Overview

E. Christopher Ellison, M.D.
Chairman, Department of Surgery

The missions of the Department of Surgery are consistent with those of The Ohio State University College of Medicine. The department’s missions are the delivery of high-quality patient care, the contribution to innovations in medicine through basic and translational research and clinical outcomes studies, and the education of medical students and postgraduate trainees. This report summarizes the changes and accomplishments in the department from July 1, 2009 through June 30, 2010.

Organization
The Department of Surgery comprises eight specialty divisions: Cardiothoracic Surgery; Critical Care, Trauma, and Burn; General and Gastrointestinal Surgery; Pediatric Surgery; Plastic Surgery; Surgical Oncology; Transplantation; and Vascular Diseases and Surgery. In addition, the Center for Minimally Invasive Surgery, a multidisciplinary organization within the department, is dedicated to developing and implementing minimally invasive technologies and procedures.

Faculty
Recruitment efforts brought 17 new faculty members to the department this year. The Center for Minimally Invasive Surgery made two one-year clinical faculty appointments. The Division of Cardiothoracic Surgery, and the Division of Care, Trauma, and Burn, each added two new faculty members. The Division of General and Gastrointestinal Surgery added three faculty members and made one one-year clinical faculty appointment. The Division of Plastic Surgery added two faculty members and made one one-year clinical faculty appointment. The Division of Pediatric Surgery, the Division of Surgical Oncology, and the Division of Vascular Diseases and Surgery each appointed one new faculty member. A complete list of this year’s faculty appointments begins on page 7 of this report.
Clinical Care
The Department of Surgery provides all aspects of major surgical care. This year, the department performed 18,742 surgical procedures and received 62,288 outpatient visits. Outpatient services are available at numerous sites, including:

- Aesthetic Surgery at Easton Town Center, 2 Easton Oval, Suite 545.
- The Arthur G. James Cancer Hospital and Richard J. Solove Research Institute, 300 West 10th Avenue.
- Cramblett Hall Medical Clinic, 456 West 10th Avenue.
- General Surgery at Knightsbridge, 4830 Knightsbridge Boulevard, Suite J.
- JamesCare Dublin, 4019 Dublin-Granville Road.
- The Martha Morehouse Medical Plaza, 2050 Kenny Road.
- Nationwide Children’s Hospital, 700 Children’s Drive.
- The Ohio State University Medical Center, 450 West 10th Avenue.
- The Ohio State University Medical Center Services, 770 Kinnear Road.
- Plastic Surgery at Knightsbridge, 4830 Knightsbridge Boulevard, Suite G.
- Plastic Surgery at the OSU Eye and Ear Institute, 915 Olentangy River Road, Suite 2100.
- The Richard M. Ross Heart Hospital, 452 West 10th Avenue.
- University Hospital East, 1492 East Broad Street.

Research
Research efforts continue to focus on three major areas: wound healing, vascular biology and transplantation, and tumor biology.

This year, new research funding awarded through The Ohio State University Research Foundation to principal investigators in the Department of Surgery totaled more than $4.9 million. New federal funding was more than $2.7 million, or 56 percent of total funding. New non-federal funding was more than $2.1 million, or 44 percent of the total.

Education
Twenty-nine residents and fellows completed their training programs this year. Five went on to community practice, 16 to further training, and six to academic appointments. Two residents had not yet decided on a position at the time of graduation.

Faculty Appointments

**Jennifer H. Aldrink, M.D.**
Assistant Professor of Clinical Surgery, Division of Pediatric Surgery

**B.A.:** Wake Forest University, Winston-Salem, N.C., 1995

**M.D.:** East Carolina University School of Medicine, Greenville, N.C., 2000

**Specialty Training:** Residency in general surgery, Duke University Medical Center, Durham, N.C.; fellowship in pediatric surgery, Nationwide Children’s Hospital, Columbus, Oh.

**Appointment:** 2009

**Research Interests:** Osteosarcoma pulmonary metastases, childhood malignancy and obesity, childhood melanoma, gastroschisis

---

**Paul R. Beery, M.D.**
Assistant Professor of Clinical Surgery, Division of Critical Care, Trauma and Burn

**B.M.E.:** The Ohio State University, Columbus, Oh., 1992

**M.D.:** The Ohio State University, Columbus, Oh., 1999

**M.S.:** The Ohio State University, Columbus, Oh., 2005

**Specialty Training:** Residency in general surgery and fellowship in surgical critical care, The Ohio State University, Columbus, Oh.

**Appointment:** 2009

**Specialty Interests:** Thoracic and abdominal trauma

**Previous Appointment:** Trauma surgeon, Grant Hospital, Columbus, Oh.

---

**Renata B. Fabia, M.D., Ph.D.**
Assistant Professor of Clinical Surgery, Division of Pediatric Surgery

**M.D.:** Medical University of Silesia, Katowice, Poland, 1985

**Ph.D.:** Lund University, Lund Sweden, 1993

**Specialty Training:** Research fellowship in transplantation, Baylor University, Dallas, Tx.; fellowship in pediatric surgery, Children’s Hospital, Dallas, Tx.; residency in general surgery, The Ohio State University, Columbus, Oh.

**Appointment:** 2009

**Specialty Interests:** Pediatric burn surgery

**Previous Appointment:** Clinical assistant professor of surgery, The Ohio State University, Columbus, Oh.

---

**Nabil A. Habash, M.D.**
Clinical Assistant Professor of Surgery, Division of Plastic Surgery

**B.S.:** Florida State University, Tallahassee, Fl., 1997

**M.D.:** University of North Carolina, Chapel Hill, N.C., 2003

**Appointment:** 2009

**Specialty Interests:** Microsurgery, cancer reconstruction

**Previous Appointment:** Resident in general surgery, Mount Carmel Health System, Columbus, Oh.
Clinton R. Hall, M.D.
Clinical Assistant Professor of Surgery, Division of General and Gastrointestinal Surgery
B.S.: Cumberland College, Williamsburg, Ky., 2000
M.D.: University of South Florida College of Medicine, Tampa, Fl., 2004
Appointment: 2009
Specialty Interests: Laparoscopic, gastric bypass, hernia repair
Research Interest: Abdominal wall defects, hernia prevention
Previous Appointment: Residency in general surgery, The Ohio State University, Columbus, Oh.

Brian Janz, M.D.
Assistant Professor of Surgery-Clinical, Division of Plastic Surgery
M.D.: Medical College of Ohio, Toledo, Oh.
Specialty Training: Hand and Microsurgery fellowship, Curtis National Hand Center, Baltimore, Md., 2008
Appointment: 2009
Specialty Interests: Catastrophic injuries to upper and lower extremities, limb salvage, reconstructive microsurgery of the hand, arthritis surgery of the hand and wrist endoscopic carpal tunnel release
Research Interests: Upper extremity microsurgery and revascularization
Previous Appointment: Residency in plastic surgery, Baylor College of Medicine, Houston, Tx.

Edmund S. Kassis, M.D.
Assistant Professor of Surgery, Division of Cardiothoracic Surgery
B.S.: University of Pittsburgh, Pittsburgh, Pa., 1992
M.D.: University of Pittsburgh, Pittsburgh, Pa., 1999
Specialty Training: Residency in general surgery, Johns Hopkins University Hospital, Baltimore, Md.; thoracic surgery residency, University of Texas M.D. Anderson Cancer Center, Houston, Tx.
Appointment: 2009
Specialty Interests: Thoracic surgical oncology, esophageal cancer, minimally invasive thoracic surgery
Research Interests: Thoracic oncology, translational research in lung and esophageal cancer, molecular genetics, staging
Previous Appointment: Fellow in thoracic surgery, University of Texas, Houston, Tx.
Savita Khanna, Ph.D.
Assistant Professor of Surgery, Division of General and Gastrointestinal Surgery
B.S.: Meerut University, Meerut, Uttar Pradesh, India, 1984
M.S.: Meerut University, Meerut, Uttar Pradesh, India, 1986
M.Ph.: Meerut University, Meerut, Uttar Pradesh, India, 1988
Ph.D.: University of Kuopio, Kuopio, Finland, 2000
Specialty Training: Research fellowship in molecular and cell biology, University of California, Berkeley, Ca.
Appointment: 2009
Research Interests: Tissue injury and repair, neurodegeneration and stroke
Previous Appointment: Research scientist, The Ohio State University Medical Center, Columbus, Oh.

Ergun Kocak, M.D.
Assistant Professor of Surgery, Division of Plastic Surgery
B.S.: University of Michigan, Ann Arbor, Mi., 1996
M.D.: The Ohio State University, Columbus, Oh., 2000
M.S.: The Ohio State University, Columbus, Oh., 2005
Specialty Training: Residency in plastic surgery, The Ohio State University, Columbus, Oh.; fellowship in reconstructive microsurgery, University of Texas M.D. Anderson Cancer Center, Houston, Tx.
Appointment: 2009
Specialty Interests: Microsurgery and cancer reconstruction
Research Interests: Tumor immunotherapy, image guidance in surgery, objective measures of surgical training and skill
Previous Appointment: Fellow in reconstructive microsurgery, The Ohio State University Medical Center, Columbus, Oh.

Vanchad Memark, M.D.
Clinical Assistant Professor of Surgery, Division of General and Gastrointestinal Surgery
B.S.: Loyola University, Chicago, Il., 1997
M.D.: Loyola University Stritch School of Medicine, Chicago, Il., 2009
Specialty Training: Residency in general surgery, University of Illinois Metropolitan Group Hospitals, Chicago, Il.
Appointment: 2009
Specialty Interests: Surgical endoscopy, minimally invasive surgery
Research Interest: Natural orifice translumenal endoscopy surgery (NOTES), minimally invasive surgery
Previous Appointment: Chief resident, University of Illinois Metropolitan Group Hospitals, Chicago, Il.
Kyle Perry, M.D.
Assistant Professor of Surgery, Division of General and Gastrointestinal Surgery
B.A.: University of Michigan, Ann Arbor, Mi., 1998
M.D.: Temple University, Philadelphia, Pa., 2002
Specialty Training: Residency in general surgery, Rush Presbyterian St. Luke’s Medical Center, Chicago, Il.; fellowship in minimally invasive surgery, Oregon Health Science University, Portland, Or.
Appointment: 2009
Specialty Interests: Esophageal surgery including cancer
Research Interest: Minimally invasive surgery
Previous Appointment: Clinical Instructor of Surgery, Oregon Health Science University, College of Medicine, Department of Surgery. Portland, Oregon

John Phay, M.D.
Associate Professor of Surgery, Division of Surgical Oncology
B.A.: Williams College, Williamstown, Massachusetts, 1983
M.D.: University of California-San Francisco, San Francisco, Ca., 1988
Specialty Training: Howard Hughes Research Fellowship, University of California-San Francisco, San Francisco, Ca.; Residency in general surgery, Washington University School of Medicine, St. Louis, Mo.; surgical oncology training grant fellowship, Washington University School of Medicine, St. Louis, Mo.
Appointment: 2009
Specialty Interests: Endocrinology, oncology
Research Interests: Endocrinology
Previous Appointment: Assistant professor of surgery, Vanderbilt Medical Center, Nashville, Tn.

Brian Porshinsky, M.D.
Assistant Professor of Surgery, Division of Critical Care, Trauma, and Burn
B.A.: The Ohio State University, Columbus, Oh., 1991
M.D.: Medical College of Ohio, Toledo, Oh., 1999
Specialty Training: Residency in general surgery, Medical College of Ohio, Toledo, Oh.; fellowship in plastic surgery, University of Illinois, Chicago, Illinois; fellowship in burn surgery, New York-Presbyterian Hospital, New York, N.Y.
Appointment: 2009
Specialty Interests: Improving burn outcomes
Research Interests: Fluid resuscitation burn reconstruction
Previous Appointment: Fellow in burn and trauma, Ohio State University Medical Center, Columbus, Oh.
David Renton, M.D.
Assistant Professor of Clinical Surgery, Division of General and Gastrointestinal Surgery
B.S.: Tulane University, New Orleans, La., 1994
M.D.: Louisiana State University, New Orleans La., 2001
Specialty Training: Master of Public Health, Tulane University School of Public Health, New Orleans, La., 1997
Appointment: 2009
Specialty Interests: Bariatrics, natural orifice translumenal endoscopy surgery (NOTES)
Research Interests: Advanced technology
Previous Appointment: Assistant professor, University of South Carolina School of Medicine, Columbia, S.C.

Cameron Rink, Ph.D.
Assistant Professor of Surgery, Division of Vascular Diseases and Surgery
B.S.: Hillsdale College, Hillsdale, Mi., 2000
Ph.D.: Ohio State University, Columbus, Oh., 2009
Appointment: 2009
Research Interests: Human nutrition, stroke, vascular disease
Previous Appointment: Post doctoral researcher, The Ohio State University Medical Center, Columbus, Oh.

Eric Volckmann, M.D.
Clinical Assistant Professor of Surgery, Center for Minimally Invasive Surgery
B.S.: Indiana University, Bloomington, In., 1999
M.D.: Indiana University, Indianapolis, In., 2003
Specialty Training: Residency in general surgery and minimally invasive research fellowship, Northwestern University, Chicago, Il.
Appointment: 2008
Specialty Interests: Minimally invasive surgery
Research Interests: Minimally invasive surgery, duodenal ulcer disease, colorectal cancer screening
Previous Appointment: Resident in general surgery, Northwestern University, Chicago, Il.

Wing Yeen, M.D.
Assistant Professor of Surgery, Division of Cardiothoracic Surgery
M.D.: University of Kentucky, Lexington, Ky., 1997
Specialty Training: Fellowship in cardiothoracic surgery, The Ohio State University Medical Center, Columbus, Oh.
Appointment: 2008
Specialty Interests: Minimally invasive robotic cardiac and thoracic surgery
Previous Appointment: Fellow in cardiothoracic surgery, The Ohio State University Medical Center, Columbus, Oh.
New Research Funding

During fiscal year 2009–2010, new research funding awarded through The Ohio State University Research Foundation to principal investigators in the Department of Surgery totaled more than $4.9 million.

New federal funding was more than $2.7 million, or 56 percent of total funding. New non-federal funding was more than $2.1 million, or 44 percent of the total.

Graduate Programs in Surgery

The surgical residency programs at The Ohio State University Medical Center share a common goal: to provide an environment conducive to learning, in which physicians prepare to function as well-qualified, independent specialists in surgery.

This year, 111 residents and fellows participated in the department’s 13 residency programs, which consist of three residencies accredited by the Accreditation Council for Graduate Medical Education (ACGME), three ACGME-approved specialty certification programs, and seven approved specialty fellowships. These programs provide training in cardiothoracic surgery, general surgery, minimally invasive surgery, advanced endoscopic surgery, pediatric surgery, plastic surgery, surgical critical care, surgical oncology, transplantation, and vascular surgery.

Surgical residents at Ohio State are dedicated to learning and teaching advanced surgical techniques and procedures, and assume a major responsibility for the clinical education of medical students. The integrated and affiliated institutions of the program provide clinical resources for graduate and undergraduate surgical education. The Ohio State University Medical Center and the Department of Surgery host a variety of forums and seminars, where clinicians and researchers share their expertise and advance the profession.

Research is a vital component of the Department of Surgery’s mission and an integral element of its training programs. Research efforts are focused on key areas of interest that promise to yield significant results in the understanding of disease and in the improvement of clinical care. The Department of Surgery’s Office of Surgical Research promotes interdisciplinary research activity and the integration of clinical and basic science research. The department’s stature and the reputation of its researchers and clinicians enable it to garner significant funding from private industry and from federal sources, such as the National Institutes of Health.
Residency and Fellowship Program Graduates

Twenty-nine residents and fellows completed their training programs this year. Five went on to community practice, 16 to further training, and six to academic appointments. Two residents had not yet decided on a position at the time of graduation.

Sherif R. Z. Abdel-Misih, M.D.
Dr. Abdel-Misih completed the fellowship in surgical oncology and began an appointment as assistant professor of clinical surgery in Ohio State’s Division of Surgical Oncology.

Siddharth K. Bhende, M.D.
Dr. Bhende completed the fellowship in vascular surgery and began private practice in Mesa, AZ.

Mutaza Y. Dawood, M.D.
Dr. Dawood completed the fellowship in cardiothoracic surgery and began a fellowship in advanced valve surgery at the University of Maryland Medical Center, in Baltimore, MD.

Kevin O. Delaney, M.D.
Dr. Delaney completed the residency in plastic surgery and began an appointment as assistant professor at the Medical University of South Carolina, in Charleston, SC.

Daniel S. Eiferman, M.D.
Dr. Eiferman completed the fellowship in surgical critical care and began an appointment as assistant professor of surgery in Ohio State’s Division of Critical Care, Trauma, and Burn.

David C. Evans, M.D.
Dr. Evans completed the fellowship in surgical critical care and is continuing the residency in general surgery at Ohio State.

Bryan T. Fisher, M.D.
Dr. Fisher completed the residency in general surgery and began a fellowship in peripheral vascular surgery at Vanderbilt University, in Nashville, TN.

Mason G. Fisher, M.D., M.S.
Dr. Fisher completed the residency in general surgery and began a fellowship in surgical critical care at the Medical College of Wisconsin, in Milwaukee, WI.

Stacey H. Francis, M.D.
Dr. Francis completed the residency in plastic surgery and began a fellowship in craniofacial and pediatric plastic surgery at Children’s Hospital, in Los Angeles, CA.

Brian M. Goodman, M.D.
Dr. Goodman completed the fellowship in cardiothoracic surgery and began a fellowship in thoracic oncology at Brigham and Women’s Hospital, in Boston, MA.
K. Roxanne Grawe, M.D.
Dr. Grawe completed the residency in plastic surgery and began private practice in Columbus, OH.

Yusuf Gunay, M.D.
Dr. Gunay completed the fellowship in transplantation and was undecided at the time of graduation.

Nabil A. Habash, M.D.
Dr. Habash completed the fellowship in reconstructive microsurgery and began private practice in Austin, TX.

Clinton R. Hall, M.D.
Dr. Hall completed the fellowship in minimally invasive surgery and began private practice in Melbourne Beach, FL.

Ioannis S. Hatzaras, M.D., M.P.H.
Dr. Hatzaras completed the master of medical science program and is continuing the residency in general surgery at Ohio State.

Lisa M. Haubert, M.D., M.S.
Dr. Haubert completed the master of medical science program and is continuing the residency in general surgery at Ohio State.

James M. Howard, M.D.
Dr. Howard completed the fellowship in surgical critical care and began a fellowship in burn surgery at Ohio State.

Iyore A.-O. James, M.D., M.A.L.D., M.S.
Dr. James completed the master of medical science program and is continuing the residency in general surgery at Ohio State.

Natalie B. Jones, M.D., M.S.
Dr. Jones completed the residency in general surgery and began a fellowship in surgical oncology at Ohio State.

Vanchad C. Memark, M.D.
Dr. Memark completed the fellowship in advanced therapeutic endoscopy and gastrointestinal surgery and began private practice in Atlanta, GA.

Benjamin N. Morris, M.D.
Dr. Morris completed the fellowship in surgical critical care and began an appointment as assistant professor of surgery at Wake Forest University, in Winston-Salem, NC.

Peter N. Nau, M.D., M.S.
Dr. Nau completed the master of medical science program and is continuing the residency in general surgery at Ohio State.
Dorothy V. Rocourt, M.D.
Dr. Rocourt completed the fellowship in pediatric surgery and began an appointment as assistant professor of clinical surgery at Pennsylvania State University, in Hershey, PA.

Srinivas S. Samavedi, M.D., M.S.
Dr. Samavedi completed the fellowship in transplantation and began an appointment as assistant professor of urology at Nizams Institute of Medical Science, Hyderabad, India

Irina Shakhnovich, M.D., M.S.
Dr. Shakhnovich completed the residency in general surgery and began a fellowship in vascular surgery at the Medical College of Wisconsin, in Milwaukee, WI.

Vance L. Smith, M.D., M.S., M.B.A.
Dr. Smith completed the residency in general surgery and began a fellowship in surgical critical care/trauma at Stanford University, Stanford, CA.

Alicia C. Thomas, M.D., M.S.
Dr. Thomas completed the master of medical science program and is continuing the residency in general surgery at Ohio State.

Eric T. Volckmann, M.D.
Dr. Volckmann completed the fellowship in minimally invasive surgery and was undecided at the time of graduation.

Wing C. Yeen, M.B.B.S.
Dr. Yeen began an appointment as clinical assistant professor of surgery in Ohio State’s Division of Cardiac Surgery. He will complete the fellowship in mechanical and circulatory support on September 30, 2010.
Annual Surgery Awards Banquet

Outstanding teachers and the 2009–2010 graduates of the Department of Surgery’s training programs were honored June 12 at the department’s annual awards banquet.

Special Awards
Dr. Natalie B. Jones, chief resident in general surgery, was named Resident of the Year by the Surgery faculty.

Dr. Ellen A. Carraro was named Intern of the Year by the Surgery faculty.

Karen S. Copeland, RN, Division of General and Gastrointestinal Surgery, was named Surgical Nurse of the Year by the chief residents in general surgery.

Dr. Mary Dillhoff was named Pediatric Resident of the Year of the Year by the Pediatric Surgery faculty.

Teaching Awards
Dr. Sherif Abdel-Misih, fellow in surgical oncology, was selected by the general surgery residents to receive a Fellow Teaching Award.

Dr. Siddharth K. Bhende, fellow in vascular surgery, was selected by the general surgery residents to receive a Fellow Teaching Award.

Dr. Natalie B. Jones, chief resident in general surgery, was chosen by the medical students to receive a Resident Teaching Award.

Dr. Carl R. Schmidt, assistant professor of clinical surgery in the Division of Surgical Oncology, was selected by the medical students to receive the Michael J. Walker, M.D., Faculty Teaching Award.

Dr. Andrei V. Manilchuk, assistant professor of clinical surgery in the Division of General and Gastrointestinal Surgery, was chosen by Department residents and fellows to receive a Faculty Teaching Award.

Raymond M. Manley, director of operations, OSU Surgery, LLC, was selected by the chief residents in general surgery to receive the John L. Robinson Award, for outstanding teaching by faculty or staff from another department.

Research Awards
Five trainees received awards for outstanding research presentations made at the Department of Surgery’s 15th Annual Research Conference, held May 28 at The Ohio State University Medical Center.

Dr. Kristan D. Guenterberg, a general surgery resident, received the first-place award for the best research presentation by a resident. His presentation was titled “Natural Killer Cells are Activated by IL-21 and Induce ADCC and IFN-Gamma Release in Pancreatic Cancer Cell Lines.”
Dr. Thomas Pham, a general surgery resident, received the second-place award for a research presentation by a resident. His presentation was titled “IL-4 Dependent, IgG1-Dominant Post-Transplant Alloantibody Production is Regulated by CD8+ T Cells.”

Alyssa Charrier, a Ph.D. student in the Department of Surgery, received the award for the best research presentation by a graduate research associate. Her presentation was titled “Connective Tissue Growth Factor Production by Activated Pancreatic Stellate Cells in Mouse Alcoholic Chronic Pancreatitis.”

Dr. Mary Dillhoff, a general surgery resident, received the award for the best research presentation as voted by the interns. Her presentation was titled “Inactivation of p16 in Patients with Esophageal Adenocarcinoma Portends Poor Prognosis in Esophageal Adenocarcinoma.”

Dr. Peter Nau, a general surgery resident, received the award for the best poster presentation. His poster was titled “Novel Reconstruction Techniques of the Extrahepatic Biliary Trees with a Biosynthetic Absorbable Graft.”

Medical Student Awards
Department of Surgery faculty honored five senior medical students for exceptional performance and dedication to surgery.

Zachary W. Bryan received the Ferguson Award in Surgery.

Lindsay E. Williams received the Carey Award in Surgery.

Aaron P. Wilcox received the Barton Williams Graduation Award, a merit scholarship for a graduating fourth-year student in the College of Medicine who intends to complete a surgical residency.

Justin T. Huntington received the Zollinger Award in Surgery.

Rachel C. Sullivan received the Jonasson Award in Surgery.
Recognitions

**Michael D. Adolph, MD, FACS**, Division of Surgical Oncology, presented work accomplished with Division of Thoracic Surgery surgeons **Patrick Ross, MD, PhD, FACS** and **Susan Moffatt-Bruce MD, PhD, FACS** and their clinical services teams at the American Society for Clinical Oncology Annual 2009 National Meeting in Orlando Florida. “Evaluating cancer patient satisfaction before and after daily multidisciplinary care for thoracic surgery inpatients” demonstrated enhanced pain relief satisfaction and quality, and reduced costs, for James inpatients with lung cancer using an innovative process improvement approach. [Journal of Clinical Oncology, 27 (18S), 9605] The project also won the “**Greatest Quality and Patient Satisfaction Improvement**” Award at the James Quality, Satisfaction, and Patient Safety Fair, December 3, 2009; the award was one of only 6 given out of about 100 projects and 60 posters at the James.

**Dr. Paul R. Beery, II**, was selected to receive the 2009-2010 Department of Emergency Medicine Outstanding Contribution Award. The award recognizes an attending or resident from another department for their commitment to teamwork, communication, and outstanding clinical judgement. The award is selected by the Department of Emergency Medicine housestaff.

**Dr. Paul R. Beery, II**, assistant professor of clinical surgery, Division of Critical Care, Trauma, and Burn was selected for the University Hospital Physician of the Month Award - March 2010.

**David R. Brigstock, PhD**, Professor of Surgery in the OSU Division of Pediatric Surgery has been elected as a member of the Society of University Surgeons (SUS).

**Dr. Allen F. Browne**, associate professor of clinical surgery in the Division of Pediatric Surgery, served on a mission trip to Children’s Hospital #1, in Ho Chi Minh City, Vietnam, April 8–19, with the International Pediatric Specialists Alliance for Children. Also, Dr. Browne has been appointed chairman of the Childhood Obesity Committee of the American Pediatric Surgical Association, for 2009–2010.

**Dr. Ginny L. Bumgardner**, professor of surgery, Division of Transplantation has been invited to serve as chair of the American Society of Transplantation (AST) Workforce Analysis Task Force. This newly established AST task force will focus on identifying and addressing potential workforce shortages in the field of transplantation. Task force members actively take part in discussion and participate in scheduled conference calls.

**Dr. Donna A. Caniano**, the H. William Clatworthy professor of surgery and chief of the Division of Pediatric Surgery, **Dr. Marc P. Michalsky**, assistant professor of clinical surgery in the Division of Pediatric Surgery, and **Dr. Bradley J. Needleman**, associate professor of surgery and director of bariatric surgery in the Division of General and Gastrointestinal Surgery, served as speakers at a symposium titled “Chronic Diseases in Childhood Obesity: Risks and Benefits of Early Intervention,” April 2–3, 2009, in Columbus, Ohio.
Dr. William E. Carson III, has been named to the Board of Directors of the National Comprehensive Cancer Network (NCCN). Dr. Carson is a surgical oncologist who serves as Associate Director for Clinical Research at The Ohio State University Comprehensive Cancer Center (OSUCCC) and co-leads the Cancer Center’s Innate Immunity Research Program.

Dr. Juan A. Crestanello, assistant professor of surgery, Division of Cardiothoracic Surgery has accepted an invitation to join the editorial board of the Journal of Surgical Research. As a member of the board Dr. Crestanello will serve a 3-year term with an option for a second term and will review manuscripts in his field of expertise. Dr. Crestanello previously served the journal as an ad hoc reviewer.

Dr. Juan A. Crestanello, of the Division of Cardiothoracic Surgery, was promoted October 1, 2009 to associate professor of surgery.

Dr. Elmahdi A. Elkhammas, professor of clinical surgery, chief, liver transplantation, Division of Transplantation, has been appointed examiner for the Libyan Board of Medical Specialization, Surgical Specialty, Tripoli, Libya, July 25-28, 2009.

Dr. Elmahdi A. Elkhammas, professor of clinical surgery, chief, liver transplantation, Division of Transplantation, has been selected as chairman for the Libyan Health Reforms Advisory Committee, Secretary of Health and Environment, Tripoli, Libya, November 23, 2009. Dr. Elkhammas has also been selected as chairman for the Ibnosina Annual Seminar of Open Access Organizing Committee, Tripoli, Libya, November 29, 2009.

Dr. E. Christopher Ellison, the Robert M. Zollinger professor and chairman of surgery, associate vice president for health sciences, and vice dean of clinical affairs, has been elected secretary of the American Surgical Association for 2009 through 2014.

Dr. Ronald M. Ferguson, chairman of the Department of Surgery from 1993 to 1999 and chief of the Division of Transplantation from 1985 to 2005, was appointed emeritus professor of surgery April 1, 2009.

Dr. Michael S. Firstenberg, assistant professor of surgery, Division of Cardiothoracic Surgery was highlighted in the OSU Medical Center publication Medical Staff News for his high patient satisfaction scores. Dr. Firstenberg attributed his high ratings to directing the patient’s care from pre-surgery exam throughout hospitalization and follow-up, and making himself available to address patient’s questions and concerns. He also stressed the importance of caring not only for the patient, but for the patient’s family too. Dr. Firstenberg focuses on adult-acquired and congenital cardiac surgery, cardiothoracic care, mechanical assist devices and heart failure.

Dr. Gayle M. Gordillo, of the Division of Plastic Surgery, was promoted October 1 to associate professor of surgery.
Dr. Gayle M. Gordillo, associate professor of surgery, Division of Plastic Surgery, has been accepted into the Executive Leadership in Academic Medicine (ELAM) fellowship program of the Institute for Women’s Health and Leadership at Drexel University College of Medicine, Philadelphia, Pennsylvania. The ELAM program is an intensive one-year program of leadership training with extensive coaching, networking and mentoring opportunities aimed at expanding the national pool of qualified women candidates for leadership in academic medicine, dentistry and public health.

More than 300 emergency medical technicians, nurses, physicians, and social workers attended the 10th Annual Ohio Pediatric Trauma Symposium April 17, 2009, at the Hyatt Regency Columbus. Sponsored by the trauma program at Nationwide Children’s Hospital, which is under the direction of Dr. Jonathan E. Groner, the symposium featured keynote speaker Dr. Barbara Barlow, professor of epidemiology in surgery at Columbia University and founder and director of the Injury Free Coalition for Kids. Dr. Groner is associate professor of clinical surgery in the Division of Pediatric Surgery.

Dr. Alan E. Harzman, assistant professor of surgery, Division of General and Gastrointestinal Surgery has been accepted into the Association for Surgical Education’s (ASE) Surgical Education Research Fellowship program (SERF).

Dr. Jeffrey W. Hazey, of the Division of General and Gastrointestinal Surgery, was promoted October 1, 2009 to associate professor of surgery.

Dr. Mitchell L. Henry has been selected as president-elect of the American Society of Transplant Surgeons (ASTS) at the 2010 American Transplant Congress held in May. He will take office in May, 2011. Dr. Henry, professor of surgery, is Ohio State’s chief of the Division of Transplantation and deputy director of the Comprehensive Transplant Center. In addition, Henry serves as president of the Vascular Access Society of the Americas.

K. Christopher Kaiser, Chief Operating Officer of OSU Surgery, LLC was recently named a trustee of Otterbein College located in Westerville, Ohio. Chris is a 1977 graduate of the College founded in 1847 which serves 3,000 students. Upon graduation Chris joined the accounting and consulting firm now known as Deloitte where he worked for 15 years attaining the position of Senior Manager. In 1992, Chris joined the Department of Surgery Corporation, P.C. (the predecessor company to OSU Surgery, LLC).

The appointment of Dr. Edmund S. Kassis, assistant professor of surgery in the Division of Cardiothoracic Surgery, was noted September 18, 2009, by Business First.

Dr. Denis R. King was presented with The Ohio State University College of Medicine’s Lifetime Achievement Award. Dr. King is co-medical director of Nutrition Support Services at Nationwide Children’s Hospital and a clinical associate professor of surgery in The Ohio State University College of Medicine.

Dr. Denis R. King was selected as recipient of the Department of Surgery’s Outstanding Educator Award for 2010. The award was presented by Dr. E. Christopher Ellison at the June Surgery Awards Banquet.
Dr. Richard E. Kirschner, MD, has joined Nationwide Children’s Hospital as chief of Plastic Surgery and director of the Cleft Lip and Palate-Craniofacial Institute.

Dr. W. Scott Melvin, professor of surgery, chief, Division of General and Gastrointestinal Surgery, and director, Center for Minimally Invasive Surgery as the 2010 recipient of The Ohio State University College of Medicine’s Distinguished Educator Award. Dr. Catherine Lucey, vice dean, Medicine Administration and associate vice president, Health Sciences Administration, OSU College of Medicine presented Dr. Melvin with his award at the 15th Annual Department of Surgery Research Conference, held May 28, 2010

Dr. Marc P. Michalsky, of the Division of Pediatric Surgery, was promoted October 1, 2009 to associate professor of clinical surgery.

The OSU Division of Plastic surgery, represented by Dr. Michael Miller, Dr. Pankaj Tiwari, Dr. James Boehmler and several residents from OSU Plastic Surgery, received two prestigious awards at the American Society of Reconstructive Microsurgery Meeting, April 2010. The awards were for the “Best Case of the Year” and “Best Save of the Year.”

Dr. Sidney F. Miller, professor of surgery in the Division of Critical Care, Trauma, and Burn and director of the Burn Center at The Ohio State University Medical Center, was appointed as a member of the external review panel for the U.S. Army Combat Casualty Care, Combat Critical Care Engineering, Advanced Capabilities for Emergency Medical Monitoring, Automated Critical Care Life Support, and Medical Knowledge Engineering Research programs. The review panel was developed by the American Institute of Biological Sciences to review military projects proposed for possible funding by the Department of Defense or other external agencies.

Dr. Sidney F. Miller, professor of surgery, director, Burn Center, Division of Critical Care, Trauma, and Burn assumed the Presidency of the American Burn Association.

Dr. Susan D. Moffatt-Bruce, assistant professor of surgery, Division of Cardiothoracic Surgery, was appointed to the newly created position of Chief Quality and Patient Safety Officer of the Ohio State University Medical Center Health System.

Dr. Susan D. Moffatt-Bruce was selected for membership in the Society of University Surgeons (SUS).

Dr. Vimal K. Narula, clinical assistant professor of surgery in the Division of General and Gastrointestinal Surgery, was director of a course on laparoscopic hernia repair for advanced general surgery residents, held Aug. 15 and sponsored by the Center for Minimally Invasive Surgery. The program, which included didactic and laboratory sessions, was attended by 21 residents from throughout the state and the region. Faculty for the course included Dr. Jeffrey W. Hazey, assistant professor of surgery; Dr. Dean J. Mikami, assistant professor of surgery; Dr. Kyle A. Perry, assistant professor of surgery; Dr. David B. Renton, assistant professor of clinical surgery; and Dr. Eric T. Volckmann, clinical assistant professor of surgery.
Dr. Bradley J. Needleman, of the Division of General and Gastrointestinal Surgery, was promoted October 1, 2009 to associate professor of clinical surgery.

Dr. Benedict C. Nwomeh, of the Division of Pediatric Surgery, was promoted October 1, 2009 to associate professor of clinical surgery. Also, Dr. Nwomeh was course director for “Fundamentals of Research and Career Development,” July 13–14, 2009, and “Minimally Invasive Surgery Workshop,” July 15, 2009, for the Association for Academic Surgery, in Abuja, Nigeria.

Dr. Benedict C. Nwomeh, assistant professor of clinical surgery, Division of Pediatric Surgery completed the MPH Program for Experienced Professionals (PEP) offered by the OSU College of Public Health and has received a master of public health degree.

Dr. Sampath Parthasarathy, Karl P. Klassen Professor of Surgery, director of research, Division of Cardiothoracic Surgery, professor of internal medicine, has received the Excellence in Mentorship award by the Davis Heart & Lung Research Institute, awarded for student and faculty level mentoring excellence in 2009.

Dr. Amer Rajab, of the Division of Transplantation, was promoted October 1, 2009 to associate professor of surgery.

Dr. Patrick Ross, Jr., professor of clinical surgery, Division of Cardiothoracic Surgery, served on the Oncodiagnosis Panel: Detection and Treatment of Early Lung Cancer—Current Controversies and Future Directions at the Radiology Society of North America (RSNA) national meetings, November 29 2009. The panel reviewed the current state of lung cancer screening, indications for and outcomes of minimally invasive pulmonary resection, different radiotherapy options for early-stage non-small cell lung cancer, the technical aspects of different radiotherapy options and the pros and cons of those options.

Sashwati Roy, Ph.D., of the Division of General and Gastrointestinal Surgery, was promoted October 1, 2009 to associate professor of surgery.

On Sept. 4–6, 2009, the Division of Plastic Surgery held the inaugural Ruberg Symposium, a plastic surgery conference honoring the career of Dr. Robert L. Ruberg, professor of surgery in the Division of Plastic Surgery. Dr. Ruberg joined the division in 1975 and served as its chief from July 1985 through Jan. 2007.

Dr. Bhagwan Satiani, professor of clinical surgery, Division of Vascular Diseases and Surgery was selected as a member of the editorial board of the International Journal of Vascular Medicine. The journal is a peer-reviewed, open access journal that publishes original research articles, review articles, case reports, and clinical studies in all areas of vascular medicine. December 2009.

Dr. Bhagwan Satiani was also selected as co-editor, Journal of Vascular Surgery, Volume 51, Issue 4, Special Supplement (April 2010) Diversity in Vascular Surgery: Adapting to America’s New Face. Edited by Frederick P. Beavers MD and Bhagwan Satiani MD, MBA.
Dr. Bhagwan Satiani, professor of surgery, Division of Vascular Surgery was elected President-Elect of the South Asian American Vascular Society (SAAVS), Boston, MA, June 9th, 2010.

Dr. Bhagwan Satiani, professor of clinical surgery, Division of Vascular Diseases and Surgery, was elected as secretary ASHA Ray of Hope, an organization to combat domestic violence in South Asians.

Chandan K. Sen, Ph.D., professor of surgery in the Division of General and Gastrointestinal Surgery, vice chairman for research in the Department of Surgery, and associate dean for translational and applied research in the College of Medicine, had a patent granted in January by the United Kingdom, for his invention called “Methods and Compositions for Wound Healing.” Also, Dr. Sen co-organized a conference, held March 9–13, 2009, in conjunction with the Mathematical Biosciences Institute at The Ohio State University, which for the first time brought together clinicians, biologists, and mathematicians to focus on wound healing. In April, Dr. Sen was named to the national Surgery, Anesthesiology and Trauma Study Section, Center for Scientific Review, for July 1, 2009 through June 30, 2013.

Dr. Stanislaw P. Stawicki, assistant professor of surgery, Division of Critical Care, Trauma, and Burn became the Section Editor, Critical Sonology Science, Journal of Emergencies, Trauma, and Shock (PubMed-listed International Journal).

Dr. Steven M. Steinberg, professor of surgery; chief, Division of Critical Care, Trauma, and Burn; vice chairman for Clinical Affairs, was selected as the recipient of the American College of Surgeons/American Surgical Association Health Policy Scholarship for the year 2010. As part of the scholarship Dr. Steinberg has been invited to attend the course “Leadership Program in Health Policy and Management,” offered at Brandeis University, June 13-19, 2010.

Dr. Benjamin C. Sun, associate professor of surgery and chief of the Division of Cardiothoracic Surgery, is co-investigator for a study titled “Electrical and mechanical behavior of live human myocardium in health and disease,” which has received a grant of $1 million for two years, from the National Heart, Lung, and Blood Institute.

Dr. Anne Taylor, associate professor of surgery, Division of Plastic Surgery was nominated to American Society of Plastic Surgeons (ASPS) Board of Directors, term beginning October 2010.

Dr. Steven Teich, of the Division of Pediatric Surgery, was promoted October 1, 2009 to clinical associate professor of surgery.

Dr. Patrick S. Vaccaro, professor of clinical surgery and chief of the Division of Vascular Diseases and Surgery, began an appointment July 1, 2009, as chief of staff-elect of The Ohio State University Medical Center.
In the news

**Dr. Doreen M. Agnese**, assistant professor of surgery and internal medicine, Division of Surgical Oncology was interviewed on WOSU radio March 1, 2010 and Fox28 TV *Good Day Columbus* on March 18, 2010 regarding her research of the increasing number of women diagnosed with breast cancer choosing preventive mastectomies. Dr. Agnese reported that the number of women choosing to sacrifice a healthy breast has doubled in the past decade. Women who made this choice were younger, more highly educated, and more likely to have a family history of cancer. Dr. Agnese’s research was also mentioned on the WBNS 10TV *HealthSource* report on March 1, 2010.

**Dr. Kenneth A. Andreoni**, associate professor of surgery and director of liver transplantation in the Division of Transplantation, was quoted August 25, 2009, by the *San Diego Union-Tribune*, in a story about paired-donor kidney transplants.

**Dr. Mark W. Arnold**, professor of clinical surgery in the Division of General and Gastrointestinal Surgery and vice chairman for surgical education in the Department of Surgery, was mentioned in the July 2009 issue of Columbus C.E.O., as a recipient of the Distinguished Educator Award from The Ohio State University College of Medicine.

**Dr. Ginny L. Bumgardner**, professor of surgery in the Division of Transplantation and associate dean for research education in The Ohio State University College of Medicine, was quoted August 10, 2009, by the *Florida Times-Union*, of Jacksonville, Florida, in a story about her study finding that only one in 10 abdominal transplant surgeons in the United States is female.

**Dr. Donna A. Caniano**, the H. William Clatworthy, Jr. professor of surgery, chief of the Division of Pediatric Surgery at The Ohio State University Medical Center, and surgeon-in-chief at Nationwide Children’s Hospital, on September 21, received the 2009 Jimmy Crum Labor of Love Award, an annual honor given by International Monetary Systems, as part of the company’s charity golf classic. The award recognizes the recipient’s charitable efforts and philanthropic spirit to benefit those in need. The annual Labor of Love Golf Classic has donated nearly $1 million dollars to Ohio Special Olympics, Easter Seals, and Recreation Unlimited. Previous recipients have included Dr. E. Gordon Gee, Archie Griffin, Barbara Nicklaus, Dave Thomas, and other Columbus leaders. The Ohio State University Medical Center and Lifeline of Ohio organ procurement teamed with NBC4 TV to produce a one-hour show about organ donation and transplantation, which aired May 26, 2010 at 7 p.m. Hosted by news veteran Gail Hogan, the program features interviews from individuals that educate and inspire, including the OSU Comprehensive Transplant Center’s staff Dr. Todd Pesavento, **Dr. Amer Rajab**, **Dr. Benjamin Sun**, Dr. Adam Hanje and Laura Murdock, as well as
personal stories from those who have been touched by donation and transplantation. In addition, NBC4 held a “Call 4” phone bank from 5-8 p.m., with a panel of experts from the Comprehensive Transplant Center and Lifeline of Ohio.

**Dr. Richard E. Schlanger**, assistant professor of clinical surgery in the Division of General and Gastrointestinal Surgery and director of the Center for Advanced Wound Management at University Hospital East, was mentioned July 23, 2009 by MedCity News, in a story about an Ohio State University nurse who is working to develop a wound-care device. On October 16, 2009, Dr. Schlanger was mentioned by Business First, in a story about the device and the technology licensing and commercialization office at Ohio State.

**Dr. Wiley W. “Chip” Souba, Jr.,** professor of surgery in the Division of Surgical Oncology, dean of The Ohio State University College of Medicine, and vice president for health sciences at The Ohio State University Medical Center, was interviewed for a profile of Dr. Steven G. Gabbe, CEO of Ohio State’s Medical Center, in the September 2009 issue of *Columbus C.E.O.*

**Dr. Steven Steinberg**, professor of surgery; chief, Division of Critical Care, Trauma and Burn; and vice chairman for Clinical Affairs, Department of Surgery was interviewed on July 23, 2010, by WSYX-TV ABC 6 News about the recent spike in violent activity throughout central Ohio which has landed several victims in the emergency department. During the interview Dr. Steinberg discussed the physical and emotional effects of gunshot injuries.

**Dr. Thomas E. Williams, Jr.,** clinical associate professor of surgery in the Division of Cardiothoracic Surgery, was quoted in the August 2009 issue of *General Surgery News*, in a story about federal legislation that could help ward off a surgical work force shortage.
Distinguished Visiting Professors

**Dr. W. Virgil Brown**
Dr. W. Virgil Brown, Charles Howard Candler Professor of Internal Medicine and director, Division of Arteriosclerosis and Lipid Metabolism, Emory University School of Medicine; chief of medicine, Atlanta Veterans Affairs Medical Center presented the Karl P. Klassen Lecture “Guidelines for Heart Disease Prevention: Time for New Approaches?”, May 20, 2010.

**Dr. John R. Clarke**
Dr. John R. Clarke, professor of surgery, Drexel University College of Medicine; executive director of the Philadelphia Academy of Surgery; clinical director for patient safety and quality initiatives, Emergency Care Research Institute, and clinical director of the Pennsylvania Patient Safety Authority presented a Surgery Grand Rounds titled “Working Together to Keep Your Patients Safe in the O.R.”, July 9, 2009.

**Dr. Joseph S. Coselli**
Dr. Joseph S. Coselli, Cullen Foundation Endowed Chair, professor and chief, Division of Cardiothoracic Surgery, Baylor College of Medicine; associate chief, Cardiovascular Service, St. Luke’s Episcopal Hospital and chief, Adult Cardiac Surgery, Texas Medical Center, presented a Surgery Grand Rounds titled “Hybrid Aortic Repair: Combining Open and Endovascular Approaches to Complex Repair”, February 28, 2010.

**Dr. Julie A. Freischlag**
Dr. Julie A. Freischlag, William Stewart Halsted Professor, chair, Department of Surgery, and Surgeon-in-Chief at The Johns Hopkins Hospital, presented a Surgery Grand Rounds titled “Abdominal Aortic Aneurysms - How Things Have Changed Over 50 Years”, January 28, 2010.

**Dr. Tracy L. Hull**

**Dr. Goran Hansson**
Dr. Goran Hansson, professor and head, Cardiovascular Research Laboratory, Karolinska University Hospital, Stockholm; secretary, Nobel Committee for Physiology or Medicine and member, Board of the Nobel Foundation; and chairman, Louis-Jeantet Foundation, presented the Karl P. Klassen lecture “Atherosclerosis, Stem Cells, Heart Failure and Vascular Biology”, November 12, 2009.

**Dr. David N. Herndon**
Dr. David N. Herndon, Jesse H. Jones Distinguished Chair in Burn Surgery, and professor of surgery, University of Texas Medical Branch; chief of staff and director of research, Shriners Burn Hospital in Galveston, Texas, presented a Surgery Grand Rounds titled “Modulating the Hypermetabolic Response to Burns: Surgery, Drugs, Diet, and Exercise”, January 21, 2010.
Dr. Roger G. Keith  
Dr. Roger G. Keith, professor of surgery, and head, Division of General Surgery, Department of Surgery, University of Saskatchewan, presented a Surgery Grand Rounds titled “The Canadian Health Care System”, April 5, 2010.

Dr. Keith C. Kocis  
Dr. Keith C. Kocis, professor of anesthesia, pediatrics and biomedical engineering (adjunct), Division of Pediatric Critical Care Medicine Fellowship Director, University of North Carolina, Chapel Hill, North Carolina, presented Grand Rounds titled “Improving Inpatient Pediatric Safety and Outcomes with Real Time Continuous Risk Analysis”, Visiting Professor in Critical Care, January 27-28, 2010.

Dr. Barry J. Marshall  
Dr. Barry J. Marshall, professor of clinical microbiology, University of Western Australia; and 2005 Nobel Laureate presented a “Question and Answer Session”, May 11, 2010.

Dr. David W. McFadden  
Dr. David W. McFadden, Stanley S. Fieber professor and chair, Department of Surgery, University of Vermont; surgeon-in-chief, Fletcher Allen Health Care; and interim associate director for clinical cancer care and research, Vermont Cancer Center presented a Surgery Grand Rounds titled “Surgical Groupthink”, October 29, 2010.

Dr. Mary H. McGrath  
Dr. Mary H. McGrath, professor of surgery, Division of Plastic and Reconstructive Surgery, University of California San Francisco presented a Surgery Grand Rounds titled “Surgeons, Innovation and Industry - Balancing Competing Interests”, May 27, 2010.

Dr. Richard G. Ohye  
Dr. Richard G. Ohye, associate professor of surgery and division head, Pediatric Cardiovascular Surgery; surgical director, Pediatric Heart Transplant Program; program director, Congenital Cardiac Surgery Fellowship Program, University of Michigan Medical Center, presented a Surgery Grand Rounds titled “Congenital Heart Surgery: Past, Present and Future”, May 13, 2010.

Dr. James A. O’Neill, Jr.  
Dr. James A. O’Neill, Jr., Emeritus John Clinton Foshee Distinguished Professor of Surgery, Vanderbilt University School of Medicine, Director of Clinical Program Development and Education for the Meharry-Vanderbilt Alliance, Nashville, Tennessee, presented Pediatric Grand Rounds titled, “Pediatric Surgery: Then and Now.” H. William Clatworthy Visiting Professor in Pediatric Surgery, October 7-8, 2009.
Dr. Raphael E. Pollock
Dr. Raphael E. Pollock, professor and chairman, Department of Surgical Oncology; head, Division of Surgery, Senator A.M. Aiken, Jr. Distinguished Chair, and professor of molecular and cellular oncology, University of Texas M.D. Anderson Cancer Center presented a Surgery Grand Rounds titled “Contemporary Management of Soft Tissue Sarcoma”, September 24, 2009. Dr. Pollock presented the Michael J. Walker, MD Lecture in Surgical Oncology titled “New Approached to Soft Tissue Sarcoma”, September 25, 2009.

Dr. Peter D. Reaven
Dr. Peter D. Reaven, professor of clinical medicine, University of Arizona; director, Diabetes Program, Carl T. Hayden VA Medical Center presented “CVD and Glycemic Control: Who Should We Target?” as a special guest lecturer during the Klassen Research Day, May 20, 2010.

Dr. Steven C. Stain
Dr. Steven Stain, Neil Lempert Professor and chair, Department of Surgery, Albany Medical College; surgeon-in-chief, Albany Medical Center Hospital presented the annual Robert M. Zollinger Lecture titled “Is it Time to Restructure Surgical Residency Training?”, May 7, 2010.

Dr. Julio A. Teixeira
Dr. Julio A. Teixeira, associate clinical professor of surgery, Columbia University College of Physicians and Surgeons; and chief, Division of Minimally Invasive Surgery, St. Luke’s-Roosevelt Hospital Center, presented a Surgery Grand Rounds titled “How Do We Make Progress in Surgery: The Case for Single Port”, December 17, 2009.
Integrated and Affiliated Hospitals

The Ohio State University Medical Center
Consistently recognized as one of America’s best hospitals, The Ohio State University Medical Center is dedicated to patient care, research, and medical education. An institution with advanced diagnostic and therapeutic capabilities and more than 900 licensed beds, Ohio State’s Medical Center is a major tertiary referral center and a Level I trauma center with a helicopter transport service. A network of primary care centers refers patients to the Medical Center’s comprehensive patient management system.

The Arthur G. James Cancer Hospital and Richard J. Solove Research Institute
Dedicated to care of the cancer patient and to cancer research, the Arthur G. James Cancer Hospital and Richard J. Solove Research Institute is the only freestanding cancer hospital in Ohio and is one of 16 charter members of the National Comprehensive Cancer Network. An institution with 160 licensed beds, the James is adjacent to Ohio State’s Medical Center.

The Richard M. Ross Heart Hospital
Home to Ohio State’s nationally-ranked heart program and dedicated exclusively to the care of patients with cardiovascular disease, the Richard M. Ross Heart Hospital is a 150-bed, state-of-the-art institution offering advanced imaging and surgical technologies and patient care facilities. The hospital adjoins Ohio State’s Medical Center.

University Hospital East
A full-service hospital with an emphasis on family medicine, orthopedic care, and emergency medicine, University Hospital East is located on the near east side of Columbus, six miles from Ohio State.
Nationwide Children’s Hospital
The fifth-largest freestanding children’s hospital in the United States, Nationwide Children’s Hospital provides a broad spectrum of services, from advanced neonatal intensive care and surgery to primary and secondary medical care. Children’s Hospital is fully integrated with the training programs of the College of Medicine and The Ohio State University Medical Center. A Level I trauma center, Children’s is located just east of downtown Columbus, five miles from Ohio State.

Grant Medical Center
Located in the heart of downtown Columbus, five miles from Ohio State, Grant Medical Center is a busy, respected hospital and a Level I trauma center.

Mount Carmel West
An active and respected health-care provider, Mount Carmel West is located just west of downtown Columbus, five miles from Ohio State.

Riverside Methodist Hospital
Known for high-quality care, Riverside Methodist Hospital is located on the north side of Columbus, four miles from Ohio State.
Chairmen of the Department of Surgery

1914–1916  Dr. William J. Means
1916–1922  Dr. Verne A. Dodd (Head of Clinical Surgery)
1922–1926  Dr. Charles S. Hamilton
1927–1946  Dr. Verne A. Dodd (Head of Clinical Surgery)
1936–1952  Dr. George M. Curtis (Chairman of Surgical Research)
1946–1974  Dr. Robert M. Zollinger
1975–1986  Dr. Larry C. Carey
1987–1992  Dr. Olga Jonasson
1993–1998  Dr. Ronald M. Ferguson
1999 – present Dr. E. Christopher Ellison
A Legacy of Leadership

A bronze bust of Dr. Edwin H. Ellison is on exhibit in the Department of Surgery’s display case on the sixth floor of 395 West 12th Avenue, in recognition of the former faculty member’s contributions to The Ohio State University Medical Center.

Dr. Ellison joined the faculty of the department in 1946, after completing his residency in general surgery at Ohio State, under the mentorship of Dr. Robert M. Zollinger, then chairman of the department.

Dr. Ellison and Dr. Zollinger went on to perform the landmark studies that resulted in their identification of the disorder now known as Zollinger-Ellison syndrome, a condition characterized by intractable peptic ulcers, gastric hypersecretion and hyperacidity, and the occurrence of gastrinomas of the pancreatic cells of the islets of Langerhans. Their findings were published in *Annals of Surgery* in 1955.

Dr. Ellison served on the surgical faculty at Ohio State for 12 years. During this time, his achievements as a gifted clinical physician and technical surgeon, inspiring educator, and accomplished surgical investigator were important influences in the department’s rapid development and success after World War II.

In 1958, Dr. Ellison accepted an appointment as professor and chairman of surgery at Marquette University School of Medicine, now the Medical College of Wisconsin, in Milwaukee.

At Marquette, Dr. Ellison trained Dr. Larry C. Carey, who later, from 1975 to 1985, would serve as professor and chairman of surgery at Ohio State.

While at Ohio State, Dr. Carey trained Ellison’s son, Dr. E. Christopher Ellison, now the Robert M. Zollinger professor and chairman of surgery, associate vice president for health sciences, and vice dean of clinical affairs at The Ohio State University Medical Center.

“Dr. [Edwin] Ellison was unique,” Dr. Carey said during a 1994 interview. “He had a remarkable ability to get more out of people than was in them. He convinced all of us that we were a lot better than we were, and having done so, he helped us achieve more than we might have.”

Under Dr. Ellison’s leadership, the surgical faculty at Marquette made important contributions to the field of gastrointestinal surgery, and the department and its academic reputation grew and flourished.
Dr. Ellison died in 1970. He is remembered as a successful leader in academic surgery who made significant contributions to the profession of surgery, both at The Ohio State University Medical Center and at the Medical College of Wisconsin.

The bust of Dr. Ellison was sculpted by artist Anna D. Christoforidis, who also created the bust of Dr. Zollinger exhibited in the department’s display case.

**Also on Exhibit**

Also on exhibit is a set of surgical instruments that belonged to Dr. Robert M. Zollinger, chairman of the Department of Surgery from 1946 to 1974.

The instruments, a pair of Metzenbaum surgical scissors, were presented to Dr. Zollinger in 1970 by the then chief residents in general surgery: Dr. Michael F. Kaplan, Dr. Avram R. Kraft, Dr. Paul C. Redmond, Dr. Gary M. Richardson, and Dr. Thomas T. Vogel.

The instruments were donated to the Department of Surgery by Dr. Zollinger’s son, Dr. Robert M. Zollinger, emeritus professor of surgery at Case Western Reserve University, in Cleveland, Ohio.
The Division of Cardiothoracic Surgery has completed another successful year in all sections – cardiac, congenital, research and thoracic as well as in all arenas – clinical, research, education and leadership. We have focused on clinical program organization, research programs and funding, and faculty development.

The section of cardiac surgery has advanced on a number of fronts. We have maintained a strong national presence in the area of ventricular assist devices and mechanical support. Our clinical program success and the OSU experience have been shared in presentations nationally and internationally. The VAD program and the heart transplant program are the surgical arms of an outstanding heart failure center; the heart transplant volume continues to increase. The program in surgical management of atrial fibrillation has grown significantly in volume this year; a novel approach to this complex problem has been reported by our team in *Annals of Thoracic Surgery*. Recently, our division has been awarded the opportunity to become a site for percutaneous valve therapy. The OSU team believes that this innovative therapy will impact the management of valvular heart disease in the future. Each of these programs highlights the collaborative nature of our practice which involves cardiovascular anesthesiology, cardiology, interventional cardiology, cardiac surgery, and imaging. During the next year we will translate our collaborative experience into our daily delivery of care as we explore a new hospitalist/intensivist based inpatient care model. Finally, we congratulate Juan Crestanello, MD on his promotion to Associate Professor.

The section of research which is led by Dr. Sampath Parthasarathy has had a productive year. The team has competed successfully at the national level for multiple funding opportunities. Additionally, we have been able to fund projects through industry sources and development funds. Our faculty have presented a number of papers in a variety of venues. Dr. Parthasarathy has utilized his skills as a scientific mentor by collaborating in the research efforts of our clinical faculty. Under Dr.
Parthasarathy’s leadership, our division hosted two Klassen Research Days this year. The first was November 12, 2009 and featured the Secretary of the Nobel Committee for Physiology and Medicine and member of the Board of the Nobel Foundation, Goran Hansson, M.D., PhD. The Klassen Research Day on May 20, 2010, featured the President of the International Atherosclerosis Society and Former President of the American Heart Association, W. Virgil Brown, M.D. from Emory University School of Medicine in Atlanta, Georgia, and special guest speaker Peter D. Reaven, M.D., from the University of Arizona, Tucson who is the Director of the Diabetes Program at the Carl T. Hayden VA Medical Center in Phoenix, Arizona. This Klassen Research Day was an unqualified success.

The section of thoracic surgery has focused on program development and research. The clinical programs cover the spectrum of thoracic oncology and end stage lung disease. Each area utilizes the expertise of multiple specialties which underscores our emphasis on multi-disciplinary therapy. National recognition for our programs in photodynamic therapy (PDT) and lung volume reduction surgery (LVRS) has continued. The LVRS program has maintained Joint Commission certification. We have been selected to participate in an international outcomes study on PDT for lung and esophageal cancer. This year we have brought additional success to clinical trials by concentrating on the development of investigator-initiated protocols and clinical trial accruals. During this year, the thoracic team which includes faculty, mid-level providers, nurses and house staff has focused on quality and throughput resulting in a significant decrease in average length of stay for our inpatients. Faculty news includes the recruitment of Ed Kassis, M.D. who joined the team after completing his fellowship at MD Anderson; he will focus on thoracic oncology. During this year Patrick Ross, MD, PhD has served his first year as Chief of Staff for the James Cancer Hospital. We congratulate Susan Moffatt-Bruce, MD, PhD, on her new role as Chief Quality and Patient Safety Officer for the health system.

The Division of Cardiothoracic Surgery has grown in all arenas and achieved national as well as international recognition. Our department leadership has recognized the efforts and successes of the faculty as well as the increasing specialization of the sections. In the next year, we will develop these sections into two divisions, Cardiac Surgery and Thoracic Surgery, providing the opportunity for both teams to achieve additional clinical and research prominence. Robert Higgins, MD will lead the Division of Cardiac Surgery. Patrick Ross, MD, PhD will be chief of the Division of Thoracic Surgery.
Faculty

Patrick Ross, Jr., M.D., Ph.D.
Professor of Clinical Surgery; Interim Chief, Division of Cardiotoracic Surgery
M.D., Ph.D.: St. Louis University, St. Louis, Mo., 1983
Appointment: 1991
Specialty Interests: Lung volume reduction, thoracic surgical oncology, benign noncardiac thoracic disease, lung transplantation
Research Interests: New modality lung cancer therapy

Juan A. Crestanello, M.D.
Associate Professor of Surgery
M.D.: University of the Republic of Uruguay Medical School, Montevideo, Uruguay
Specialty Training: General surgery residency, University of Maryland Medical System, Baltimore, Md.; cardiothoracic surgery research, Hahnemann University, Philadelphia, Pa., and University of Maryland, Baltimore, Md.
Appointment: 2004
Specialty Interests: Cardiac surgery
Research Interests: Ischemic preconditioning, mitochondrial function during ischemic preconditioning, myocardial ischemia reperfusion injury, cell transplantation, the effect of myocardial oxygen content on survival of transplanted cells

Michael S. Firstenberg, M.D.
Assistant Professor of Surgery
B.A.: University of Chicago, Chicago, Ill., 1990
M.D.: Case Western Reserve University, Cleveland, Ohio, 1996
Specialty Training: The Ohio State University Medical Center, Columbus, Ohio; Cleveland Clinic, Cleveland, Ohio; National Heart, Lung, and Blood Institute, Bethesda, Md.; University Hospitals, Cleveland, Ohio
Appointment: 2007
Specialty Interests: Adult acquired and congenital cardiac surgery, cardiothoracic critical care, mechanical assist, heart failure
Research Interests: Cardiac imaging and physiology, mechanical assist
Mark Galantowicz, M.D.
Associate Professor of Clinical Surgery
M.D.: Cornell University Medical College, New York, N.Y., 1987
Specialty Training: Columbia-Presbyterian Medical Center, New York, N.Y.
Appointment: 2002
Specialty Interests: Pediatric transplantation and surgery

Edmund S. Kassis, M.D.
Assistant Professor of Surgery
B.S.: University of Pittsburgh, Pittsburgh, Pa., 1992
M.D.: University of Pittsburgh, Pittsburgh, Pa., 1999
Specialty Training: Johns Hopkins University Hospital, Baltimore, Md.; National Cancer Institute, Bethesda, Md.; University of Texas M. D. Anderson Cancer Center, Houston, Tx.
Appointment: 2009
Specialty Interests: Cardiothoracic surgery

Pawel Kwiatkowski, M.D.
Assistant Professor of Surgery
B.A.: ILO Swietochlowice, Poland, 1982
M.D.: Silesian Academy of Medicine, Katowice, Poland, 1988
Specialty Training: Silesian Academy Medical Center, Zabrze, Poland; Columbia University, New York, N.Y.
Appointment: 1998
Research Interests: Transplant immunology, including xenotransplantation and allotransplantation of heart and lung

Louis B. Louis, IV, M.D.
Assistant Professor of Surgery
B.A.: Virginia Military Institute, Lexington, Va., 1994
M.D.: University of Miami, Miami, Fla., 1998
Specialty Training: The Ohio State University, Columbus, Ohio
Appointment: 2008
Specialty Interests: Adult cardiac surgery, surgery for heart failure, mechanical circulatory support, cardiac transplantation, cardiovascular surgical critical care
Susan D. Moffatt-Bruce, M.D., Ph.D.
Assistant Professor of Surgery
B.A.: McGill University, Montreal, Quebec, Canada, 1990
M.D.: Dalhousie University, Halifax, Nova Scotia, Canada, 1994
Ph.D.: University of Cambridge, Cambridge, United Kingdom, 1999
Specialty Training: Residency in general surgery, Dalhousie University, Halifax, Nova Scotia, Canada; fellowship in cardiothoracic surgery, Stanford University, Palo Alto, Ca.
Appointment: 2006
Specialty Interests: Lung transplant, heart transplant, transplant outcomes, thoracic oncology
Research Interests: Transplant immunology

Sampath Parthasarathy, Ph.D., M.B.A.
The Karl P. Klassen Professor of Surgery; Director of Research, Division of Cardiothoracic Surgery
Ph.D.: Indian Institute of Science, Bangalore, India, 1975
M.B.A.: University of Phoenix, 2004
Specialty Training: Kyoto University, Kyoto, Japan; Duke University, Durham, N.C.; the Hormel Institute, University of Minnesota, Austin, Mn.
Appointment: 2006
Research Interests: Vascular biology and medicine

Alistair B. M. Phillips, M.D.
Assistant Professor of Surgery
B.S.: Johns Hopkins University, Baltimore, Md., 1990
M.D.: Columbia University, New York, N.Y., 1994
Specialty Training: Residency in general and cardiothoracic surgery, New York-Presbyterian Hospital and Weill Cornell Medical Center, New York, N.Y.; fellowship in pediatric cardiac surgery, Columbia University Medical Center, New York, N.Y.
Appointment: 2006
Specialty Interests: Pediatric cardiothoracic surgery

Chittoor B. Sai-Sudhakar, M.B.B.S., F.A.C.S., F.R.C.S.
Assistant Professor of Surgery
B.A.: Loyola College, Madras, India, 1975
B.Sc.: Presidency College, Madras, India, 1976
M.B.B.S.: Stanley Medical College, Madras, India, 1982
Specialty Training: Yale-affiliated residency, St. Mary’s Hospital, Waterbury, Ct.
Appointment: 2003
Specialty Interests: Aortic surgery, heart failure
Research Interests: Pathways in endothelial cells
John H. Sirak, M.D.
Assistant Professor of Clinical Surgery
B.A.: Amherst College, Amherst, Mass., 1985
M.D.: Case Western Reserve University, Cleveland, Ohio, 1991
Specialty Training: General surgery residency, minimally invasive cardiothoracic surgery fellowship, The Ohio State University, Columbus, Ohio; arrhythmia surgery fellowship, Cleveland Clinic, Cleveland, Ohio
Appointment: 2004
Specialty Interests: Surgery for atrial fibrillation
Research Interests: Transplant immunology

Benjamin C. Sun, M.D.
Associate Professor of Surgery; Director, Cardiac Transplantation and Mechanical Support
B.S.: Yale University, New Haven, Conn., 1984
M.D.: State University of New York, Stony Brook, N.Y., 1989
Specialty Training: University of North Carolina Hospitals, Chapel Hill, N.C.; Columbia-Presbyterian Medical Center, New York, N.Y.
Appointment: 2002
Specialty Interests: Heart transplantation
Research Interests: Direct mechanical ventricular actuation

Paul A. Vesco, M.D.
Assistant Professor of Surgery
M.D.: University of Kentucky, Lexington, Ky., 1997
Specialty Training: The Ohio State University, Columbus, Ohio
Appointment: 2008
Specialty Interests: Minimally invasive robotic cardiac and thoracic surgery
New Full-Time Faculty Appointments

Edmund S. Kassis, M.D.
Assistant Professor of Surgery

Emeritus Faculty

J. Terrance Davis, M.D.
Professor Emeritus of Clinical Surgery

Gerard S. Kakos, M.D.
Clinical Associate Professor Emeritus of Surgery
B.A.: The Ohio State University, Columbus, Ohio, 1964
M.D.: The Ohio State University, Columbus, Ohio, 1967

James W. Kilman, M.D.
Professor Emeritus of Surgery
B.S.: Indiana State University, Terre Haute, Ind., 1956
M.D.: Indiana State University, Indianapolis, Ind., 1960

Charles V. Meckstroth, M.D.
Professor Emeritus of Surgery
B.A.: The Ohio State University, Columbus, Ohio, 1944
M.D.: The Ohio State University, Columbus, Ohio, 1947
M.M.Sc. (Surgery): The Ohio State University, Columbus, Ohio, 1950

Howard D. Sirak, M.D.
Professor Emeritus of Surgery
A.B.: University of Pennsylvania, Philadelphia, Pa., 1943
M.D.: The Ohio State University, Columbus, Ohio, 1947
M.M.Sc. (Surgery): The Ohio State University, Columbus, Ohio, 1953
Clinical Faculty

Patrick McConnell, M.D.
Clinical Associate Professor of Surgery
B.A.: Creighton University, Omaha, Neb., 1994
M.S., M.D.: University of Nebraska, Omaha, Neb., 1999

Thomas E. Williams, Jr., M.D., Ph.D.
Clinical Associate Professor of Surgery
M.S., M.D.: The Ohio State University, Columbus, Ohio, 1963
Ph.D.: Northwestern University, Evanston, Ill., 1969

Resident Staff

Sergio Carrillo
PGY-6
M.D.: Universidad de San Carlos, Guatemala, 2002

Murtaza Dawood, M.D.
PGY-7
B.S.: University of Maryland, College Park, Md., 1997
M.D.: Saba University, Netherlands-Antilles, 2002

Brian Goodman, M.D.
PGY-7
B.S.: University of Miami, Coral Gables, Fla., 1996
M.D.: University of Vermont, Burlington, Vt., 2003

Charles Jason Rousseau, D.O.
PGY-6
B.S.: Samford University, Birmingham, AL, 2000
D.O.: Nova Southeastern University College of Osteopathic Medicine, Ft. Lauderdale, FL, 2004

Wing Yeen, M.B.B.S.
PGY-8
M.B.B.S.: University of Sydney, Sydney, NSW, Australia, 1998
Mission

The Division of Cardiothoracic Surgery is dedicated to preserving and improving life for patients with heart and lung disease.

Research Programs

• ABLATE CAP

• Associations between Adverse Events and Surgical Types

• CardioWest Temporary Total Artificial Heart CardioWest Temporary Total Artificial Heart Post market surveillance study

• Carotid Retrospective study

• Chronic heart failure model in sheep

• Circulating endothelial cells and thrombosis

• Clinical Trial of the On-X Valve Using Low Dose Anticoagulation

• Comparative Clinical and Pharmacoeconomic Study Comparing Argatroban® IV vs. Desirudin SC for Patients with Suspected Heparin-Induced Thrombocytopenia (HIT) without Clinically Evident Thrombosis: PREVENT-HIT

• Comparative Mutational Profiling as the Standard of Care in Assessing Lung Lesions

• Cormatrix Study

• C-Pulse Implantable Counterpulsation Pump for treating Heart Failure

• CTSN- Moderate MR Study

• CTSN- Severe MR Study

• Destiny Trial: Effects of Mitral Valve Annuloplasty with the Geoform Ring on Left Ventricular Geometry and function in patients with Cardiomyopathy

• Dietary oxidized lipids and atherosclerosis
• Evaluation of the HeartWare LVAD system for the treatment of Advanced Heart Failure
• HeartMate II VAD destination therapy
• HYBRID Observational Study
• Hyponatremia during Cardiac Surgery
• The Immunobiology of Insulin Resistance: The role of T regulatory Cells
• Immunobiology of photodynamic therapy in Lung Cancer Patients
• Immunobiology of Transplant-Related Heart Failure
• INTERMACS (Interagency Registry for Mechanically-Assisted Circulatory Support) NHLBI/CMS/UNOS
• Levitronix CentriMag LVAS for failure to wean CPB
• Mechanical, cellular and pharmacological therapy for congestive heart failure
• Mechanisms of Bronchiolitis Obliterans in Pediatric and Adult Lung Transplants
• Medtronic Mosaic® vs. Carpentier-Edwards®/Perimount® All-Cause Patient Survival
• Neuropathy after Lung Transplantation
• A Novel Approach to Generate Regulatory T Cells using CD103 Depletion
• OSU Heart Center Biobank
• Patient Discharge using the AB Portable Driver System
• Pilot Study Assessing Robotic Video-Assisted Thoracic Surgery (RATS) Versus Standard Thoracotomy for Malignant Lesions
• Preclinical cardiac device study
• A Prospective Multi-Center Randomized Clinical Study to Evaluate the PleuraSeal Sealant System as an Adjunct to Standard Closure Techniques for Control of Visceral Pleural Air Leaks Following Elective Pulmonary Resection Via Open Thoracotomy
• A Randomized, Multicenter, Double-Blind, Group-Sequential Study to Evaluate the Efficacy, Immunogenicity, and Safety of a Single Dose of Merck 0657nI Staphylococcus aureus Vaccine V710 in Adult Patients Scheduled for Cardi thoracic Surgery

• A Randomized Study to Compare Sizing, Implant Techniques and Homodynamic Performance between the Mitroflow and the Carpenter-Edwards Magna Pericardial Tissue Valves in the Aortic Position

• RED-CABG Trial

• Resident Anatomy Study

• A Retrospective and Prospective Study of Patients with Atrial Fibrillation and the Post-operative Outcomes, Quality of Life, and Arrhythmia Re-occurrence Rates after Undergoing the Total Thoracoscopic Maze Procedure

• Role and mechanism of oxygen tension and oxidative stress in regulating the development of intimal hyperplasia in human saphenous veins cultures ex-vivo

• Role of Macrophages in Acute Cellular Rejection in Cardiac Transplantation

• Scherring Plough CABG Clinical Research Study

• Simultaneous carotid endarterectomy and cardiac surgery

• STICH protocol for surgical treatment for ischemic heart failure. NHLBI

• Study to Determine the Presence of Oxidized Low Density Lipoproteins (Ox-LDL) and its Degradation Products in the Blood and Left Ventricular Tissue of Patients with Heart Failure

• Thoratec left ventricular assist device congestive heart failure sheep

• Thrombosis model of heart failure in sheep

• VAD Watch Telehealth Monitoring in the Residential Setting

• VentAssist bridge to transplant

• VentAssist destination therapy
Accomplishments in Research

• Klassen Research Day, November 2009, Klassen lecturer Goran K. Hansson, MD., Ph.D., Professor and head, Cardiovascular Research Laboratory, Karolinska University Hospital, Stockholm, Sweden. Secretary, Nobel Committee for Physiology or Medicine and member, Board of the Nobel Foundation. Chairman, Louis-Jeantet Foundation presented “Inflammation, immunity, and atherosclerosis”.

• Klassen Research Day, May 2010, Klassen lecturer W. Virgil Brown, MD, Charles Howard Candler Professor of Medicine Emeritus, Emory University School of Medicine, Atlanta, Georgia, Former President, American Heart Association, President, International Atherosclerosis Society presented “Guidelines for Heart Disease Prevention: Time for New Approaches?” and Special Guest Lecturer Peter D. Reaven, MD, Professor of Clinical Medicine, University of Arizona, Tucson, Director, Diabetes Program, Carl T. Hayden VA Medical Center, Phoenix, Arizona presented “CVD and Glycemic Control: Who Should We Target?”.

• Dr. Juan Crestanello accepted an invitation to join the editorial board of the Journal of Surgical Research. As a member of the board, Dr. Crestanello will serve a 3-year term with an option for a second term and will review manuscripts in his field of expertise. Dr. Crestanello previously served the journal as an ad hoc reviewer.

• Dr. Sampath Parthasarathy received the CCTS research award: pilot program to study through the OSU Center for Clinical and Translational Science (CCTS). Dr. Parthasarathy and Dr. Martha Beluri will study “Diabetic hypertriglyceridemia: A new mechanism and potential treatment options” using $30,000 that is available through this mechanism. The application was selected was one of the eight applications that the review committee selected out of 45 outstanding proposals. This award is partially funded by the NIH Clinical and Translational Science Award to The Ohio State University.

• Dr. Patrick Ross, Jr. received a grant in the amount of $250,000 to investigate a web-based photodynamic therapy (PDT) patient registry solution to help streamline the data collection and outcomes analysis process. The grant is part of a contract between The Ohio State University Comprehensive Cancer Center; Arthur G. James Cancer Hospital, the Richard J. Solove Research Institute (OSUCC-James) and Global Vision Technologies (GVT) to develop software called ClinicalPURSUIT, a powerful, HIPAA compliant, cost-effective patient registry software tool that will help OSUCC-James work with real-time, accurate information on their patients daily.

• Dr. Benjamin Sun is co-investigator for a study titled “Electrical and mechanical behavior of live human myocardium in health and disease,” which has received a grant of $1 million for two years, from the National Heart, Lung, and Blood Institute.
Active Research Grants

**Crestanello J.** Destiny trial: effects of mitral valve annuloplasty with the GeoForm Ring on left ventricular geometry and function in patients with cardiomyopathy. Edwards Lifesciences, November 3, 2006 – November 3, 2009, $57,190.

**Moffatt-Bruce S, Astor T.** Mechanisms of bronchiolitis obliterans in pediatric and adult lung transplants. 2008–2009 The Ohio State University/Nationwide Collaborative Research Award, August 1, 2008 – December 31, 2009, $50,000.

**Moffatt-Bruce S, Hadley G.** The role of macrophages in acute cellular rejection in cardiac transplant rejection. Clinical and Translational Science Award, K12 Scholars Award 2009–2011, $196,000/year.

**Parthasarathy S.** Novel mechanisms by which aspirin might protect against atherosclerosis. National Heart, Lung, and Blood Institute, R01, July 1, 2008 – June 30, 2013, $250,000/year.

**Phillips ABM.** Cytoskeletal alterations in a porcine model of restrictive ventricular septal defect. Society of Cardiovascular Anesthesiologists, September 1, 2008 – August 31, 2010, $40,000 for two years.

**Sai-Sudhakar CB.** Clinical trial of the On-X valve using low dose anticoagulation. Medical Carbon Research Institute, LLC, December 1, 2006 – November 30, 2013, $3,600.

**Sai-Sudhakar CB.** Potential auto-antibodies to endothelial cells and their role in angiogenesis and neovascularization following acute coronary events. Davis/Bremer Research Grant, 2008–2010, $50,000 annually for two years.

Clinical Programs

- Adult cardiothoracic surgery
- Aortic surgery
- Arrhythmia surgery
- Heart failure surgery
- Heart transplantation
- Heart-lung transplantation
- Lung transplantation
- Lung volume reduction surgery
- Mechanical circulatory support
- Minimally invasive heart surgery
- Photodynamic therapy
- Robotic surgery
- Thoracic oncology
- Total artificial heart transplantation
Accomplishments in Clinical Care

- Dr. Michael Firstenberg was highlighted in the OSU Medical Center publication Medical Staff News for his high patient satisfaction scores. Dr. Firstenberg attributed his high rating to directing the patient’s care from presurgery exam throughout hospitalization and follow-up, and making himself available to address patient’s questions and concerns. He also stressed the importance of caring not only for the patient, but for the patient’s family too. Dr. Firstenberg strives to explain the surgical process, helping patients and their families understand what is happening.

- Dr. Patrick Ross, Jr. became Chief of Staff for Arthur G. James Cancer Hospital and Richard J. Solove Research Institute, Columbus, Ohio, 2009-2011.

Educational Programs

- Two-year cardiothoracic surgery fellowship accredited by the Accreditation Council for Graduate Medical Education.

- One-year fellowship in mechanical circulatory support.

- Comprehensive rotation in cardiothoracic surgery for first- and third-year residents in general surgery.

Accomplishments in Education

- Completion of the cardiothoracic surgery fellowship by Dr. Patrick McConnell in October 2009 and Dr. Murtaza Dawood and Dr. Brian Goodman in June 2010.

- Awarding of the Samuel J. Roessler Memorial Medical Research Scholarships to medical student Cassondra Majestic, under the direction of her research advisor, Dr. Susan Moffatt-Bruce.
Accomplishments in Teaching

- Dr. Sampath Parthasarathy received the Excellence in Mentorship award by the Davis Heart and Lung Research Institute for student and faculty level mentoring excellence in 2009.

Critical Care, Trauma, and Burn

Steven M. Steinberg, M.D.
Chief, Division of Critical Care, Trauma, and Burn

The Division of Critical Care, Trauma, and Burn was formed in March, 2006 with the charge of enhancing the Department of Surgery’s programs in surgical critical care, trauma, burns and emergency general surgery and developing an acute care surgery program. This last year has seen continued growth in both faculty and also clinical volume and scholarly activity.

This year, the division recruited two new faculty members: Paul R. Beery II, MD and Brian S. Porshinsky, MD. Dr. Beery received his Bachelor of Music Education from The Ohio State University in 1992. After a brief career in music, he graduated from The Ohio State University College of Medicine and Public Health in 1999 and did his General Surgery residency and Surgical Critical Care fellowship at Ohio State, also receiving a Master of Science in Surgical Critical Care. He then completed a one-year Trauma Surgery mentorship and joined a trauma and critical care practice at Grant Medical Center in Columbus, Ohio. After deciding to pursue an academic career, Dr. Beery joined the faculty of The Ohio State University in 2009 as an Assistant Professor of Clinical Surgery in the Division of Critical Care, Trauma, and Burn. His interests include surgical education, trauma, and critical care.

Dr. Porshinsky grew up in Worthington, Ohio. He completed his undergraduate studies at The Ohio State University and then went on to obtain his medical degree from the Medical College of Ohio in Toledo. He then did his General Surgery Residency also at the Medical College of Ohio Hospital. He next completed a fellowship in Plastic and Reconstructive Surgery at the University of Illinois at Chicago. He then followed this with a one-year fellowship dedicated to Burns at the New York Presbyterian Hospital/Cornell Burn Center. He completed a Surgical Critical Care Fellowship at The Ohio State University Medical Center in June 2009. He joined the faculty of the Division of Critical Care, Trauma, and Burn in July 2009 as an Assistant Professor and as Assistant Director of the OSU Burn Center. His interests include acute burn care, fluid resuscitation, and reconstructive burn surgery.
As a division, there have been a number of notable accomplishments in the past year:

- The American College of Surgeons has reverified The Ohio State University Medical Center as a ‘Level I’ trauma center in July 2009, denoting it as a regional resource to care for the most critically ill and injured patients.

- Our surgical critical care fellowship had all four spots filled this past year. Dr. Daniel Eiferman is joining our faculty at OSU, Dr. James Howard begins fellowship training with an emphasis on burn surgery, Dr. David Evans returns to the general surgery residency program, and Dr. Benjamin Morris begins an appointment as Assistant Professor in Anesthesiology/Critical Care at Wake Forest University in Winston-Salem, North Carolina.

- The Critical Care Signature Program, of which our division is a key member, continues to progress. Dr. Steinberg continues to act as co-chair of the system-wide critical care quality committee, which meets monthly.

- The Trauma Program, under the leadership of Dr. Steven Steinberg, continues to show an increase in activity with over 2231 trauma admissions in 2009, reflecting a 1.4 percent increase over the previous year. Over the past five years there has been a 17 percent increase in the growth of the program. Of the patients admitted 29 percent had a moderate to severe Injury Severity Score and 44 percent of the patients required at least 1 operative procedure. Of patients that arrive by EMS, 50 percent of the patients transferred in from outside hospitals and 50 percent of the patients came directly from the scene of the event.

The division also developed a number of new patient care guidelines and protocols including a massive transfusion protocol and a cervical spine clearance protocol.

Dr. Charles H. Cook, associate professor of surgery, continued his research in cytomegalovirus (CMV) infections and bacterial sepsis during critical illness. His laboratory continues to focus on how cytomegalovirus reactivation causes lung injury in immunocompetent patients. In addition to his research pursuits, Dr. Cook continues to be active in the care of injured and critically ill patients and is medical director of the Surgical Intensive Care Unit.

Dr. David E. Lindsey, assistant professor of clinical surgery, is now in his third year. Dr. Lindsey is currently participating in the cardiovascular mortality reduction project at the Medical Center. He is an ATLS Trauma Course Director. He was appointed by the American College of Surgeons (ACS), Committee on Trauma, as an active member of the ACS Ohio Committee on Trauma. Dr. Lindsey is active in the care of injured and critically ill patients. He was selected and attended the American College of Surgeons Leadership Conference May 23-26, 2010 in Chicago, Illinois. He was elected to membership in the Central Surgical Association this past year.

Dr. Sidney F. Miller, professor of surgery, is the director of the OSU Burn Center. He is an authority on burn care and serves in leadership roles on local and national levels. He serves on the board of trustees of the American Burn Association and currently serves as president of that organization. He is an
editorial board member of the “Journal of Burns” and “Journal of Burn Care and Rehabilitation.” Dr. Miller currently serves on the Ohio Department of Public Safety EMS Board’s Trauma Committee and the Ohio Department of Homeland Security Interagency Response Group. Dr. Miller served as a member of the American College of Surgeons’ Committee on Trauma for 18 years as Ohio State Committee on Trauma vice-chair and chair and as Region Chief for Region V of the COT. He is a member of the external review panel for the Department of Defense Combat Casualty Care Program. This program is developing new and improved methods of evaluating and treating our injured military personnel and the work done by the Combat Casualty Care Program will be translatable to the civilian community. He is a past governor of the American College of Surgeons and a past president of the Ohio Chapter of the American College of Surgeons. Under the direction of Dr. Miller, the burn program has been established at Ohio State University. In addition to patient care the program has established an Annual Burn Survivor Family Camp and implemented the Survivors Offering Assistance in Recovery (SOAR) program which provides peer support to patients in the OSU Burn Center.

Dr. Stanislaw P. Stawicki, assistant professor of surgery, is in his second year with us. He is the Principal Organizer, First Annual Scientific and Board Meeting, OPUS 12 Foundation, Inc. Bethlehem, Pennsylvania (February 3-5, 2009). He is participating on several Medical Center Committees: Trauma Bay Reorganization, Interdisciplinary Sentinel Event Committee-Wrong Site Surgery Task Force, and the Trauma Radiology Improvement Task Force. He has published 16 scientific manuscripts and is performing 6 IRB-approved studies. His research this year has resulted in 5 podium and 4 poster presentations at regional, national and international meetings. He is an ATLS instructor and has taught in several courses this year. Dr. Stawicki has presented numerous lectures and led many small group discussions for the surgical critical care fellows and residents rotating on both the surgical ICU and trauma/emergency general surgery services. Dr. Stawicki was named Director of Research for the Division of Critical Care, Trauma, and Burn, The Ohio State University Medical Center on July 1, 2009. He received a Letter of Commendation from the Chief Medical Officer for participation in the Sentinel Event Taskforce on Retained Surgical Foreign Bodies, The Ohio State University Medical Center, Columbus, Ohio on July 15, 2009. He received Third Place at the Poster Competition, the 2009 American College of Physicians – Arizona Chapter Scientific Meeting for the presentation titled Cardiac Doppler Examinations of E, E’, A, and A’ Waves: Evaluating Echographic Measurement Biases Between Cardiologist and Non-Cardiologist Intensivists in Tucson, Arizona, September 26-27, 2009. In addition to being named to the Editorial Board of the International Journal of Orthopaedics and a Section Editor (Critical Sonology Science) for the Journal of Emergencies, Trauma, and Shock, Dr. Stawicki was also invited to become the Editor-In-Chief of the International Journal of Critical Illness and Injury Science.

Dr. Steven M. Steinberg, professor of surgery, is the director of the Division of Critical Care, Trauma and Burn and is a member of the board and the clinical trauma committee of Central Ohio Trauma Systems. He also is a member of the State of Ohio Emergency Medical Services Board. He serves as the chair of University Hospital Operating Room Committee and is a member of the Health System Operating Room Coordinating Committee, Leadership Council for Clinical Quality and Safety, and the Medical Staff Officers Group for The Ohio State University Medical Center. He is an editorial board member of Selected Readings in General Surgery. Under his leadership, the American College of Surgeons reverified The Ohio State University Medical Center as a ‘Level I’ trauma center in July 2009. He has been selected as the recipient of the American College of Surgeons/American Surgical Association Health Policy Scholarship for the year 2010. Dr. Steinberg continues to be active in surgical education and critical care.
Dr. Melissa L. Whitmill, assistant professor of clinical surgery, joined us in August 2008. She has been appointed Medical Director of Nutrition Services at OSUMC. She recently became a member of the Eastern Association of Trauma Surgeons and the Neurocritical Care Society. She is an ATLS instructor and has taught in several courses this year. Dr. Whitmill has also taken charge of helping develop our division’s educational programs in trauma and emergency general surgery. She has taught a bedside skills course for intensivists. More recently, she has accepted the responsibility of performing team training for trauma and emergency medicine residents in trauma.

Rebecca Coffey, RN, CNP, burn nurse practitioner, is on the Nursing Research Executive Council and she is also the co-leader of the wound care practice group, which is a subgroup of the Nursing Research Executive Council. In the past year she has provided outreach education to multiple EMS, referral hospitals and ED. She received the 2009 Clinical Excellence Award from the OSU Medical Center.

Susan Yeager, MS, RN, CCRN, ACNP, nurse practitioner, currently serves as Chair for the Advance Practice Nurse Committee for the hospital. She is a FCCS and Trauma Tactics instructor and has been invited to be a guest lecturer at the 2010 Multidisciplinary Advances in the Treatment of the Critically-Ill Hospitalized patient and Advanced Practice conferences. Nationally she is actively involved on the newly formed Advanced Practitioner Council for the Eastern Association for the Surgery of Trauma (EAST). She continues to serve on the NeuroCritical Care Society (NCS) Annual Meeting and Nursing Committees. For the NCS, she will serve as moderator/presenter at the upcoming meeting speaking on the integration of Advanced Practitioners into the ICU setting. Within the state of Ohio, she continues her involvement with the American Academy of Nurse Practitioners by remaining an active member of the Schedule II narcotic taskforce.

Dr. Daniel Eiferman, Dr. David Evans, Dr. James Howard, and Dr. Benjamin Morris completed their surgical critical care fellowships.
Faculty

**Steven M. Steinberg, M.D.**
Professor of Surgery; Vice Chairman for Clinical Affairs, Department of Surgery; Chief, Division of Critical Care, Trauma, and Burn

B.Sc.: The Ohio State University, Columbus, Ohio, 1975
M.D.: The Ohio State University, Columbus, Ohio, 1978
Specialty Training: The Ohio State University, Columbus, Ohio
Appointment: 1999
Specialty Interests: General surgery
Research Interests: Alterations in splanchnic microcirculation in shock; hemodynamic assessment in critical illness; adequacy of hemodynamic resuscitation in shock; sepsis and organ failure; trauma

**Paul R. Beery, II, M.D.**
Assistant Professor of Clinical Surgery

B.M.E.: The Ohio State University, Columbus, Ohio, 1992
M.D.: The Ohio State University, Columbus, Ohio, 1999
M.S.: The Ohio State University, Columbus, Ohio, 2005
Specialty Training: The Ohio State University, Columbus, Ohio
Appointment: 2009
Specialty Interests: Trauma, surgical critical care

**Charles H. Cook, M.D.**
Associate Professor of Surgery; Medical Director, Surgical Critical Care

B.S.: Pennsylvania State University, University Park, Pa., 1987
M.D.: The Ohio State University, Columbus, Ohio, 1991
Specialty Training: The Ohio State University, Columbus, Ohio
Appointment: 1997
Specialty Interests: Critical care, laparoscopy
Research Interests: Surgical outcomes, surgical infectious disease

**David E. Lindsey, M.D.**
Assistant Professor of Clinical Surgery

B.S.: The Ohio State University, Columbus, Ohio, 1972
M.D.: The Ohio State University, Columbus, Ohio, 1976
Specialty Training: Stanford University Hospital, Stanford, Calif.; University of California-Davis, Sacramento, Calif.
Appointment: 2007
Specialty Interests: Critical care, cardiovascular critical care, trauma
Sidney F. Miller, M.D.
Professor of Surgery; Director, Burn Center, The Ohio State University Medical Center
B.A.: Indiana University, Bloomington, Ind., 1965
M.D.: Indiana University School of Medicine, Indianapolis, Ind., 1968
Specialty Training: Miami Valley Hospital, Dayton, Ohio
Appointment: 2006
Specialty Interests: Burns
Research Interests: Wound healing

Brian S. Porshinsky, M.D.
Assistant Professor of Surgery; Assistant Director, Burn Center, The Ohio State University Medical Center
B.A.: The Ohio State University, Columbus, Ohio, 1991
M.D.: Medical College of Toledo, Toledo, Ohio, 1999
Specialty Training: Fellowship in surgical critical care, The Ohio State University Medical Center, Columbus, Ohio; fellowship in burn surgery and critical care, New York-Presbyterian Hospital/Weill Cornell Medical Center, New York, N.Y.; fellowship in plastic surgery, University of Illinois, Chicago, Ill.
Appointment: 2009
Specialty Interests: Acute burn care, fluid resuscitation after burns
Research Interests: Advanced technology applications in clinical surgery

Stanislaw P. Stawicki, M.D.
Assistant Professor of Surgery
B.A.: University of Louisville, Louisville, Ky., 1997
M.D.: University of Louisville, Louisville, Ky., 2001
Appointment: 2008
Specialty Interests: Trauma, surgical critical care, emergency surgery
Research Interests: Geriatric trauma, role of comorbidities in trauma

Melissa L. Whitmill, M.D.
Assistant Professor of Clinical Surgery
B.S.: Columbia Union College, Takoma Park, Md., 1995
M.D.: Wright State University, Dayton, Ohio, 2001
Specialty Training: Residency in general surgery, Wright State University, Dayton, Ohio; fellowship in surgical critical care, Henry Ford Hospital, Detroit, Mich.
Appointment: 2008
Specialty Interests: Trauma, surgical critical care, emergency surgery
New Full-Time Faculty Appointments

Paul R. Beery, II, M.D.
Assistant Professor of Clinical Surgery
November 2009

Brian S. Porshinsky, M.D.
Assistant Professor of Surgery
July 2009

Faculty Departures

Yalaunda M. Thomas, M.D.
Assistant Professor of Surgery
Date of resignation: September, 2009
Current appointment: Advocate Christ Medical Center, Oak Lawn, Ill.

Resident Staff

Daniel S. Efferman, M.D.
Surgical Critical Care Fellow
B.A.: Northwestern University, Evanston, Il, 1999
M.D.: University of Kentucky, Lexington, Ky, 2003

David C. Evans, M.D.
Surgical Critical Care Fellow
B.S.: Duke University, Durham, N.C., 2002
M.D.: Duke University, Durham, N.C., 2006

James M. Howard, M.D.
Surgical Critical Care Fellow
B.S.: University of Kansas, Lawrence, Ks., 1999
M.D.: University of Kansas, Kansas City, Ks., 2004

Benjamin N. Morris, M.D.
Surgical Critical Care Fellow
B.S.: University of South Carolina, Columbia, S.C., 2000
M.D.: University of South Carolina, Columbia, S.C., 2004
Mission

The mission of the Division of Critical Care, Trauma, and Burn is to improve people’s lives through innovations in research, education, and patient care in the areas of surgical critical care, trauma, burns, and emergency surgery.

Research Programs

- Cytomegalovirus infections and bacterial sepsis.
- Missed billing opportunities in the surgical intensive care unit.
- Splenic and pancreaticoduodenal trauma.
- Screening for lower extremity deep venous thrombosis in trauma patients.
- The management of new onset atrial fibrillation in non-cardiac surgery ICU patients.
- Glycemic control in ICU patients.
- A review of hunting accidents.
- A survey on the use of digital rectal examination in trauma evaluation.
- Evaluation of blind bronchoalveolar lavage in the diagnosis of ventilator associated pneumonia.
- Assessment of renal function by equation.
- Impact of RAS scoring on use of sedation in the SICU.
- Use of Fresh Frozen Plasma and the West Penn Formula vs Crystalloid and the Parkland Formula for Resuscitation of Major Burns; A Retrospective Review.
- Increasing Nurses’ Knowledge and Ability to Teach about Burn Prevention Multicenter Study (University of Louisville).
- Evaluation of Early Glycemic Control in Critically Ill Burn Patients.
- Electrical Burns and the Development of Post Traumatic Stress Disorder and Associated Psychological Sequelae, A Retrospective Study.
- Toxic Epidermal Necrolysis and SCORTEN – An Ohio State University Medical Center Experience.
- Using Computer Based Learning as a Method of Establishing Competency in the Care of High Risk Low Volume Nursing Care.
- Recognition and Treatment of Alcohol Withdrawal Syndrome in Burn Patients: Impact on Nursing Care and Patient Outcomes Using a New Clinical Guideline.
- Disseminating Organizational Screening and Brief Interventional Services (DO-SBIS). Screening of alcohol usage and brief intervention in the acute care hospital, makes any impact on further usage.
- Safe Signals: Burn Teaching High Functioning Young Adults with ASD about Community Safety Behaviors.
- Prospective randomized placebo trial of pregabalin in the control of neuropathic pain in burn patients.
- The implementation of a burn prevention education module for patients with autism.
• The incidence and implication of elevated HgbA1C in burn patients.
• Use of IO devices in US Burn Centers.
• Brain markers and advance function MRI in the evaluation and treatment of electrical injured patients and its implementation for diagnosing PTSD.
• Review of foreign body ingestions in predominately prisoner population.
• Intensivist bedside ultrasonography (INBU): A prospective multi-institutional investigation of sonography in hemodynamic assessment of the critically ill patient.
• Seprafilm in open abdomens: A prospective evaluation of wound and adhesion characteristics in trauma damage control.
• The effects of anticoagulants on elderly head trauma patients.
• Incidence and risks associated with polypharmacy in geriatric trauma patients.
• Effects of beta blockers in older trauma patients.
• The use of dynamic f/Vt ratio in identification of failures of ventilatory liberation in critically ill patients with normal pre-liberation f/Vt ratios.
• Geriatrics polypharmacy risk assessment system: The comorbidity-polypharmacy score (CPS).
• Early versus late tracheostomy in burn inhalation injury patients.
• Comparison of pulmonary artery catheter and arterial waveform analysis in critically ill surgical patients.
• Application of financial analysis techniques to urine output and glycemic measurements in critically ill burn patients.
• Multi-institutional study of retained surgical foreign bodies.

Accomplishments in Research

• Faculty members in the division published 42 scholarly articles, abstracts and chapters.

• Division members had 2 podium presentations at national meetings and 7 poster presentations at international and national meetings by division faculty and staff.

• The division broadened its clinical research meetings to include pharmacy, dietary and nursing.

Active Research Grants

• $360,000 grant for multi-institutional study titled Seprafilm in open abdomens: A prospective evaluation of wound and adhesion characteristics in trauma damage control (Stanislaw P. Stawicki, MD, Principal Investigator).

• $125,000 funded by Pfizer for a Prospective, Single Center, Randomized, Double Blind, Placebo-Controlled Trial for the Evaluation of the Efficacy of 300mg or 600mg of Pregabalin Versus Placebo in the Reduction of Pain and Opioid Consumption in Patients with Partial or Full Thickness Burn Injuries.
• $25,000 grant from Autism Speaks to teach burn prevention.

• $6300 grant awarded to the Burn Program from The Ohio State University Medical Center Service Board in support of our Burn Survivor Family Camp.

Clinical Programs

• Surgical critical care, trauma, burn, and emergency surgery services.

Accomplishments in Clinical Care

• The American College of Surgeons has reverified The Ohio State University Medical Center as a ‘Level I’ trauma center in July 2009, denoting it as a regional resource to care for the most critically ill and injured patients.

• The Level I verification follows a comprehensive review of the Medical Center’s practices and policies related to providing optimal care for critically ill and injured patients. The review, conducted by trauma surgeons associated with the American College of Surgeons, takes place every three years. OSU Medical Center has held a Level I designation for 19 years and was one of the first hospitals to receive the designation after the verification program started in 1987.

• A Level I trauma center must possess advanced diagnostic and treatment capabilities, including cardiopulmonary bypass, nuclear scanning and neuroradiology. The center also should have a leadership role in education, research and patient care.

• The OSU Medical Center is widely recognized for its expertise in the care of trauma patients and treats patients from throughout Ohio. It also has the only emergency department in central Ohio with hyperbaric medicine facilities and on-site physicians in more than 40 medical specialties.

• The division assumed the care of the majority of emergency general surgery patients.

• The division developed a number of new patient care guidelines and protocols including a massive transfusion protocol and a cervical spine clearance protocol.

Accomplishments in Education

- Completion of the surgical critical care fellowships by Dr. Daniel Eiferman, Dr. David Evans, Dr. James Howard, and Dr. Benjamin Morris.

- Dr. Paul Beery was voted the Department of Emergency Medicine’s Outstanding Contribution Award by their residents.

- Rebecca Coffey, RN, CNP, received the 2009 Clinical Excellence Award from the OSUMC.

- Dr. David Evans received First Place - Clinical Science, American College of Surgeons Ohio Chapter Resident Research Forum, Columbus, Ohio, May 7, 2010.

- Dr. Stanislaw Stawicki was a co-recipient of the Third Place at the Poster Competition, the 2009 American College of Physicians – Arizona Chapter Scientific Meeting for the presentation titled Cardiac Doppler Examinations of E, E’, A, and A’ Waves: Evaluating Echographic Measurement Biases Between Cardiologists and Non-Cardiologist Intensivists, Tucson, Arizona, September 26-27, 2009.

- Ann Marie Smith, PhD, RN, CRRN, ANP is the recipient of the Excellence in Community Health Education Team Award from the OSUMC, Columbus, Ohio, November 4, 2009.

Community Outreach Programs

- Trauma injury prevention program.

- Burn outreach program.

- Trauma outreach program.

- Local Heroes Day.

Accomplishments in Community Outreach

- The Third Annual OSU Burn Center Family Burn Camp, under the direction of Dr. Sidney Miller, was held on August 14-16, 2009 at Camp Joy in Clarksville, Ohio. This camp brings together former burn patients and their families for a weekend of camping and team building.
• The Spirit of Safety Days at Hilliard’s 1st Annual Community Safety Days, in Hilliard was held on May 15, 2010. Members of our burn team—Rebecca Coffey, Ann Smith, John Dahman, Sidney Miller, and Kristen Calvitti—participated in this outreach event by setting up a booth for burn prevention education and trauma.

• The ThinkFirst Program grew immensely this year and additional speakers were recruited. Central Ohio ThinkFirst Chapter presented 171 programs between 7/1/09-6/30/10, reaching 9,614 people. We continued these collaborative partnerships and served on the many community-wide committees including:
  - 4H CarTeens
  - Columbus Police Department
  - Franklin County 4H Youth Development
  - Franklin County Juvenile Court
  - Franklin County Safe Communities
  - Franklin County Sheriff’s Department
  - Franklin County Teen Safety Council
  - MADD Franklin County
  - SafeKids Central Ohio
  - SafeCommunities
  - The Ohio State University Extension Office
  - The Columbus Health Department
  - Worthington Police
  - Voices In Prevention (VIP’s)-4
  - Mayor’s Court: Upper Arlington, Dublin, and New Albany Juvenile Courts
  - Various K-12 schools and OSU
  - Central Ohio Trauma System (COTS)
  - Fatality Review Board
  - Columbus Area Pedestrian Safety Committee (CAPS)
  - Columbus Bicycle Safety Coalition
  - Mid-Ohio Regional Planning Commission (MORPC)
  - Bloom School of Driving Dynamix
  - Columbus Housing Partnership
  - Ohio Injury Prevention Partnership (OIPP)

• Many members of the division gave talks on trauma and burn topics to EMS providers, staff of outside hospitals and other care providers throughout the state of Ohio.

Yeager S. Traumatic Brain Injury. Trauma Tactics, Central Ohio Nurses, Columbus, Ohio, February 18, 2010 and June 17, 2010.

Yeager S. Nuts and Bolts of Hemorrhagic Brain Injury. Critical Care Symposium, Ohio University, Lancaster, Ohio, October 2, 2009.

Yeager S. Rootin’ Around, Keynote. The Ohio State University Medical Center Cardiac Conference, Columbus, Ohio, November 2, 2009.
The Division of General and Gastrointestinal Surgery is committed to excellence in education, training, research and clinical care in general surgery, foregut, and colorectal surgery. We strive to offer the newest and most cutting edge treatments. Our surgeons are leaders in their respective fields and we continue to recruit the best and brightest talent to expand our Division’s ability to offer the best to our patients. We continue to make contributions to surgery in the fields of gastroesophageal reflux disease, endoluminal and minimally invasive surgery, bariatric surgery, surgical endoscopy, and the treatment of malignant disease of the gastrointestinal tract, including pancreatic, esophageal and gastric cancer.

This year our Division expanded the breadth of procedures offered to patients suffering from benign and malignant disease processes of the esophagus with the recruitment and hire of Dr. Kyle Perry. Dr. David Renton has also joined our team this year with a clinical practice focusing on minimally invasive gastrointestinal surgery at University Hospitals East. Drs. Perry and Renton, both fellowship trained and board-certified, bring additional specialty approaches to patients in need of advanced treatment options in gastrointestinal surgery.

Surgical education and the training of medical students, residents, fellows and physicians in practice is an integral piece of our Division’s academic endeavors. We strive as group to cultivate those individuals with a passion for surgery, through one-on-one teaching opportunities, educational course series options, and hands-on instruction in clinical and laboratory settings. We are very proud of the accomplishments in this arena in 2009 – 2010, with a number of our faculties recognized at the Department, College and national levels for excellence in teaching endeavors. Our Divisional faculties were awarded the Department of Surgery Faculty Teaching Award, The Ohio State University College
of Medicine Distinguished Faculty Award, and an Association for Surgical Education’s (ASE) Surgical Education Research Fellowship (SERF).

In basic and translational science research Chandan K. Sen, PhD, director of the Comprehensive Wound Center and vice chair for Research in the Department of Surgery, is the principal investigator of three active National Institutes of Health (NIH) research projects with total funding exceeding $4.2 million. Dr. Sen is the Director of the Laboratory of Molecular Medicine and serves as the Deputy Director of the Davis Heart and Lung Research Institute and is the Associate Dean for Translational and Applied Research in the College of Medicine. Dr. Sen leads the Medical Center’s Technology Commercialization and Industry Partnership programs. The primary focus of Dr. Sen’s laboratory is to study tissue injury, repair, remodeling, and survival. Dr. Sen has been named as a permanent member of NIH’s Surgery, Anesthesia and Trauma study section in 2009 and has presented 13 keynote addresses and plenary lectures on the subject during the year at thirteen national and international conferences. In 2009, Dr. Sen presented the Van Lierre lecture at the Robert Byrd Health Sciences Center of West Virginia University. He was the chief guest at the Health Science Center’s 2009 annual research day and convocation. Dr. Sen is the Executive Director of the Comprehensive Wound Center (CWC), which combines patient care with research and education. The CWC serves over 1500 patient visits a month. The CWC funded its first clinical trial in 2006, and today there are six extramurally-funded trials that either have been completed or are in progress with Dr. Sen as the PI. At present, the CWC has over a dozen faculties from six different Colleges making it a truly interdisciplinary program. Dr. Sen also serves on the board of directors of the Wound Healing Society. Dr. Sen is the Editor-in-Chief of an international peer-reviewed journal, Antioxidants & Redox Signaling (www.liebertpub.com/ars), which has an impact factor of 7.58 ranking number 1 in the field. Dr. Sen serves as the Associate Editor of the prestigious journal Physiological Genomics, a publication of the widely respected American Physiological Society. Dr. Sen is the Editor-In-Chief of Advances in Wound Care (www.liebertpub.com), the official yearbook of the Wound Healing Society. In addition, Dr. Sen serves on the editorial board of five other journals and as a peer reviewer of over 25 major journals. Dr. Sen is the program director of the Novel Clinical and Translational Methodologies and Pilot Studies programs of the Ohio State Center for Clinical and Translational Research (CCTS). The CCTS has been awarded a NIH CTSA grant of $34.1 million. Dr. Sen also serves as a voting member of NIH’s national CTSA Public Private Partnerships Steering Committee. In 2009, he was designated as NIH Champion of Change for The Ohio State University. Dr. Sen also serves as a faculty advisor on the Indian Gateway Project for the OSU Globalization Initiative and served as president of the 14th OCC World Congress.

Dr. Sashwati Roy, associate professor of surgery, is building a diabetic wound healing program in partnership with the teams of Drs. Sen, Gordillo, and Melvin. In particular, her program focuses on dead cell recognition and clearance from the chronic wound of diabetics. Dr. Roy is an expert in microarray analyses and data mining in functional genomics, as well as laser capture microdissection. Dr. Roy serves as the Director of the Laser Capture Microdissection Core Facility. She is the principal investigator of an active National Institutes of Health research project with funding exceeding $1.2 million, and is the co-investigator on three wound healing projects. Dr. Roy is an adhoc reviewer, NIH Arthritis, Connective Tissue and Skin Study Section and a reviewer for NIH challenge grants. She has published seven papers in reputed journals during this academic year. In total, Dr. Roy has published
Dr. Savita Khanna was promoted to assistant professor in the Department of Surgery in July 2009. Dr. Khanna is building a brain injury and rescue laboratory. She has extensive experience in in vitro and in vivo studies related to mechanisms of neurodegeneration and interventional rescue. Within the first few months of her faculty appointment, Dr. Khanna received three competitive grants, a Research Investment Fund (RIF) award and an NIH-sponsored Clinical and Translational Science Award (CTSA) Pilot Award, and the Center for Clinical and Translational Science (CCTS) NCTMP Matching Dissemination Funds award. Dr. Khanna serves as the managing editor for the international peer-reviewed journal, Antioxidants & Redox Signaling, which has an impact factor of 7.581. She also serves as a peer reviewer for nine major journals. Dr. Khanna has published six papers in reputed journals over the past year. In total, Dr. Khanna has published over seventy-five journal articles, and she has presented her work at meetings and conferences both nationally and internationally. Dr. Khanna works with a highly-skilled team of collaborators and is building a successful laboratory and research program.

Dr. E. Christopher Ellison, the Robert M. Zollinger professor and chairman of Surgery, continues to serve as associate vice president for Health Sciences and vice dean of Clinical Affairs in the College of Medicine and as a director of the American Board of Surgery. Repeatedly recognized as one of the nation’s top physicians, Dr. Ellison was listed again this year by Best Doctors in America. His book, co-authored with Dr. Thomas E. Williams, Jr. and Dr. Bhagwan Satiani, “The Coming Shortage of Surgeons: Why They Are Disappearing and What That Means for Our Health” was published in the September 2009 and is a quantitative analysis of the workforce in orthopedic and thoracic surgery, otolaryngology, obstetrics and gynecology, general surgery, neurosurgery, and urology. Dr. Ellison maintains an active clinical practice focusing on pancreatic and esophageal diseases, and he continues to serve as an outstanding teacher of medical students and residents.

W. Scott Melvin, MD, professor of surgery, is the chief of the Division, as well as the director of the Center for Minimally Invasive Surgery. Dr. Melvin’s clinical practice focuses on advanced minimally invasive surgical treatments for gastroesophageal reflux disease and other esophageal disorders, as well as advanced hepatobiliary surgery. In addition to his leadership within the Medical Center Dr. Melvin is a member of a variety of local, national and international societies. He serves as the Second Vice President for the Society of American Gastrointestinal and Endoscopic Surgeons and is the Committee Chair of their Business Development Advisory Group. This year he was appointed to the Advisory Board in General Surgery of the American College of Surgeons as a representative for The American Board of Surgery. In 2010 Dr. Melvin was the recipient of The Ohio State University College of Medicine Distinguished Educator Award. This award is presented annually to a faculty member who has shown extraordinary commitment to teaching and the promotion of academic excellence. A five-time Surgery Faculty Teaching Award winner, twice acknowledged by medical students and three times by surgical residents, Dr. Melvin was a most deserving recipient.
Mark W. Arnold, MD, professor of clinical surgery, is the vice chair for Education in the Department of Surgery. Dr. Arnold serves as the Director of the General Surgery residency program, which continues to grow in prestige and volume. Under his direction, the program has grown to 55 residents, graduating five per year. In October 2009 the General Surgery Residency Program underwent a comprehensive review by Residency Review Committee of the Accreditation Council for Graduate Medical Education and was granted a 4 year accreditation extension. Dr. Arnold also participates as an instructor for the Colorectal Fellowship program. While participating in all levels of education, he maintains a busy clinical practice that focuses on treatment of colorectal diseases and disorders.

Alan Harzman, MD, assistant professor of clinical surgery, joined the Division in 2007 and has since built an extremely busy practice. His primary clinical focus is the treatment of colorectal diseases and disorders, offering advanced minimally invasive approaches for many. In additional to clinical duties, Dr. Harzman has quickly become a recognized educator for both residents and medical students alike. In 2009, Dr. Harzman was awarded an Association for Surgical Education’s (ASE) Surgical Education Research Fellowship (SERF). A competitive program, he was the recipient of one of only 16 fellowships awarded nation-wide. The SERF program is a one year, home-site fellowship designed to equip investigators with the skills and knowledge needed to plan, implement and report research studies in the field of surgical education. We are extremely fortunate to have Dr. Harzman on our team and look forward the expansion of his mentoring role of medical students and residents in the field of surgical education.

Jeffrey Hazey, MD was promoted to associate professor of surgery in October 2009. Dr. Hazey continues to be a recognized national leader in areas of surgical endoscopy and NOTES. His clinical practice focuses on advanced therapeutic endoscopy, including ERCP, as well as advanced minimally invasive surgical procedures. Under his direction, 2009-2010 was the fourth year for the Fellowship in Advanced Therapeutic Endoscopy and Gastrointestinal Surgery. Dr. Hazey is a committed educator both within our Medical Center, training medical students, residents and practicing physicians in continuing medical education courses, and beyond where he participates in educational activities on an international and national level. Dr. Hazey is a member of six different committees within the Society of American Gastrointestinal Endoscopic Surgeons (SAGES), including the Flexible Endoscopy Committee and the Endolumenal Task Force. In addition to his national society participation, Dr. Hazey is a member of five hospital-based committees, including the appointment this year as an at-large member of the Department of Surgery Executive Committee. In his research endeavors, Dr. Hazey continues to be at the forefront of the Natural Orifice Translumenal Endoscopic Surgery (NOTES) movement, publishing the findings of the first US clinical NOTES trial in Surgical Endoscopy and its extension, entitled “Diagnostic Transgastric Endoscopic Peritoneoscopy: Extension of Initial Human Trial for Staging of Pancreatic Head Masses”.

In September 2009, Syed Husain, MD, assistant professor of clinical surgery, received his Board Certification by the American Board of Colon and Rectal Surgery. Dr. Husain continues to grow his clinic practice, with a specialty focus on minimally invasive treatments for benign and malignant colon and rectal disease. On a national level, Dr. Husain was an invited faculty speaker on “Ischemic Colitis and Acute Hemorrhage” at the 96th Annual Clinical Congress of American College of Surgeons held
in Washington, DC and presented his research on “Posterior Pelvic Floor Dysfunction: A Comparison of Defecography, MRI and Anorectal Physiology” at the 2009 annual meeting of the American Society of Colon and Rectal Surgeons.

Andrei Manilchuk, MD, assistant professor of clinical surgery, continues to grow his clinical practice in general surgery. He has participated in various workshops in advanced surgical techniques for colon surgery and for abdominal wall reconstruction and continues to be a valuable resource for a variety of various surgical diseases. Dr. Manilchuk is a recognized teacher and educator of residents and medical students, and this year he was awarded the Department of Surgery Faculty Teaching Award. This award is bestowed by the surgery residents and fellows in recognition for excellence in teaching and dedication to surgical education.

Dean Mikami, MD, assistant professor of surgery, has been an active member of our Division since 2003. His clinical practice focuses on advanced minimally invasive surgical procedures specializing in laparoscopic bariatric surgery, minimally invasive approaches for hernia repair, and novel endoluminal therapies. Dr. Mikami is an active member of the surgical community on both a national and international level and served as an invited speaker at many venues throughout the year. He chaired an endoluminal therapy session at the 2010 SAGES meeting in Washington, DC and served as an invited lecturer at the American College of Surgeons and the American Society of Metabolic and Bariatric Surgery annual meetings. Dr. Mikami provided guest lectures in Paris and Versailles, France, as well as Sao Paulo, Brazil on evolving endoscopic procedures. In his research endeavors, Dr. Mikami is currently a Co-I on a multi-center, FDA trial entitled “Randomized controlled trial of StomaphyX versus sham for revisional surgery in post-Roux-en-Y patients to reduce regained weight”. The goal of the trial to prove efficacy of the StomaphyX procedure in reducing weight gain following primary weight loss surgeries, thus allowing improving insurance coverage for patients in need. He has published multiple papers and abstracts and is featured on SAGES Top 21 Videos “Minimally Invasive Procedures Every Practicing Surgeon Should Know”. Dr. Mikami is also an editor of the text book, “Evidence Based Minimally Invasive Surgery”, which should be out in the near future.

Peter Muscarella, MD, associate professor of surgery, serves as the director of the Surgical Clerkship for medical students. In this role, he mentors medical students as they pursue careers in the surgical fields. Dr. Muscarella also serves as the assistant program director for the General Surgery Residency Program participants. This past year, in conjunction with the Center for Minimally Invasive Surgery, Dr. Muscarella helped to implement the American College of Surgeon’s (ACS) Surgical Skills Curriculum for residents. The expanded hands-on curriculum will help our surgeons in training achieve a more advanced skill level at a quicker pace through the use of simulation and skills labs. His research focuses on gastrointestinal disorders, and clinically, Dr. Muscarella’s practice focuses on surgical disorders of the pancreas.

Vimal Narula, MD was promoted to assistant professor of clinical surgery during this academic year. He continues to expand his clinical practice with a focus on advanced therapeutic endoscopy, including ERCP, and minimally invasive surgical treatments for common general surgery procedures. Dr. Narula is an active member of the educational team, and serves as an instructor for continuing
medical education courses offered through the Center for Minimally Invasive Surgery and is a valued instructor of the ACS Surgical Skills Curriculum for the general surgery residents. Continuing to participate in the expanding field of NOTES research, this year Dr. Narula is participating in an investigator initiated study looking at the safety and feasibility of transvaginal cholecystectomy. This study is a stepping stone to a larger, multi-center trial sponsored by Natural Orifice Surgery Consortium for Assessment and Research (NOSCAR).

During the 2009-2010 academic years Bradley Needleman, MD was promoted to associate professor of clinical surgery. He also continues to serve in his role as the Director of Bariatric Surgery. Surgical volumes for bariatric surgery continue to grow and this year he and Dr. Mikami will combine to perform more than 300 primary bariatric surgery operations. In May 2010, Dr. Needleman traveled to China where he participated in the 5th Chinese Congress on Perioperative Medicine in Integrated Traditional and Western Medicine. During his visit to Shanghai and Hangzhou, he participated as a guest lecturer and performed surgical cases for a live audience at the Wenshou Medical College. Dr. Needleman cultivated many professional acquaintances during his time in China, which we hope as a Division to help sustain with future trips to the region for teaching and research endeavors.

Kyle Perry, MD joined our Division in July 2009 as an assistant professor of surgery. Prior to joining our practice, Dr. Perry completed a general surgery residency at Rush University Medical Center/Cook County Hospital Integrated Surgical Resident Program in Chicago, Illinois. His specialty training was obtained at the Oregon Health & Science University (OHSU) in Portland, Oregon, where he completed a two year fellowship in Minimally Invasive Surgery and received a graduate degree from the OHSU Human Investigations Program. Dr. Perry’s clinical practice focuses on the treatment of benign and malignant esophageal and gastric disorders including esophageal and gastric cancer, Barrett’s esophagus and minimally invasive approaches to gastroesophageal reflux disease (GERD). His current research endeavors include funding from SAGES for a project entitled “Identifying the Optimal Duration of Gastric Ischemic Conditioning to Improve Gastroesophageal Anastomotic Wound Healing”. We are happy to have Dr. Perry on our team and look forward to continued expansion of his practice in the years to come.

Dr. David Renton, assistant professor of clinical surgery, became a member of our team in August 2009. Dr. Renton completed his general surgery residency at the University of Alabama – Birmingham, followed by a year of specialty training at The Ohio State University, where he completed a minimally invasive surgical fellowship. Following his training, Dr. Renton joined the faculty at the University of South Carolina, where he held the title of Director of Minimally Invasive Surgery. His clinical practice at University Hospital East focuses on minimally invasive treatment options for a variety of gastrointestinal surgical operations. Dr. Renton is also one of few surgeons in central Ohio to offer “single-incision” options to patients for such common operations as gall bladder removal, hernia repair, and some colorectal procedures. His dedication and interest in surgical education is also an asset to our team, and Dr. Renton is working with the Center for Minimally Invasive Surgery to establish a Surgical Skills Center for our rotating medical students and residents.

Richard Schlanger, MD, associate professor of clinical surgery, serves as the Chief of Surgical Services at University Hospitals East and the Clinical Director of the Center of Advanced Wound Manage-
ment. He maintains an extremely busy general surgery clinical practice, with a specialty focus on wound healing. Dr. Schlanger is recognized leader in clinical wound healing research and is frequently an invited speaker on the national and international level. Dr. Schlanger collaborates with our Division’s basic science research program, which specializes in wound care research. Spring of 2010 brought the opening of CarePoint at Gahanna, an extension of the Comprehensive Wound Center, of which Dr. Schlanger will oversee quality and pathway compliance.

Minimally Invasive Surgery
The Center for Minimally Invasive Surgery (CMIS) is a multidisciplinary center dedicated to the achievement of excellence in patient care, clinical training, research and outcomes studies pertaining to the techniques and technology of minimally invasive surgery. The Center strives to expand the ever changing field of surgery and 2009-2010 brought continued expansion of our educational and research endeavors.

Research
At The Ohio State University’s Center for Minimally Invasive Surgery (OSU-CMIS), surgeons and researchers are continuously pushing the boundaries of current surgical techniques. Over the past few years, a completely new minimally invasive surgical technique has emerged, pioneered by efforts at The Ohio State University. Natural Orifice Transluminal Endoscopic Surgery, or NOTES, is the process of performing surgery through naturally existing orifices, thus eliminating the need for external incisions. It is a trend has been gaining interest in the surgical community over the last several years. We continue to focus our efforts on new developments in technology and techniques for NOTES, with the hope that someday common surgical procedures can be totally incisionless.

The Center for Minimally Invasive Surgery (CMIS) at The Ohio State University remains in the forefront of NOTES related research. In addition to our, “Transgastric Peritoneoscopy for Evaluation of the Abdominal Wall to Direct Laparoscopic Trocar Placement” and “Diagnostic Transluminal Endoscopic Peritoneoscopy” (Hazey et al. 2008) studies, OSUMC has been selected as a site in a NOTES cholecystectomy multicenter clinical trial sponsored by the Natural Orifice Surgery Consortium for Assessment and Research (NOSCAR). NOSCAR, a non-profit organization formed in July 2005 to further NOTES research, is supported by the American Society for Gastrointestinal Endoscopy (ASGE) and the Society of American Gastrointestinal and Endoscopic Surgeons (SAGES).

The field of obesity surgery and related disease processes also continues to be a focus for our researchers. Metabolic disorders, such as diabetes, are some of the fastest growing complications that arise from obesity. Treatment of obesity with surgical intervention often leads to resolution of such metabolic disorders. Dara Schuster, MD, who holds a joint appointment with the Division of Endocrinology, Diabetes and Metabolism and the Division of General and Gastrointestinal Surgery, received a $525,451 grant from Covidien for a project entitled: “Metabolic Surgery vs. Medical Management for Resolution of Type II Diabetes: A Prospective Group Match Study.” As part of this study, morbidly obese patients with diabetes who choose to undergo Roux-en-Y gastric bypass surgery or who choose best medical management are followed for two years to ascertain whether
diabetes improves or resolves as a result of surgical or medical intervention. This study will enroll 120 subjects: 60 in the surgical intervention arm and 60 in the best medical management arm.

Finally, Dr. Kyle Perry received a $30,000 grant from the Society of American Gastrointestinal and Endoscopic Surgeons (SAGES). Dr. Perry’s project is entitled: “Identifying the optimal duration of gastric ischemic conditioning to improve gastroesophageal anastomotic wound healing.” This study will investigate the optimal duration of gastric ischemic conditioning prior to esophagectomy as a treatment for esophageal adenocarcinoma. The incidence of esophageal adenocarcinoma has increased 350% since 1970, a rate outpacing all other cancers. It is hoped that this study will lead to a reduction in complications endemic to esophagectomy and an improvement in patients’ quality of life.

**Education**

This year, CMIS focused a large portion of its educational mission on surgical resident education in addition to continuing medical education (CME) and non-CME courses for practicing surgeons. In accordance with new guidelines from the American College of Surgeons (ACS) dictating skills training for residents, CMIS along with the Department of Surgery residency training program began to offer weekly surgical skills labs based on various modules included in the ACS surgical skills curriculum for residents. Each week, different levels of post graduate year (PGY) learners attend a two-hour skills lab in either an animate, inanimate or didactic setting taught by an attending surgeon or expert in the area. Sessions vary in topic based on the training level of the learner. Attendance at weekly skills labs are mandatory and have been very well received overall. In addition to these weekly skills labs, approximately 10 CME and non-CME courses were held in 2009-2010 with over 170 participants including practicing surgeons, allied health professionals, fellows and residents. Course topics ranged from minimally invasive hernia, colon and urologic surgery to newer topics in surgery such as single incision laparoscopic surgery and endoluminal treatments for GERD and weight loss.

We saw continued success of the OSU Robotic Surgery Training Center in 2009-2010. CMIS added a new Allied Health Robotics Training program to its course offerings. Under the direction of Lynda Jayjohn, nurse manager for robotic surgery, beginner and intermediate/advanced courses for perioperative team members working in a robotic operating room. Programs are tailored to fit the needs of each program that attends. Key course topics include troubleshooting, flow management, OR efficiency, staffing needs/management and marketing. Over 47 participants have attended these training programs. In addition to our allied health programs, over sixty da Vinci surgeon training programs were held at Ohio State during this time with a total of 63 participants from various states around the country. Training programs held here include training in techniques for general, gynecologic, urologic and cardiothoracic robotic surgery.

Our minimally invasive surgery training program, which is a one-year, faculty level dedicated experience in advanced laparoscopic surgery, remains a well sought after position. This year we welcomed two new clinical assistant professors, Dr. Eric Volckmann and Dr. Clinton Hall. Dr. Volckmann had a very busy clinical year, completing more than 400 advanced laparoscopic surgeries and endoscopies. He participated in a number of research projects during his time at OSU, which will lead to multiple publications. Dr. Volckmann’s future practice will focus on minimally invasive surgery
as well as bariatric surgery. Dr. Hall was also a very active member of the team this year, completing over 400 advanced laparoscopic and endoscopic procedures. In addition to his clinical responsibilities, he participated in multiple CMIS continuing medical education programs and was active in teaching at our resident skills labs. Dr. Hall has taken a position with a practice in Florida where he will offer bariatric and other advanced minimally invasive procedures to his patients.

Additionally, the Center for Minimally Invasive Surgery, welcomed Dr. Vanchad Memark, clinical assistant professor of surgery, who completed a one year training program in Advanced Therapeutic Endoscopy and Gastrointestinal Surgery. Dr. Memark had an extremely busy clinical year, completing more than 130 advanced laparoscopic surgeries, and over 378 therapeutic and diagnostic endoscopies including ERCP’s. He participated in a number of research projects during his time at OSU, which lead to publications. Dr. Memark will be joining a surgical practice in the Atlanta, GA area.
Faculty

W. Scott Melvin, M.D.
Professor of Surgery; Vice Chairman for Academic Affairs, Department of Surgery; Chief, Division of General and Gastrointestinal Surgery; Director, Center for Minimally Invasive Surgery
B.S.: Ohio Northern University, Ada, Ohio, 1983
M.D.: Medical College of Ohio, Toledo, Ohio, 1987
Specialty Training: University of Maryland, College Park, Md.; Ohio Digestive Disease Institute, Columbus, Ohio
Appointment: 1993
Specialty Interests: Gastrointestinal, hepatobiliary, and pancreatic surgery; advanced laparoscopic techniques
Research Interests: Laparoscopic surgery education and training, molecular biology of pancreatic cancer, experimental therapies for pancreatic cancer

Mark W. Arnold, M.D.
Professor of Clinical Surgery; Vice Chairman for Surgical Education, Department of Surgery
B.A.: University of Virginia, Charlottesville, Va., 1979
M.D.: New York University, New York, N.Y., 1983
Specialty Training: Jackson Memorial Hospital, University of Miami Medical Center, Miami, Fla.; Grant Medical Center, Columbus, Ohio
Appointment: 1990
Specialty Interests: Colon and rectal surgery
Research Interests: Radioimmunoguided antibodies for diagnosis and treatment of colon and rectal cancers

E. Christopher Ellison, M.D.
The Robert M. Zollinger Professor of Surgery; Chairman, Department of Surgery; Associate Vice President for Health Sciences and Vice Dean of Clinical Affairs, College of Medicine
B.S.: University of Wisconsin, Madison, Wis., 1972
M.D.: Medical College of Wisconsin, Milwaukee, Wis., 1976
Specialty Training: The Ohio State University, Columbus, Ohio
Appointment: 1993
Specialty Interests: Surgery of the liver, biliary tree, and pancreas
Research Interests: Gastrinoma and Zollinger-Ellison syndrome, pancreatic and hepatic cancer
Clinton R. Hall, M.D.
Clinical Assistant Professor of Surgery
B.S.: Cumberland College, Williamsburg, Ky., 2000
M.D.: University of South Florida College of Medicine, Tampa, Fla., 2004
Specialty Training: Residency in general surgery, The Ohio State University, 2004–2009
Appointment: 2009
Specialty Interests: Laparoscopic surgery, gastric bypass, hernia repair
Research Interests: Abdominal wall defects, hernia prevention

Alan E. Harzman, M.D.
Assistant Professor of Clinical Surgery
B.S.: Vanderbilt University, Nashville, Tenn., 1997
M.D.: Washington University, St. Louis, Mo., 2001
Specialty Training: Residency in general surgery, University of Texas Southwestern Medical Center, Dallas, Texas; fellowship in colon and rectal surgery, Baylor University Medical Center, Dallas, Texas
Appointment: 2007
Specialty Interests: General surgery, colon and rectal surgery
Research Interests: General surgery, colon and rectal surgery

Jeffrey W. Hazey, M.D.
Associate Professor of Surgery
B.A.: Miami University, Oxford, Ohio, 1987
M.D.: Case Western Reserve University, Cleveland, Ohio, 1992
Specialty Training: Residency in general surgery, University Hospitals of Cleveland; fellowship in nutrition and surgery research, Case Western Reserve University/Mount Sinai Medical Center; fellowship in advanced laparoscopic and endoscopic surgery, Cleveland Clinic, Cleveland, Ohio
Appointment: 2003
Specialty Interests: Minimally invasive surgery, advanced endoscopy, endoscopic retrograde cholangiopancreatography
Research Interests: Minimally invasive surgery, natural orifice transluminal endoscopic surgery (NOTES), endolumenal treatment options
Syed G. Husain, M.D.
Assistant Professor of Clinical Surgery
M.B.B.S.: Dow Medical College, Karachi, Pakistan
Specialty Training: Residency in general surgery, Harlem Hospital Center, New York, N.Y.; fellowship in clinical research, University of Illinois at Chicago; fellowship in minimally invasive surgery, University of Rochester, Rochester, N.Y.; fellowship in colorectal surgery, Brown University, Providence, R.I.
Appointment: 2008
Specialty interests: Minimally invasive colorectal surgery
Research Interests: Natural orifice transluminal endoscopic surgery (NOTES)

Savita Khanna, Ph.D.
Assistant Professor of Surgery
B.S.: Meerut University, Meerut, Uttar Pradesh, India, 1984
M.S.: Meerut University, Meerut, Uttar Pradesh, India, 1986
M.Ph.: Meerut University, Meerut, Uttar Pradesh, India, 1988
Ph.D.: University of Kuopio, Kuopio, Finland, 2000
Specialty Training: Research fellowship in molecular and cell biology, University of California, Berkeley
Appointment: 2009
Research Interests: Tissue injury and repair, neurodegeneration and stroke
Previous Appointment: Research scientist, The Ohio State University Medical Center, Columbus, Ohio

Andrei V. Manilchuk, M.D.
Assistant Professor of Clinical Surgery
M.D.: Gorky State Medical Institute, Nizhny Novgorod, Russia, 1984
Specialty Training: General surgery and surgical oncology, Nizhny Novgorod Medical Academy and Regional Cancer Center, Nizhny Novgorod, Russia; general surgery, The Ohio State University, Columbus, Ohio
Appointment: 2003
Specialty Interests: Gastrointestinal and pancreatobiliary surgery

Vanchad R. Memark, M.D.
Clinical Assistant Professor of Surgery
B.S.: Loyola University, Chicago, Ill., 1997
M.D.: Loyola University, Chicago, Ill., 2004
Specialty Training: University of Illinois Metropolitan Group Hospitals, Chicago, Ill.
Appointment: 2009
Specialty Interests: Surgical endoscopy, minimally invasive surgery
Research Interests: Natural orifice transluminal surgery
Dean J. Mikami, M.D.
Assistant Professor of Surgery
M.D.: University of Kansas, Kansas City, Kan., 1997
Specialty Training: Residency in general surgery and fellowship in minimally invasive surgery, The Ohio State University, Columbus, Ohio
Appointment: 2003
Specialty Interests: Minimally invasive surgery, bariatric surgery, hernia treatment options
Research Interests: Minimally invasive surgery, natural orifice transluminal endoscopic surgery (NOTES)

Peter Muscarella, II, M.D.
Associate Professor of Surgery; Director, Surgical Clerkship
B.S.: University of Rochester, Rochester, N.Y., 1989
M.D.: New York Medical College, Valhalla, N.Y., 1993
Specialty Training: Residency in general surgery, The Ohio State University, Columbus, Ohio
Appointment: 2000
Specialty Interests: General surgery, endocrine gastrointestinal disease, liver, pancreas
Research Interests: Pancreatic cancer, pancreatic neuroendocrine tumors

Vimal K. Narula, M.D.
Assistant Professor of Clinical Surgery
B.S.: Marshall University, Huntington, WV, 1995
M.D.: Marshall University, Huntington, WV, 1999
Specialty Training: Residency in general surgery, Marshall University; fellowship in minimally invasive surgery and fellowship in advanced therapeutic endoscopy, The Ohio State University, Columbus, Ohio
Appointment: 2005
Specialty Interests: Minimally invasive surgery, foregut surgery, advanced therapeutic endoscopy
Research Interests: Natural orifice transluminal endoscopic surgery (NOTES), robotic surgery
Bradley J. Needleman, M.D.
Associate Professor of Clinical Surgery; Director, Bariatric Surgery Program
B.A.: Vassar College, Poughkeepsie, N.Y., 1990
M.D.: Mount Sinai School of Medicine, New York, N.Y., 1994
Specialty Training: Residency in general surgery, Washington Hospital Center, Washington, D.C.; fellowship in minimally invasive surgery, The Ohio State University, Columbus, Ohio
Appointment: 2000
Specialty Interests: Advanced laparoscopic surgery, obesity surgery
Research Interests: Minimally invasive surgery, surgical education

David Renton, M.D.
Assistant Professor of Clinical Surgery
B.S.: Tulane University, New Orleans, Louisiana. 1994
M.D.: Louisiana State University, New Orleans Louisiana, 2001
Specialty Training: Master of Public Health, Tulane University School of Public Health, New Orleans, Louisiana, 1997
Appointment: 2009
Specialty Interests: Bariatrics, natural orifice translumenal endoscopy surgery (NOTES)
Research Interests: Advanced technology
Previous Appointment: Assistant professor, University of South Carolina School of Medicine, Columbia, South Carolina

Sashwati Roy, Ph.D.
Associate Professor of Surgery
B.S.: Meerut University, Meerut, India, 1984
M.S.: Meerut University, Meerut, India, 1986
Ph.D.: University of Kuopio, Kuopio, Finland, 1994
Appointment: 2000
Research Interests: Antioxidant and redox biology focusing on signal transduction and gene expression

Richard E. Schlanger, M.D., Ph.D.
Associate Professor of Clinical Surgery; Director, Center of Advanced Wound Management and chief, Surgical Services, University Hospital East
M.D.: Faculté de Medicine, Toulouse, France, 1980
Ph.D.: Faculté de Medicine, Toulouse, France, 1982
Specialty Training: The Ohio State University, Columbus, Ohio
Appointment: 2000
Specialty Interests: General surgery, wound healing
Research Interests: Wound healing
Chandan K. Sen, Ph.D.
Professor of Surgery; Vice Chairman for Research, Department of Surgery; Associate Dean for Translational and Applied Research, College of Medicine; Deputy Director, Davis Heart and Lung Research Institute; Director, DNA Microarray and Genetics Facility, Davis Heart and Lung Research Institute; Professor, Department of Molecular and Cellular Biochemistry
B.S.: Calcutta University, Calcutta, India, 1987
M.S.: Calcutta University, Calcutta, India, 1990
Ph.D.: University of Kuopio, Kuopio, Finland, 1994
Appointment: 2000
Research Interests: Wound healing, redox control of biological events, role of oxygen- and nitrogen-derived species in signal transduction and gene expression

Eric T. Volckmann, M.D.
Clinical Assistant Professor of Surgery
B.S.: University of North Carolina, Chapel Hill, N.C., 1998
M.D.: University of North Carolina School of Medicine, Chapel Hill, N.C., 2002
Specialty Training: McGaw Medical Center, Northwestern University, Chicago, Ill.
Appointment: 2009
Specialty Interests: Minimally invasive gastrointestinal and bariatric surgery
Research Interests: Outcomes in minimally invasive surgery, natural ori-fice transluminal surgery, surgical device development

Clinical Faculty

Robert E. Falcone, M.D.
Clinical Professor of Surgery
B.A.: Kent State University, Kent, Oh., 1973
M.D.: The Ohio State University, Columbus, Oh., 1976

Jeffrey T. Innes, M.D.
Clinical Assistant Professor of Surgery
B.S.: University of California, Davis, Ca., 1976
M.D.: University of California, Davis, Ca., 1980
Bruce A. Kerner, M.D.
Clinical Assistant Professor of Surgery
B.S.: University of Tampa, Tampa, Fla., 1980
M.D.: Chicago Medical School, Chicago, Il., 1984

Richard C. Rooney, M.D.
Clinical Assistant Professor of Surgery
B.S.: University of Cincinnati, Cincinnati, Oh., 1964
M.D.: University of Cincinnati, Cincinnati, Oh., 1967

Thomas T. Vogel, M.D., Ph.D.
Clinical Assistant Professor of Surgery
B.A.: Holy Cross College, 1955
Ph.D.: The Ohio State University, Columbus, Oh., 1962
M.D.: Georgetown University, Washington, D.C., 1965

Resident Staff

Catherine E. Beck, M.D.
PGY-2
B.S.: University of Wisconsin, Madison, Wis., 2003
M.D.: Ohio State University, Columbus, Oh., 2008

Amy L. Collins, M.D.
Master of Medical Science Program
B.S.: Florida Atlantic University, Boca Raton, Fla., 2001
M.D.: University of South Florida, Tampa, Fla., 2007

Alexandria Conley, M.D.
PGY-1
B.S.: Wayne State University, Detroit, Mi., 2004

Mission

The Division of General and Gastrointestinal Surgery is dedicated to the achievement of excellence in patient care, medical education, clinical training, and basic science and clinical research.

Research Programs

- Wound angiogenesis and healing.
- Cardiac remodeling.
- Vitamin E and neurodegeneration.
- Clinical wound healing.
- Cytomegalovirus infections and bacterial sepsis.
- Gene therapy and the effects of early genetic changes in pancreatic cancer.
- Minimally invasive surgical techniques.

Accomplishments in Research

- Faculty members in the division published 123 scholarly articles, abstracts, and chapters.
- The scientific journal ARS (Antioxidants & Redox Signaling), for which Dr. Chandan Sen is the founder and editor, was recognized by the Institute for Scientific Information as one of the top scientific publications nationwide. It was awarded an impact factor of 7.581, which ranks it as one of the top scientific journals overall.
- The Bariatric Center of Excellence at The Ohio State University Medical Center has been selected as one of two sites in the United States to evaluate a new laparoscopic bariatric surgery. To date, the principal investigator of this study, Bradley J. Needleman, MD, has performed eight greater curvature plication surgeries. Dr. Needleman is in the process of screening five more candidates for this promising new surgery to facilitate weight loss in morbidly obese patients. The sponsor of this study is Ethicon Endo-Surgery, Inc.
- Dara Schuster, MD, who holds a joint appointment with the Division of Endocrinology, Diabetes and Metabolism and the Division of General and Gastrointestinal Surgery, received a $525,451 grant from Covidien for a project entitled: “Metabolic Surgery vs. Medical Management for Resolution of Type II Diabetes: A Prospective Group Match Study.”
• Dr. Kyle Perry received a $30,000 grant from the Society of American Gastrointestinal and Endoscopic Surgeons (SAGES) for a project is entitled: “Identifying the optimal duration of gastric ischemic conditioning to improve gastroesophageal anastomotic wound healing.”

• Investigators from The Center for Minimally Invasive Surgery (CMIS) at The Ohio State University Medical Center (OSUMC) continue to be in the forefront of Natural Orifice Translumenal Endoscopic Surgery (NOTES) research. OSUMC has been selected as a site in a NOTES cholecystectomy multicenter clinical trial sponsored by the Natural Orifice Surgery Consortium for Assessment and Research (NOSCAR). NOSCAR, a non-profit organization formed in July 2005 to further NOTES research, is supported by the American Society for Gastrointestinal Endoscopy (ASGE) and the Society of American Gastrointestinal and Endoscopic Surgeons (SAGES).

Active Research Grants

Hazey JW, Melvin WS. Transgastric bacterial contamination of the abdomen. Stryker Endoscopy, June 1, 2006 – September 1, 2010, $35,000.

Needleman BJ, Melvin WS. Evaluation of endostapled anastomoses for laparoscopic gastric bypass: A prospective randomized comparison of the 3.5-mm vs. 4.8-mm circular stapler for creation of the gastrojejunostomy. United States Surgical Corporation, March 1, 2005 – September 30, 2009, $11,613.

Clinical Programs

- Comprehensive general surgery service.
- Minimally invasive surgery.
- Bariatric surgery.
- Benign and malignant esophageal disorders.
- Gastroesophageal reflux.
• Hepatobiliary and pancreatic cancer.

• Treatment of benign and malignant diseases of the colon and rectum.

• Wound care.

Accomplishments in Clinical Care

• Attending faculty in the division performed 15,679 surgical procedures and received 17,673 outpatient visits.

Educational Programs

• Fully-accredited residency in general surgery.

• One-year clinical assistant professorship in minimally invasive surgery and advanced therapeutic endoscopy.

• Honors program in surgery for fourth-year medical students.

• Four-week subinternship in general surgery.

• Six-week clerkship in general surgery.

• Master of medical science program.
Accomplishments in Education

- Completion of the general surgery residency by Dr. Bryan Fisher, Dr. Mason Fisher, Dr. Natalie Jones, Dr. Irina Shakhnovich and Dr. Vance Smith.

- In October 2009 the General Surgery Residency Program underwent a comprehensive review by Residency Review Committee of the Accreditation Council for Graduate Medical Education and was granted a 4 year accreditation extension.

- Completion of the clinical assistant professorship in minimally invasive surgery by Dr. Clinton Hall and Dr. Eric Volckmann.

- Completion of the clinical assistant professorship in advanced therapeutic endoscopic surgery by Dr. Vanchad Memark.

- Association for Surgical Education’s (ASE) Surgical Education Research Fellowship (SERF) awarded to Dr. Alan Harzman.

- Department of Surgery Faculty Teacher of the Year award received by Dr. Andrei Manilchuk.

- The Ohio State University College of Medicine Distinguished Educator Award received by Dr. W. Scott Melvin.

- Faculty have trained over 233 surgeons, residents, students and allied healthcare professionals from throughout the United States and international community in educational programs offered through the Center for Minimally Invasive Surgery.

International Presentations

National Presentations

**Hazey J.** Faculty, NOTES and Single Incision Laparoscopy Annual Symposium, University of California at San Diego, CA. November 19-21, 2009.

**Hazey J.** American College of Surgeons, Flexible Endoscopy Post-Graduate Course Faculty, ACS Annual Meeting, Chicago, IL. October 12, 2009.

**Hazey J.** Masters Hernia Course Director, Covidien, Las Vegas, NV. August 5,6 2009.

**Hazey J.** University of Wisconsin, Advanced Hernia Course. May 28, 29 2009.

**Husain S.** Ischemic Colitis and Acute Hemorrhage”. 96th Annual Clinical Congress of American College of Surgeons. 2010. Washington, DC.

**Khanna S.** Seminar: OSUN spring seminar series, Natural Vitamin E Tocotrienol Against Stroke, Newark, OH. May 14, 2010.

**Khanna S.** Annual meeting of the Oxygen Club of California, Santa Barbara, CA. Feb 17-20, 2010.

**Khanna S.** International Conference on Advances in Free Radicals & Natural Products, Antioxidants and Radioprotectors in Health and 9th Annual Meeting of the Society of Free Radical Research India, Hyderabad, India, January, 11-13, 2010.

**Khanna S.** Society for Neuroscience 39th Annual Meeting, Chicago, IL, October 17-21, 2009.

Mikami DJ. The University of Hawaii Minimally Invasive Surgery Symposium. Queens Medical Center. Honolulu, HI. 02/19-21/2010.

Sen CK. President’s Address, Oxygen club of California, Santa Barbara, CA. March 16-21, 2010.

Miscellaneous Presentations

Harzman AE. Lecturer. 2010. Benign Anorectal Disease. Presented at Department of Surgery Grand Rounds, to Department of Surgery. The Ohio State University. Columbus, OH. (April 8) [Peer Reviewed]

Hazey J. Director, SAGES Flexible Endoscopic Surgery Course for MIS Fellows. The Ohio State University, Columbus, OH. November 12-13, 2009.

Hazey J. Central Ohio Perianesthesia Nursing Association, Local Presentation. When a Simple Cholecystectomy Isn’t so Simple, Columbus, OH. October 3, 2009.

Hazey J. SAGES Flexible Endoscopic Surgery Course for MIS Fellows. Case Western Reserve University, Cleveland, OH. September 24-25, 2009.

Hazey J. Director, SAGES Basic Endoscopy and Laparoscopy Course for Residents. Ethicon Endo-Surgery Institute, Cincinnati, OH. August 13-14, 2009.

Mikami DJ Minimally Invasive Hernia Repair. The Ohio State University, Minimally Invasive Surgery, Columbus, OH. August 15, 2009.
Mikami DJ. Course Instructor. SAGES Endoscopy Course. Society American Gastrointestinal Endoscopic Surgeons (Los Angeles, CA), SAGES, Cincinnati, OH, August 12, 2009.

Mikami DJ. Course Instructor. Approaches to Endoluminal Reflux Procedures. The Ohio State University, New Approaches in Minimally Invasive Surgery, Columbus, OH, August 7, 2009.

Mikami DJ. New Approaches in Minimally Invasive Surgery. The Ohio State University (Columbus, OH), New Approaches to Revisional Bariatric Surgery, Columbus, OH, August 6, 2009.

Mikami DJ. Minimally Invasive Hernia Repair. Course Director. The Ohio State University Medical Center. Columbus, OH. 5/14/2010.

Perry KA. Evaluation and Management of Benign and Malignant Esophageal Disease. Senior Resident Professor Conference, Department of Surgery, The Ohio State University, Columbus, OH, 2009.

Perry KA. The Spleen. Senior Resident Professor Rounds, Department of Surgery, The Ohio State University, Columbus, OH, 2009.

Perry KA. Abdominal Wall Hernias. Senior Resident Professor Rounds, Department of Surgery, The Ohio State University, Columbus, OH, 2009.

Roy, S. Seminar Lecturer. Integrated Biomedical Graduate Program 797.01, The Ohio State University, Columbus, OH, Nov. 5, 2009.

Roy, S. Guest Lecturer. IDHLRI Lecture Series Research and Progress, The Ohio State University, Columbus, OH, October 29, 2009.

Roy, S. Seminar Instructor. Human Nutrition Graduate Program, The Ohio State University, Columbus, OH, October 14, 2009.

Sen CK. Inaugural Address, Advances in Wound Care, Columbus, Ohio March 27, 2010.

Schlanger R. Family Practice Physician meeting, Short presentation on the Comprehensive Wound Care Center, Rardin Family Practice Office, Columbus, OH, August 5, 2009.

Schlanger R. Clinical Skills Immersion Experience, Pericardiocentesis procedure. Hamilton Hall, OSU Medical Center, Columbus, OH, August 25, 2009.

Schlanger R. Principles of Wound Healing and Hyperbaric Medicine, “Physiology, Contraindications, Carbon Monoxide & Cyanide Poisoning, Arterial Gas Embolism and Decompression Sickness,” the Blackwell Hotel, Columbus, OH. Sponsored by the National Healing Corporation. September 17, 2009.

Schlanger R. Nursing Grand Rounds, “Peripheral Artery Disease,” The Ohio State University Medical Center East, Columbus, OH, October 29, 2010.

Schlanger R. Presentation to Radiation Oncology faculty, “Hyperbaric Oxygenation Therapy,” The Ohio State University James Cancer Hospital, Columbus, OH. December 18, 2009.

Schlanger R. Ohio Department of Aging, “Finer With Age Interview” for monthly TV show. The Ohio Government Television station, Statehouse, Columbus, OH, February 11, 2010.

Schlanger R. Advances in Wound Care and HBO Update 2010, “Impacts of Fistulas and Treatments,” and Moderator for Panel Discussion, The Ohio State University Medical Center and OSU Comprehensive Wound Center, Columbus, OH, March 27, 2010.

Schlanger R. Basic Science Resident Lecture, Professor Conference, “Preoperative and Postoperative Care,” The Ohio State University Medical Center, Columbus, OH, May 6, 2010.

Schlanger R. Grand Rounds, “Wound Care and Cancer,” Wallace Auditorium, The Ohio State University Medical Center, East, Columbus, OH. June 25, 2010.
The Division of Pediatric Surgery conducts its clinical, educational, research, and academic programs at the Nationwide Children’s Hospital, the fourth busiest and fifth largest children’s hospital in the United States. For the fifth consecutive year, Nationwide Children’s Hospital was included in the 2010 edition of *U.S. News & World Report* of best children’s hospitals, ranking in seven of ten categories: gastroenterology, heart and heart surgery, pulmonary care, urology, cancer, neonatology, and kidney services.

Construction is on schedule for the replacement hospital which will open in 2012 as a 12-story, 700,000 square foot facility that includes new inpatient units, a state-of-the-art emergency department, connectivity to the recently built operating room suites, and innovative family-centered services. Groundbreaking occurred this past spring for the third research building, which will add significantly to the current clinical and basic science laboratories.

The Level-I Pediatric Trauma Program received re-accreditation by the American College of Surgeons in February 2010, with a commendation for excellence in collaboration within the institution and a vigorous quality improvement system. The trauma and burn programs remain among the busiest in the nation among children’s hospitals, with 1582 admissions in 2009.

The Pediatric Surgical Research Laboratory, directed by Dr. Gail Besner and Dr. David Brigstock, is supported by five NIH grants that fund basic science and translational research in growth factor biology. This year Dr. Besner received permission by the Food and Drug Administration to undertake Phase I clinical trials of heparin-binding EGF-like growth factor (HB-EGF) in human volunteers. Assuming a safety profile, the ultimate goal will be to administer HB-EGF to at-risk premature infants as a protective measure against the development of necrotizing enterocolitis. Dr. Brigstock and his research team developed and validated a model of alcoholic pancreatitis in mice that will be the basis of a new area of translational investigation.
The Adolescent Bariatric Surgery Program, in collaboration with Nationwide Children’s Hospital Center for Healthy Weight and Nutrition, remains one of the busiest in the nation. Over 75 adolescents with morbid obesity and associated cardiovascular and metabolic derangements have undergone weight reduction procedures. The program is an active participant in on-going multi-center NIH-funded clinical trial that prospectively enrolls adolescents with morbid obesity, assesses their comorbid conditions, and evaluates their outcomes after a bariatric operation.

Dr. Jennifer Aldrink joined the Division of Pediatric Surgery this year as an assistant professor of Clinical Surgery. In 2009 she completed the residency in pediatric surgery at Nationwide Children’s Hospital and received her general surgery training at Duke University Medical Center. She was appointed the director of Surgical Oncology for Nationwide Children’s Hospital, with special interest in thyroid cancer and melanoma.

Dr. Gail Besner, program director of the residency in pediatric surgery, remains a member of the Center for Perinatal Research of the Research Institute at Nationwide Children’s Hospital. This year she represented Nationwide Children’s Hospital as the invited speaker at the Circle of Care North American Leadership Conference in Atlanta, Georgia. Her talk was entitled, “Big News for Small Intestines”, highlighting her research on necrotizing enterocolitis.

Dr. David Brigstock is a principal investigator in the Center of Cell and Vascular Biology of the Research Institute at Nationwide Children’s Hospital, continuing his work on connective tissue growth factor (CTGF) and its relation to fibrosis of the liver and pancreas. This year Dr. Brigstock became a member of the Society of University Surgeons, and remains a U.S. editor of The Journal of Endocrinology.

Dr. Donna Caniano received the Jimmy Crum Labor of Love Award in recognition of her philanthropic activities and work with children with disabilities. The general surgery residency program at Riverside Methodist Hospital honored her with a Lifetime Educator Award. She continues service on the editorial boards of The Journal of Pediatric Surgery and Pediatric Surgery International.

Dr. Renata Fabia was appointed the director of the Pediatric Burn Program. This year she introduced the clinical innovation of nurse-initiated burn fluid resuscitation protocols for critically ill children with thermal injuries.

Dr. Jonathan Groner, medical director of the Level I pediatric trauma program, was an invited speaker at the 17th Annual Trauma Symposium at Memorial Healthcare System and University of Miami Miller School of Medicine in Miami and at the 6th Annual Advocate Injury Institute Symposium in Chicago. He also served as a moderator for the Seventh International Conference on Pediatric Trauma, sponsored by the Kiwanis Pediatric Trauma Institute, in Puerto Rico. He continues as an invited reviewer for several peer-reviewed surgical journals.
Dr. Brian Kenney continues as director of the Nationwide Children’s Hospital fellowship in pediatric surgical critical care. This year he was appointed as the Surgical Director for Quality at Nationwide Children’s Hospital. He is also a member of the Solutions for Patient Safety of the Ohio Hospital Association and the Ohio Children’s Hospital Association.

Dr. Denis King continues as medical director of Nutrition Support Services. This year he received two awards from the OSU College of Medicine in recognition of his outstanding service as a faculty educator: (1) the Lifetime Achievement Award for distinction throughout his career in the education of medical students and residents in surgery; and (2) the 2010 “Excellence in Teaching Award” from the Department of Surgery.

Dr. Marc Michalsky is the surgical director of the Center for Healthy Weight and Nutrition at Nationwide Children’s Hospital. Under his leadership the Adolescent Bariatric Surgery Program is recognized for its clinical excellence and participation in multi-disciplinary research. This year he was appointed chairman of the Pediatric Bariatric Committee for the American Society for Metabolic and Bariatric Surgery.

Dr. Benedict Nwomeh continues as the surgical director for the Center for Pediatric and Adolescent Inflammatory Bowel Disease at Nationwide Children’s Hospital. This year he received a Master of Public Health, having completed the MPH program for experienced health professionals at the OSU College of Public Health.

Dr. Steven Teich remains the surgical director of the Neonatal Intensive Care Unit at Nationwide Children’s Hospital. This year he began the first of a two-year term as president of the medical staff. He collaborated with Dr. Carlo DiLorenzo and Dr. Hayat Mousa, pediatric gastrointestinal motility experts in the Department of Pediatrics, in launching a gastric pacing program for children and adolescents with gastroparesis. Nationwide Children’s Hospital is one of only two programs in the US that offers this treatment in pediatric patients.

In our graduate programs, Dr. Dorothy Rocourt completed the residency in pediatric surgery. In September 2010 she joins the Division of Pediatric Surgery at the Pennsylvania State University College of Medicine as an Assistant Professor of Surgery and an attending pediatric surgeon at the Milton S. Hershey Medical Center, Hershey, Pa. Dr. David Skarda will begin the chief residency in pediatric surgery. Dr. Helena Crowley, who completed a residency in general surgery at Tufts University Medical Center, will begin the residency in pediatric surgery. Dr. Johanna Askgard-Giesmann completed the fellowship in pediatric surgical critical care and returned to the Mayo Clinic in Rochester, Minnesota as a chief resident in general surgery. She will begin the residency in pediatric surgery at Nationwide Children’s Hospital in July 2011. Dr. Erin Teeple completed a fellowship in minimally invasive and pediatric bariatric surgery and returned to the Christiana Care Health Services in Newark, Delaware as a senior resident in general surgery.
The members of the Division of Pediatric Surgery are committed to the educational, research, clinical, and service missions of the Department of Surgery, The Ohio State University College of Medicine, Nationwide Children’s Hospital, and numerous professional organizations.
Faculty

Donna A. Caniano, M.D.
Professor of Surgery; Chief, Division of Pediatric Surgery; the H. William Clatworthy, Jr. Professor in Pediatric Surgery
B.A.: Vassar College, Poughkeepsie, N.Y., 1972
M.D.: Albany Medical College, Albany, N.Y., 1976
Specialty Training: Albany Medical Center Hospital, Albany, N.Y.; Johns Hopkins University Hospital, Baltimore, Md.; Columbus Children’s Hospital, Columbus, Ohio
Appointment: 1985
Specialty Interests: Neonatal gastrointestinal disorders, Hirschsprung’s disease
Research Interests: Biomedical ethics

Jennifer H. Aldrink, M.D.
Assistant Professor of Clinical Surgery
B.A.: Wake Forest University, Winston-Salem, N.C., 1995
M.D.: East Carolina University School of Medicine, Greenville, N.C., 2000
Specialty Training: Duke University Medical Center, Durham, N.C.; Nationwide Children’s Hospital, Columbus, Oh.
Appointment: 2009
Research Interests: Osteosarcoma pulmonary metastases, childhood malignancy and obesity, childhood melanoma, gastroschisis

Gail E. Besner, M.D.
Professor of Surgery
B.A.: Cornell University, Ithaca, N.Y., 1978
M.D.: University of Cincinnati, Cincinnati, Oh., 1982
Specialty Training: Brigham and Women’s Hospital, Boston, Mass.; Children’s Hospital of Buffalo, Buffalo, N.Y.
Appointment: 1991
Specialty Interests: Burns, pediatric laparoscopic surgery
Research Interests: Growth factor involvement in wound healing

David R. Brigstock, Ph.D.
Associate Professor of Surgery
B.S.: Brunel University, West London, United Kingdom, 1984
Ph.D.: Cambridge University, Cambridge, United Kingdom, 1988
Specialty Training: Harvard University, Cambridge, Ma.
Appointment: 1991
Research Interests: Biology of connective tissue growth factor
Renata B. Fabia, M.D., Ph.D.
Assistant Professor of Clinical Surgery
M.D.: Silesian University School of Medicine, Katowice, Poland, 1985
Ph.D.: Lund University, Lund, Sweden, 1993
Specialty Training: The Ohio State University, Columbus, Oh.; Children’s Medical Center, Dallas, Tx.
Appointment: 2003
Specialty Interests: General surgery in children and adolescents; burn and trauma management
Research Interests: Inflammatory bowel disease, trauma

Jonathan I. Groner, M.D.
Professor of Clinical Surgery
B.S.: Northwestern University, Evanston, Ill., 1982
M.D.: Northwestern University, Evanston, Ill., 1984
Specialty Training: Medical College of Wisconsin, Milwaukee, Wi.; Children’s Hospital, Columbus, Oh.
Appointment: 1999
Specialty Interests: Trauma, child advocacy
Research Interests: Trauma prevention

Brian D. Kenney, M.D., M.P.H.
Assistant Professor of Clinical Surgery
B.A.: University of Notre Dame, South Bend, In., 1979
M.D.: Medical College of Ohio, Toledo, Oh., 1983
M.P.H.: Harvard University School of Public Health, Boston, Ma., 1990
Specialty Training: University of Montreal, Montreal, Quebec, Canada
Appointment: 2003
Specialty Interests: Laparoscopy, thoracoscopy, critical care, and thoracic surgery
Research Interests: Clinical epidemiology and outcomes research

Marc P. Michalsky, M.D.
Associate Professor of Clinical Surgery
B.A.: Brandeis University, Waltham, Mass., 1988
M.D.: University of Medicine and Dentistry of New Jersey, Newark, N.J., 1992
Specialty Training: University of Medicine and Dentistry of New Jersey, Newark, N.J.; Columbus Children’s Hospital, Columbus, Oh.
Appointment: 2004
Specialty Interests: Minimally invasive surgery, childhood obesity
Research Interests: Childhood obesity, quality performance, surgical outcomes
Benedict C. Nwomeh, M.D.
Associate Professor of Clinical Surgery
Undergraduate Degree: Faculty of Science, University of Lagos, Lagos, Nigeria, 1981
M.D.: College of Medicine, University of Lagos, Lagos, Nigeria, 1986
Specialty Training: Medical College of Virginia, Virginia Commonwealth University, Richmond, Va.; Children’s Hospital of Pittsburgh, Pittsburgh, Pa.
Appointment: 2003
Specialty Interests: Pediatric general surgery, neonatal surgery, pediatric minimally invasive surgery, pediatric thoracic surgery
Research Interests: Surgical education, clinical outcomes

Emeritus Faculty

E. Thomas Boles, Jr., M.D.
Professor Emeritus of Surgery
B.S.: College of William and Mary, Williamsburg, Va., 1942
M.D.: Harvard University, Cambridge, Ma., 1945

Clinical Faculty

Denis R. King, M.D.
Clinical Associate Professor of Surgery
B.S.: University of Notre Dame, South Bend, In., 1965
M.D.: Hahnemann Medical College, Philadelphia, Pa., 1969
Specialty Training: The Ohio State University Hospital; Children’s Hospital, Columbus, Oh.
Specialty Interests: Cancer, nutrition
Research Interests: Pediatric oncology

Steven Teich, M.D.
Clinical Associate Professor of Surgery
B.S., M.S.: Rensselaer Polytechnic Institute, Troy, N.Y., 1976
M.D.: State University of New York at Buffalo, N.Y., 1981
Specialty Training: George Washington University Medical Center, Washington, D.C.; Children’s Hospital of Pittsburgh, Pa.
Specialty Interests: Epidermolysis bullosa, burns, laparoscopic surgery
Research Interests: Quality improvement and surgical clinical pathways
Resident Staff

Dorothy V. Rocourt, MD
Clinical Instructor and Chief Resident
B.A.: Dartmouth College, Hanover, N.H., 1995
M.D.: University of Medicine and Dentistry of New Jersey, Newark, N.J., 1999

David E. Skarda, MD
Clinical Instructor and Assistant Chief Resident
B.S.: Brigham Young University, Provo, Ut., 1997
M.D.: Albert Einstein College of Medicine, Bronx, N.Y., 2001

Johanna R. Askegard-Giesmann, MD
Surgical Critical Care Fellow
B.A.: University of Minnesota, Minneapolis, Mn., 1999
M.D.: Finch University of Health Sciences – The Chicago Medical School, Chicago, Il., 2004

Erin A. Teeple, MD
MIS/Bariatric Fellow
B.S: Lafayette College, Easton, Pa., 1999
M.D.: Jefferson Medical College, Philadelphia, Pa., 2005

Mission

The Division of Pediatric Surgery, in alignment with Nationwide Children’s Hospital, is dedicated to fulfilling the CARES mission: providing the highest quality of care, advocacy for children, child health research, education, and outstanding service.

Research Programs

The Pediatric Surgery Research Laboratory focuses on two major areas of clinical interest. Dr. Besner’s laboratory studies heparin-binding EGF-like growth factor (HB-EGF) and its ability to protect the intestines from various forms of injury. These research projects continue to be funded by the National Institutes of Health, as well as by industry, and include:

• Elucidation of the mechanisms by which HB-EGF exerts its protective effects against intestinal injury.

• Studies of the effect of HB-EGF on intestinal stem cells.
• Studies of susceptibility to intestinal injury in HB-EGF transgenic and knockout mice.

• Determination of the signal pathways used by HB-EGF in intestinal cytoprotection.

• Studies of the effects of HB-EGF in several established animal models of intestinal injury.

• Design of HB-EGF clinical trials in the prevention of necrotizing enterocolitis in preterm infants.

The second area of interest is the role played by connective tissue growth factor (CTGF) in scarring and fibrosis. These studies are led by Dr. Brigstock and focus on the fibrotic properties of CTGF, including novel strategies for antagonizing CTGF action in vivo. Current areas of emphasis include:

• Characterization of CTGF receptors and signaling pathways in hepatic or pancreatic stellate cells.

• Production of transgenic mice that overexpress CTGF in the liver.

• Anti-CTGF targeting strategies in the liver and pancreas.

Accomplishments in Research

Gail E. Besner, M.D.
The Besner laboratory has had significant accomplishments this year. Dr. Besner currently holds three R01 grants from the NIH to continue her basic science research on HB-EGF. In conjunction with her biotechnology contacts, human-grade HB-EGF has been produced and permission from the FDA to begin Phase I trials of HB-EGF in humans has been obtained. Dr. Besner’s research was presented at multiple national meetings this year, including a plenary session presentation at the annual Academic Surgical Congress given by surgery resident Iyore Otabor James from Dr. Besner’s laboratory. Dr. James received a Masters in Medical Science degree upon completion of her training in Dr. Besner’s laboratory this year. Many publications have resulted from this year’s work. Dr. Besner was the co-moderator of an International Necrotizing Enterocolitis Webcast hosted by Nationwide Children’s Hospital and Rainbow Babies Hospital.

David R. Brigstock, Ph.D.
Dr. Brigstock continues his NIH-funded studies of the role of connective tissue growth factor (CTGF) in organ fibrosis. He holds two NIH R01 grants to support his work on CTGF-mediated fibrogenic pathways in the liver and pancreas. He also is the recipient of a NCH-OSU collaborative grant with Dr. Ramesh Ganju to study the role of CTGF in HIV/HCV-mediated hepatic pathology as well as a 2-year NIH ARRA supplement to support the summer lab training of Mr Todd Martin, an 8th grade science teacher at The Columbus Academy, Gahanna OH. Dr. Brigstock’s work on CTGF-mediated alcoholic fibrosis was presented the annual meetings of the American Association for the Study of Liver Dis-
eases in Boston in November 2009 and of the American Society for Cell Biology in San Diego in December 2009. Dr Brigstock was an invited speaker on CTGF-based anti-fibrotic therapy at Experimental Biology 2010 in Anaheim, Ca., in April 2010. Alyssa Charrier, a MCDB graduate student working in Dr. Brigstock’s lab, received a 1st place graduate student award for her presentation entitled “Connective tissue growth factor production by activated pancreatic stellate cells in mouse alcoholic chronic pancreatitis” at the 15th Annual Department of Surgery Research Conference at OSU in May 2010 (see Lab Invest (2101) 90 1179-1188). Dr Brigstock was elected to membership of the Society of University Surgeons and served as an ad hoc reviewer for research grants submitted to The Wellcome Trust (UK) and the Council for the Earth and Life Sciences of the Organisation for Scientific Research (The Netherlands).

Active Research Grants

**Besner GE.** HB-EGF and protection of the intestines from injury. Trillium Therapeutics, Inc., April 15, 2009 – April 14, 2010, $100,000.

**Brigstock DR.** Mechanisms of CTGF-induced liver disease. National Institutes of Health (National Institute on Alcohol Abuse and Alcoholism), April 15, 2007 – March 31, 2012, $1,125,000.

**Brigstock DR.** CTGF in pancreatic stellate cell-mediated fibrogenesis. National Institutes of Health (National Institute on Alcohol Abuse and Alcoholism), September 30, 2007 – August 31, 2012, $1,125,000.

**Brigstock DR.** Analysis of relationship between CTGF and HCV/HIV-mediated liver pathophysiology. NCH/OSU, $50,000.

Michalsky MP. Prediction of outcome of bariatric surgery using the autonomic and enteric nervous systems. Thomas Boles Endowment Fund, October 6, 2008 – October 6, 2013, $11,600.

Clinical Programs

• Level I pediatric trauma program with American College of Surgeons verification.

• American Burn Association-verified multidisciplinary pediatric burn center.

• Columbus Fetal Medicine Collaborative in conjunction with The Ohio State University Medical Center, Mount Carmel Health System, and OhioHealth.

• Pediatric and adolescent bariatric surgery program.

• Multidisciplinary ECMO neonatal and pediatric program.

• Minimally invasive pediatric surgery program.

• Chest wall center for comprehensive care of chest wall anomalies.

Accomplishments in Clinical Care

• Maturation of outpatient care for children with thermal injuries.

• Maturation of the bariatric surgery program for the treatment of morbidly obese adolescents, and participation in a funded clinical trial using the Lap-Band.
• Development of advanced minimally invasive procedures for thorascopic and laparoscopic management of congenital and acquired lung and intestinal disorders.

• Listing of Dr. Gail E. Besner, Dr. Donna A. Caniano, Dr. Denis R. King, and Dr. Steven Teich by Best Doctors in America.

Educational Programs

• Two-year residency in pediatric surgery, accredited by the Accreditation Council for Graduate Medical Education. The program accepts one resident per year through the National Residency Match Program. The residency qualifies a candidate for the Certificate of Special Competence in Pediatric Surgery, upon successful completion of the Qualifying and Certifying Examinations in Pediatric Surgery, as given by the American Board of Surgery.

• Fully-accredited, two-year residency in pediatric surgery, which accepts one resident per year through the National Residency Match Program. The residency qualifies a candidate for the Certificate of Special Competence in Pediatric Surgery, upon successful completion of the Qualifying and Certifying Examinations in Pediatric Surgery, as given by the American Board of Surgery.

• Fully-accredited fellowship in pediatric surgical critical care, which annually accepts one resident at the PGY-4 level or higher in general surgery. Completion of the fellowship makes a candidate eligible for the Examination in Surgical Critical Care administered by the American Board of Surgery.

• Clinical fellowships in trauma and clinical research and in minimally invasive and adolescent bariatric surgery for senior level residents in general surgery.

• Basic science research fellowships in the Pediatric Surgical Laboratory for residents in accredited programs in general surgery.
• Comprehensive pediatric surgery rotation in the care of infants, children, and adolescents with surgical
disease, for junior and senior residents in general surgery from The Ohio State University Medical
Center, OhioHealth, and the Mount Carmel Health System.

• Comprehensive pediatric surgery rotation in the care of pediatric patients for interns in the combined
Nationwide Children’s Hospital-Doctor’s Hospital pediatrics residency and for fellows in the pediatric
critical care medicine fellowship at Children’s Hospital.

• Clinical clerkship in pediatric surgery.

• Subinternship in pediatric surgery.

Accomplishments in Education

• Ongoing clinical research in surgical education techniques by Dr. Benedict Nwomeh.

• Ongoing clinical research on optimal communication with parents of pediatric surgical patients by Dr.
Benedict Nwomeh.

Community Outreach Programs

• Injury passenger safety program, part of the Nationwide Children’s Hospital trauma program, which
concentrates on child safety seats and bicycle helmet.

• Quarterly publication of Surgical Scene for pediatricians and primary care physicians in the Central
Ohio and referral area. Surgical Scene highlights common surgical conditions, their diagnosis, and
treatment.

• Regular lectures about pediatric trauma and thermal injury, by physician and nursing members of the
Nationwide Children’s Hospital trauma program, presented to emergency services personnel in the
Central Ohio and referral area.

Accomplishments in Community Outreach

• Distribution of 2,888 bicycle helmets to children in Central Ohio, in cooperation with the Columbus
Blue Jacket Foundation.
• Sponsorship of education and information programs on child safety seats throughout the Columbus community.

• Inspection of 322 child safety seats and distribution of 921 child safety seats through the trauma program of Nationwide Children’s Hospital.

• Injury prevention focused on lawn mower injuries and mower safety.

• Total of 12,131 passenger safety interventions in 2009.

Publications

Abstracts

**Charrier A and Brigstock D**: Connective tissue growth factor localizes to activated pancreatic stellate cells in a model of ethanol-induced pancreatic fibrosis. *Mol Biol Cell* 20 (suppl), 2009.

International Presentations

National Presentations

**Besner G**: HB-EGF as a Novel Therapeutic Strategy for NEC. International NEC Webcast, hosted by Rainbow Babies Hospital and Nationwide Children’s Hospital, June 17, 2010.

Charrier A and Brigstock D: Connective tissue growth factor localizes to activated pancreatic stellate cells in a model of ethanol-induced pancreatic fibrosis. 49th Annual Meeting of ASCB, San Diego, CA, Dec 7-11, 2009.

Miscellaneous Presentations

Aldrink J. Renal Tumors. PST Lecture, Nationwide Children’s Hospital, Columbus, OH, January 6, 2010.

Aldrink J. Surgical Management of Melanoma and Other Skin Lesions in Children. Pediatric Grand Rounds, Nationwide Children’s Hospital, Columbus, OH, January 7, 2010.

Aldrink J. Cervical Cysts and Sinus, Lounge and Learn Series, Nationwide Children’s Hospital, Columbus, OH, April 16, 2010.
Aldrink J. Liver Tumors – PST Lecture, Nationwide Children’s Hospital, Columbus, OH, May 12, 2010.

Besner G. Physiology of Infection. Pediatric Surgery Tutorial Lecture Series, Nationwide Children’s Hospital, Columbus, OH, June 2, 2010.

Caniano D. Pediatric Surgery Stories, Dinner With the Docs, Columbus, OH, October 1, 2009.

Caniano D. Leadership Ethics, Fellows Leadership Program, Nationwide Children’s Hospital, Columbus, OH, December 2, 2009.

Charrier A and Brigstock D: Connective tissue growth factor localizes to activated pancreatic stellate cells in a model of ethanol-induced pancreatic fibrosis. Research Week, Nationwide Children’s Hospital, Columbus OH, April 5-9 2010.

Charrier A and Brigstock D: Connective tissue growth factor localizes to activated pancreatic stellate cells in a model of ethanol-induced pancreatic fibrosis. The Ohio State University Medical Center Research Day, Columbus, OH, April 8, 2010.

Charrier A and Brigstock D: Connective tissue growth factor production by activated pancreatic stellate cells in mouse alcoholic chronic pancreatitis. 15th Annual Department of Surgery Research Conference, The Ohio State University, Columbus, OH, May 28, 2010.

Groner J. The Pediatric Acute Abdomen, presented at MedNet 21, Center for Continuing Medical Education, The Ohio State University College of Medicine, Columbus, OH, October 23, 2009.

Groner J. The Good, the Bad, and the Ugly: Recognition of Shock in Pediatric Trauma, presented at Trauma Grand Rounds, Rainbow Babies and Children’s Hospital, Cleveland, OH, November 4, 2009.

Groner J. Pediatric Torso Trauma, presented at the 11th annual Ohio Pediatric Trauma Symposium, Akron, OH, April 16, 2010.

Groner J. Multidisciplinary Trauma Care: Who’s in Charge?, presented at the 17th Annual Trauma Symposium, Memorial Healthcare System and University of Miami Miller School of Medicine, Hallandale Beach, FL, February 11, 2009.
Huang G, Brigstock, D. Connective tissue growth factor (CCN2) modulates its cognate integrin receptors and promotes cell adhesion by interacting with fibronectin through integrin α5β1 in primary culture mouse hepatic stellate cells. Research Week, Nationwide Children’s Hospital, Columbus, OH April 5-9 2010.

Huang G, Brigstock, D. Connective tissue growth factor (CCN2) modulates its cognate integrin receptors and promotes cell adhesion by interacting with fibronectin through integrin α5β1 in primary culture mouse hepatic stellate cells. The Ohio State University Medical Center Research Day, Columbus, OH, April 8, 2010.

Jiang Y and Brigstock D. CTGF is Up-regulated in a Mouse Model of Pancreatic Fibrosis. Research Week, Nationwide Children’s Hospital, Columbus, OH, April 5-9, 2010.

Li C, Leask A, Brigstock D. Ethanol-induced expression of connective tissue growth factor (CTGF) and promoter activity in human hepatic stellate cells. Ohio State University Medical Center Research Day, Columbus, OH, April 8, 2010.

Li C, Leask A, Brigstock D. Ethanol-induced expression of connective tissue growth factor (CTGF) and promoter activity in human hepatic stellate cells. Research Week, Nationwide Children’s Hospital, Columbus, OH, April 5-9, 2010.

Distinguished Visiting Professors

James A. O’Neill, Jr., MD. H. William Clatworthy Visiting Professor in the Division of Pediatric Surgery, October 7-8, 2009. Emeritus John Clinton Foshee Distinguished Professor of Surgery, Vanderbilt University School of Medicine, Director of Clinical Program Development and Education for the Meharry-Vanderbilt Alliance, Nashville, Tennessee.

Presentations: Pediatric Grand Rounds: Pediatric Surgery: Then and Now.

Keith C. Kocis, MD. Visiting Professor in Critical Care, January 27-28, 2010. Professor of Anesthesia, Pediatrics and Biomedical Engineering (Adjunct), Division of Pediatric Critical Care Medicine PCCM Fellowship Director, University of North Carolina, Chapel Hill, North Carolina.

Presentations: Grand Rounds: Improving Inpatient Pediatric Safety and Outcomes with Real Time Continuous Risk Analysis.
The past three years have been extremely productive for the Division of Plastic Surgery at The Ohio State University. The continual growth trajectory of our business and the development of state-of-the-art technology designed for the care of our patients has been the driving force for the group’s continued expansion of our faculty, providers, and services. In addition, the reputation of the entire Plastic Surgery product line has been rapidly expanding and there have been many significant achievements within the clinical, research, and teaching arenas.

In clinical care our guiding principle is to provide services that are fully integrated into a multidisciplinary environment within an academic medical center, as well as providing readily available reconstructive surgery services to other specialists at the University Hospital, Ross Heart Hospital, James Cancer Hospital, and Nationwide Children’s Hospital. Our surgical volumes, billings, and revenues reached record levels again in fiscal year 2010. Some cases performed this year have never before been performed at The Ohio State University. Dr. Brian Janz, working in collaboration with Dr. Michael Ruff, performed the first total thumb reconstruction at The Ohio State University using microsurgical transfer of a great toe. Both Dr. Janz and Dr. Ruff are new faculty members in 2009 each with joint appointments in plastic surgery and orthopedics. In addition to advanced techniques for reconstructive surgery, we continue to offer state-of-the-art aesthetic surgery as an essential part of a comprehensive clinical service in plastic surgery.

We successfully recruited four new members to the full-time faculty this year, increasing the number of faculty in our Division to 13.

- Dr. Brian Porshinsky joined our faculty with a joint appointment in the Division of Critical Care, Trauma and Burn beginning July 1, 2009. He will serve as the Assistant Director of The Ohio State University Burn Center.
• Dr. Ergun Kocak completed his plastic surgery training at The Ohio State University and a fellowship in reconstructive microsurgery at The University of Texas M.D. Anderson Cancer Center. Dr. Kocak joined the faculty in August, 2009 and has already been proving himself in the clinical arena and in the field of research.

• Dr. Brian Janz, was successfully recruited this year and joined us in September 2009 after completing his fellowship training at the Curtis Hand Center in Baltimore, the premier hand center in the country. Dr. Janz has a dual appointment in the Department of Orthopedic Surgery and is a participant in the multidisciplinary Hand Center.

• Dr. Richard Kirschner is the new Chief of Plastic Surgery at Nationwide Children’s Hospital. He is an internationally recognized authority in pediatric plastic surgery and now serves as the Director of the Cleft Lip and Palate Craniofacial Center for Children’s. He completed his surgery training at Cornell University Medical Center, where he also completed a research fellowship. Dr. Kirschner then completed his plastic surgery residency at the University of Pennsylvania School of Medicine prior to serving as a fellow in Pediatric Plastic and Reconstructive Surgery at Children’s Hospital of Philadelphia (CHOP). Dr. Kirschner was successfully recruited this year and joined the faculty in March, 2010.

With the addition of these 4 new faculty members, the OSU Division of Plastic Surgery is now a full-service academic plastic surgery group of thirteen physicians making it one of the largest plastic surgery programs in the nations. Our success in recruiting additional outstanding faculty members moves us further along toward our goal of becoming a Department at The Ohio State University.

In order to support this growth in faculty, we have added several key new leaders in administration to our organization. Angie Collier-Crespin joined us as our new Division Administrator and Craig Coffman serves as our new Fiscal Officer. In addition, we have added several new administrative and clinic staff members—Holly Rucker, RN, Carrie Shaner, LPN, Tonya Hromjak, LPN, Jennifer Sajdak, Scheduling Coordinator, Carol Vannatter, Patient Care Associate, Tracy Grody, Research Administrative Associate, and Richard Scharschmidt, Executive Assistant.

Our mission remains to “restore, repair and make whole those parts which nature had given but fortune has taken away.” Our program’s primary objective is restoring wholeness to people suffering from physical deformities through integrated programs in patient care, education and research in the field of Plastic Surgery. Our vision is to foster and build partnerships with other academic disciplines and hospitals as well as our patients and the community to develop our program to become nationally and internationally renowned.

Due to our significant academic and clinical growth this year, we have relocated our offices to the Gowdy Fields II Building at 915 Olentangy River Road, Columbus, OH. This expansion has allowed us to provide space for all current and incoming faculty as well as expand our research program with a Surgical Stimulation Laboratory. In addition with the opening of the new Outpatient Surgery Center on the first floor of the Gowdy facility, we will be able to serve our patients in a more convenient and state-of-the-art facility. Finally, we have played an integral role in establishing the
new OSU Hand Center, a multidisciplinary effort provided primarily by plastic surgery and orthopedic surgery, located on the third floor of the facility.

**Clinical services**

Our clinical services continue to expand both in volume and scope.

Dr. Gregory Pearson continues to have a very active practice in general plastic surgery, particularly in facial trauma and pediatric plastic surgery. He assumed all responsibility for performing surgery on patients through the Craniofacial Clinic at Nationwide Children’s Hospital upon Dr. Ruberg’s retirement and has done well in this position. In addition, his assistance with the residency program is of tremendous help to the Director. In April, 2008, Columbus hosted an AO Course in which Dr. Pearson gained many accolades for his presentation and participation. He is also organizing the Tri-State Craniofacial Meeting to be held in Columbus in October, 2010.

This year was Dr. William Wallace’s third year on the faculty at Ohio State. Dr. Wallace successfully passed his board certification examinations this year and he has continued his work on establishing a post-bariatric body contouring program in conjunction with general surgery. He has also become our second aesthetic surgeon working out of our Easton location in conjunction with Dr. Anne Taylor. Dr. Wallace will continue to grow his clinical practice as well as undertake more academic responsibilities over the next year.

Dr. Pankaj Tiwari completed his third year here at Ohio State and he has continued to perform beyond our expectations. His clinical practice volume has grown such that he is at the top of our Division. He has also grown in his management and leadership skills as he has been appointed as our faculty Clinical Affairs Director. Dr. Tiwari also acts as the lead advisor for our Communication and Marketing projects which include our divisional website.

Our Easton office location has become very successful under the leadership of Dr. Anne Taylor, who has now been a part of the Division’s faculty for three years. Dr. Taylor serves as the Aesthetic Director of our program as well as the Director of the Resident Cosmetic Clinic. Dr. Taylor also represents our division and the University by serving on many different committees and leadership positions in local and national Plastic Surgery professional organizations.

Dr. James Boehmler has completed his second year within the Division of Plastic Surgery. Dr. Boehmler is one of five of our reconstructive microsurgeons and his clinical volumes have grown tremendously over this past year. Dr. Boehmler has contributed greatly to the division by establishing our microsurgery laboratory and by serving as the Division’s Finance Director. In addition, he serves on several critical committees including OpTime and Epic which are crucial roles as these two systems were implemented in our division in August 2009. Dr. Boehmler successfully passed his board certification examinations this year.

The division was delighted this year to join forces with the Department of Orthopedic Surgery to create the OSU Hand Center. This center is being directed by Dr. Michael Ruff who joined our program in June 2009. In addition, Dr. Brian Janz, joined our program in September 2009 as a hand
and microsurgeon. Dr. Janz has been instrumental in the development of a divisional database that has been designed to assist the Division in tracking a variety of data points that will help monitor the Division’s overall productivity.

The Division has continued our strong alliance with Nationwide Children’s Hospital by assisting with the recruitment of a new Chief of Plastic Surgery, Dr. Richard Kirschner, an internationally recognized Pediatric Plastic Surgeon. Over this past year, nearly all of our full-time faculty members have provided general plastic surgery and clinical services to Children’s. OSU Plastic Surgery continues to work with Children’s Hospital to conduct two major multidisciplinary clinical programs. The Craniofacial Clinic has been staffed primarily this year by Dr. Gregory Pearson who has been assisted by Dr. Robert Ruberg. This program has been very successful and continues to grow in patient volume. In addition, Dr. Gayle Gordillo has continued to direct the multidisciplinary Vascular Malformations Clinic that serves as a center for patient care as well as clinical and basic translational research.

Research
Mirroring our developments in clinical care, our efforts are expanding in clinical, basic, and translational research.

Dr. Gordillo serves as our dedicated clinical researcher and has been quite productive and successful this year. She has continued developing her successful research program in wound healing and vascular malformations. This year Dr. Gordillo was awarded a 5-year, $1.8 million RO1 grant from the National Institutes of Health to further her work in the mechanisms of hemangioma formation and control. She has furthered her national chronic wound tissue bank project and has made important contributions in wound healing and vascular malformations research. Dr. Gordillo serves the Division as the Director of Research, coordinating all basic, translational, and clinical research for plastic surgery.

Alok Sutradhar, PhD., our post-doctoral researcher in advanced technology applications in surgery, has been working on several different project areas including: 1) Measuring skin elasticity and skin thickness of the female breast in order to create a physics-based simulation of the breast for surgical planning, teaching, and outcomes prediction, 2) Developing patient-specific optimal layout of reconstructed craniofacial region subject to constraints using topological optimization methods, 3) Developing a mathematical model to predict successful tissue transfer method based on blood vessel diameter, tissue volume and oxygen delivery, 4) Computer simulations to predict breast augmentation surgeries, i.e., mastopexy and implant reconstruction and 5) Developing a framework designed for an objective assessment score for selection of appropriate type of breast reconstructive surgery. These ongoing projects have resulted in three article submissions and two presentations to be given at the 10th US Congress of Computational Mechanics in July, 2009. Two projects completed in collaboration which resulted in a publication in the Proceedings of the National Academy of Sciences. He has had productive collaborations with Avner Friedman of the Mathematical Biosciences Institute as well as with faculty in the Department of Engineering at the University of Illinois. He made critical contributions leading to a grant award from the National Science Foundation, and has served multiple times this year on grant review study sections at NSF. Our goal
is to continue to seek promotion for Dr. Sutradhar a full faculty position on the tenure track in the coming year. Also, we still have plans to recruit a senior full-time research scientist to serve as our Research Director.

Dr. Ergun Kocak has completed his first year as one of our microsurgery faculty members with in the Division of Plastic Surgery. Dr. Kocak has proven to be a tremendous asset to our Division as he is a capable clinician and a promising researcher. He received two intramural grants this year to initiate his research program involving transforming surgical flaps into therapeutic “devices” using viral gene transfection to enable delivery of therapeutic proteins to wounds following tumor ablation.

Education
We made significant advances in our education program.

Under the direction of Dr. Michael Miller as Program Director and Dr. Gregory Pearson as Associate Program Director the Division initiated our new 6-year integrated residency program.

We have continued to enhance our communication with the community faculty by social events, a monthly community faculty meeting and a city-wide M&M conference as well as establishing a local professional society named the Columbus Society of Plastic Surgeons. Our visiting professors this past year have all spoken at the Columbus Society of Plastic Surgeons and this has drawn exposure to Ohio State and what our faculty has to offer the community.

Our priorities for the upcoming year include:
• Obtaining Departmental status at The Ohio State University
• Continue to work toward financial stability
• Actively recruit a few key faculty in various areas of the division, especially in the area of research
• Foster academic development of current faculty
• Establish more efficient clinical care processes
• Establish a high risk treatment center within our clinic at Gowdy Fields
• Utilize a multi-media approach to further publicize our unique clinical services
• Expand our basic and translational research programs in wound healing, biocomputation, regenerative medicine, and clinical science.
Faculty

**Michael J. Miller, M.D.**
Professor of Surgery; Chief, Division of Plastic Surgery
B.S.: University of Massachusetts, Boston, Mass., 1978
M.D.: University of Massachusetts, Boston, Mass., 1982
**Specialty Training:** General surgery, Berkshire Medical Center, Pittsfield, Mass.; plastic surgery, The Ohio State University, Columbus, Oh.; reconstructive microsurgery, Tulane University, New Orleans, La.
**Appointment:** 2007
**Specialty Interests:** Reconstructive surgery for cancer patients
**Research Interests:** Tissue repair and regeneration and applications of advanced technology in clinical surgery

**James H. Boehmler, IV, M.D.**
Assistant Professor of Surgery
B.A.: University of Chicago, Chicago, Ill., 1997
M.D.: University of Rochester, Rochester, N.Y., 2001
**Specialty Training:** Plastic surgery, Georgetown University, Washington, D.C., 2007; fellowship in reconstructive microsurgery, University of Texas M.D. Anderson Cancer Center, Houston, Tx., 2008
**Appointment:** 2008
**Specialty Interests:** Oncologic reconstructive surgery

**Gayle M. Gordillo, M.D.**
Associate Professor of Surgery
A.B.: Stanford University, Stanford, Calif., 1984
M.D.: The Ohio State University, Columbus, Oh., 1990
**Specialty Training:** Plastic surgery, The Ohio State University, Columbus, Oh., 1999
**Appointment:** 1999
**Specialty Interests:** Burns, complex wounds
**Research Interests:** Angiogenesis

**Brian A. Janz, M.D.**
Assistant Professor of Clinical Surgery
B.A.: University of Dayton, Dayton, Oh., 1997
M.D.: Medical College of Ohio, Toledo, Oh., 2001
**Specialty Training:** General surgery, Harvard Medical School at Beth Israel Deaconess Medical Center, Boston, Mass.; Plastic/reconstructive surgery, Baylor College of Medicine, Houston, Tx., 2008; Hand/microsurgery, Curtis National Hand Center, Baltimore Md.
**Appointment:** 2009
**Specialty Interests:** Oncologic reconstructive surgery
Richard Kirschner, M.D.
Professor of Clinical Surgery
B.A.: University of Miami, Miami, Fla., 1985
M.D.: University of Miami School of Medicine, Miami, Fla., 1989
Appointment: 2010
Specialty Interests: Craniofacial disorders and cleft lip

Ergun Kocak, M.D.
Assistant Professor of Surgery
B.A.: University of Michigan, Ann Arbor, Mi., 1996
M.D.: The Ohio State University, Columbus, Oh., 1998
Specialty Training: Plastic surgery, The Ohio State University, Columbus, Oh., 2008; Reconstructive microsurgery, MD Anderson Cancer Center, Orlando, Fla., 2009
Appointment: 2009
Specialty Interests: Oncologic reconstructive surgery

Gregory D. Pearson, M.D.
Assistant Professor of Clinical Surgery
B.S.: Ohio University, Athens, Ohio, 1994
M.D.: The Ohio State University, Columbus, Ohio, 1998
Specialty Training: Plastic surgery, The Ohio State University, Columbus, Ohio, 2004; Fellowship in craniofacial surgery, Riley Hospital for Children, Indianapolis, Ind., 2005
Appointment: 2005
Specialty Interests: Craniofacial disorders

Brian S. Porshinsky, M.D.
Assistant Professor of Surgery
B.A.: The Ohio State University, Columbus, Ohio, 1991
M.D.: Medical College of Toledo, Toledo, Ohio, 1999
Specialty Training: Reconstructive surgery, University of Illinois, Chicago, Ill., 2007; Burn surgery, New York-Presbyterian Hospital/Weill Cornell Medical Center, New York, N.Y., 2008; Surgical critical care, The Ohio State University Medical Center, Columbus, Oh., 2009
Appointment: 2009
Specialty Interests: Acute burn care, fluid resuscitation after burns
Robert L. Ruberg, M.D.
Professor of Surgery; Senior Vice Chairman for Administrative Affairs, Department of Surgery
B.A.: Haverford College, Haverford, Pa., 1963
Specialty Training: Hospital of the University of Pennsylvania, Philadelphia, Pa.
Appointment: 1975
Specialty Interests: Breast surgery, children’s plastic surgery
Research Interests: Plastic surgery education, curriculum development

Michael Ruff, M.D.
Clinical Assistant Professor of Surgery
B.A.: The Ohio State University, Columbus, Oh., 1974
M.D.: The Ohio State University, Columbus, Oh., 1979
Specialty Training: Plastic surgery, The Ohio State University, Columbus, Ohio, 1984; Hand/microsurgery, University of Louisville, Louisville, Ky., 1985
Appointment: 2009
Specialty Interests: Hand surgery

Anne Taylor, M.D.
Clinical Assistant Professor of Surgery
B.S.: Denison University, Granville, Ohio, 1986
M.D.: The Ohio State University, Columbus, Ohio, 1990
Specialty Training: Plastic surgery, The Ohio State University Medical Center, Columbus, Ohio, 1996
Appointment: 2007
Specialty Interests: Aesthetic surgery

Pankaj Tiwari, M.D.
Assistant Professor of Surgery
B.A.: Harvard University, Boston, Mass., 1995
M.D.: New York University, New York, N.Y., 2000
Specialty Training: Plastic surgery, Baylor College of Medicine, Houston, Texas, 2006; fellowship in reconstructive microsurgery, M. D. Anderson Cancer Center, Houston, Texas, 2007
Appointment: 2007
Specialty Interests: Aesthetic surgery and reconstructive microsurgery
**William A. Wallace, Jr., M.D.**  
Assistant Professor of Clinical Surgery  
**B.S.:** Oklahoma State University, Oklahoma City, Okla., 1995  
**M.D.:** University of Oklahoma, Norman, Okla., 1999  
**Specialty Training:** Plastic surgery, The Ohio State University Medical Center, Columbus, Ohio, 2007  
**Appointment:** 2007  
**Specialty Interests:** Body contouring

Plastic surgery residency: The Ohio State University, Columbus, Oh., 2009

---

**Mission and Vision**

The mission of the Division of Plastic Surgery at The Ohio State University is to restore wholeness to people suffering from physical deformities through integrated programs in patient care, education, and research in the field of plastic surgery. Our vision is to become the world’s leading center for the practice, training, and advancement of plastic surgery.

---

**Basic Science Research Programs**

- Gordillo, Gayle M. (Principal Investigator). Macrophage-derived oxidants promote hemangioma growth. Mentored Clinical Scientist Award (K08). NIH/NIGMS, $633,042.

- Kocak, Ergun (Principle Investigator). Gene Directed Enzyme Prodrug Therapy in Gene Modified Muscle Flaps using a Syngeneic Tumor in an Immunocompetent Rat Model. Seed Grant from The American Cancer Society, $30,000.

- Kocak, Ergun (Principle Investigator). Gene Directed Enzyme Prodrug Therapy in Gene Modified Muscle Flaps using a Human Xenograft Tumor in an Immunodeficient Mouse Model. CCTS Davis Bremer Pilot Award, $40,000.

Clinical Research Programs

- Gordillo, Gayle M. (Principal Investigator) A multicenter randomized, controlled trial examining cellular and tissue oxygenation levels related to various wound healing therapies- KCI USA, Inc. $124,878.

- Gordillo, Gayle M. (Principal Investigator) A Prospective, Multi-Center, Double Blind, Randomized Placebo Controlled Trial to Evaluate the Safety and Efficacy of ICXP007 in a Phase III trial with Four-Layer Therapeutic Compression, for the Treatment of Non-Infected Skin Leg Ulcers due to Venous Insufficiency. FDA Phase III, $195,304.

- Gordillo, Gayle M. (Co-investigator) Efficacy of Natural Vitamin E Tocotrienol on the Treatment of Surgical Scars – Randomized Double-Blinded Placebo Controlled Trial Designed to Assess the Qualitative Effects of Tocotrienol on Scar Healing Outcomes in Plastic Surgery Patients, $600,000.

- Gordillo, Gayle M. (Principal Investigator) Use of dermaPACE (Pulsed Acoustic Cellular Expression) device in conjunction with standard of care in the treatment of diabetic foot ulcers – SanuWave; FDA phase II; $73,506.

- Kocak, Ergun (Co-investigator). Distal Interphalangeal Joint Arthrodesis with the Herbert Headless Compression Screw: Outcomes and Complications in 67 Consecutively Treated Joints.

- Kocak, Ergun (Co-investigator). A Reliable Method for the Preoperative Estimation of Tissue to be Removed during Reduction Mammaplasty.

- Kocak, Ergun (Principal Investigator). Breast Aesthetics: Objective Measures Based on 3-D Imaging.

Translational Research Programs

• Gordillo, Gayle M. (Principal Investigator) Gene Expression Profiles in Healing and Non-Healing Wounds – a large multicenter translational research protocol being implemented at OSU and other wound care centers in the National Healing Corp network that collects wound tissue specimens, medical history and clinical outcomes data to determine patterns of gene expression in healing versus non-healing wounds. Tissue specimens will be evaluated by histology for quality control and then proceed to gene chip analysis on single cell populations using laser capture technology. Data collection and management strategies were incorporated into the protocol, which is also approved by the GCRC at OSU. They support the data collection process.

• Gordillo, Gayle M. Mechanisms Regulating Wound Vascularization – a Pilot study for the Program Project Initiative Grant to get preliminary data for a planned P50 Center grant submission to NIH to establish a Wound Healing Center of Excellence at OSU. A $400,000 seed grant was provided by the Davis Heart and Lung Research Institute to support the development of this proposal. Dr. Gordillo is the clinical core director and wrote the human subjects protocol and supervised development of data management tools to support translational needs of 4 basic science investigators.

• Gordillo, Gayle M. (Co-investigator) Mechanisms Underlying Impaired Diabetic Wound Healing (R01). NIH/NIDDK, $1,200,00. Is a translational protocol looking at the effects of diabetes on macrophage function in wounds? Macrophages are collected from the wound non-invasively using VAC Sponges in a protocol developed jointly by Dr. Gayle Gordillo and Dr. Sashwati Roy.

• Gordillo, Gayle M. Isolation of cells and proteins from wound fluid in patients treated with VAC dressings (2006-present) – protocol used to obtain preliminary data for the NIH/NIDDK R01 award and currently being used to acquire preliminary data for planned P50 center grant.

• Gordillo, Gayle M. Mechanisms underlying impaired diabetic wound healing (2007- present) – protocol written for the NIH/NIDDK R01 award.

• Miller, Michael and Sutradhar, Alok. Co-Principal Investigator, EAGER: Topological Optimization Methods for Designing Patient-Specific Large Craniofacial Segmental Bone Replacements, NSF CMMI Award # 1032884. $158,407.
Accomplishments in Research

- Ergun Kocak, M.D., received a seed grant from The American Cancer Society for $30,000.

- Ergun Kocak, M.D., was the recipient of a CCTS Davis Bremer Pilot Award for $40,000.

- Ergun Kocak, M.D., received a Roessler Scholarship for Medical Student Research.

- Gayle Gordillo, M.D., received the Best Translational Research Presentation 2010 from the Oxygen Club of California.

- Gayle Gordillo, M.D., was awarded a 5-year, $1.8 million RO1 grant from the National Institutes of Health to further her work in the mechanisms of hemangioma formation and control.

- Michael Miller, M.D., (Principal Investigator) and Alok Sutradhar, Ph.D., Post Doc (Co-Principal Investigator) received a grant award EAGER: Topological Optimization Methods for Designing Patient-Specific Large Craniofacial Segmental Bone Replacements from NSF CMMI for $158,407.

Clinical Programs

- **Hemangioma and Vascular Malformation Clinic** – established and directed by Dr. Gayle Gordillo. Provides comprehensive care to patients with hemangiomas and vascular malformations. This clinic is staffed by 4 physician providers which includes a dermatologist and an otolaryngologist and 2 plastic surgeons. The volume of patients seen has also doubled in size and exceeds 400+ patient visits per year.

- **Inpatient Wound Consult Service** – established and directed by Dr. Gayle Gordillo and staffed by Dr. Pankaj Tiwari. This service provides expertise in the evaluation and management of inpatients with pressure ulcers, venous stasis ulcers or diabetic foot ulcers. This service also sees about 200 patients per year.

- **The Craniofacial Clinic at Nationwide Children’s Hospital** is serviced by Dr. Gregory Pearson and Dr. Robert Ruberg.

- **Comprehensive Wound Center (CWC)** – Recognized by OSU Board of Trustees in 10/04, this center was developed by Dr. Gordillo and Dr. Chandan Sen to: 1) accelerate the translation of basic science findings to clinical application, 2) encourage novel partnerships and multidisciplinary approaches to investigate complex problems related to wound repair and regeneration, and 3) use data to develop clinical best practices and become leaders in the field of tissue repair and wound management. The objectives and activities of the CWC adhere to NIH Roadmap guidelines. The CWC was used as a centerpiece in the recently funded OSU proposal for a Clinical and Translational Science award from NIH ($35,000,000).
Accomplishments in Clinical Care

• OSU Division of Plastic Surgery is now a full-service, comprehensive plastic surgery program of 13 physicians making it one of the largest plastics surgery programs in the nation.

• The division joined forces with The Department of Orthopedics to create the OSU Hand Center which opened one at 915 Olentangy River Road, Gowdy Fields II Building in March 2010.

• Dr. Michael Miller received two very prestigious awards for “Best Case of the Year” and “Best Save of the Year” from the American Society of Reconstructive Microsurgery Meeting. No institution has ever won both of these awards in the same year. This was Ohio State’s first year of entering cases as we are very proud of everyone that was involved.

• On October, 2009 The Ohio State University Division of Plastic Surgery put forth a team effort to reconstruct the oro-mandibular region of an 8 year old boy from west Africa. The patient was afflicted with NOMA, a polymicrobial necrotizing oral stomatitis. Patients affected by this disease are typically afflicted in their youth and hail from endemic, poverty-stricken regions of the world. The patient was sponsored by a local Columbus family and his care was funded by Nationwide Children’s Hospital. The plastic surgery team included: Dr. Gregory Pearson and Dr. Pankaj Tiwari (faculty), Dr. Nabil Habash (microsurgical fellow), Dr. Stacey Francis (senior resident) and Dr. Samita Saha (junior resident). In addition to the crippling deformity that this illness had ravaged on his oro-facial region, the patient’s functional status was severely impaired due to TMJ ankylosis and oral incompetence. The surgery consisted of scar release, TMJ arthroplasty and microvascular transfer of a dual-paddled anterolateral thigh flap. The patient progressed well, is now eating and is scheduled for further reconstructive procedures.

• Dr. Michael Miller was honored as one of the Best Doctors in American 2009-2010.

Educational Programs

• The Plastic Surgery Residency Training Program is now an integrated 6-year program. In 2009-2010 the Division initiated the new program format. This is an exciting change for our program and should add a great deal of knowledge and experience for our residents. It is also consistent with changes in training which will be mandated by the ACGME starting in 2010.

• The OSU Division of Plastic Surgery held the First Annual Ruberg Symposium in September 2009. This year’s symposium honored Dr. Robert Ruberg and focused on the emerging healthcare environment, relevant economic and business concepts pertaining to plastic surgery, and improving outcomes in plastic surgery of the breast and of the aging face.

Accomplishments in Education

• Drs. Robert Ruberg and Anne Taylor served as examiners for the American Board of Plastic Surgery in Phoenix, Arizona on November, 2009.

• Dr. Greg Pearson wrote questions for the AACPS MOC Craniofacial Surgery Certification Examination, July 2009.

• Dr. Gayle Gordillo served as Chairman of the PSEF Basic Science Grant Review Session, Beverly Hills, CA, September, 2009.

• Dr. Gayle Gordillo spoke to the OSU College of Medicine Admissions Office on the topic of “My Experience as an OSU Medical Student.” Sep. 2009.

Community Outreach Programs

• Dr. Pankaj Tiwari participated in a surgery mission trip to Jalandhar, Punjab in India in December 2009. The trip was organized in conjunction with surgeons from the American Society of Indian Plastic Surgeons. This group (ASIPS) represents plastic surgeons of Indian origin who are board certified and come from both academic and private plastic surgery backgrounds. The mission trip was also planned in conjunction with local plastic surgeons from Changara Singh Hospital in Punjab. During the trip over 40 operations were performed for burn reconstruction, cleft repair, hand surgery and other complex reconstructions. The mission trip was presented at the
International Plastic and Reconstructive Surgery Meeting (IPRAS) in New Delhi December, 2009. This was the first such mission trip performed in an effort to develop a relationship with not only the local plastic surgeons but with multinational plastic surgeons interested in international mission work.

- Dr. James Boehmler led a Breast Reconstruction Seminar at The Ohio State University that was featured in *Current Health* magazine in March 2010.

Accomplishments in Community Outreach

- Brian Porshinsky, M.D. – Presented “Crash and Burn” Seminar, Delaware EMS, July 2009.

- Michael J. Miller, M.D. – Served as an Adjunct Merit Reviewer, Merit Review Subcommittee for Surgery, Department of Veterans Affairs, 2010.

- Michael J. Miller, M.D. and Gregory Pearson, M.D. – Nominees for Health Care Heroes Award, Business First, 2009.

- Michael J. Miller, M.D. – Breast Reconstruction Following Mastectomy, ONN Interview, June 10, 2009.

May 28, 2010
In the Division of Surgical Oncology, all clinical and basic research activities are devoted to the evaluation and management of cancer. The mission of the division is reflected in the mission of The Arthur G. James Cancer Hospital and Richard J. Solove Research Institute. Our goals are to provide excellence in clinical cancer care, educate medical students, residents, and fellows, and conduct clinical and basic research. Most of the research performed in the division is translational, in which ideas and hypotheses from the laboratory are incorporated into clinical evaluation through the clinical trial mechanism.

Dr. Doreen Agnese continues to distinguish herself as an excellent clinician, working mainly in breast cancer, melanoma, and cancer genetics. She participates in our High-Risk Breast Cancer Clinic and continues to lead our weekly multi-modality breast meeting. Dr. Agnese has served as a resident mentor for the past four years, and is on the clinical subcommittee of the Center for Women’s Health. She appeared on local televised news programs to discuss her recent breast cancer research and its implications for the community. She serves as a reviewer for the European Journal of Surgical Oncology.

Dr. Mark Bloomston continues to lead our GI surgical oncology program. He is director of translational research in liver cancer and also serves as director of the surgical oncology fellowship program. This year, he completed the James IV Surgical Association Traveling Fellowship. He serves on the biliary cancer guidelines committee of the National Cooperative Cancer Network. He served as a mentor to many residents and medical students this year. Last year Dr. Bloomston received a National Institutes of Health K12 award for his work titled “Translational Training Grant in Experimental Therapeutics.” He continues to make numerous local and national presentations in GI oncology.
Dr. William Carson, a leader in basic research, continues to serve as associate director of the Comprehensive Cancer Center at the James Cancer Hospital. He directs the institutional review board at the James and continues as co-director of the clinical trials office. Dr. Carson has been instrumental in increasing clinical trial activity at the James this year, and through his efforts has made the cancer hospital a leader in clinical trial participation. He holds numerous grants, and recently received an NIH K24 award and an NIH/NCI P01 award. Dr. Carson recently concluded an NIH/NCI R21 award titled “The Therapy of Melanoma and Basismad Interferon-Alpha.”

Dr. William Farrar is the recipient of the Arthur G. and Mildred C. James and Richard J. Solove chair in surgical oncology. Breast and thyroid cancer continue to be the focus of his clinical and research activities. Dr. Farrar is co-director of the JamesCare Breast Center at Stoneridge, a comprehensive center that makes available all the aspects of the breast cancer diagnosis during one clinic visit, providing mammography, ultrasound, stereotactic breast biopsy, MRI, and outpatient techniques. He recently completed six years of service on the Commission on Cancer of the American College of Surgeons, and he continues as principal investigator at The Ohio State University Medical Center for the National Surgical Breast and Bowel Project. Dr. Farrar serves on the breast treatment, breast cancer prevention, and thyroid cancer guidelines committees of the National Comprehensive Cancer Network. At the James Cancer Hospital, he continues to serve as medical director, and he also serves on the leadership council, which is working toward a major expansion of the James. Dr. Farrar has been listed by Best Doctors in America for seven years.

Dr. William Kraybill has just completed his first year in the Division of Surgical Oncology. He began work in May, 2009, following a distinguished career at The Roswell Park Cancer Institute where he led the melanoma and sarcoma service for more than 17 years. Dr. Kraybill has vast experience in research as well as the treatment of melanoma and sarcoma. He serves on a number of radiation therapy oncology group committees and was recently inducted into the American Surgical Society. He has already established a practice in melanoma and sarcoma. He has also served as a mentor to our younger faculty.

Dr. Edward Martin is an international leader in gastrointestinal cancer and continues to evaluate the detection of recurrent colon cancer. He participates in an R21 grant titled “The Probe-Assisted PET CT-Guided Surgery for Colon Cancer,” and received an R01 grant for “The Integrated System for Tumor Detection and Targeting Drug Therapy of Cancer.” A prolific author, Dr. Martin has authored more than 200 publications, eight of which were published this year. His research has also resulted in numerous national presentations, and one of his papers has been accepted for presentation next year at the American College of Surgeons Surgical Forum. He was issued a patent for a fluorescence detection system. Dr. Martin continues to be a leader in teaching surgical principles to residents and fellows at the James.
Dr. John Phay recently joined the Division of Surgical Oncology in July of 2009. John specializes in endocrine surgery and comes to us from Vanderbilt University where he practiced endocrine surgery for about 6 years. He previously trained with the endocrine group at Washington University. John is becoming very active clinically and is working under the mentorship of Dr. Matt Ringel doing research in thyroid cancer. He brings to the division a needed expertise in adrenal tumor, thyroid cancer and parathyroid disease.

Dr. Stephen Povoski, a leader in breast cancer prevention, continues to serve as director of our High-Risk Breast Cancer Clinic. He is a leader in innovative techniques for the treatment of breast cancer, and has been the principal investigator on our partial radiation therapy program. Dr. Povoski has also been working with the Division of Nuclear Medicine to evaluate near infrared/ultrasound dual mobile imaging for breast cancer. He is a co-investigator on a pilot study evaluating the combined and integrated technologic approach of 18F-FDG-directed perioperative PET/CT imaging and intraoperative hand-held gamma probe detection of neuroendocrine and occult disease in patients undergoing surgery for solid malignancy. Dr. Povoski was appointed principal investigator for the Lymphoseek program. He continues to serve on a number of editorial boards, and was recently named editor of the World Journal of Surgical Oncology.

Dr. Lisa Yee, an excellent clinician and researcher, has a number of translational clinical trials for which she continues to recruit patients. She maintains a very busy practice in breast oncology and serves as our division liaison with the medical students. She continues her basic research in fatty acids and breast cancer prevention.

Dr. Wiley W. “Chip” Souba, Jr. continues to serve as dean of the College of Medicine and vice president for health sciences at The Ohio State University Medical Center.

Dr. Carl Schmidt has now completed his second year in the Division of Surgical Oncology after completing a fellowship in surgical oncology at the Memorial Sloan Kettering Cancer Institute in New York City. He has quickly become very busy clinically in the treatment of GI malignancies. He has become an excellent educator not only for our fellowship program but for our residents and students. He presents a conference weekly to our fellows concerning different aspects of clinical trials. He also recently received a grant entitled CCTC Davis Bremer Award.

Dr. Sherif Abdel-Misih completed the two-year fellowship in surgical oncology in June 2009 and accepted a faculty appointment with the Division of Surgical Oncology at Ohio State. Dr. Abdel-Misih also received the Fellow Teaching Award. Bestowed by the general surgery residents, this award recognizes a fellow who has demonstrated excellence in teaching.
Faculty

William B. Farrar, M.D.
Professor of Surgery; Chief, Division of Surgical Oncology; the Arthur G. and Mildred C. James/Richard J. Solove Chair in Surgical Oncology
B.A.: Illinois Wesleyan University, Bloomington, Ill., 1971
M.D.: University of Virginia, Charlottesville, Va., 1975
Specialty Training: The Ohio State University, Columbus, Ohio; Memorial Sloan-Kettering Cancer Center, New York, N.Y.
Appointment: 1982
Specialty Interests: Breast disease, thyroid disease, head and neck cancer
Research Interests: Breast cancer (high-risk breast cancer clinic, clinical studies for the adjuvant treatment of breast cancer, role of stereotactic biopsy for diagnosis, use of sestamibi in breast cancer diagnosis); thyroid cancer (role of aspiration biopsy and follicular neoplasms, extent of surgery for thyroid cancer); parathyroid disease (localization studies using sestamibi and Neoprobe)

Doreen M. Agnese, M.D.
Assistant Professor of Surgery and Internal Medicine - Clinical
Specialty Training: General surgery internship and residency, research fellowship, University of Medicine and Dentistry of New Jersey Robert Wood Johnson Medical School, Piscataway, N.J.; fellowship in surgical oncology and clinical cancer genetics, The Ohio State University, Columbus, Ohio
Appointment: 2004
Specialty and Research Interests: Breast cancer, melanoma, cancer genetics, all aspects of surgical oncology

Mark Bloomston, M.D.
Assistant Professor of Surgery
B.S.: Florida State University, Tallahassee, Fla., 1992
M.D.: University of South Florida, Tampa, Fla., 1997
Specialty Training: Internship, residency, and research fellowship in general surgery, University of South Florida, Tampa, Fla.; fellowship in surgical oncology, The Ohio State University, Columbus, Ohio
Appointment: 2006
Specialty and Research Interests: Pancreatic and alimentary tract cancers
William E. Carson, III, M.D.
Professor of Surgery
B.S.: University of California, Irvine, Calif., 1982
M.D.: University of Southern California, Los Angeles, Calif., 1986
Specialty Training: University of California, Irvine, Calif.; Roswell Park Cancer Institute, Buffalo, N.Y.
Appointment: 1997
Specialty Interests: Breast cancer
Research Interests: The role of natural killer cells in septic shock

William G. Kraybill, M.D.
Professor of Surgery
B.A.: Earlham College, Richmond, Ind., 1965
M.D.: University of Cincinnati, Cincinnati, Ohio, 1969
Specialty Training: Internship at Santa Clara Valley Medical Center, San Jose, Calif.; Residency and Fellowship at University of Oregon Health Sciences Center, Portland, Ore.; Fellowship in Surgical Oncology at Memorial Sloan-Kettering Cancer Center, New York, N.Y.
Appointed: 2009
Specialty Interests: Malignant melanoma and other aggressive skin cancers, soft tissue sarcomas
Research Interests: Clinical trials in tumors, multidisciplinary management of tumors, whole body hyperthermia

Edward W. Martin, Jr., M.D.
Professor of Surgery
B.S.: Ohio University, Athens, Ohio, 1967
M.D.: Meharry Medical College, Nashville, Tenn., 1972
Specialty Training: National Institutes of Health training, The Ohio State University, Columbus, Ohio; American Cancer Society Advanced Fellowship, The Ohio State University, Columbus, Ohio
Appointment: 1977
Specialty Interests: Gastrointestinal malignancies
Research Interests: Radioimmunoguided surgery, tumor markers, biologic response modifiers, liver metastatic model, dormant cancer cells, vaccines
John E. Phay, M.D.
Associate Professor - Clinical
M.D.: University of California at San Francisco School of Medicine, San Francisco, Calif., 1993
Specialty Training: Resident in General Surgery, Washington University School of Medicine, St. Louis, Mo.
Appointed: July 1, 2009
Specialty Interests: Thyroid cancer, benign thyroid disease, parathyroid disease, multiple endocrine neoplasia, surgical adrenal disease (laparoscopic adrenalectomy)
Research Interests: Thyroid cancer, glucose metabolism in malignancy, parathyroid surgical imaging
Previous Appointment: Assistant Professor of Surgery, Division of Surgical Oncology and Endocrinology, Vanderbilt University, Nashville, Tenn.

Stephen P. Povoski, M.D.
Associate Professor of Surgery
B.S.: State University of New York, Buffalo, N.Y., 1985
M.D.: State University of New York Health Science Center, Syracuse, N.Y., 1989
Specialty Training: University of Cincinnati Medical Center, Cincinnati, Ohio; Memorial Sloan-Kettering Cancer Center, New York, N.Y.
Appointed: 2001
Specialty Interests: Breast cancer, breast diseases
Research Interests: Sentinel lymph node mapping and biopsy for breast cancer, image-guided/minimally invasive breast biopsy, high-risk breast cancer clinic, ductal lavage

Carl R. Schmidt, M.D., M.S.C.I.
Assistant Professor of Clinical Surgery
B.S.: University of Michigan, Ann Arbor, Mich., 1995
M.D.: University of Michigan, Ann Arbor, Mich., 1999
M.S.: Vanderbilt University, Nashville, Tn., 2004
Specialty Training: General surgery residency, Vanderbilt University Medical Center, Nashville, Tenn.; surgical oncology fellowship, Memorial Sloan-Kettering Cancer Center, New York, N.Y.
Appointed: 2008
Specialty Interests: Gastrointestinal and hepatobiliary malignancies
Research Interests: Novel therapeutic strategies and imaging modalities for metastatic liver tumors
Wiley W. “Chip” Souba, Jr., M.D.
Professor of Surgery; Dean, The Ohio State University College of Medicine; Vice President for Health Sciences, The Ohio State University Medical Center
B.S.: Muskingum College, New Concord, Ohio, 1975
M.D.: University of Texas, Houston, Texas, 1978
M.B.A.: Boston University School of Management, Boston, Mass., 1998
Specialty Training: Residency in surgery, University of Texas, Houston, Texas; fellowship, Brigham and Women’s Hospital and the Dana-Farber Cancer Institute, Boston, Mass.; fellowship, University of Texas M.D. Anderson Cancer Center, Houston, Texas
Appointment: 2006
Specialty Interests: Leadership development; the academic medicine environment
Research Interests: Metabolism of glutamine

Lisa D. Yee, M.D.
Associate Professor of Surgery - Clinical
B.A.: University of California, San Diego, Calif., 1982
M.D.: Yale University, New Haven, Conn., 1986
Specialty Training: Mount Sinai Medical Center, Miami, Fla.
Appointed: 1996
Specialty Interests: General surgical oncology
Research Interests: Tumor progression and metastasis

Resident Staff

Sherif Abdel-Misih, M.D.
PGY-6
M.D.: Jefferson Medical College, Philadelphia, Pa., 2003

David Arrese, M.D.
PGY-7

Ravi J. Chokshi, M.D.
PGY-7
B.A.: Ursinus College, 1999
M.D.: Ross University School of Medicine, 2003
Mission

The Division of Surgical Oncology is dedicated to the evaluation and management of cancer and to cancer research and education.

Accomplishments in Research

- Faculty members in the division published 36 articles, abstracts, and chapters.

Active Research Grants

Agnese DM. A phase 3, multicenter, randomized trial of sentinel lymphadenectomy and complete lymph node dissection versus sentinel lymphadenectomy alone in cutaneous melanoma patients with molecular or histopathological evidence of metastases in the sentinel node. John Wayne Cancer Institute, June 1, 2006 – May 31, 2010, $100.

Bloomston M. A randomized, phase II trial comparing transarterial chemoembolization (TACE) to selective internal radiotherapy (SIRT) for unresectable carcinoid hepatic metastases. National Institutes of Health, National Cancer Institute, July 1, 2008 – June 30, 2010, $35,000/year.

Carson WE III. Tumor immunology. National Cancer Institute, June 1, 2008 – May 31, 2013, $224,780.

Povoski SP, McKenney RR. A phase 3, prospective, open-label, multicenter comparison study of Lymphoseek and vital blue dye as lymphoid tissue targeting agents in patients with known melanoma or breast cancer who are undergoing lymph node mapping. Neoprobe Corp., December 3, 2008 – June 30, 2010, $874.

Xu RX, Povoski S. Development of an integrated dynamic breast imaging system for the early detection of breast cancer. Wallace H. Coulter Foundation, September 1, 2006 – August 31, 2009, $228,932.

Yee LD. Dietary fatty acids, macrophages, and HER-2/neu-mediated mammary carcinogenesis. Army Medical Research Acquisition Activity, September 15, 2008 – September 14, 2011, $450,000.

Clinical Programs

• Comprehensive surgical oncology service.

Accomplishments in Clinical Care

• Attending faculty in the division performed 1,748 operating room procedures and received 26,105 outpatient visits.

Educational Programs

• Two-year fellowship in surgical oncology, which includes 18 months of clinical work and six months of basic research.

• Comprehensive rotation in surgical oncology for third- and fourth-year residents in general surgery.

• Subinternship in surgical oncology.

Accomplishments in Education

• Completion of the fellowship in surgical oncology by Dr. Sherif Abdel-Misih.

• Dr. David Arrese and Dr. Ravi Chokshi began surgical oncology fellowships.

Distinguished Visiting Professor

**Raphael E. Pollock, M.D., PH.D.**
Professor and Chairman
Department of Surgical Oncology
Head, Division of Surgery
University of Texas M.D. Anderson Cancer Center, Houston, Texas
September 25, 2009
The Division of Transplantation continues to combine a busy clinical transplant program with a diverse and productive research effort. Within the Comprehensive Transplant Center (CTC), the division has embarked on a number of collaborative, interdisciplinary endeavors to enhance both the clinical activities and the basic research efforts in transplantation at The Ohio State University Medical Center. The CTC’s team of specialists are pursuing areas of common interest in transplantation, including immunopharmacology, immune assessment and monitoring, immune engineering, information systems, biostatistics, clinical trials, public policy and ethical considerations, and communications and public relations.

Gregg Hadley, Ph.D., professor of surgery, director of the Tissue Typing Laboratory, and deputy director of research in the Comprehensive Transplant Center, continued his research examining transplant rejection and graft-versus-host pathology and the development of strategies for therapeutic intervention in these processes. In other basic science research, Dr. Ginny Bumgardner continued her research in hepatocyte and islet transplant murine models, and Dr. Ronald Pelletier continued his National Institutes of Health-funded work on chronic allograft rejection and immune tolerance. Dr. Amer Rajab published the outcomes of islet transplantation in nonhuman primate models.

Clinically, the volume of kidney and pancreas transplantation remains high, buoyed by a strong living-donor program. Under the guidance of Dr. Amer Rajab, the division’s initiative for clinical transplantation of islet cells into Type 1 diabetic patients is conducting evaluations of patients for the islet cell transplant waiting list. Several successful auto-islet transplantations have been performed. The division continues to conduct clinical trials examining new and innovative immunosuppressive regimens in the post-transplant patient.
Members of the division faculty continue to participate in national organizations, including the American Society of Transplant Surgeons (ASTS), the United Network for Organ Sharing (UNOS), and the Vascular Access Society of the Americas (VASA). Dr. Mitchell Henry serves as president of VASA and is the president-elect of ASTS. Dr. Ginny Bumgardner serves on the board of directors of the American Association for the Study of Liver Diseases (AASLD). Dr. Kenneth Andreoni serves as chair of the kidney committee at UNOS.

Dr. Anas Alzuhaili, previously a resident at Damascus University Hospitals, in Damascus, Syria, continues the second year of the fellowship in transplantation. In June 2010, Dr. Yusuf Gunay and Dr. Srinivas Samavedi completed the fellowship in transplantation. Dr. Gunay began a laparoscopic fellowship at the University of Iowa. Dr. Samavedi began an appointment as assistant professor of urology, Nizams Institute of Medical Sciences, Hyderabad, India.
Faculty

**Mitchell L. Henry, M.D.**
Professor of Surgery; Chief, Division of Transplantation; Deputy Director of Surgical Services, Comprehensive Transplant Center
B.S.: University of Nebraska, Lincoln, Ne., 1976
M.D.: University of Nebraska, Omaha, Ne., 1979
Specialty Training: The Ohio State University, Columbus, Oh.
Appointment: 1985
Specialty Interests: Transplantation, immunosuppression
Research Interests: Pancreatic transplantation, xenotransplantation

**Kenneth A. Andreoni, M.D.**
Associate Professor of Surgery; Director, Liver Transplantation
B.S.: Georgetown University, Washington, D.C., 1984
M.D.: Yale University, New Haven, Ct., 1988
Specialty Training: Johns Hopkins University Hospital, Baltimore, Md.; The Ohio State University, Columbus, Oh.
Appointment: 2008
Specialty Interests: Liver transplantation
Research Interests: New anti-rejection drugs, antibody-mediated injury to liver, kidney grafts

**Ginny L. Bumgardner, M.D., Ph.D.**
Professor of Surgery; Associate Dean for Research Education, College of Medicine; Director, Master of Medical Science Program
B.S.: College of William and Mary, Williamsburg, Va., 1979
M.D.: University of Virginia, Charlottesville, Va., 1983
Ph.D.: University of Minnesota, Minneapolis, Mn., 1994
Specialty Training: University of Minnesota, Minneapolis, Mn.; University of California at San Francisco, Ca.
Appointment: 1993
Specialty Interests: Transplantation, immunosuppression, post-transplant pregnancy, liver disease and transplantation
Research Interests: Transplantation immunology, liver immunobiology, cellular transplantation
Elizabeth Ann Davies, M.D.
Clinical Assistant Professor of Surgery
B.S.: University of Akron, Akron, Oh., 1979
M.D.: Northeastern Ohio Universites, Rootstown, Oh., 1983
Specialty Training: The Ohio State University, Columbus, Oh.
Appointment: 1993
Specialty Interests: Transplantation, immunosuppression
Research Interests: Transplantation, organ procurement

Elmahdi A. Elkhammas, M.D.
Professor of Clinical Surgery
M.D.: Gar-Younis University, Benghazi, Libya, 1977
Specialty Training: The Ohio State University, Columbus, Oh.
Appointment: 1991
Specialty Interests: Transplantation, immunosuppression
Research Interests: Liver transplantation, urologic complications

Gregg A. Hadley, Ph.D.
Professor of Surgery; Director, Tissue Typing Laboratory; Deputy Director of Research, Comprehensive Transplant Center
B.S.: Purdue University, West Lafayette, In., 1975
M.S.: University of Iowa, Iowa City, Ia, 1979
Ph.D.: University of Minnesota, Minneapolis, Mn., 1986
Specialty Training: Washington University School of Medicine, St. Louis, Mo.
Appointment: 2006
Specialty Interests: Transplant immunology
Research Interests: Mechanisms of organ transplant rejection and graft-versus-host disease

Ronald P. Pelletier, M.D.
Associate Professor of Surgery; Director, Kidney Transplantation
B.S.: Trinity College, Hartford, Ct., 1979
M.D.: University of Cincinnati, Cincinnati, Oh., 1987
Specialty Training: The Ohio State University, Columbus, Oh.
Appointment: 1996
Specialty Interests: Pre- and post-transplant immune status monitoring
Research Interests: Pathophysiology of chronic rejection
Amer Rajab, M.D., Ph.D.
Associate Professor of Surgery; Director, Pancreas and Islet Transplantation
M.D.: Damascus University, Damascus, Syria, 1983
Ph.D.: Lund University, Lund, Sweden, 1991
Specialty Training: University of Texas Southwestern Medical Center, Dallas, Texas
Appointment: 2001
Specialty Interests: Organ transplantation
Research Interests: Islet transplantation

Emeritus Faculty

Ronald M. Ferguson, M.D., Ph.D.
Professor Emeritus of Surgery
B.S.: Augsburg College, Minneapolis, Mn., 1967
M.D.: Washington University, St. Louis, Mo., 1971
Ph.D.: University of Minnesota, Minneapolis, Mn., 1982

Fellows

Anas Alzuhailei, M.D.
Transplantation Fellow/Clinical Instructor of Surgery
M.D.: Damascus University, Damascus, Syria, 2001

Yusuf Gunay, M.D.
Transplantation Fellow/Clinical Instructor of Surgery
M.D.: Ankara University, Ankara, Turkey, 1999

Srinivas Samavedi, M.D.
Transplantation Fellow/Clinical Instructor of Surgery
M.D.: Kakatiya Medical College, Warangal, India, 1992
Rotating Resident Staff

**Joshua Chung, M.D.**
PGY-3, Riverside Methodist Hospital  
B.S.: Andrews University, Berrien Spring, Michigan, 2003  
M.D.: Loma Linda University School of Medicine, Loma Linda, Maryland, 2007

**Suzanne Gozdanovic, M.D.**
PGY-3, Mount Carmel Health System

D.O.: Ohio University, Athens, Ohio, 2006
Mission

The Division of Transplantation is dedicated to building upon a solid foundation of basic, translational, and clinical research in order to define and develop the next generation of high-quality, comprehensive, cost-effective transplant programs.

Research Programs

- Transplant rejection
- Allograft acceptance and transplant tolerance
- Novel immunologic strategies for islet cell transplantation
- Cellular transplantation
- New immunosuppressive compounds

Accomplishments in Research

- **Gregg A. Hadley, Ph.D.** serves as Director of the Tissue Typing Laboratory, and Deputy Director of Research in the Comprehensive Transplant Center. He leads a research program focused on defining mechanisms of chronic tissue injury following transplantation, and the development of novel therapeutic strategies for intervention in these processes.

- **Dr. Ronald Pelletier** continues the division’s investigations into the immunobiology of graft acceptance and the role of alloantibodies in allograft pathobiology. Our recent studies addressing transplantation tolerance suggest that allograft acceptance may evolve through a series of mechanisms involving TGFβ and foxP3 regulatory cells. These mechanisms are associated with donor-reactive alloantibodies and pathology within the grafts, and do not lead to true transplantation tolerance, despite the ability to accept donor matched skin allografts. Our ongoing studies of the role of alloantibodies in transplantation reveal that alloantibodies are not necessarily directed at MHC molecules, but are also directed at tissue-associated and tissue-specific molecules. Using new experimental assays for alloantibody detection, our studies have further revealed that some, but not all, of these antibodies are complement-fixing. Investigational studies focusing on humoral allograft rejection in an animal model are designed to carefully characterize the acute inflammatory events leading to Ab-mediated graft damage. We hope to define stages in the process that offer opportunities for therapeutic intervention to ameliorate graft damage.
• Translational Research in Immunologic Recognition and Post-Transplant Outcomes. Dr. Ronald Pelletier continues his translational research (basic, tissue typing, and clinical) investigating the relationship between cellular and humoral donor-specific immunologic recognition and post-transplant outcomes. Efforts are now under way to foster living donor/recipient pair exchanges to enable increasing numbers of patients to obtain a lifesaving kidney transplant. Additionally, methods for removing circulating alloantibodies in sensitized recipients to permit safe organ transplantation continue to be investigated.

• Transplantation Immunobiology. Dr. Ginny Bumgardner continues her investigations in transplant immunobiology, using experimental models of pancreatic islet and hepatocyte (liver cell) transplantation. Studies include a research project that focuses on understanding how a novel CD8⁺ T cell-dependent pathway is activated after transplant, and how its activation and effector function can be suppressed by immunotherapy in primary and sensitized transplant recipients. This pathway is important, because it can cause transplant tissue damage, either early or late after transplant, and interferes with the induction of transplantation tolerance. Dr. Bumgardner’s laboratory was the first to report the efficacy of a novel immunosuppressive strategy that successfully suppresses this immunoresistant (CD4-independent) CD8⁺ T cell mediated immune pathway and promotes long-term allograft survival. Very little is known regarding how CD8⁺ T cells cause immune damage of allografts and in vivo effector functions of alloreactive CD8⁺ T cells is a specific focus for investigation. Our lab is also investigating CD4-dependent humoral immune pathways of allograft damage. These and other projects have been funded by external sponsors, such as the American Diabetes Association, the Roche Organ Transplant Research Foundation, the American Society of Transplant Surgeons, the American Society of Transplantation and the National Institutes of Health.

Active Research Grants

Elkhammas EA, Ferguson RM, Henry ML, Pelletier RP. A facilitated access program to provide everolimus (RAD) for maintenance for patients completing therapy in RAD trials in solid organ transplantation. Novartis Pharmaceuticals Corp., February 17, 2004 – June 30, 2010, $8,175.

Ferguson RM, Henry ML, Pelletier RP, Rajab A. A facilitated access program to provide everolimus (RAD) for maintenance for patients completing therapy in RAD trials in solid organ transplantation. Novartis Pharmaceuticals Corp., February 17, 2004 – June 30, 2010, $10,923.

Ferguson RM, Pelletier RP, Henry ML, Rajab A. A facilitated access program to provide everolimus (RAD) for maintenance for patients completing therapy in RAD trials in solid organ transplantation. Novartis Pharmaceuticals Corp., February 17, 2004 – June 30, 2010, $14,500.

Hadley GA. Blockade of CS103 as a means to prevent tubular injury following allogeneic renal transplantation. American Society of Transplantation, July 1, 2007 – June 30, 2009, $80,000.

Horne PH, Bumgardner GL. CD4-independent, CD8+ T cell-mediated alloimmunity studied through a hepatocellular allograft model. American Society of Transplantation, July 1, 2006 – June 30, 2009, $30,000.

Clinical Programs

- Pre-transplant
- Post-transplant and transplant wellness. The program currently sees more than 2,000 patients
- Living donor kidney
- Kidney transplant
- Liver transplant
- Pancreas transplant
- Vascular access
- Deceased donor

Accomplishments in Clinical Care

- Both the Auto-Islet Transplantation Program and the Allo-Islet Transplantation Program continue to be areas of clinical focus within the Division.

Auto-islet transplant serves as an innovative treatment modality for pancreatitis. The patient’s pancreas is removed and processed to isolate the islets. The cells are then returned to the operating room, and infused into the patient’s liver, where they graft and mimic the function of the removed pancreas, preserving the patient’s ability to secrete insulin. Using the patient’s own islet cells eliminates any threat of rejection and substantially reduces the risk of the patient developing diabetes.

Allo-islet transplantation allows diabetic patients to receive the islets from the pancreas of a deceased donor, as the patient’s own islets have ceased to function. Subsequent to a successful allo-islet transplantation, the patient is cured of diabetes and no longer has to rely on receiving insulin.

Both of these transplant processes are highly specialized, and are only offered by a few transplant centers. Ohio State is one of a few prestigious centers certified to offer these types of transplants.
Pediatric Transplant Program. As Director of Pediatric Transplantation, Dr. Rajab continues to enhance the transplant program at Nationwide Children’s Hospital. Nine kidney transplants were performed during the past year. In addition, utilizing the expertise gained over the many years of the Ohio State program, Dr. Rajab has implemented successful immunosuppressive regimens in his pediatric patients.

Living Donor Kidney Transplant Program. This year, a dedicated effort by the pre-transplant coordinators, the transplant surgeons, and the nephrologists resulted in 104 living donor kidney transplants.

Sequential Pancreas Transplant Program. Continued efforts to focus on a sequential pancreas transplant program resulted in six of these transplants being performed this year, benefiting the large population of patients who, suffering from end-stage renal disease secondary to diabetes, have already undergone a successful kidney transplant. In addition, twenty combined kidney-pancreas transplants were performed this year, allowing the recipients to be cured of both diseases by a single transplant procedure.

Educational Programs

- Two-year fellowship in solid organ transplantation. The program is accredited by the American Society of Transplant Surgeons.

- Rotations for general surgery residents during their intern and PGY-3 years.

- Rotation for surgery residents from the Mount Carmel Hospital System, Riverside Methodist Hospital, and Doctors Hospital. The rotation provides the clinical transplant experience required by the American Board of Surgery.

- Comprehensive Transplant Center Lecture Series. This bi-weekly lecture features broad-based clinical and basic science topics, presented by clinicians and researchers from Ohio State and other institutions.
• Biopsy Conference. The weekly conference reviews renal transplant biopsies and liver transplant biopsies, in conjunction with the pathologists and nephrology physicians.

• Divisional Morbidity and Mortality Conference.

• Observership Program. The one-month international visiting scholar appointment allows international medical students, graduates, and faculty who are not part of a formal training program at The Ohio State University Medical Center to observe faculty members, residents, or interns at Ohio State for a predetermined period of time. The goal is to introduce international visiting scholars to the fields of transplant surgery, patient care, research, and teaching.

Accomplishments in Education

• The 2010 American Transplant Congress (ATC), was held during May 1-5, 2010, in San Diego, California. This joint meeting between the American Society of Transplant Surgeons (ASTS) and the American Society of Transplantation (AST) is the foremost educational event in the field of basic and clinical transplantation. At this year’s meeting, as well as chairing plenary sessions and presenting orally, the combined efforts of the surgeons and Dr. Hadley resulted in twelve abstracts being accepted for the event.

• Further, at the ATC, Dr. Henry was selected President-Elect of the ASTS. The Society, with more than 1,600 members, is dedicated to fostering and advancing the practice and science of transplantation for the benefit of patients and the community. Members are primarily board-certified surgeons with advanced training in transplantation and a record of publication in peer-reviewed journals and books.

• Dr. Henry participated as a Faculty member at the Vascular Access Society of the Americas (VASA) Vascular Assess for Hemodialysis XII Symposium, held May 12-14, 2010 in Las Vegas, Nevada. The program promoted excellence in the care of the patients who require hemodialysis – including placement of optimal access, maintenance and prolongation of access patency. At this meeting, Dr. Henry assumed the role of President of VASA, having served as President-Elect for the past year.

• Dr. Henry, Dr. Andreoni and Dr. Bumgardner all created learning modules for the Organ Procurement Unit in the National Transplant Surgery Fellowship curriculum, developed by the American Society of Transplant Surgeons. The Curriculum defines the key areas of knowledge necessary for mastery of the field of transplantation surgery and when complete, this ASTS Academic Universe will contain over 200 learning modules. The Curriculum is available to all residents, fellows and transplant professionals who are members of this prestigious society.
• Dr. Anas Alzuhaili joined the transplant team as the junior fellow in the ASTS-approved fellowship training program.

• Dr. Yusuf Gunay and Dr. Srinivas Samavedi both completed the two-year fellowship in abdominal organ transplantation.

• The division continues to distribute a CD-ROM for resident education that is continually updated with cutting-edge educational materials on transplantation.

• Progress continues on the video library for resident education. The division’s attending faculty members believe that a complete video library in solid organ transplantation will be a valuable teaching tool for those interested in this specialized field.

• Dr. Ginny Bumgardner is a member of the admissions committees for the Medical Scientist Program (MSP), the M.D./Ph.D. dual degree program. She also serves on the MSP Steering Committee, which addresses MSP policies and administrative issues. Dr. Bumgardner is a faculty member for the Integrated Biomedical Sciences Graduate Program. The Ohio State Med Into Grad Program is co-directed by Dr. Bumgardner, and was awarded a four-year grant by the Howard Hughes Medical Institute.

• Dr. Bumgardner is the Associate Dean for Research Education & Graduate Studies in the College of Medicine. She participates as a member of the OSU Clinical and Translational Science (CCTS) Community of Research Education.

• Dr. Bumgardner is the Director of the COM’s Masters of Medical Science Program.

Community Outreach Programs

• **Liver Transplantation.** Dr. Ken Andreoni has instituted an outreach program, centering around lectures on the role of liver transplantation in end stage liver disease patients, especially those with hepatocellular cancer. This outreach effort is to increase awareness of Ohio State’s liver transplant program as a treatment modality for these patients. Dr. Andreoni’s lectures are helping to educate colleagues in the medical community to identify patients who are appropriate to be considered as candidates for transplantation. In addition, he is informing the referring physicians and patients on the processes involved in the national UNOS system for liver transplantation.

• **TransChart.** An Internet-based electronic medical record for post-transplant patients and healthcare professionals managing their care, TransChart facilitates better communication and patient outcomes. The use of Transchart by outlying nephrologists is increasing, as its browser-based application for reviewing medical records and charting directly into the record is invaluable in managing patient care.
Accomplishments in Community Outreach

Faculty members in the division continue to occupy positions of importance within the community of transplantation professionals. The faculty members and their positions are:

**Kenneth A. Andreoni, M.D.**
- Chair, Kidney Committee, United Network for Organ Sharing (UNOS).
- Member, Subcommittee on National Kidney Paired Donation, UNOS.
- Co-Chair, Subcommittee on Liver-Kidney Allocation, UNOS.
- Chair, Kidney Subcommittee reviewing SRTR Kidney Transplant Metrics, UNOS.
- Member, Public Policy Committee, American Society of Transplantation.
- Medical Advisory Board, Lifeline of Ohio Organ Procurement Agency.

**Ginny L. Bumgardner, M.D., Ph.D.**
- Chair, American Society of Transplant Surgeons (ASTS) AdHoc Workforce Committee. This committee developed and distributed a survey to transplant surgeons of the ASTS to gather information about their demographics, educational and professional background, clinical activity, and professional productivity. The results of the survey have been submitted for publication.
- Co-Chair, ASTS Awards Committee, American Society of Transplant Surgeons. This committee develops award guidelines and develops new awards for consideration of funding by the ASTS Council. The ASTS Awards committee reviews ASTS research applications annually and awards approximately $750,000 annually.
- Associate Editor, American Journal of Transplantation (AJT) Editorial Board. Dr. Bumgardner has been an Associate Editor for AJT since 2007. AJT has an impact factor of 6.843 which is the highest ranking of transplantation journals.
- Member, Graduate Research Education and Training (GREAT), a national organization which fosters the exchange of information and ideas among the faculty and administrative leaders of biomedical PhD, MD-PhD and postdoctoral programs. GREAT also sponsors annual conferences on issues of importance in research education.
- Member, NIH NIAID AIRT research education section which reviews training grants and individual research fellowship and career development awards.
- Co-Chair OSU Clinical Center for Translational Science (CCTS) Research Education Resources and Special Programs committee. This committee has organized CCTS T1 workshop series designed to connect basic scientists and clinicians working in related areas with the intent of forging new research collaborations.

**Elizabeth Ann Davies, M.D.**
- Chair, Education Committee, International Society for Organ Preservation.

**Elmahdi A. Elkhammas, M.D.**
- Chair, Executive Committee; Deputy Editor, Libyan Journal of Medicine.
- Chair, Board of Directors, Ibnosina Medical Association.
- Member, Executive Committee on Health Reform in Libya.
- Board Member, African Center for the Prevention of Infectious Diseases, Tripoli, Libya.
Gregg A. Hadley, Ph.D.
- Member, Scientific Advisory Committee, Roche Organ Transplantation Research Foundation.
- Associate Editor, American Journal of Transplantation.
- Editorial Board, Transplantation.

Mitchell L. Henry, M.D.
- President-Elect, American Society of Transplant Surgeons (ASTS).
- Member, Executive Committee, American Society of Transplant Surgeons.
- Council Member, American Society of Transplant Surgeons.
- Secretary, Board of Directors, United Network for Organ Sharing.
- Member, Executive Committee, United Network for Organ Sharing.
- President, Vascular Access Society of the Americas.
- Senior Advisor, Vanguard Committee, ASTS.
- Medical Director, Lifeline of Ohio Organ Procurement Organization.

Ronald P. Pelletier, M.D.
- Assistant Medical Director, Lifeline of Ohio Organ Procurement Organization.
- Member, Board of Directors, National Kidney Foundation. The board works to prevent kidney and urinary tract diseases, improve the health and well-being of individuals and families affected by these diseases, and increase the availability of all organs for transplantation.

Chapters

International Visiting Scholars (Observerships)

Dr. Abdel-Rauof Akkari, Libya, August-September, 2009.

Dr. Mussarat Rafiq, Pakistan, January-February, 2010.

Dr. Anas J. Benmokhtar, Libya, May-June, 2010.

International Presentations

Elkhammas EA. Organizing a Department of Surgery, Tripoli Medical Center. Tripoli, Libya. November 21, 2009.

National Presentations

Henry, ML. Chair of Session. United Network for Organ Sharing (UNOS) Spring Regional Meeting, Dayton, Ohio, April 9, 2010.

Kozlowski T, Rubinas T, Nickeleit V, Andreoni KA. Reported inconsistencies in C4d patterns in liver allograft antibody mediated rejection can be due to detection techniques. The 2010 American Transplant Congress, San Diego, California, May 1-5, 2010.

Pelletier RP, Henry ML. Higher C2 CSA levels within the first month after kidney transplantation correlates with better renal function and graft survival at five years. The 2010 American Transplant Congress, San Diego, California, May 1-5, 2010.

Miscellaneous Presentations

Davies EA. Organ Donor Management. Nationwide Children’s Hospital, Columbus, Ohio, October 27, 2009.

Henry ML. Clinical value of hemodialysis access imaging. OSU Heart and Vascular Center, Second Annual Vascular Noninvasive Testing Symposium, Columbus, Ohio, October 3, 2009.

Rajab A. Working together to achieve the best outcomes for kidney donors and recipients. Anesthesiology Grand Rounds, The Ohio State University, Columbus, Ohio, September 10, 2009.

Rajab A. Improving islet cell transplant survival through gene transfer. Nationwide Children’s Hospital, Columbus, Ohio, October 5, 2009.
Rajab A. How to evaluate a deceased donor. Lifeline of Ohio Organ Procurement, Columbus, Ohio, October 7, 2009.

Rajab A. Chronic Pancreatitis and Islet Auto Transplantation. GI Grand Rounds, The Ohio State University, Columbus, Ohio, October 29, 2009.

Rajab A. Pancreas Transplantation. Transplant Nurses at The Ohio State University, Columbus, Ohio, November 18, 2009.

Rajab A. Finding the right donor for a kidney transplant recipient. Urology Rounds, The Ohio State University Medical Center, Columbus, Ohio, January 26, 2010.

Distinguished Visiting Professors

Richard N. Whitney, M.D.
Medical Director, Addiction Services Shepherd Hill Newark, Ohio Comprehensive Transplant Center Conference: “Appropriate use of medications in recovery”, December 9, 2009.

Thalachallour Mohanakumar, Ph.D.
Jacqueline G. and William E. Maritz Professor of Surgery, Medical Director of the Histocompatibility Laboratory, Washington University, St. Louis School of Medicine, St. Louis, Missouri. Comprehensive Transplant Center Conference: “Alloimmunity mediated autoimmunity in pathogenesis of chronic rejection”, December 16, 2009.

Thalachallour Mohanakumar, Ph.D.
Jacqueline G. and William E. Maritz Professor of Surgery, Medical Director of the Histocompatibility Laboratory, Washington University, St. Louis School of Medicine, St. Louis, Missouri. Charles G. Orosz Memorial Lecture 2010: “Cross talk between alloimmune response to HLA and autoimmunity in pathogenesis of chronic rejection”, April 14, 2010.

Randall S. Sung, M.D.
The Division of Vascular Diseases and Surgery has continued to maintain a high clinical volume while achieving excellence in patient satisfaction. Simultaneously under the direction of Dr. Cameron Rink and Dr. Michael Go, the division’s research efforts have continued to expand. Overall, there remains a very high resident and medical student satisfaction regarding the teaching provided on this service.

Dr. Jean Starr was recently designated Associate Program Director for the fellowship program in the Division of Vascular Diseases and Surgery. She has also committed herself to the MedPath Mentoring program in the College of Medicine and has also recently appointed to the Admissions Committee in the College of Medicine as well.

Dr. William Smead and Dr. Blair Vermilion continue to expand the care of patients with venous disease at our Vein Solutions office. Dr. Vermilion continues to expand his involvement in hospital administration while Dr. Smead continues to maintain an active arterial practice in addition to his venous efforts. Both remain effective teachers and continue to receive excellent evaluations by both the residents and the medical students.

Dr. Das has increased the division’s involvement in the care of dialysis patients largely through his efforts at the University Hospital East and continues to maintain an active arterial practice here at the Richard M. Ross Heart Hospital.

Dr. Satiani continues to conduct his practice management seminars as well as remain active in publications he was directly involved in 16 publications over the past year and produced another widely-attended invasive vascular symposium in the past fall.
Dr. Michael Go, working closely with Dr. Vince Pompili of the Division of Cardiology, has recently gained IRB approval for a prospective human trial investigating the use of autologous bone marrow-derived hematopoietic stem cells with platelet rich plasma to stimulate angiogenesis for the treatment of critical limb ischemia. To our knowledge, this is the first study of its kind in the U.S. to attempt to treat patients who otherwise would need amputation using stem cells combined with platelet-rich plasma. Platelet rich plasma is an autologous blood component that has been shown to stimulate angiogenesis in other applications such as wound healing and theoretically may augment the angiogenic activity of stem cell therapy. We hope to begin patient enrollment within two months. Also within the last academic year Dr. Go has had two peer-reviewed articles published in *Journal of Vascular Surgery*, a case report published in *Vascular and Endovascular Surgery*, and another report accepted for publication in *Vascular and Endovascular Surgery*. He was invited to speak at the Society for Vascular Medicine in Cleveland, Ohio and at the Pittsburgh Vascular Symposium, and he was most recently asked to speak at Controversies in Surgery in Ann Arbor, Michigan.

Dr. Cameron Rink’s research focuses on mechanisms of stroke injury and brain repair more specifically, his interest lies in elucidating the specific role of oxygen as a key factor in stroke-mediated pathology. He has recently published in the *Journal of Cerebral Blood Flow and Metabolism* in February 2010.

Dr. Patrick Vaccaro continues his second year as Chief-of-Staff, Elect of The Ohio State University Medical Center and was most recently appointed by the Department of Surgery to be its representative on the OSUP Finance Committee starting in July 2010.

Dr. Siddharth Bhende completed his two year fellowship in vascular surgery this year and will be joining a private practice group in Mesa, Arizona. Dr. Maria Litzendorf will become the senior vascular fellow and Dr. Joseph Habib from Charleston Area Medical Center/West Virginia University will become the first year fellow starting in July. Dr. Bhende received the Fellow Teaching Award. Bestowed by the general surgery residents, this award recognizes a fellow who has demonstrated excellence in teaching.
Faculty

Patrick S. Vaccaro, M.D.
Professor of Clinical Surgery; Chief, Division of Vascular Diseases and Surgery; Program Director, Vascular Diseases and Surgery
B.S.: Yale University, New Haven, Ct., 1971
M.D.: University of Cincinnati, Cincinnati, Oh., 1975
Specialty Training: General surgery residency, The Ohio State University, Columbus, Oh.; clinical fellowship in cardiothoracic surgery, Baylor College of Medicine, Houston, Tx.
Appointment: 2004
Specialty Interests: General vascular surgery, endovascular therapy
Research Interests: Endothelial cell biology, spinal cord ischemia, clinical trials

B. Mohan Das, M.D.
Assistant Professor of Clinical Surgery
B.A.: Madras Christian College, Madras, India, 1967
M.D.: Stanley Medical College, Madras, India, 1974
Specialty Training: General surgery residency and vascular surgery fellowship, Albert Einstein Medical Center, Philadelphia, Pa.; vascular surgery fellowship, Cleveland Clinic, Cleveland, Oh.
Appointment: 2004
Specialty Interests: General vascular surgery, carotid disease, lower extremity and dialysis access surgery
Research Interests: Clinical trials, ARK “TRINAM STUDY” for dialysis access

Michael R. Go, M.D.
Assistant Professor of Surgery
B.S.: Duke University, Durham, N.C., 1996
M.D.: University of Cincinnati, Cincinnati, Oh., 2000
M.S.: The Ohio State University, Columbus, Oh., 2005
Specialty Training: General surgery residency, The Ohio State University, Columbus, Oh., 2006; Vascular and endovascular surgery fellowship, University of Pittsburgh Medical Center, Pittsburgh, Pa., 2008
Appointment: 2008
Specialty Interests: General vascular surgery, endovascular surgery
Research Interests: Endovascular surgery, stem cell therapy for limb ischemia
Bhagwan Satiani, M.D., M.B.A.
Professor of Clinical Surgery; Director of Non-Invasive Vascular Services

Undergraduate Degree: Shah Abdul Latif College, Mirpurkhas, Pakistan, 1964
M.D.: Dow Medical College, University of Karachi, Karachi, Pakistan, 1971
M.B.A.: Franklin University, Columbus, Oh., 2002

Specialty Training: General surgery residency and trauma fellowship, Emory University, Atlanta, Ga.; vascular surgery fellowship, The Ohio State University Medical Center, Columbus, Oh.

Appointment: 2004

Specialty Interests: Noninvasive vascular diagnosis, business and legal aspects of medicine

Research Interests: Business education for physicians, workforce issues

William L. Smead, M.D.
The Luther M. Keith Professor of Surgery

B.A.: Amherst College, Amherst, Ma., 1968
M.D.: Vanderbilt University, Nashville, Tn., 1972

Specialty Training: General surgery residency, Massachusetts General Hospital, Boston, Ma.; cardiothoracic surgery residency, Southampton Chest Hospital, Southampton, England

Appointment: 1978

Specialty Interests: General vascular surgery, aortic aneurysmal disease (thoracic and abdominal), renovascular hypertension, carotid disease, pediatric vascular problems

Research Interests: Claudication, carotid disease, thoracic outlet syndrome, aortic aneurysmal disease

Jean E. Starr, M.D.
Assistant Professor of Clinical Surgery; Director of Endovascular Services

B.S.: The Ohio State University, Columbus, Oh., 1985
M.D.: The Ohio State University, Columbus, Oh., 1989

Specialty Training: General surgery residency and vascular surgery fellowship, Cleveland Clinic, Cleveland, Oh.

Appointment: 2004

Specialty Interests: Endovascular surgery, interventional procedures, carotid stents

Research Interests: Endovascular aortic aneurysm repair, carotid stenting
Blair D. Vermilion, M.D.
Associate Professor of Clinical Surgery
B.S.: Miami University, Oxford, Oh., 1968
M.D.: The Ohio State University, Columbus, Oh., 1972
Specialty Training: General surgery residency, Indiana University, Indianapolis, In.; vascular surgery fellowship, St. Anthony Hospital, Columbus, Oh.
Appointment: 2004
Specialty Interests: General vascular surgery, venous disease
Research Interests: Clinical trials

New Faculty Appointment

Cameron L. Rink, Ph.D.
Assistant Professor of Surgery
B.S.: Hillsdale College, Hillsdale, Mi., 2000
Ph.D.: The Ohio Sate University, Columbus, Oh., 2008
Post-doctoral Research, Laboratory of Molecular Medicine, The Ohio State University, 2009
Graduate Fellow, Department of Surgery, The Ohio State University, 2008
Graduate Research Assistant, Laboratory of Molecular Medicine, The Ohio State University, 2006
Graduate Fellow, Human Nutrition, The Ohio State University, 2005
Appointment: 2009
Research Interest: stroke injury, brain repair and oxygen as a key factor in stroke-mediated pathology

Resident Staff

Siddharth Bhende, M.D.
PGY-7
B.S.: University of California at Riverside, Riverside, Ca., 1999
M.D.: Ross University, Dominica, West Indies, 2003

Maria Litzendorf, M.D.
PGY-6
B.S.: College of William and Mary, Williamsberg, Va., 1996
M.D.: Eastern Virginia Medical School, Norfolk, Va., 2003
Mission

The mission of the Division of Vascular Diseases & Surgery is consistent with that of The Ohio State University College of Medicine and Public Health, and includes: 1) the delivery of the highest quality of care to patients throughout Central Ohio suffering with peripheral vascular disease, 2) the contribution to innovations in medicine through translational research and clinical outcomes studies, and 3) the education of medical students and postgraduate trainees. Strategic planning has been a priority for us as we have focused on identifying how we can best fulfill our mission and truly create the future of medicine to improve people’s lives. A key element of that focus is our commitment to leadership in personalized health care as well as to help become a high-performance organization and workplace of choice.

Active Research Grants

\textbf{Accomplishments in Research}

- Faculty in the division published 12 scholarly articles.

- IRB approval for a prospective human trial investigating the use of autologous bone marrow derived hematopoietic stem cells with platelet rich plasma to stimulate angiogenesis for the treatment of critical limb ischemia. To our knowledge, this is the first study of its kind in the U.S. to attempt to treat patients who otherwise would need amputation using stem cells combined with platelet-rich plasma.

- OSPREY – sponsored by Terumo is coming but is not totally approved by the FDA yet so we are on hold with that application.

- Bolton Relay-initial enrollment is now complete for endovascular arm of the original study plan but we were invited to participate in the continued access portion of the Bolton Relay Trial (Protocol Version I) which will allow 50 additional subjects to be treated with the Relay Thoracic Stent Graft at up to 20 of the investigative sites participating in the trial.

- CVRx Rheos Pivotal – Enrollment is complete and we are now in the follow up phase of the trial. Subjects enrolled in the trial will be followed through FDA approval/disapproval of the device.

- We are currently the third top enroller in the Boston Scientific study called ORION: A Boston Scientific trial of the EPIC Nitinol Stent System in the Treatment of Atherosclerotic Lesions in Iliac Arteries.

- The study, HERCULES- Herculink Elite Cobalt Chromium Renal Stent Trial to Demonstrate Efficacy and Safety of the RX Herculink Renal Stent System, sponsored by Abbott Vascular, is closed to enrollment and in the follow up phase of the trial for the next 3 years.

- CHOICE, sponsored by Abbott Vascular, is a carotid stent registry in which we continue to enroll patients. The enrollment for this registry is open ended.

- SAPPHIRE WW, sponsored by Cordis, is a carotid stent registry in which we also currently enroll patients.

- The following studies have been closed this past year: SONOMA – Boston Scientific; PIVOTAL – Medtronic and Cleveland Clinic Foundation.
Clinical Programs

- Comprehensive general vascular diseases and surgery service.
- Endovascular surgery.
- Laser surgery for varicose veins.
- Arterial surgery clinic.
- Venous surgery clinic.
- Varicose vein clinic.
- Dialysis clinic.
- Outlying vascular clinics in Ashland, Bellefontaine, Fayette, Lancaster, London, Marysville, and Upper Sandusky, Oh.

Accomplishments in Clinical Care

- Listing of Dr. William L. Smead by Best Doctors, Inc.
- Continuation of a high patient satisfaction score. As of February 2010, the overall assessment total was 92.5 percent.
- Use of the Guidant stent system in treatment of blockages in the carotid artery.
- Use of the Rheos Baroflex Hypertension therapy system for treatment to control resistant hypertension.
- Use of Cordis Precise RX and Emboshield carotid stent system.
- Bolton Relay Thoracic Endograft.
- TX2 Thoracic Endograft.
- EPIC Nitinol stent for treatment of iliac artery blockages.

Educational Programs

- Two-year fellowship in vascular diseases and surgery, accredited in 2006 by the Accreditation Council for Graduate Medical Education.

- Seminar in Practice Management. Dr. Bhagwan Satiani presents this monthly seminar to the residents in the Department of Surgery.

- Comprehensive rotation in vascular diseases and surgery for junior and senior general surgery residents.

- Subinternship in vascular diseases and surgery.

- Medtronic Thoracic Simulator at The Ross Heart Hospital.

Accomplishments in Education

- The division’s Grand Rounds was approved for Category 1 continuing medical education credit toward the American Medical Association Physicians Recognition Award.

- Dr. Siddharth Bhende assisted the Richard M. Ross Heart Hospital with the College of Nursing on some simulation exercises (scenario involves a patient who has had AAA repair) Columbus, Ohio, August 6, 10, 11, & 25, 2009; the UCLA Symposium, Hollywood, CA., September 14-17, 2009; the Society for Clinical Vascular Surgery Meeting, Scottsdale, AZ., April 7-10, 2010.

• Diane Gawron, RN attended Osprey Investigator Meeting, Orlando FL., March 19, 2010.

• Dr. Michael Go attended the CIMT (Carotid Intima-Media Thickness) Ultrasound Training Course in Madison, WI., August 7-8, 2009; the 8th Annual Pittsburgh Vascular Symposium in Pittsburgh, PA, September 11, 2009; the Osprey Investigator Meeting, Orlando, FL., March 19-21, 2010.

• Dennis Kiser, RVT and Dr. Bhagwan Satiani received the Member First Time Presenter award at the Society for Vascular Ultrasound Annual Conference, Boston MA., June 11, 2010.

• Dr. Maria Litzendorf assisted the Richard M. Ross Heart Hospital with the College of Nursing on some simulation exercises(scenario involves a patient who has had AAA repair) Columbus, Ohio, August 6, 10, 11, & 25, 2009; the Annual Fellow course in Venous Disease, Houston, TX., September 20 – 22, 2009; the Society for Vascular Surgery Women’s Leadership Retreat in Newport, RI., October 22- 24, 2009; the Society for Clinical Vascular Surgery Meeting, Scottsdale, AZ., April 7-10, 2010; the Medtronic Technology Exchange Meeting, Minneapolis, MN., May 14-16, 2010.

• Dr. Cameron Rink attended the Oxygen Club of California World Congress meeting, Santa Barbara, CA., March 16-21, 2009; the Society for Neuroscience 2009 annual meeting, Chicago, IL., October 19-21, 2009.

• Dawn Sagle attended the Association of Program Directors in Vascular Surgery meeting in Chicago, IL., April 16-17, 2010.

• Dr. William Smead attended the Annual Vein Solutions National Meeting in Chicago, IL., April 23-24, 2010; the Eastern Surgical Meeting, Nashville, TN., April 29-May 2, 2010.

• Dr. Jean Starr attended the 23rd Annual Midwestern Vascular Surgical Meeting in Chicago, IL., September 10-11, 2009; the RPVI Exam Review Course in Atlanta, GA., September 25-27, 2009; the Medtronic Fellow Technology Exchange Meeting in Minneapolis, MN., October 2- 4, 2009; the Society for Vascular Surgery Women’s Leadership Retreat in Newport, RI., October 22-24, 2009; the Boston Scientific 2010 Medical Advisory Board Meeting, Salt Lake City, Utah, February 10-13, 2010; Medtronic Technology Exchange Meeting, Minneapolis, MN., May 14-16, 2010.
• Dr. Patrick S. Vaccaro attended the 23rd Annual Midwestern Vascular Surgical Meeting in Chicago, IL., September 10-11, 2009; the RPVI Exam Review Course in Atlanta, GA, September 25-27, 2009; the Osler Course “General Surgery Review” in Chicago, IL., October 15-18, 2009; The London Cardiovascular Symposium, The Royal Society of Medicine, Moderator, London England, October 29-31, 2009; the Medical Executive Committee Institute, Naples, FL., November 5-6, 2009; the Association of Program Directors in Vascular Surgery meeting in Chicago, IL., April 16-17, 2010; the Ohio Chapter, American College Surgeons Council Meeting, Columbus, Ohio, May 7-8, 2010; the 2010 Society for Vascular Surgery Annual Meeting in Boston, MA June 8-June 12, 2010.

Community Outreach Programs

• Presentation of regular lectures on vascular diseases to Central Ohio hospitals, College of Medicine, Department of Surgery, hospital board meeting, medical staff meetings, Grand Rounds, M&M, medical society meetings, and the division’s Vascular Symposium and Endovascular Club meetings.

Accomplishments in Community Outreach

• Dr. Michael Go was elected a member into the Society for Vascular Surgery.

• Dr. Bhagwan Satiani was co-director, planner and moderator of the 2nd Annual Non-Invasive Vascular Symposium, at The Ohio State University Medical Center, Columbus, Ohio, October 3, 2009; elected secretary of the Board of ASHA – Ray of Hope; elected on the editorial board for the International Journal of Vascular Medicine; elected to the Clinical Practice Council for the Society for Vascular Surgery and elected President-elect for the South Asian American Vascular Society (SAAVS).

• Dr. William Smead conducted examinations at the American Board of Surgery/Vascular Surgery Board Exam in Dallas, Texas, May 16-19, 2010.
• Dr. Jean Starr was named Associate Program Director for the Division of Vascular Diseases & Surgery; participating with the Medpath Mentoring program; served as journal reviewer for Archives of Surgery; member of the College of Medicine/Medical School Admission Committee (interview two student monthly); mentored Med I students in Learning Community; Past President of the Columbus Surgical Society; consultant for HOPES (Vascular Abbott) College of Public Health/review economic evaluations Jan 2010. HOPES mission is to provide community services that respond to the social, educational and training needs of its residents in an effort to overcome barriers and fight the causes of poverty.

• Dr. Patrick Vaccaro conducted fellowship interviews for the American College of Surgeons Ohio District #3 Committee on Applicants, May 8, 2010.

• Dr. Blair Vermilion was elected a member of the American Institute for Healthcare Quality.

**Distinguished Visitors**

George Berdejo, BA, RVT, FSVU. Director, Vascular Ultrasound Services, Montefiore Medical Center Vascular Lab, Bronx, NY. Preoperative arterial duplex imaging. Lower limb graft and stent surveillance. The Ohio State University Medical Center, 2nd Annual Non-Invasive Vascular Symposium, Columbus, Ohio, October 3, 2009.
Joseph Coselli, MD., Professor of Surgery, Chief, Division of Cardiothoracic Surgery, Director, Thoracic Surgery Residency Program at Baylor College of Medicine in Houston, Texas spoke at our Mid Ohio Endovascular Club meeting on “Hybrid Aortic Repair: Combining Open and Endovascular Approaches to Complex Repair”, Worthington, Ohio on February 24, 2010.

Patricia Poe, BA, RVT, RDCS, FSVU. Director, Non Invasive Vascular Laboratory, Division of Vascular Surgery, University of Cincinnati, Cincinnati, Ohio. Technical aspects of hemodialysis access testing. Technical pitfalls in renal duplex. The Ohio State University Medical Center, 2nd Annual Non-Invasive Vascular Symposium, Columbus, Ohio, October 3, 2009.

John Rundback, M.D., Managing Partner at Advanced Interventional Radiology Services LLP, Director, Interventional Institute at Holy Name Hospital in Teaneck, New Jersey and Adjunct Associate Professor of Clinical Radiology at College of Physicians and Surgeons of Columbia University in New York, New York spoke at our Mid Ohio Endovascular Club meeting on “Renal Artery Management”, Columbus, Ohio on October 8, 2009.

Michael Schwebler, MBA, RVT, FSVU. Chief Operating Officer, Midwest Ultrasound, Inc., Cincinnati, Ohio. Changes in reimbursement for imaging. Sonographer and physician credentialing update. The Ohio State University Medical Center, 2nd Annual Non-Invasive Vascular Symposium, Columbus, Ohio, October 3, 2009.

Interdisciplinary Lectures

Michael Andritsos, MD., Section Director, Cardiothoracic and Vascular Anesthesiology, The Ohio State University Medical Center, spoke at the Division of Vascular Diseases and Surgery, Grand Rounds, Columbus, Ohio, topic “Pain Management in Vascular Surgery” on October 26, 2009.

Spero Cataland, MD., Associate Professor – Clinical, Hematology and Oncology Department, The Ohio State University Medical Center, spoke at the Division of Vascular Diseases and Surgery, Grand Rounds, Columbus, Ohio, topic “Disorders of hemostasis” on June 14, 2010.

Steven Dean, DO, FACC, RPVI. Director, StoneRidge Cardiology Peripheral Vascular Laboratory & Program Director, Vascular Medicine; Associate Professor of Internal Medicine, The Ohio State University Medical Center, Columbus, Ohio. Interesting cases: testing your knowledge. The Ohio State University Medical Center, 2nd Annual Non-Invasive Vascular Symposium, Columbus, Ohio, October 3, 2009.
Mitchell L. Henry, MD, Division Director, Transplant Surgery; Deputy Director for Surgical Services, Comprehensive Transplantation Center; Associate Medical Director, Lifeline of Ohio Organ Procurement Agency, The Ohio State University Medical Center, Department of Surgery, Division of Transplant, Columbus, Ohio. Clinical value of hemodialysis access imaging. The Ohio State University Medical Center, 2nd Annual Non-Invasive Vascular Symposium, Columbus, Ohio, October 3, 2009.

Steve Marsh, MS, DABMP, Department of Radiology, The Ohio State University Medical Center, spoke at the Division of Vascular Diseases and Surgery, Grand Rounds, Columbus, Ohio, topic “Radiation Safety” on May 10, 2010.

Sanjay Rajagopalan, MD, Section Director, Vascular Medicine; Co-Director, Cardiovascular MR/CT Program; Associate Director, Vascular Research, The Ohio State University Medical Center, spoke at the Division of Vascular Diseases and Surgery, Grand Rounds, Columbus, Ohio, topic “Imaging of Complex Vascular Diseases” on December 28, 2009.

Irina Shankovich, MD, Clinical House-staff, Department of Surgery, The Ohio State University Medical Center, College of Medicine, Columbus, Ohio. Quality statistics in the vascular lab. The Ohio State University Medical Center, 2nd Annual Non-Invasive Vascular Symposium, Columbus, Ohio, October 3, 2009.

Steven Dean, DO, FACC, RPVI, Director, Stoneridge Cardiology Peripheral Vascular Laboratory & Program Director, Vascular Medicine; Associate Professor of Internal Medicine, The Ohio State University Medical Center, Columbus, Ohio. Interesting cases: testing your knowledge. The Ohio State University Medical Center, 2nd Annual Non-Invasive Vascular Symposium, Columbus, Ohio, October 3, 2009.

International Presentations

National Presentations
