Dr. Jennifer Hefner** is a post-doctoral researcher in the Department of Family Medicine. Her research interests include health systems organization and management with a particular interest in primary care practice transformation.

- **Ms. Alison Aldrich** is a Research Librarian working in the Department of Family Medicine. She has extensive experience in supporting research activities, including eleven years of experience as an academic health sciences librarian. She has completed to graduate training in public health with a specialization in health promotion/health education, and additional coursework in health systems management.

- **Dr. Maryanna Klatt**, is an Associate Professor of Clinical Family Medicine the in Department of Family Medicine with interests in mindfulness and integrative medicine.

- **Dr. Michael Johansen**, is a practicing clinician and health services researcher in the Department of Family Medicine with particular interest in cardiovascular risk factors, medication adherence, disparities, and analysis of large data sets.

- **Ms. Pamela Thompson** is our Clinical Research Coordinator in the DFM who provides research support for the teams’ activities.
RESEARCH AND SCHOLARSHIP

Selected Projects of the Primary Care Interdisciplinary Research Team

Accountable Care Organizations (ACOs): Dr. McAlearney is currently PI of a nationwide study of ACOs funded by the Robert Wood Johnson Foundation designed to produce usable, evidence-based information about ACO development, implementation and impact, and to provide consumer perspectives about ACOs and their impact. In this study Dr. McAlearney is leading all aspects of the study, including conceptual development, case studies, data analysis, and dissemination of research results.

Coordination of Breast Cancer Care: Dr. McAlearney is local PI for a multi-year grant funded by the National Cancer Institute entitled “Implementing a Tracking and Feedback Registry to Allay Cancer Therapy Disparities (INTERACT).” This research is designed to develop and implement an intervention to reduce barriers to receiving breast cancer adjuvant therapies. It is being conducted across 10 urban hospitals serving large proportions of minority patients.

Meaningful Use Attainment by Hospitals: In 2013, Dr. Huerta worked with a team of researchers to explore the factors contributing to eligible hospitals applying for meaningful use. In that study, hospitals that had met the conditions for meaningful use prior to the call were generally the resultant first wave of applicants, suggesting that in its current iteration that the incentive program was rewarding as opposed to incentivizing. This work contributes to the policy implications of the research presented. Additionally, Dr. Huerta is currently the research scientist for the tri-annual State of Ohio EHR Ambulatory Care Survey – a research project facilitated through the Ohio Government Resource Center (GRC) – designed to explore meaningful use in ambulatory settings in Ohio and conducted in partnership with the Ohio Department of Health (ODH).

Reducing Disparities in the Quality of Prostate Cancer Care: Dr. McAlearney is local PI of a study funded by the Department of Defense designed to reduce barriers to prostate cancer treatment for vulnerable men in Harlem, New York. The study is investigating the perspectives of both clinicians and patients based on their experiences and beliefs about prostate cancer treatment options.

Practice Transformation and Organizational Change: Dr. McAlearney is a recognized national expert in organizational change. In addition, our research team has participated in a variety of organizational change and practice transformation projects in a range of contexts including ambulatory care and hospital settings, as well as within practice-based research networks. We submitted 3 new grant applications in 2013 to study this issue, including one to AHRQ for 15 million dollars.

Statewide Primary Care Pilot Studies: Dr. Huerta, in collaboration with Drs. McAlearney, Sieck, Hefner, and Johansen, received funding to explore practice transformation across Ohio through a pilot grant from the Case Western Reserve University Clinical and Translational Science Collaborative (their CTSA). Data collection, initiated as a pilot for the validation component of this proposal, has demonstrated the feasibility of our approach. A survey data collection effort is currently underway within the Central Ohio Practice Based Research Network and will be expanded statewide by early 2015.

Transitions of Care: Dr. McAlearney is Co-PI and currently collaborating with PI, Dr. Wexler, along with Drs. Huerta, Hefner, and Sieck on an AHRQ-funded study that developed, implemented, and evaluated a health information technology (HIT)-based randomized controlled trial that aimed to improve access to primary care for non-urgent and routine health services for Medicaid patients needing coordination of care across transitions in healthcare settings.

Crisafi-Monte Grant Applications: Our team has been active in submitting proposals to the Crisafi-Monte Endowment program funded to support research in primary care. We have four currently funded projects: (1) to study patient and provider’s perspectives on use of MyChart Ambulatory, the patient portal available through OSUWMC’s Electronic Health Record system (Dr. Sieck, PI); (2) a study of the development and application of a cardiovascular risk scorecard within IHIS for use in primary care practices (Dr. Huerta, PI); (3) a study of the Impact of a Mindfulness Lifestyle Intervention on Healthcare Utilization Among Persons with (Cardiovascular Disease Risk (Dr. Klatt, PI); and (4) a grant to support Research Trainees in manuscript and grant writing to facilitate proposal submissions (Dr. Huerta, PI).
PREDOCTORAL EDUCATION

Predoctoral Education continues to lead a variety of curricular and extracurricular programming to enhance the learning of all medical students. A team of committed teachers, facilitators, preceptors, and mentors works with premedical to graduating medical students. Committed students add leadership to our programs to improve outcomes. In the 2014 Match, 5% of the class (13 students) chose careers in Family Medicine, many matched into top programs throughout the country. Students will be pursuing Family Medicine residencies at:

Connor Burke  Oregon Health & Science University, Klamath Falls, Oregon
Whitney Christian  The Ohio State University Wexner Medical Center, Columbus, Ohio
Ariana Herbert  Wright State University Boonshoft School of Medicine, Dayton, Ohio
Elizabeth Herman  University of Kentucky Medical Center, Lexington, Kentucky
Anne Kessler  Oregon Health & Science University, Klamath Falls, Oregon
Lynda Labranche  Barberton Hospital/Northeast Ohio Medical University, Barberton, Ohio
Timothy Light  The Ohio State University Wexner Medical Center, Columbus, Ohio
Muyuan Ma  Case Western/MetroHealth Medical Center, Cleveland, Ohio
Robert Makishi  Chippenham Medical Center, Richmond, Virginia
Lauren Phillips  The Ohio State University Wexner Medical Center, Columbus, Ohio
Bradley Prestwich  Utah Valley Regional Medical Center, Provo, Utah
Mary Beth Ray  Naval Hospital Bremerton, Bremerton, Washington
Alexandra Smith  The Ohio State University Wexner Medical Center, Columbus, Ohio

Summer Externship

Our Summer Externship experience for students entering their Med 2 year included 4 inner city and rural settings. The preceptors hosting students were: Dr. David Scoggin, Lancaster, Ohio; Dr. Delia Herzog, Marysville, Ohio; Dr. Debbie Plate, Akron, Ohio, and Dr. Allison Macerollo, Columbus, Ohio. After a rigorous application process, students are paired with a local urban or rural family physician based on student interests. Students participate in a group luncheon to network together about the experience and understand expectations for the summer. They spend one month in the summer seeing patients, participating in the medical team at that office and understanding what their mentor does on a daily basis. They complete a small project to benefit the practice in some way. Projects range from staff and provider education about local substance abuse resources to patient handouts about local exercise options for free or low cost. Students then have a culminating luncheon with all students to celebrate the experience, share stories, review projects and brainstorm for the following year. Student interest was very high this year despite a new med school curriculum that provides early and frequent outpatient experience. This enthusiasm shows the boosted interest in primary care and our group wants to capitalize on this in our promotion of the breadth and excitement in Family Medicine.

Med 3

Two hundred forty-nine 3rd-year medical students completed the required four-week family medicine rotation during the Ambulatory Care Clerkship. Case-based didactics, small groups, four workshops and a formative Observed Standardized Clinical Encounter enhanced the clinical rotation for our third-year students. Regular and auxiliary faculty presented lectures and workshops including: Drs. Ann Aring, Laurie Belknap, Holly Cronau, Maryanna Klatt, Nanette Lacuesta, Allison Macerollo, Tom Pomering, Richard Rodenberg, Robert Skully and Randy Wexler. This rotation is highlighted by its clinical component, which uses preceptors representing a wide diversity of practices including: residency practices, along with rural, urban, suburban, and inner city sites involving approximately 75 volunteer preceptors.

Seven students from the Med 3 class chose to take a second month in Family Medicine during their elective month. The elective month continues as a separate month of the third year. Dr. Cronau continues to serve as clerkship director for both the third and fourth-year required courses and continues to work with several departments to coordinate didactics and clinical experiences for both courses. In addition, Drs. Belknap and Macerollo served as expert educators for this class which enhanced the didactic offerings for this course.

Med 4

Fifty-five students took advantage of our fourth-year Family Medicine offerings. A wealth of diversity is available in our subinternships and electives. Students had the opportunity to experience practices in rural, urban and suburban in Columbus and across the country. Electives were offered in sports medicine and research. The Department was also a part of the DOC-3 Chronic Care curriculum offering an elective in Healthcare for the Homeless, which consistently has students rotating with Drs. O’Handley and Vallangeon in a unique, urban setting.
In August, 2012, the *Lead. Serve. Inspire.* (LSI) Curriculum was launched to medical students in the Class of 2016. The new LSI curriculum consists of three parts over four years of study.

- **Part 1**, entitled Clinical Foundations, covers basic foundational sciences and clinical skills. During Part 1, students participate in weekly Longitudinal Group (LG) sessions, similar to the small group sessions in CAPS. Topics include interpersonal communication, physical examination, behavioral/social sciences, and clinical reasoning.

- **Part 2**, entitled Clinical Applications, provides students with advanced foundational sciences and further clinical training across a spectrum of medical and surgical specialties.

- **Part 3**, entitled Advanced Clinical Management, is designed to provide students with a variety of opportunities to individualize and advance their clinical skills.

Family Medicine faculty who taught LG to first-year students included Drs. Belknap, Mack, Conroy, Alexander, and Tucker. In addition, LSI students participate in Longitudinal Practice (LP) sessions one half-day every other week across Part 1 of LSI. Family Medicine faculty and practices are highly involved in teaching this preceptorship and important to its success. During the academic year, Dr. Mike Alexander was appointed as an Expert Educator for Part 1 and continues to serve in this capacity.

**Community Health Education Project:**
The Community Health Education (CHE) project, directed by Dr. Loraine Wallace, serves as an introduction to population-based medicine, focusing on the dynamic relationship between an individual and his/her community and its influence on the individual’s health. The CHE curriculum provides students with a basic understanding of this relationship by focusing on core concepts of population-based medicine including Needs Assessment, Program Development, Program Implementation, and Outcome Evaluation. The overarching goal of the Project is for students to help develop an understanding of health-care informational needs through evaluation of current practices. Students identify opportunities for improvement, seeking out and applying best practices to help develop effective change. Additionally, students will demonstrate an understanding of the role of the physician in the improvement of the healthcare delivery system. Students work on their CHE projects in small groups over a span of one year, beginning in January of Year 1 and ending in January of Year 2 of the Part One curriculum.

**Health Coaching Project:**
The Health Coaching project, directed by Dr. Don Mack, strives to instill in the student the skills and practical experience to become proficient in health coaching. As a health coach, each medical student will guide a patient to develop a self-identified goal of healthful behavior change; thereby making the patient an active participant in their care. During Year 1 students will explore health coaching concepts, essential skills for effective health coaching, and the role that health coaching plays in the chronic care. Students will participate in OSCEs to practice their health coaching skills in a simulated setting. Students will practice health coaching skills through peer activities and OSCEs. Prior to the end of Year 1, students will work with their preceptor to start the process of selecting a patient for the health coaching project. In Year 2, students meet three times with their patient in a one-on-one capacity. In addition, students will have a longitudinal group session facilitated by a professional health coach, where they will have an opportunity to discuss barriers as well as successes experienced in health coaching. At the end of Year 2, students will have an opportunity to reflect on their health coaching experience in a longitudinal group setting.

Part Two of LSI will be rolled out during the 2014-15 academic year. Part Two is characterized by three integrated clerkships. Understanding Patients Within Populations (UPWP) is one of the three, combining Family Medicine, Pediatrics, and also has an emphasis on Geriatrics. Dr. Holly Cronau serves as the leader of the UPWP Working Group. Participating Family Medicine faculty on this task force included: Drs. Belknap and Mack. We appreciate the significant contribution of Family Medicine faculty in the development and implementation of the successful LSI curriculum.
The Family Medicine Interest Group

The Ohio State University College of Medicine Family Medicine Interest Group (FMIG) is the largest student interest group at our college. We serve as a home to medical students, residents, faculty, and community leaders in central Ohio who are dedicated to promoting the values of family medicine. Our members work to improve the health of patients, families, and communities through advocacy and service projects. We also function as a pipeline for students from middle school to residency who are interested in pursuing careers in Family Medicine. We provide students with opportunities for Family Medicine exposure, education, mentorship, networking, and leadership development.

This year we hosted a “Family Medicine Presents” series highlighting the diversity of experiences available through Family Medicine. About once a month, we had a lunch meeting where we highlighted a different family medicine focus. Meetings included an introductory session, where Dr. Macerollo spoke about her role, we discussed our officer positions, and discussed events that we would be having throughout the year. In October, Dr. Grant, a Family Medicine physician, came to speak about adolescent medicine and caring for the underserved. In November, Dr. Panchal, who practices full-spectrum Family Medicine including OB, spoke about opportunities in women’s health through Family Medicine. Later in the year, Dr. Longenecker spoke about practicing Family Medicine in a rural community in southeastern Ohio. He also discussed opportunities to get involved in rural medicine training programs. Finally, Dr. Ortiz-Cruzado, who is dual-boarded in Family Medicine and Psychiatry, talked about his experience in Family Medicine, mental health training, and opportunities for dual-residencies in Family Medicine.

This year we put on a diverse range of events during national Primary Care week at OSU. While Family Medicine was the main coordinator of the week, we also collaborated with Peds, Med-Peds, Ob-Gyn, Internal Medicine, Integrative Medicine, and AMSA groups to put on several joint events. On 10/7, Family Medicine hosted an event entitled, “Legislature and the affordable care act and how it pertains to the future of primary care.” Speakers included Allison Macerollo, MD, Assistant Professor, Department of Family Medicine; Randy Wexler, MD, Vice Chair of Clinical Affairs; and William Hayes PhD., Director, Healthcare Reform for the Ohio State University Wexner Medical Center, OSU College of Public Health. Tuesday, 10/8, the Peds and Med-Peds interest groups joined to put on a panel about “Bridging the Gap between Pediatric and Adult Primary Care.” Speakers were Dr. Robert Seese, a primary care pediatrician at one of the Nationwide Close-to-Home clinics; Dr. Fareeda Haamid, an adolescent medicine physician; and Dr. Megan Brundrett, a primary care Med-Peds physician. Wednesday, 10/9 we hosted a primary care resident panel including residents from Peds, Ob/Gyn, Family Medicine, Integrative Medicine, Internal Medicine, and Psychiatry. Thursday, 10/10, AMSA and the Integrative Medicine Interest Group worked together to organize a group Google+ hangout with Dr. Josh Umbehr, a Family Medicine physician in Wichita, KS in a direct primary care practice. This event was titled “Alternative Primary Care Delivery Systems.” Lastly, Friday 10/11, we had a group viewing of the “Choose Primary Care” webinar put on by Dr. Blackwelder of the AAFP. Overall, national primary care week at OSU had a lot of collaboration, a variety of speakers and panels, and a good number of students attending each event.

FMIG continued to organize shadowing through The Mount Carmel Outreach Van. This is a mobile clinic that provides free medical care to the homeless community in the greater Columbus, OH area out of an RV. More than your average shadowing experience, this unique opportunity showcases the impact a family medicine physician can have on the community. This year, because of high student demand, we added a third location. With this expansion we increased volunteer opportunities from 4 to 6 per month and volunteer hours from 8 to 14 hours per month.

Workshops presented included:

**Ob/Gyn workshop:** We hosted residents from Fairview Residency program for a workshop concerning Ob/Gyn procedures and skills, and their place in the practice of a family physician. The workshop included an overview and didactic talk, as well as demonstrations and opportunities for students to have hands-on time practicing Ob/Gyn skills such as colposcopy, pap smear, and IUD placement, etc. This was one of our most well-received events of the year, and students felt they not only had a better understanding of what it was like to practice as a woman’s primary care physician, but also of the ability family physicians have to do procedures and still play an active and leading role in patients’ primary care.

**Phlebotomy workshop:** Faculty and residents from OSU’s Family Medicine department led this workshop to discuss and demonstrate proper phlebotomy techniques. Students were given time to practice blood draws on phantom arms and on each other under the supervision of physicians.

**Cardiology workshop:** This is a didactic session regarding heart sounds as well as an opportunity for our medical students to practice listening to these sounds using simulations. Students report benefit from learning from family physicians regarding specialty concepts to better understand how issues are dealt with in real life situations.
Family Medicine Honors Program
The Honors Program had an exceptional year with seven students participating in the program. There is required attendance at monthly FMLDP meetings as well as compulsory readings in different subjects. Students also participate in an online discussion board where they investigate current topics in health care and Family Medicine. Lastly, students complete a year-long project. Each project is student designed and guided by a faculty advisor. Projects span the world of Family Medicine from integrative medicine to patient education, patient health and wellness, clinical research, and community outreach. Student evaluations of this course continue to be excellent and the presentation of the projects at the annual Honors Reception is testimony to the wonderful work of our students.

2013-2014 Annual Honors Reception
The annual Honors Reception is always a special evening. This year was no exception. The audience had a chance to hear about each of the Honors Program projects and celebrate each student’s success.

Fourth-Year Student Awards
Tennyson Williams, MD Award in Humanism __________________________ Alexandra Smith
Patrick Fahey, MD and Larry Gabel, PhD Award in Academic Excellence __________________________ Mary Beth Ray
John Lombardo, MD Award in Community Service __________________________ Whitney Christian

Communications
The communications part of our programming continues to be strong. Dr. Macerollo oversees the production of the quarterly newsletter. It is distributed electronically, with print copies made available to College of Medicine programming and leaders. The newsletter featured updates for both local and national meetings, advice columns for the many aspects of medical student life, thoughtful articles on doctor patient relationships written by faculty, residents, and students, and in-depth review of topical issues such as volunteering globally. The Central Ohio Academy of Family Physicians continues its support of the newsletter in its ongoing partnership with the OSU FMIG.

Family Medicine Leadership Development Program (FMLDP)
♦ Our Department has noted an increased enthusiasm for Family Medicine in our medical center and wanted to be sure there was sufficient programming to aid students in preparing for their careers in Family Medicine. Each meeting also includes a catered meal which allows students to relax and enjoy a few hours to think about the future. August was the first meeting of the academic year and hosted all fourth-year students who are entering the Family Medicine Match. Students came to discuss the interview season. Local programs send faculty and residents to network and share major Do's and Don'ts during interview season.
♦ In January, we welcomed current third year students with any interest in Family Medicine to come and speak to our fourth-year students who are matching in Family Medicine. This event allows an early glimpse into scheduling for fourth year, residency application preparation, interviews, types of programs there are in the country, etc. The fourth years answer all questions with only small guidance from faculty representation. Students make connections with other students with like interests and foster some short-term mentorship through the process.
♦ In February, we invited all students matching in Family Medicine to take part in a leadership seminar. The event was action packed and well received. Students performed a quick leadership game which included paper airplane making, followed by a discussion of leadership. The final portion included development of personal mission statements which was highly regarded as a worthwhile activity.
♦ The March 10th event was a preparation for residency workshop which focused on clinical topics pertinent to entering residency. The different content areas included IV fluids for different issues and subsets, quick antibiotic reference for outpatient use, brief preventive health topics, inpatient discharge summary and orders, and lastly, inpatient admission orders. Students rotated to different stations led by faculty and or residents. Each student left with a clear sense of strengths and weaknesses clinically as well as advice from current residents on how to prepare for residency.
♦ The May 12th event focused on third years who are starting to finalize their interest in Family Medicine. This meeting provides an opportunity to discuss different types of programs available, letters of reference, building a great CV, and examples of ideal personal statements. All local programs provided faculty and resident representation to the meeting.
♦ The FMLDP/FMIG sent six students to the AAFP National Conference in July, 2013. The students appreciated the financial support of the Department of Family Medicine for this conference.
The 2013-2014 academic year proved to be yet another successful year as the University and Urban Tracks continued to strive for excellence in educating family medicine residents. Much of the program’s continued success belongs to the wonderful support of the Department and the outstanding efforts of the residency faculty, staff, and residents who strive toward perfecting the culture and learning environment of the program.

**Strategic Focus**
The Residency Committee continued to oversee residency activities, provide strategic direction, and ensure the program met its goals. "Working Groups" for curriculum review and recruitment/retention met monthly to ensure that forward momentum continued. The program focused on several key areas:

**Maternity Care:** Dr. Bethany Panchal joined our faculty and assumed the role of Assistant Residency Director for Women’s Health and Maternity Care. She reestablished much-needed relationships with obstetrics, enhanced the curriculum, and developed policy to ensure we are compliant with the new FM-RC guidelines. Joining her later in the year to assist in this initiative was Dr. Kristen Rundell. Thanks to them our program now exceeds the expectations of the FM-RC.

**Care of Children:** Recent studies on the scope of family medicine has shown a decrease in care of children. Over the years our program has noticed a decrease in the number of children to whom we provide care. To correct this, we took several initiatives this year to increase our residents’ exposure to children. We added a sixth required ambulatory pediatric experience. We looked at our practices to see what we could do to enhance our care to children. Finally we developed a relationship with the Schoenbaum Family Center at Weinland Park. Associated with the Ohio State University, this family center provides day care and pre-school services, and we developed an agreement where we would spend one-half day each week providing medical care to these children.

**New Accreditation System, Family Medicine Milestones, and FM-RC Guidelines:** Our program spent most of the year in anticipation of these new requirements that will become effective July 2014. Changes were made to the curriculum and faculty were provided guidance. We are ready to take on these new initiatives!

**Global Health**
Three residents completed international rotations this year. Dr. Benish Aqil traveled to Lahore, Pakistan (August 2013), Dr. Magdalena Teodorescu traveled to a small rural community in Northern Italy, and Dr. Jacqueline Nguyen traveled to an orphanage in Ho Chi Minh City, Vietnam. They came back with outstanding experiences that they subsequently shared with the faculty and residents. Needless to say, their view of medicine, and health in general, changed dramatically through their experiences.

**Academic Residency Track**
Dr. Michael Salama, graduating resident, successfully completed his MBA degree through the Fisher College of Business. Dr. Melissa Davis, a 2nd-year resident, and 1st-year residents Drs. Juliet French-Vallab and David Tessier are enrolled in the MPH degree program in the College of Public Health. Dr. Bhavesh Patel, a 1st-year resident, enrolled in the MBA degree program in the Fisher College of Business.
Faculty

This year, we were sad to say goodbye to Dr. Luis Salazar, who left to join the faculty at the University of Kansas. Dr. Pat Fahey retired, but was able to rejoin us September 1, 2013 as a precepting faculty member. Fortunately this year we were able to hire several new faculty, which after two years of leanness, brought us up to full strength. New hires included Drs. Ernesto Ortiz Cruzado, Clint Hartz, Jeff Hageman, Mike Johansen, Bethany Panchal, and Kristen Rundell. In addition, Drs. David Kageorge and Bushra Siddiqi agreed to help with precepting throughout the year.

Faculty Development Series:
Dr. Fred Miser led a quarterly faculty development series for the faculty. Issues discussed included teaching at the bedside, goals and objectives for the inpatient service, effective and safe patient handoffs, enhancing the learning environment, standards, evaluation and feedback, the one-minute preceptor, and preparation for the new FM-RC requirements, FM milestones, and the New Accreditation System. The final meeting involved an in-depth look at the residency program and the annual program evaluation.

Residency Activities

Rardin and CPE Fall Retreat
On August 28, 2013, the staff, residents, and faculty from the two clinical sites met for an afternoon of team building, including a potluck dinner, a quick overview of the FM-RC requirements for our practices, a communication exercise, a photo scavenger hunt across the university grounds, and an ice cream social while enjoying the hilarious pictures. Thanks to Dr. Welker who allowed us to close both practices for the afternoon, to Ms. Brittany Campbell and Ms. Sarah Germak who planned the event and put much effort in the scavenger hunt, and to Ms. Becky Wilkins and Ms. Mary Elswick who encouraged their practice personnel to attend.

Annual Department Affiliation Conference
On October 23, 2013, the four Central Ohio family medicine residency programs met at the Fawcett Center for lunch, followed by two keynote speakers: Dr. Glen Stream (former AAFP Board Chair) The Evolution of Family Medicine, and Dr. Ted Wymslo (Director, Ohio Department of Health) Healthcare for Ohio. Over 100 residents and faculty attended this annual event.

Annual ABFM In-Training Examination
Our residents did very well on this national October examination: 1st-year class mean 379 (national mean 396), 2nd-year class mean 473 (national mean 448), and 3rd-year class mean 513 (national mean 476).

December Holiday Party
Dr. Marie Schaefer hosted a holiday party on December 13, 2014 for the residents at her house. All had a fun time!

Annual Resident Retreat
The Annual Resident Retreat was held in a rented lodge in Hocking Hills February 11-12, 2014. Residents went the night before for “bonding activities” and were joined the next morning by the faculty. Dr. Miser delivered his Annual State of the Residency Program address, with a focus on accomplishments made over the prior year, and critique of how the program is doing with its five core values (caring, excellence, respect, teamwork, and service). The remainder of the morning was spent in reviewing and ranking the residency candidates for both the university and urban tracks. After lunch, the residents then developed their next year’s rotation schedule and selected the 2014-2015 Chief and Assistant Chief Residents.

First-Year Orientation and Welcome Picnic
We welcomed our new first-year residents into the program on Wednesday, June 11, 2014. Over the course of the next two weeks the residents attended necessary courses and underwent initial evaluations, all with the purpose of getting them ready to start seeing patients July 1st. Culminating this orientation was the Welcome Picnic on June 28th at Dr. Miser’s house in which residents, faculty, and staff came together for dinner and a game of volleyball.
We said goodbye to our graduating residents on June 14, 2014 at the Franklin Park Conservatory. Guests included graduating residents, their families and significant others, residents, faculty and staff. Residents were honored for their accomplishments and contributions to the program, and faculty members were given awards from the residents as thanks for their involvement with residency education. Drs. Jacqueline Nguyen, Jason Pedrick and Marie Schaefer were commended for their contributions as Chief and Assistant-Chief Residents, respectively. Dr. Don Mack provided the keynote address to the graduates, sharing with them lessons he learned right after residency graduation. Dr. Miser concluded the event noting how far the senior residents had come. A number of special awards were given to various residents and faculty at the residency graduation dinner.

- **Outstanding Intern of the Year (chosen by residents)**: Christopher Smallwood, MD
- **Tennyson Williams Family Medicine Resident of the Year**: Kerri Gibson, MD
- **Society of Teachers of Family Medicine Resident Teacher of the Year**: Jason Foster, MD
- **Rardin Office Professionalism Award**: Tahir Maya, MD
- **CPE Office Professionalism Award**: Jacqueline Nguyen, MD
- **Dr. Bryan Beggin Community Service Award**: Jonathan Yun, MD
- **Dr. Mary Jo Welker Organizational Leadership Award**: Jacquelyn Nguyen, MD
- **OSU Family Medicine Humanism Award**: Benish Aqil, MD
- **Association of Family Medicine Residency Director’s and North American Primary Care Research Group’s Resident Scholarship Award**: Kerri Gibson, MD
- **Director’s Award for Excellence in Academics**: Michael Salama, MD, MPH, MBA
- **Association of Family Medicine Residency Director’s Resident Advocate Award**: Marie Schaefer, MD
- **Outstanding Educator Award**: Donald Mack, MD
- **Outstanding Preceptor Award, University Track**: William Buoni, MD
- **Outstanding Preceptor Award, Urban Track**: Rupal Oza, MD
- **Educational Impact Award**: Michael Johansen, MD
- **Mikhail Novikov OSU WMC Faculty of the Year**: Richard Schlanger, MD (Surgery)
Recruitment Season

Resident recruitment remained a high priority for the program. Sarah Germak, Brittany Campbell and Dr. Fred Miser coordinated the recruitment experience for applicants, providing a personalized approach. Drs. Jacqueline Nguyen, Steven Albrechta, and Marie Schaefer were the residents in charge of recruitment. Despite the trend of diminished interest in family medicine among medical students, interest in OSU was higher than ever before. The quality of applicants accepted for interviews was extremely high.

Between November 2013 and January 2014, selected faculty and residents interviewed 67 applicants. Recruitment season ended on February 8, 2014 with a Second Look Olympic-themed party at Dr. Miser’s home with over 80 individuals in attendance. Both programs filled in the match with a group of talented, motivated future Family Physicians. Matching with four students from the Ohio State University College of Medicine was a record! We warmly welcomed the Class of 2017.

Scholarly Activities

Scholarship is vital for the academic environment of the Program. Residents are required to complete a scholarly project defined as a data driven research project, a case report, or a critical literature review. Regardless of the type of project, the outcomes expected are a presentation and a manuscript suitable for publication. Our 15th annual Resident Scholarly Activity Symposium was conducted on March 19, 2014. Two residents had their scholarly work accepted at the 2013 North American Primary Care Research Group (NAPCRG) Conference, held November 2013 in Ottawa, Canada. Dr. Kerri Gibson presented a poster entitled, “Are Primary Care Residents Prepared to Address the Obesity Epidemic? Family Medicine Residents’ Obesity-Related Attitudes, Practices, Knowledge and Self-Assessment.” Dr. Kerry Kuffenkam presented her poster entitled, “Breast Cancer Screening – Conflicting Guidelines for Primary Care.” Both residents represented our residency superbly while gaining experience in this international setting. Congratulations to Drs. Gibson and Kuffenkam!
Residency Grant Awards

Patient-Centered Medical Home (PCMH) Adaptable Curriculum Models, Instructional Modules, & Implementation Plans:
This grant, funded by the U.S. Department of Health and Human Services through the Bureau of Health Professions of the Health Resources and Services Administration (HRSA) for $1,004,187, finished its 4th year of funding. Led by Dr. Fred Miser (Principal Investigator), the team consists of Drs. Bill Buoni, Don Mack, John McConaghy, and Randy Wexler, Rollin Nagel, Ms. Pam Beavers, and Ms. Jennifer Lehman.
The purpose and objectives of the project are: To plan, develop, and implement educational and training modalities relative to the Ohio State University Family Medicine Residency Program that promote family medicine residents’ knowledge and abilities regarding the Patient-Centered Medical Home (PCMH). This project has four major objectives:

Objective 1: To design and configure a model three-year PCMH curriculum - we have designed and implemented a longitudinal PCMH curriculum, which includes a four-week 2nd-year block rotation entitled “Medical Management Home.” The curriculum melds such important constructs as core family medicine principles, relationship-centered care, new information technology, and chronic care management.

Objective 2: To develop, pilot, and refine instructional modules that emphasize topics germane to the PCMH – we have designed, piloted and are in the process of refining 13 web-based instructional modules that emphasize the PCMH Transformed Model, NCQA PCMH criteria, and the Accountable Care Organization.

Objective 3: To transform our model training sites of our three training tracks – University and Urban - into model PCMHs; both sites have achieved Level 3 NCQA PCMH certification both under the 2008 and 2011 criteria.

Objective 4: To model and teach how the PCMH provides comprehensive, integrated, and outcomes-based care – now that residents are practicing every day in a PCMH, we are able to teach how the PCMH provides comprehensive, integrated, and outcomes-based care that meets the full range of patients’ health care needs, especially those with chronic disease.

Primary Care Faculty Development Initiative (PCFDI) Demonstration Pilot: Represented by Drs. Don Mack, John McConaghy and Fred Miser from the Department of Family Medicine and their colleagues from the Departments of Internal Medicine and Pediatrics, was one of four institutions selected to be part of this national pilot. Funded by HRSA, administered by Oregon Health & Science University, and supported by the American Board of Family Medicine, the American Board of Internal Medicine, the American Board of Pediatrics and the Josiah Macy Jr. Foundation, the purpose of this initiative was to begin a dialogue with a dedicated group of faculty who wish to accept the many inherent challenges involved in this personal and professional transformation dealing with patient centeredness. This project created a foundation for this change and fostered the development of resource communities of primary care faculty. Drs. Mack, McConaghy and Miser frequently met with their OSU colleagues, and received additional training through meetings held in Chicago, Illinois and Minneapolis, Minnesota. Lessons learned were brought back to the residency program for implementation.

2014-2015 AAFP Foundation Pfizer Senior Immunization Grant Award: Under the direction of Drs. Bill Buoni and Fred Miser, with the assistance of Drs. Melissa Davis and David Tessier and Ms. Jennifer Lehman, the program was recognized as one of 16 programs nationwide to receive this prestigious grant award. Winners were chosen for their ability to implement best practices and identify high-impact, team-based solutions to increase influenza and pneumococcal immunization rates in seniors. The grant, entitled The Ohio State University Family Medicine Program – Senior Immunization Improvement Program, is funded for one year for $11,200, which includes travel for one resident to register for the July 2015 National Conference of Family Medicine Residents and Medical Students. The purposes of the grant are to increase pneumococcal and influenza vaccination rates in our elderly population by 25%, survey our elderly population to determine what specific barriers they face, and analyze this current effort with respect to historical efforts with the goal of creating a sustainable, cost-effective vaccination program for the foreseeable future. This grant follows on the successfully funded 2011 AAFP Foundation Pfizer Immunization Awards Program, which involved all residents and implemented a system to increase immunization rates in medically underserved children.

AAFP Family Medicine Congressional Conference Resident Award Recipient
The American Academy of Family Physicians selected Dr. Marie Schaefer, second-year resident, to receive a scholarship award which allowed her to attend the 2014 AAFP Family Medicine Congressional Conference held April 7-8, 2014 in Washington DC. Congratulations to Dr. Schaefer!

OAFP Resident Delegate
The Ohio Academy of Family Physicians selected Dr. Marie Schaefer, second-year resident, to be the resident delegate to the 2014 AAFP National Congress of Family Medicine Residents and Medical Students, to be held in August 2014. Congratulations to Dr. Schaefer!
The Division of Sports Medicine is an active element of the Department of Family Medicine regarding its three-part mission of clinical practice, research, and education. All faculty members contribute to all parts of the mission and are engaged in both clinical care and scholarly activity.

Changes
Two new faculty members joined the division during the last year, Clinton Hartz, MD, RMSK and Bryant Walrod, MD. In addition to their clinical practice at Morehouse, CarePoint East and Lewis Center they are team physicians for OSU Athletics.

Also joining Sports Medicine were psychologists Jennifer Carter, PhD and Stephen Graef, PhD. They will utilize their unique expertise in both mental health and performance psychology to offer an in-depth understanding of high pressure environments such as athletics. Sport psychology may take the form of mental skills training for performance enhancement or personal counseling.

National Recognition
This past May, Dr. Best received the 2014 ACSM Citation Award. And he continues to serve on the Board of the National Youth Sports Health and Safety Institute and the US Bone and Joint Initiative. Timothy Hewett, PhD continues to serve as a permanent member of the NIH MRS Study Section.

Research
Research is an important part of the mission of both the Division of Sports Medicine and the Department of Family Medicine. Faculty members participate as PIs, Co-PIs, and investigators on studies within the Division as well as collaborating with Orthopedics, and other departments within the College of Medicine, and other colleges across the campus where appropriate.

Faculty regularly travel to regional and national meetings to present their research as well as participate on discusant panels on a wide variety of Sports Medicine topics. As a group, the Division authored over 50 peer-reviewed papers. The faculty also delivered 70 presentations at international, national and local conferences.

Thomas Best, MD, James Borchers, MD and Timothy Hewett, PhD are co-investigators on an NIH funded project.

In addition to his work on his NIH funded research project on eccentric muscle mass, Thomas Best, MD, PhD, participated in two other NIH funded studies.

Dr. Hewett is principal investigator or co-investigator in five additional NIH funded projects. He is also principal investigator on numerous industry funded studies.
Resident Education
The Division of Sports Medicine supports the mission of resident education within the Department of Family Medicine. An elective is available for R2 residents with an interest in Sports Medicine. A third-year rotation in Sports Medicine is required of all R3 residents in the Department and is completed at the OSU Sports Medicine Center. Regardless of whether the rotation is elective or required, the residents are actively involved with conferences and Grand Rounds during the rotation. Faculty members of the Division also provide resident education via workshops and lectures through the Ohio State Family Medicine Residency Program. This also includes a longitudinal rotation, involving 2nd and 3rd year residents. This rotation provides a more in-depth sports medicine learning experience and is available to qualified applicants. A total of seven residents completed rotations in Sports Medicine during the recent year.

Fellowship
The Division of Sports Medicine is dedicated to advanced education in Sports Medicine by offering a one-year Fellowship in Sports Medicine leading to eligibility to complete the Certificate of Added Qualifications (CAQ) in Sports Medicine. The program currently accepts two fellows per year. The fellowship is accredited by the ACGME; fellows are expected to pass the CAQ exam once their fellowship is completed. In addition, fellows are expected to present at a national meeting of their choice during their year at OSU. Scholarly writing in the form of a systematic review with faculty involvement is also expected. David Krey, DO and Christopher Miller, MD both presented abstracts at the AMSSM and ACSM Annual Meetings during the spring of 2014. Along with James Borchers, MD, MPH, and Kendra McCamey, MD they had a systematic review submitted for publication.

Athletic Team Coverage
The Division of Sports Medicine provides care for all 36 varsity sports at Ohio State. Faculty members of the Division provide comprehensive care for all athletes at Ohio State along with event coverage for the entire Athletic Department.

OSU Sports Medicine continues to provide medical coverage to Capital University, covering its athletic programs and student health. Physicians also provide medical coverage to the Ohio Machine, the pro-lacrosse team. High school coverage continues to be a priority of the Division of Sports Medicine. Faculty and fellows of the Division provide care for many local high schools and for state tournaments for the Ohio High School Athletic Association. A significant amount of time is dedicated to the care of student athletes from the Columbus City Schools. This year they will also provide coverage to Upper Arlington schools.

Multiple community events such as Pelotonia, the TriFit Challenge and various rugby leagues are also covered by the faculty and fellows of the Division. Resident and student involvement is encouraged.

Fourth Year Medical Student Sports Medicine Rotation
The Division of Sports Medicine is committed to medical student education and offers a four week elective to fourth year medical students in Sports Medicine.

The primary goals of the rotation are:
♦ Exposure to a multidisciplinary approach to the practice of Sports Medicine
♦ Become familiar with common problems encountered in Sports Medicine, their presentation, diagnosis and management
♦ Learn and refine musculoskeletal physical examination skills
♦ Become familiar with common procedures used in Sports Medicine (i.e. injection techniques, fracture care, splinting/casting)

Requirements of the rotation include:
♦ Office hours with assigned physician(s)
♦ Attendance at weekly Sports Medicine conferences
♦ Attendance for training room coverage with their assigned physician
♦ Attendance at three athletic events over the four week rotation with their assigned physician
♦ Complete required readings
♦ Presentation with a written paper on topic of choice at the end of the four week rotation

Faculty for the rotation includes:
♦ Thomas Best MD, PhD
♦ James Borchers MD, MPH
♦ Clinton Hartz, MD, RMSK
♦ Michael Jonesco, DO
♦ Kendra McCamey, MD
♦ Bryant Walrod, MD

The rotation is offered for six four week blocks during the academic year. A total of 10 students completed the rotation during the 2013 – 2014 Academic Year. Evaluations for the elective were high and the elective is one of the OSUCOM most popular and highly rated among fourth year electives.
OSU Sports Medicine Center, a multidisciplinary treatment center, offers family medicine, orthopedics, physical therapy, and psychological and nutritional counseling services by individuals who understand and are experienced in dealing with competitive and recreational athletes. This expertise is applied to patients who are physically active or wish to embark on a healthier lifestyle. The Department of Family Medicine is a partner with the Department of Orthopedic Surgery and OSU Medical Center at OSU Sports Medicine.

Drs. McCamey and Hartz provide therapeutic and diagnostic ultrasound to patients. Dr. McCamey has been using musculoskeletal ultrasound in the sports medicine clinic now for over a year. She helped to form a musculoskeletal ultrasound community of practice at OSU 3-4 years ago and with this group, they created a credentialing document for the procedure. Dr. McCamey mainly utilizes the modality for guided procedures. She receives many referrals for hip injections, SI injections, piriformis injections as well as requests to help with difficult knee and shoulder injections. Dr. McCamey has produced a formal musculoskeletal ultrasound curriculum for fellows to teach them the basics of musculoskeletal ultrasound.

Dr. Hartz began using musculoskeletal ultrasound in 2010 during his sports medicine fellowship and performs both diagnostic and interventional musculoskeletal ultrasound. He is also engaged in teaching family medicine residents, fellows, and medical students about musculoskeletal ultrasound. Recently, he received credentialing from the American Registry for Diagnostic Medical Sonography which is a governing body to credential sonographers and physicians alike in all forms of ultrasound.

Sports Medicine Faculty

**Faculty**

*Thomas Best, MD, PhD, FACSM*
Professor of Family Medicine
Pomerene Chair

*James Borchers, MD, MPH*
Associate Professor of Clinical Family Medicine
Team Physician

*Clinton Hartz, MD, RMSK*
Clinical Assistant Professor of Family Medicine
Team Physician

*Kendra McCamey, MD*
Clinical Assistant Professor of Family Medicine
Team Physician

*Ray Pongonis, DO*
Clinical Assistant Professor of Family Medicine
Team Physician

*Bryant Walrod, MD*
Clinical Assistant Professor of Family Medicine
Team Physician

**Adjunct Faculty**

*Michael Jonesco, DO*
Assistant Clinical Professor of Internal Medicine
OSU Sports Medicine and Team Physician
Capital University

*Timothy Hewett, PhD*
Director of Research OSU Sports Medicine
Director Sports Health & Performance Institute Professor

**Fellows**

David Krey, DO 2013-2014
Christopher Miller, MD 2013-2014
The Division of Sports Medicine recognizes the importance of community outreach efforts. The following events reflect the dedication to the community by the Sports Medicine faculty:

- Best TM. Judge, OSUMC Annual Research Day, Columbus, OH,
- Best TM. Team Physician for Columbus City Schools and Ohio Machine
- Best TM. Team Physician for Columbus Ballet Met
- Best TM. Physician Coverage for Pelotonia
- Borchers JR. OHSAA Boys and Girls Basketball Tournament Coverage
- Borchers JR. OHSAA State Wrestling Tournament Coverage
- Borchers JR. Columbus City Schools Wrestling Championships
- Borchers JR. Physicals, National Youth Sports Program/LifeSports,
- Borchers JR. Special Olympics Physicals
- Hartz C. Team Physician for Columbus City Schools
- Hartz C. Special Olympics Physicals
- Hartz C. Physicals for OSU Rugby
- Hartz C. Physician Coverage for Pelotonia
- McCamey K. Medical Director for Pelotonia
- McCamey K. Pelotonia Training Series
- McCamey K. Pelotonia Bike with Brutus event August 2011, 2012
- McCamey K. OHSAA Boys and Girls Basketball Tournament Coverage
- Pongonis R. Team Physician, Bishop Watterson High School
- Pongonis R. Team Physician Columbus Clippers Baseball Team
- Pongonis R. Special Olympic Physicals
- Walrod B. Physician Coverage Pelotonia
- Walrod B. Team Physician Columbus Clippers Baseball Team
The Ohio State University Center for Integrative Health and Wellness (CIHW) was established in 2012 to improve human lives through innovative integrative healthcare, education, and research. The Center encourages personalized, participatory, relationship-based care, promoting optimal health. It emphasizes healing of the whole person to achieve each individual’s unique physical, emotional, mental, spiritual, and social health goals.

Established by the Department of Family Medicine in 2005, the OSU Integrative Medicine Clinic is one of CIHW's main initiatives. In 2013-2014, the clinic added four new staff members, including a dietitian, an osteopathic physician, and two massage therapists, and saw nearly 14,000 patients. The clinic expanded its hours of operation and offered services beyond the 2000 Kenny Road location for the first time, bringing massage therapy to Care Point Gahanna. In February 2014, the practice achieved its highest level of patient satisfaction to date (96.3%).

Offering live and online training opportunities, CIHW educated thousands of students, professionals, and community members through its education programs. In 2013, the Center launched “Introduction to Herbs and Dietary Supplements” online curriculum, which gained 1,200 participants in 6 months. And additional online training program, titled “Mind-Body Skills Training for Resilience, Effectiveness, and Mindfulness,” was authored by the Center’s Executive Director, Dr. Kathi Kemper, for release in Fall 2014. The clinic offered a Training Clerkship, a Residency Rotation, and a Practicum for Registered Dietitian Interns, giving hands-on training in integrative medicine. Additionally, the Center assisted 6 local nurses in obtaining Urban Zen Integrative Therapy certification.

In order to support research in the area of integrative medicine, CIHW presented its inaugural research awards in 2013, disbursing prize money to one trainee and one senior faculty member. Several individuals represented OSU at the International Congress for Integrative Medicine Research, and OSU’s membership in the Research Committee of the Consortium of Academic Health Centers for Integrative Medicine doubled. Pilot grants to support future integrative research were established, as well as four research groups in the areas of mind-body, exercise, omega 3, and massage/back pain.

Engaging the community in its mission, CIHW formed valuable partnerships with individuals and organizations to share resources and information. In March 2014, CIHW hosted Congressman Tim Ryan at OSU to discuss mindfulness and its impact with campus leaders. The Center was present at nearly a dozen community events, distributing information to thousands of individuals. A monthly email newsletter was established, as well as free online mind-body recordings for personal use. Lastly, more than 150 individuals participated in a yoga or tai class at the Integrative Medicine Clinic.

After its first full year of operation, the Center for Integrative Health and Wellness has accomplished many of its strategic goals, sharing the benefits of integrative medicine and offering opportunities to explore alternative healthcare.
Definition
Integrative health care is personalized, participatory, relationship-based care, promoting optimal health. It emphasizes healing of the whole person to achieve each individual’s unique physical, emotional, mental, spiritual, and social health goals. In 2007, almost 4 out of 10 of U.S. adults had used one or more complementary therapies. In 2011, more than 42% of hospitals offered one or more types of integrative health services.

History
In 2005, the OSU Department of Family Medicine created the Integrative Medicine Clinic. In 2006, an undergraduate minor in Integrative Health was initiated. In 2012, OSU created the Center for Integrative Health and Wellness to carry out a full academic mission of clinical care, education, research, and community engagement.

Vision
The OSU Center for Integrative Health and Wellness strives to be a global leader in providing integrative health care that advances well-being through inter-professional research and education and effective community engagement. To accomplish this vision, four strategic goals have been established:

Clinical
Lead evidence-based integrative health care that improves people’s lives.

Research
Conduct and disseminate innovative research that improves well-being.

Education
Provide pre-eminent education and training in integrative health and wellness.

Community Engagement
Actively promote health and well-being.

2013-2014 Practitioners

Acupuncture
David (Dehui) Wang, R.Ac, Dipl.Ac, Dipl.C.H
Hailing Zhang, R.Ac, Dipl.Ac

Ayurveda
Hari Sharma, MD, DABIHM, FACN

Behavioral & Mental Health Counseling
Patrice Rancour, MS, RN, PMHCNS-BC

Chiropractic
John Grandominico, DC, DACRB

Dietary Guidance
Denise Londergan, MPH, RD, LD

Integrative Medicine
Linda Chun, MD
Theodore Jordan, DO
Ruslana Kurpita, MD, DABHM
Melinda Skipper, CNP

Mind-Body Therapies
Patrice Rancour, MS, RN, PMHCNS-BC
Hari Sharma, MD, DABIHM, FACN

Nutrition Counseling
Denise Londergan, MPH, RD, LD

Stress Management
Patrice Rancour, MS, RN, PMHCNS-BC

Therapeutic Massage
Kevin “Ted” Blubaugh, LMT
Cheryl Boschert, LMT
Rhonda Crockett, LMT
Caitlin Merriman, LMT
Jenny Young, LMT
Elaine Weiss, LMT

Wellness Coaching
Patrice Rancour, MS, RN, PMHCNS-BC

Women’s Health
Ruslana Kurpita, MD, DABHM
Hailing Zhang, R.Ac, Dipl.Ac
Clinical
- Added 4 new staff members, including a dietitian, an osteopathic physician, and two massage therapists
- Completed 13,779 patient visits
- Expanded service hours from 7am-7pm to better meet demand
- Expanded services outside the clinic for the first time: massage therapy at CarePoint Gahanna
- Achieved the highest level of patient satisfaction: 96.3% in February 2014
- Created and implemented a new standardized intake form, allowing better tracking of patient outcomes
- Developed an online registration system to accommodate growing tai chi, yoga, and meditation classes
- Approved new aromatherapy, guided imagery, therapeutic and healing touch, and massage policies
- Initiated group visits for congestive heart failure patients in partnership with the Ross Heart Hospital

Education
- Launched the “Herbs and Dietary Supplements Across the Lifespan” online training program, enrolling 1,200 participants in 6 months
- Offered an IM Training Clerkship, an IM Residency Rotation and an IM Practicum for Registered Dietitian Interns
- Authored online training in “Mind-Body Skills Training for Resilience, Effectiveness, and Mindfulness”
- Developed a one-month immersion experience for practicing MDs, DOs, and APNs
- Planned in-person professional training programs for guided imagery, massage, acupressure, and meditation
- Assisted 6 local nurses in obtaining Urban Zen Integrative Therapy certification
- Supported weekly medical student meditation interest group meetings
- Started Journal Club for ongoing professional development of integrative clinicians and trainees
- Supplied 5 clinician lecturers for the “Integrative Approaches to Health and Wellness” undergraduate minor

Research
- Presented the inaugural CIHW Research Awards to one trainee and one senior faculty member
- Represented OSU at the International Congress for Integrative Medicine Research, hosting a workshop, a symposium, a panel presentation, an oral presentation, and four posters
- Generated more than $130 million in support for 45 extramurally-funded OSU projects containing an integrative health and wellness research element
- Authored 80 integrative health and wellness related publications
- Established pilot grants to support future integrative research
- Formed four research groups: mind-body, exercise, omega 3, and massage/back pain
- Added 44 Center members (91 total membership)
- Doubled OSU’s membership in the Research Committee of the Consortium of Academic Health Centers for Integrative Medicine

Community Engagement
- Participated in 9 community health and wellness fairs, distributing information to over 1,000 people
- Formed partnerships with the OSU Health and Wellness Council; Buckeye Wellness; Your Plan for Health; Columbus State Community College; Yoga on High; The OSU Center for Wellness and Prevention; Natural Awakenings Magazine; Pelotonia; Healthy New Albany; and many more
- Hosted Congressman Tim Ryan at OSU to discuss mindfulness with nearly 200 attendees
- Established a monthly email newsletter that is distributed to over 1,600 subscribers
- Received nearly 10,000 monthly webpage views
- Provided over 2,700 downloads of free mind-body recordings in 7 months
- Led 150 individuals in a yoga or tai chi class
**Clinical**
- Recruit an Associate Director for Clinical Services to lead clinical inpatient expansion efforts
- Expand massage therapy operations to 3 additional outpatient sites: Healthy New Albany, the Stephanie Spielman Comprehensive Breast Center, and JamesCare for Life
- Expand acupuncture services to one additional outpatient site: Healthy New Albany
- Create an inpatient service line for medicine consults and massage therapy

**Educational**
- Launch the “Mind-Body Skills Training for Resilience, Effectiveness and Mindfulness” online training program
- Market online training programs to international audiences to reach 10,000 total registrants
- Implement a one-month immersion experience for practicing MDs, DOs, and APNs
- Establish a fellowship in general integrative medicine
- Offer in-person professional training programs for guided imagery, massage, acupressure, and meditation
- Create intensive half-day seminar for integrative approaches to common conditions

**Research**
- Bring a visiting professor to OSU
- Host international post-doctoral fellow
- Continue to expand research networks and funding
- Obtain research funding to evaluate MB-STREAM and/or in-person training
- Apply for funding to evaluate congestive heart failure group visit model

**Community Engagement**
- Offer additional health classes (yoga, tai chi, and meditation) in multiple locations
- Create internship program in massage therapy for Columbus State students
- Financially support Urban Zen Integrative Therapy trainees
- Support OSU Health and Wellness affiliates to create employee stress management services
- Participate in major health and wellness-related events, such as Pelotonia and the New Albany Walking Classic
- Grow website visitation and email newsletter subscriptions
- Develop benefactor base to support growth

---

**Goals—2014 And Beyond**

His presentation highlighted principles from his book, “A Mindful Nation: How a Simple Practice Can Help Us Reduce Stress, Improve Performance, and Recapture the American Spirit.”

(Jana Jaffe, Kathi J. Kemper MD, MPH, Jodi McDaniel, PhD)

At the OSU Personalized Health Conference held October 3, 2013, Jana Jaffe and Jodi McDaniel, PhD accepted a 1st place awards in for their contributions in the Center for Integrative Medicine Research Award Competition.
The continuing medical education program in the Department, held in conjunction with monthly faculty meetings, offered many outstanding presentations relevant to family medicine. Evaluations of the presentations were all excellent; many of the speakers have been requested to return in the future to share other timely topics. Each participant attendee was awarded 0.75 of category 1 AAFP credit. All faculty members are invited to join us on the first Thursday of every month in conference room 233 in the Northwood-High Building (Rardin Family Practice Center). http://ccme.osu.edu/.

Miser, WF. (2013, July). Management of Type 2 Diabetes Mellitus – 2013 Update. Grand Rounds presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, July). Type 2 Diabetes Mellitus – Prevention and Early Recognition of Complications. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, July). The Case of JP – Ambulatory Management of Type 2 Diabetes Mellitus. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, July). The Approach to the Patient with Chest Pain in the Office. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, July). Well Child Care – ABFM SAM #5. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, July). FP Essentials – Skin Conditions. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, July). FP Essentials – Diabetes Management 2013. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, July). Preventive Care – ABFM SAM #1 - presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, September). Bedside Teaching – Enhancing Teaching on the Family Medicine Inpatient Service. Seminar presented at The Ohio State University Department of Family Medicine Faculty Development Series in Columbus, OH.

Miser, WF. (2013, September). FP Essentials – Common Lung Conditions. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, September). Preventive Care – ABFM SAM #2. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, October). Preventive Care – ABFM SAM #3. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, November). FP Essentials – Disorders of Childhood Growth and Development – Part I. Presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, November). Preventive Care – ABFM SAM #4. Grand Rounds presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2013, November). FP Essentials – Disorders of Childhood Growth and Development – Part 2. Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.
State and Local Presentations:

Miser, WF. (2013, November). The Good and the Ugly of the Latest American Heart Association Guidelines for Cholesterol Management. presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, March). FP Essentials – Common Gastrointestinal Symptoms. Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, March). Preventive Care – ABFM SAM #6 – Grand Rounds presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, April). FP Essentials – Rhinosinusitis & Otitis Media. Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, May). Evidence-Based Management of Type 2 Diabetes Mellitus – 2014 Update. Grand Rounds presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, May). FP Essentials – Urology and Nephrology Update. Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, May). Preventive Care – ABFM SAM #7 – Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, May). Preventive Care – ABFM SAM #8 – Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, June). Preventive Care – ABFM SAM #9 – Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, June). FP Essentials – Sports Medicine in Children – Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, June). Preventive Care – ABFM SAM #10 – Lecture-discussion presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Miser, WF. (2014, June). The Resident as Teacher. Workshop presented at The Ohio State University Department of Family Medicine Residency Program in Columbus, OH.

Wexler RK. (2013). Legislature and the Affordable Care Act and how it pertains to the future of primary care. Presented at Ohio State University Primary Care Week.

National Awards:

Best, TM. (2014). American College of Sports Medicine Citation Award.

Buoni, WG. (2014). Physician Customer Service Award, Ohio State University Wexner Medical Center

Hewett, TE. (2014). Nathaniel Bates, URC Graduate Student Research Fellowship Award, University of Cincinnati.

Hewett, TE. (2014). Stephanie Di Stasi, PhD, KL2 Scholar Career Development Award, OSU Center for Clinical and Translational Science.

Miser, FW. (2013). American Academy of Family Physicians. AAFP Exemplary Teaching Award, Full-Time Faculty.

Integrated Pathway Academic Program Committee   Doug Post, PhD
Interest Group, Advisor           Allison Macerollo, MD
Lead Serve Inspire Curriculum Implementation:
  Behavioral & Social Sciences Task Force (Chair) Doug Post, PhD
  Community Health Education Task Force (Director) Maryanna Klatt, MD
  Faculty                                 Lorraine Wallace, PhD
Curriculum Implementation Team Leadership (CITL)
Curriculum Implementation Team (CIT) Clinical Sciences (Co-Chair) Doug Post, PhD
Diversity Task Force               Don Mack, MD
Geriatrics Task Force             Holly Cronau, MD
Knowledge Measurement Task Force  Don Mack, MD
Longitudinal Health Coaching Task Force (Chair) Doug Post, PhD
The Ohio State University College of Medicine:

Lead Serve Inspire Curriculum Implementation:
- Longitudinal Practice Task Force (Chair) Doug Post, PhD
- Longitudinal Small Group Task Force (Chair) Doug Post, PhD
- M4 Advanced Competency/Advanced Clinical Tracks Committee Allison Macerollo, MD
- Medical Student Procedures Education Task Force W. Fred Miser, MD
- Part 1 Academic Program Committee John McConaghy, MD
- Part 1 Longitudinal Group Faculty Development Laurie Belknap, DO
- Part 2 Groundschool Curricular Task Force Maryanna Klatt, PhD
- Part 2 Patients within Populations (Chair) Holly Cronau, MD
- Part 2 Unit Director Family Medicine Leon McDougle, MD
- Part 3 Advanced Ambulatory & Relationship Centered Care Maryanna Klatt, PhD

Leadership Development Program-Advisors:
- Med 3/4 OSCE Task Force Allison Macerollo, MD
- Med 3/4 Committee Holly Cronau, MD
- Medical Scientist Program Executive Committee Leon McDougle, MD
- Medical Scientist Training Program Review and Critique Committee Leon McDougle, MD
- Medical Student Summer Research Project Mentor Lorraine Wallace, PhD
- Medicine and the Arts (Member) Maryanna Klatt, PhD
- Musculoskeletal Ultrasound Community Kendra McCamey, MD
- MEDPATH Post Baccalaureate Program, Director Leon McDougle, MD
- Positivity, coping, and burnout working group-Member Maryanna Klatt, PhD
- Schweitzer Fellows Advisory board (Member) Don Mack, MD
- Seminar on Ethical Issues Course Faculty Maryanna Klatt, PhD
- Skills Training for Resilience, Effectiveness, and Mindfulness (Reviewer) John McConaghy, MD
- Wilderness Medicine Interest Group, Advisor Maryanna Klatt, PhD

The Ohio State University Wexner Medical Center:

Ambulatory Quality Management Committee:
- Operations Sub Committee Mary Jo Welker, MD
- Patient Centered Medical Home Sub Committee Randy Wexler, MD

Bylaws Committee
- Credentialing Committee James Borchers, MD, MPH
- Diversity Council (Co-Chair) John McConaghy, MD
- Diversity Executive Committee (Chief Diversity Officer) Mary Jo Welker, MD
- Evidence-Based Policy Committee Randy Wexler, MD
